

Management's Discussion and Analysis

Year ended December 31, 2018

AgJunction Inc.
Management's Discussion and Analysis
Year ended December 31, 2018

The following discussion and analysis are effective as of March 20, 2019 and should be read together with our audited annual consolidated financial statements and accompanying notes. Additional information related to AgJunction Inc., including the Company's Annual Information Form, can be obtained from documents filed on the System for Electronic Document Analysis and Retrieval ("SEDAR") on the internet at www.sedar.com. All amounts stated in this Management Discussion and Analysis ("MD&A") are in US dollars unless otherwise stated.

Overview

References throughout this document to AgJunction or the "Company" all refer to AgJunction Inc. and its subsidiaries.

AgJunction is a public company listed on the Toronto Stock Exchange that provides innovative hardware and software applications for precision agriculture worldwide.

Foreign Private Issuer Status

As reported at December 31, 2014, as of June 30, 2014, the Company determined that a majority of its outstanding shares were held directly or indirectly by US residents. As a result, AgJunction lost its "foreign private issuer" status effective January 1, 2015 as defined in Rule 3b-4 of the Securities and Exchange Act of 1934. AgJunction will however continue to be governed by Canadian securities laws and reporting obligations and is not required to register with the Securities and Exchange Commission or make any filings under the Securities and Exchange Act of 1934.

Economic and Market Trends

Agriculture Markets

In March 2019, the US Department of Agriculture ("USDA") reported total farm cash receipts are projected to modestly increase through 2028, primarily due to increasing crop cash receipts reflecting steady domestic and international economic growth that supports longer term demand for U.S. agricultural products. Total farm production expenses are projected to decline modestly to \$360 billion in 2019 due to lower expenditures on feed/livestock purchased. The USDA reports, global demand and trade for agricultural products are projected to continue rising through 2028/2029. Income growth is projected to remain strong, especially in many emerging and developing economies, giving strong impetus for sustained growth in demand and trade for agricultural products. The Company's revenues are directly correlated to the sales of new farm equipment which are influenced by the health of farm incomes; a leading indicator of the potential revenue trends for the Company.

Per the USDA, net farm income for 2019 is forecasted to increase by \$8.4billion, or 12.1% over 2018. Cash receipts from crops are forecasted to increase by \$2.2 billion in 2019 compared to the 2018 decrease of \$0.5 billion over 2017.

Management views the 2019 fundamentals of its global agriculture markets to be growth neutral with new machine sales expected to remain flat to slightly up and existing field equipment sales to be slightly up. However, there are other factors creating uncertainty in the market, including a weak outlook for the China market and political pressures (tariffs and US government shutdown). In addition, the Company has benefited recently from revenue generated by a Bulk Purchase Order (BPO) signed in 2018, the sell-through of which will end in Q2 2019. As a result sales are expected to lag slightly behind the agriculture cycle and related upturn due to the Company's customer base and mix of machine manufacturers. The outlook for our markets in 2020 and beyond is positive, driven by the following key factors: population growth, limited arable land, the need for increased output, and a relatively low global penetration of precision agriculture technologies such as Global

Navigation Satellite Systems (GNSS) and autosteering. We also feel our product developments and eStore position us well to grow as the markets pick up.

Results of Operations

(000's)	Years Ended December 31		
	2018	2017	2016
Sales	\$64,515	\$46,781	\$42,264

Selected Statement of Financial Position Information

	As of December 31		
	2018	2017	2016
Total assets	\$49,847	\$39,593	\$41,281

Year Ended December 31, 2018 versus Year Ended December 31, 2017

Sales

For the year ended December 31, 2018, Sales were \$64.5 million representing an increase of 37.6% from \$46.8 million in 2017.

(000's)	2018	2017	Change
Agriculture	\$ 64,515	\$ 46,781	38%

Sales by geographic region

(000's)	2018	2017	Change
Americas	\$21,434	\$26,428	(19%)
APAC	1,518	2,472	(39%)
EMEA	41,563	17,881	132%
	\$ 64,515	\$ 46,781	38%

In 2018, Sales in the Americas decreased by 19% or \$5.0 million versus 2017. This decrease in sales in the United States, Brazil and Canada of \$3.4 million, \$0.1 million and \$1.5 million, respectively, is in line with the previously mentioned decreases in farm incomes and capital spending. Sales in APAC decreased by 39% or \$1.0 million versus 2017. Australia and China decreased \$0.7 million and \$0.5 million, respectively, which is offset by an increase in sales from Japan of \$0.2 million. Sales in EMEA increased 132% or \$23.7 million versus 2017 due to the previously mentioned bulk-purchase order to an OEM customer in Germany where sales increased by \$22.7 and a small increase in sales in France of \$1.2mm, these gains were offset a decline in sales in the Netherlands of \$0.2 million.

Sales to customers in the Americas represented 33% of total Sales in 2018 compared to 57% in 2017. Sales in APAC accounted for 2% of total Sales in 2018 versus 5% in 2017. EMEA sales represent 65% of 2018 total Sales, up from 38% in 2017. This rebalancing reflects the softness in demand in the Americas, offset by the benefits of the bulk purchase order in Europe.

Gross Profits

Gross profits were \$23.8 million for the year, up by \$4.4 million or 22.6% from gross profits of \$19.4 million in 2017. Gross profits as a percentage of Sales were 36.9% in 2018 compared to 41.5% in 2017. The 4.6% decrease in gross profits over the prior year was driven by \$8.6 million in higher volume, driven by the BPO, offset by \$4.2 million in unfavorable product mix, attributed to lower gross margins for certain products included in the product mix sold.

Expenses

Operating expenses were \$25.7 million in 2018, up \$0.3 million or 1% from \$25.4 million in 2017. A break out of expenses by line item follows.

Research and development expenses were \$8.5 million in 2018, up \$0.3 million or 4% from \$8.2 million in 2017 related to continued investment in new product development.

Sales and marketing expenses of \$7.1 million decreased by \$0.7 million or 9% from \$7.8 million in 2017 related to decreases in compensation costs, consultant costs and recruitment expense.

General and administrative expenses of \$10.1 million increased by \$0.7 million or 7% from \$9.4 million in 2017 related to the cost of implementing a new ERP which will drive down internal compliance and reporting costs, and increases in compensation costs.

Goodwill Impairment

In accordance with IFRS, goodwill must be assessed for impairment annually or more often if an event or circumstance indicates that impairment may have occurred. The Company has one cash generating unit ("CGU") to evaluate for impairment.

Management completed the annual assessment of the carrying value of the goodwill reported in the Consolidated Statement of Financial Position at December 31, 2018 and 2017 and concluded that the goodwill balance associated with the Agriculture CGU of \$143 thousand was not impaired. Goodwill carried on the Company's balance sheet arose in the course of the following Agriculture CGU acquisitions:

- Del Norte Technologies business assets – January 2006
- Beeline Technologies Pty Ltd. – December 2007
- AgJunction business assets – January 2012
- Novariant, Inc. – October 2015

The Company determined the fair value of the agriculture CGU at December 31, 2018 and 2017 using a discounted cash flow model consistent with recognized valuation methods. The most significant assumptions underlying the model prepared by management include: Sales, Sales growth, gross profits, operating expenses, income taxes, weighted average cost of capital, and capital expenditures. Significant factors impacting these assumptions include estimates of future market share, competition, technological developments, interest rates, and market trends. The assumptions incorporated into the discounted cash flow model reflect management's long-term view of the Company's business and the markets in which it competes.

In formulating its conclusions, management also considered a variety of related information, including:

- Market capitalization;
- Seasonal factors impacting the Company's share price at particular periods;
- the impact on share prices of reduced liquidity in the public markets, particularly in Canada;
- the expected impact of economic conditions on the Company's long-term business activities.

Foreign Currency Risk Management

The Company has the ability to mitigate exposure to foreign currency risk as the Board of Directors has approved the execution of financial instruments with a maximum notional value of US\$40 million which have the objective of offsetting the exposure the Company faces by carrying positive Canadian and Australian dollar working capital. There are no hedge contracts outstanding at December 31, 2018 or 2017.

Interest, Foreign Exchange and Other Income

In 2018, the Company recorded net interest and other income of \$122 thousand up by \$104 thousand or 577% from \$18 thousand in 2017. The Company earns interest income on certain cash balances and loans receivable which is offset by interest paid.

During the first quarter of 2017, the company recorded \$3.0 million other income associated with its entry into a strategic agreement with Hemisphere GNSS, Inc. (Hemisphere), a world-class provider of GNSS technology, whereby the Company received a one-time payment of \$3.0 million in exchange for releasing Hemisphere from a license restriction that prevented them from selling their GNSS products directly into the global agricultural market.

The Company incurred a foreign exchange gain of \$43 thousand in 2018, compared to a loss of \$4 thousand in 2017. Foreign exchange gains/losses reported in the Consolidated Statement of Profit or Loss arise primarily from the impact of the fluctuating Canadian dollar on the translation and settlement of Canadian dollar denominated working capital.

Loss on sale of property, plant and equipment

The Company recorded a net gain on the disposal of property, plant and equipment totaling \$13 thousand in 2018 compared to a net loss of \$19 thousand in 2017. These disposals relate to assets no longer needed to support ongoing operations.

Gain on sale of divisions

On August 31, 2018, the Company completed the sale of certain assets and liabilities of its Outback Guidance (Outback) business to Hemisphere GNSS (HGNSS) for \$6.4 million. The transaction will allow AgJunction to focus on its core strategy of growing the market for autosteering.

The sale of Outback included the Outback Guidance® brand, the REBEL™ autosteering products, and AgJunction's Hiawatha, Kansas and Winnipeg, Canada facilities. HGNSS assumed the Company's relationships with the Outback independent dealer network, and the majority of the Company's former Outback workforce were transitioned to HGNSS.

In connection with the sale of Outback, the Company wrote off \$693 thousand of intangible assets related to the Outback division that no longer had any future value to the Company. This \$693 thousand was included in the calculation of the gain on sale of division. A gain on the sale of division of \$1.5 million, was recognized and is reported on the December 31, 2018 Consolidated Statements of Profit or Loss.

On November 15, 2018, the Company completed the sale of certain assets and liabilities of its SATLOC® aerial guidance and flow control business to Texas Transland, LLC ("Transland") for cash of \$1.5 million and a note receivable of \$1.4 million. The note is payable in equal installments over a five year period commencing December 2018. The note is carried at amortized cost using the simple effective interest method, less any impairment losses. The simple effective interest method calculates the amortized cost of a financial asset and allocates interest income over the corresponding period. Interest income relating to the Satloc note, calculated using the effective interest method is \$178 thousand. As with the Outback sale, this transaction allows AgJunction to focus on its core strategy of growing the market for autosteering. A gain on the sale of division in the amount of \$1.7 million, was recognized and is reported on the December 31, 2018 Consolidated Statements of Profit or Loss.

Income taxes

The Company recognized a net income tax benefit of \$290 thousand in 2017 of which \$15 thousand in expense was related to operations in China and \$305 thousand benefit was related to unrecognized deferred tax assets generated from prior year US alternative minimum tax (AMT) credits. No benefit or expense was recorded in the same period of 2018.

As of December 31, 2018, the Company has Canadian tax loss carry forwards of \$10.9 million that can be used to reduce Canadian taxable income in future years, as well as investment tax credits in the amount of \$2.3 million that can be used to reduce Canadian federal taxes otherwise payable in future years.

The Company's US operating subsidiaries, AgJunction Corporation, AgJunction LLC, CSI Wireless LLC, and Novariant, Inc. file as a combined entity for US federal tax purposes. At December 31, 2018, the Company has cumulative US net operating losses of \$52.0 million that can be used to reduce US taxable income in future years, as well as \$5.8 million of research and development tax credits that can be used to reduce federal taxes otherwise payable in future years.

The Company's Australian subsidiaries, AgJunction Pty Ltd. and AgJunction AUS Pty Ltd., file as a combined entity for Australian income tax purposes. At December 31, 2018, the Company has losses of approximately \$7.7 million available to reduce Australian taxable income in future years.

The Company does not recognize or carry any deferred tax assets on its financial statements.

Income (Loss)

In 2018, the Company generated net income of \$1.5 million or \$0.01 per share (basic and diluted), compared to a net loss of \$2.7 million or \$0.02 per share (basic and diluted) in 2017.

Summary of Quarterly Results

(000's)	31-Mar 2017	30-Jun 2017	30-Sep 2017	31-Dec 2017	31-Mar 2018	30-Jun 2018	30-Sep 2018	31-Dec 2018

Weighted Average Diluted Shares	124,307	128,268	124,475	121,157	118,338	126,287	125,684	126,445

Sales by region on a quarterly basis are as follows:

For the Quarter Ended

(000's)	31-Mar 2017	30-Jun 2017	30-Sep 2017	31-Dec 2017	31-Mar 2018	30-Jun 2018	30-Sep 2018	31-Dec 2018
Americas	\$8,254	\$7,085	\$5,549	\$5,540	\$8,481	\$6,761	\$3,923	\$2,269
APAC	1,026	822	222	402	741	178	452	147
EMEA	5,293	5,434	3,207	3,947	6,552	6,837	13,487	14,687
	\$14,573	\$13,341	\$8,978	\$9,889	\$15,774	\$13,776	\$17,862	\$17,103

Quarterly results have varied during the past eight quarters due, in part, to the following factors:

1. A large component of the Company's revenue is derived from North American and EMEA agriculture markets which are subject to the seasonality of the agricultural buying season. Normally this leads to the first half of the year being the strongest and the second half being the weakest, however during 2018 the bulk purchase order deliveries generated revenue in the second half of the year higher than the first half reversing the historical trend. Initiatives to mitigate the Company's seasonality include revenue efforts in the Southern Hemisphere which is counter-seasonal to the Northern Hemisphere agricultural seasons and strategies focused on increasing sources of recurring revenue.

On March 13, 2018 the Company announced it has entered into a bulk purchase order with a customer to supply its steering solutions products to the customer for an aggregate purchase price of approximately \$55 million. Deliveries and payments under the purchase order began July 1, 2018 and will continue through June 30, 2019.

Additionally, the sale of the Outback Guidance and SATLOC® aerial guidance and flow control businesses resulted in reduced revenue in the Americas region during the third and fourth quarters of 2018.

2. The adoption of advanced technology as it relates to precision farming is transitioning from historically being an aftermarket business to an OEM business. The outlook for the Company's products in the OEM channel remains uncertain based on the speed with which each region will adopt this model

Quarter Ended December 31, 2018 versus Quarter Ended December 31, 2017

Sales

Sales during the fourth quarter were as follows:

(000's)	Q4 2018	Q4 2017	Change
Agriculture	\$ 17,103	\$ 9,889	73%

Sales by region for the fourth quarter of 2018 and 2017 are as follows:

(000's)	Q4 2018	Q4 2017	Change
Americas	\$ 2,269	\$ 5,540	(59%)
APAC	147	402	(63%)
EMEA	14,687	3,947	272%
	\$17,103	\$9,889	73%

In the fourth quarter of 2018, sales in the Americas decreased by 59% or \$3.3 million versus the same quarter of 2017. Decreased demand in the United States, Canada, Brazil and Panama and generated lower sales of \$2.1 million, \$0.8 million, \$0.2 million and \$0.2 million, respectively. The majority of the decline in the Americas region is due to the sale of the Outback and SATLOC businesses in August and November of 2018, respectively, which were primarily North American based businesses. It is expected the eStore will begin to offset those volumes in North America in the future. Sales in APAC decreased by 63% or \$0.3 million driven by slightly weaker markets in China, Australia and Japan. Sales in the EMEA region increased 272% or \$10.7 million due to increased demand in Germany generating increased sales of \$11.7 offset by decreased sales in France and the Netherlands of \$0.8 million and \$0.2 million, respectively.

Sales to customers in the Americas represented 13% of total Sales in the fourth quarter of 2018 compared to 56% in the fourth quarter of 2017. APAC sales represented 1% of total Sales in the fourth quarter of 2018, down from 4% for the same period in 2017. EMEA sales accounted for 86% of fourth quarter 2018 total Sales, up from 40% in the same period in 2017.

Gross profit

Gross profit in the fourth quarter of 2018 was \$5.3 million, up by \$1.4 million or 37.4% from gross profit of \$3.9 million in the fourth quarter of 2017. The 8% decrease in gross profit over the prior year was driven by \$3.4 million in higher volume, driven by the BPO, offset by \$2.0 million in unfavorable product mix, attributed to lower gross margins for certain products included in the product mix sold.

Expenses

Operating expenses were \$4.4 million in the fourth quarter of 2018, down \$2.4 million or 35% from \$6.8 million in the fourth quarter of 2017. A detailed discussion of operating expenses by financial statement line item follows.

Research and development expenses totaled \$1.2 million in the fourth quarter of 2018, representing a decrease of \$1.3 million or 54% from \$2.5 million from the same period in 2017; the decrease is primarily related to internally developed intangible assets that were capitalized during the fourth quarter of 2018 of \$0.7 million and reduced overall activity.

Sales and marketing expenses of \$1.1 million in the fourth quarter of 2018 decreased by \$0.7 million or 39% from \$1.8 million in 2017 related to decreases in activities resulting in lower compensation costs, consultant costs and recruitment expense.

General and administrative expenses of \$2.2 million in the fourth quarter of 2018 decreased by \$0.3 million or 13% from \$2.5 million in the fourth quarter of 2017 related to compensation costs and ERP implementation expense.

Interest and Foreign Exchange

The Company had interest or other income in the fourth quarter of 2018 of \$0.1 million (2017 – nil).

The Company reported a foreign exchange loss in the fourth quarter of 2018 of \$13 thousand, compared to a gain of \$13 thousand in 2017. The foreign exchange gains and losses arise primarily from the translation and settlement of non-US dollar monetary working capital.

Loss on sale of property, plant and equipment

The Company did not incur a loss or gain on the sale and/or disposal of property, plant and equipment in the fourth quarters of 2018 or 2017.

Gain on sale of divisions

On August 31, 2018, the Company completed the sale of certain assets and liabilities of its Outback Guidance (Outback) business to Hemisphere GNSS (HGNSS) for \$6 million. The sale of Outback includes the Outback Guidance® brand, the REBEL™ autosteering products, and AgJunction's Hiawatha, Kansas and Winnipeg, Canada facilities. A gain on the sale of division in the amount of \$1.5 million, was recognized and is reported on the Consolidated Statement of Profit or Loss for the year ended December 31, 2018.

On November 15, 2018, the Company closed the sale of certain assets and liabilities of its SATLOC® aerial guidance and flow control business to Texas Transland, LLC ("Transland") for cash of \$1.5 million and a note receivable of \$1.4 million. Interest income relating to the Satloc note, calculated using the effective interest method is \$178 thousand. The note is payable in equal installments over a five year period commencing December 2018. A gain on the sale of division in the amount of \$1.7 million, was recognized and is reported on the Consolidated Statement of Profit or Loss for the year ended December 31, 2018.

The two transactions will allow AgJunction to focus on its core strategy to grow the market for autosteering.

Income taxes

The Company recognized an income tax credit of \$309 thousand for the fourth quarter of 2017 related to unrecognized deferred tax assets generated from prior year US alternative minimum tax (AMT) credits, no such expense was recorded in the same period of 2018.

Income (Loss)

In the fourth quarter of 2018, the Company generated net income of \$3.6 million or \$0.03 per share (basic and diluted), compared to a net loss of \$2.7 million or \$0.02 per share (basic and diluted) in 2017.

Liquidity and Capital Resources

Working Capital

The Company held cash of \$21.4 million at December 31, 2018 compared to \$13.9 million at the end of 2017. Working capital was \$26.7 million at December 31, 2018, an increase of \$6.4 million from \$20.3 million at December 31, 2017. Cash and working capital balances at December 31, 2018 increased due to the proceeds of sale of assets cash generated from operations.

Accounts receivable, net of allowance, at December 31, 2018 was \$8.5 million versus \$4.2 million at December 31, 2017 with the increase primarily attributable to sales under the BPO. The Company's standard terms on accounts receivable are net 30 though programs offering extended terms may be executed throughout the year in order to promote sales. Outstanding accounts receivable of \$0.7 million as of December 31, 2017 originate from programs with extended terms. The Company did not have any extended payment term programs as of December 31, 2018. The Company employs established credit approval and regular account monitoring practices to mitigate the credit risk associated with accounts receivable. At December 31, 2018 and 2017, the Company had a reserve for accounts receivable totaling \$53 thousand and \$228 thousand, respectively. This decrease relates to the two invoices that were reserved at December 31, 2017 which were collected during 2018.

Inventories consist of components, raw materials, work in process and finished goods related to the products sold by the Company. Inventory was \$5.7 million at December 31, 2018 compared to inventory of \$7.6 million at December 31, 2017. The Company reviews inventory movement on a quarterly basis using the previous eighteen (18) months history to make adjustments to the net realizable value of the total inventory.

Provisions for warranties on products sold are generally recorded based on historical warranty data and a weighting of all possible outcomes against their associated probabilities. In February 2019 however, the Company identified performance issues with a single model of a high-volume product which is produced under an OEM supply agreement. The Company immediately halted production and shipment of the product and conducted a Root Cause Analysis which determined that a single connector could fail in certain circumstances once the product was put into use in the field. Based on management's estimate of remediation costs per unit, an additional warranty provision of \$422 was recorded as of December 31, 2018 which related to units that had shipped in 2018 and have been or could be impacted. Warranty costs related to units that were manufactured and shipped in 2019 before the issue was identified are not believed to be material and will be charged to cost of goods sold as incurred. The Company is in discussion with the supplier of the connector regarding cost sharing. An agreement reached would mitigate a portion of the Company's remediation costs. Provisions at December 31, 2018 were \$1.0 million versus \$0.6 million at December 31, 2017.

The primary items impacting cash during the year were:

- Cash generated from continuing operations was \$2.1 million for 2018 compared to \$3.2 million in 2017. Of this \$1.1 million change, \$4.1 million relates to a difference in net loss from 2017 compared to net income in 2018, \$5.4 million relates to the increase in deferred revenue, \$0.9 million relates to use of accounts payable and accrued liabilities and \$0.6 million change in provisions, offset by \$2.9 million change in accounts receivable, \$1.5 million change in notes receivable \$2.2 million change in inventory and \$3.2 million resulting from the gain on sale of Outback and SATLOC.
- Cash used in financing activities was \$0 compared to \$1.8 million in 2017. During 2017 cash of \$1.8 million was used to buyback approximately 7.9 million shares of stock, at a price reflecting a 50% discount from the closing price on the transaction date.
- Cash from investing activities was \$5.4 million compared to cash used of \$0.4 million in 2017. This increase is primarily due to proceeds from the sale of the two businesses of \$7.8 million offset by \$1.8 million of internally developed intangible assets.
- Accounts receivable at December 31, 2018 was \$8.5 million versus \$4.2 million at December 31, 2017. This increase in accounts receivable is attributed to sales under the Company's bulk purchase order as well as royalty and other payments due as a result of the Outback and Satloc business sales.
- Inventory was \$5.7 million at December 31, 2018 versus \$7.6 million at December 31, 2017. This decrease in inventory relates to better inventory management including direct shipments from the vendor to the customer.

- Accounts payable and accrued liabilities at December 31, 2018 were \$8.5 million versus \$5.6 million at December 31, 2017.
- Total tangible capital spending was \$0.8 million and \$0.4 million in 2018 and 2017, respectively. Property and equipment purchased during 2018 included primarily computer equipment, computer software, production equipment and patents.

Foreign Currency Risk Management Program

The Company has adopted the US dollar as the reporting and measurement currency under IFRS. As a result, fluctuations in the foreign exchange rates effect Canadian dollar and Australian dollar denominated operating expenses - giving rise to foreign currency gains and losses.

The Board of Directors has approved the execution of financial instruments with a maximum notional value of US\$40 million which have the objective of offsetting the foreign exchange exposure. In 2017 the Company entered financial instruments which are settled for cash using the following reference foreign exchange rates:

- Canadian dollar - Bank of Canada noon day rate
- Australian dollar - 11AM US Fed fixed rate

There are no outstanding financial instruments in 2018 as the Company has mitigated a significant portion of our foreign exchange risk with the sale of the non-agriculture operations and closing of the Calgary office.

Property and Equipment

The Company's property and equipment is comprised of computer hardware and software, equipment for production and research purposes and furniture and fixtures, vehicles and building and leasehold improvements.

During 2018, the Company invested \$0.8 million in property and equipment (2017 - \$0.4 million). Capital additions included computer equipment and software, production equipment, vehicles and patents.

Intangible Assets

Intangible assets include assets acquired through acquisition including trademarks and brands, customer relationships, marketing and distribution assets and technology as well as internally developed technology. The Company's acquired intangible assets derive from the following acquisitions:

- Del Norte Technologies business assets – January 2006
- Beeline Technologies Pty Ltd. – December 2007
- Novariant, Inc. – October 2015

Intangible asset additions in 2018 comprised internally developed intangible assets of \$1.8 million. There were no intangible asset additions during 2017.

Goodwill

The Company carried goodwill of \$0.1 million at December 31, 2018 and 2017. For the purpose of impairment testing, goodwill is allocated to the Company's Agriculture cash generating unit (CGU).

The Company determined the value of the agriculture CGU as of December 31, 2018 using a "discounted cash flow" model, consistent with recognized valuation methods. The most significant assumptions underlying the model prepared by management include: Sales, Sales growth, gross profit, operating expenses, income taxes, weighted average cost of capital, and capital expenditures. Significant factors impacting these assumptions include estimates of future market share, competition, technological developments, interest rates, and market trends. The assumptions incorporated into the discounted cash flow model reflect management's long-term view of the Company's business and the markets in which it competes.

In accordance with IFRS, goodwill is assessed for impairment annually, or more often if an event or circumstance indicates that an impairment may have occurred. Management completed its annual assessment of the carrying value of the goodwill reported in the Consolidated Statement of Financial Position as of December 31, 2018 using the discounted cash flow model detailed above and determined goodwill totaling \$0.1 million was not impaired.

Borrowings and Credit Facilities

In February 2014, the Company entered in to an agreement for a credit facility, which provides up to a maximum of \$3 million operating line of credit. No amount has been drawn from the facility. The operating line of credit is secured by a commercial security agreement covering all accounts and general intangibles and bears interest at the bank's prime rate minus 0.5%. The operating line of credit matures July 31, 2019. The agreement also includes an accordion loan feature, with an additional \$3 million line of credit at the sole discretion of the lender. The interest rate on the accordion loan is the bank's prime rate minus 0.5%, and if enacted would carry an unused commitment fee of 0.2% per annum.

In addition, in September 2018 in order to secure inventory purchases made by our major supplier in connection with the bulk purchase order, the company entered into an irrevocable declining balance standby letter of credit (SBLC) with an initial balance of \$3 million. The SBLC letter of credit will expire on July 31, 2019.

Share Capital

At March 20, 2019, there were 119.1 million common shares, 3.5 million restricted stock awards, and 7.3 million stock options outstanding.

During 2017 and 2018 no stock options were exercised.

During 2018, the company granted 1.9 million RSAs, net of cancellations.

Contractual Obligations

The following table quantifies the Company's contractual obligations as of December 31, 2018:

Contractual Obligations (000's)	Total	Less than 1 year	1-3 years	4-5 years	After 5 years
Accounts payable and accrued liabilities	\$ 8,500	\$ 8,500	\$ —	\$ —	\$ —
Operating leases	2,007	632	1,375	—	—
	\$ 10,507	\$ 9,132	\$ 1,375	\$ —	\$ —

Subsequent Events

The Company evaluated subsequent events through March 20, 2019, the date the consolidated financial statements were available to be issued and has determined that there were no subsequent events through the evaluation date which merit disclosure.

Critical Accounting Policies and Estimates

The Company prepares its consolidated financial statements in accordance with International Financial Reporting Standards (IFRS). The preparation of these financial statements requires Management to make estimates and assumptions that affect the reported amounts of assets, liabilities, sales and expenses. These estimates are based on Management's historical experience and various other assumptions that are believed by Management to be reasonable under the circumstances. Such assumptions are evaluated on an ongoing basis and form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from these estimates.

The following critical accounting policies affect our more significant estimates and assumptions used in preparing our consolidated financial statements:

1. The Company maintains an allowance for doubtful accounts for estimated losses that may occur if customers are unable to pay balances owing to the Company. This allowance is determined based on a review of specific customers, historical experience and economic circumstances.
2. Inventories are carried at the lower of cost and net realizable value. Provisions for excess or obsolete inventory are recorded based on Management's assessment of the estimated net realizable value of component, work in process, and finished goods inventory.
3. The Company performs the required test for goodwill impairment annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset might be impaired. In performing the required test, Management determines the recoverable amount, which is the greater of the fair value less cost to sell and value in use. An impairment loss would be measured as the difference between the carrying amount of the goodwill and its recoverable amount. Fair value less cost to sell takes into consideration the market capitalization of the Company as there is only one cash generating unit, relevant multiples, and peer transactions. Value in use is determined using a detailed discounted cash flow analysis using management's estimates.
4. The Company evaluates its deferred tax assets and recognizes deferred tax assets to the extent there is available taxable income. At December 31, 2018, the Company did not recognize any deferred tax assets on the Consolidated Statement of Financial Position.
5. The Company accrues reserves for product warranty expenses as it relates to the repair or replacement of defective products sold in the current period. The warranty reserve is based on historical information of warranty claims compared to sales. Any expenses directly relating to warranty claims are expected to offset the provision in period.

Business and Market Risks

The nature of the Company's business gives rise to certain risks that may impact future financial results. In addition to risks described elsewhere in this report, the Company identifies the following risks to currently be the most significant:

1. Financial Results

The Company was profitable for the 2018 fiscal year, and was unprofitable during the years ended December 31, 2001 to 2017 except for during the years ended December 31, 2004, 2008, and 2013.

It is possible that losses will occur in any of the four quarters of 2019 and that a loss could be realized for the full 2019 year. This could arise from the impact of current negative macro-economic conditions, or the Company could fail to execute on its business plan. Future sales, gross profit and expenses are subject to many factors beyond the Company's control, including:

- the liquidity and business plan execution of customers;
- general industry conditions;
- the rate of acceptance of the Company's products;
- new technologies in the marketplace;
- the development and timing of the introduction of new products;
- price and product competition from competitors;
- the product mix of the Company's sales;
- possible delays in shipment of the Company's products;

- possible delays or shortages in component supplies;
- other risk factors described in this MD&A; and
- other risk factors not foreseen at this time.

2. *Foreign Currency Valuation Fluctuations*

Sales of the Company's products are transacted primarily in US dollars. Expenses are incurred in US dollars, Canadian dollars and Australian dollars, and as a result, the Company is exposed to risk associated with US, Canadian and Australian dollar fluctuations. A strengthening in the US dollar relative to the Canadian dollar, as was seen in 2008, 2013, 2014, 2016, 2017 and 2018 results in lower relative US dollar expenses for the Company when compared to a weaker US dollar. With the sale of the Outback business, the bulk of the Canadian dollar based expenses were eliminated.

The Company denominates a large majority of its sales in US dollars. A stronger US dollar, compared to the currencies of countries where the Company is selling its products, makes the Company's products more expensive to customers in those countries. As a result, a strong US dollar, as was seen during 2018 could have a negative impact on sales to such countries. As the Company expands with increased global sales, it is expected that it may be necessary to transact a larger volume of sales in foreign currencies other than US dollars, thus exposing the Company to additional foreign currency risk.

3. *General Economic and Financial Market Conditions*

Changes in regional conditions in market and business environments could have a negative impact on the Company's 2019 performance. The Company's agricultural product sales have typically been affected to some extent each year by changes in growing season due to drought, commodity prices affecting net farm income, and other conditions in certain markets. For example, a drought was seen for several years in significant regions in Australia which has negatively impacted sales of agriculture guidance products in that market. Should negative weather conditions arise in any of the Company's key markets in 2018, the Company could realize lower-than-expected Sales in the impacted market areas.

4. *Dependence on Key Personnel*

The Company's success is largely dependent upon the performance of key personnel. The unexpected loss or departure of any key officers or employees could be detrimental to the future operations. The success of the Company will depend, in part, upon the ability to attract and retain qualified personnel, as they are needed. The competition for highly skilled technical, research and development, management, and other employees is high in the Precision Agriculture industry. There can be no assurance that we will be able to engage the services of such personnel or retain our current personnel.

5. *Competition*

The Company is competing in a highly competitive industry that is constantly evolving and changing. The Corporation expects this competition to increase as new competitors enter the market. Many of our competitors may have greater financial, technical, sales, production and marketing resources. We compete with companies that also have established customer bases and greater name recognition. This may allow competitors to respond more quickly to the GPS market and to better implement technological developments. There is no assurance that the Company will be able to compete on the same scale as these companies. Such competition may result in reduced sales, reduced margins or increased operating expenses.

6. *Third Party Dependence*

Many of the Company's products rely on signals from satellites, and other ground support systems, that it does not own or operate. Such satellites and their ground support systems are complex electronic systems subject to electronic and mechanical failures and possible sabotage. The satellites have limited design lives and are subject to damage by the hostile space environment in which they operate. If a significant number of satellites were to become inoperable, there could be a substantial delay before they are replaced with new satellites. A reduction in the number of operating satellites would impair the current utility of the GNSS and/or the growth of current and additional market opportunities, which would adversely affect our results of operations. In addition, there is no assurance that governments will remain committed to the operation and maintenance of GNSS satellites over a long period of time or

that the policies of governments for the commercial use of GNSS satellites without charge will remain unchanged.

7. *Dependence on New Products*

The Company must continue to make significant investments in research and development to develop new products, enhance existing products and achieve market acceptance for such products. However, there can be no assurance that development-stage products will be successfully completed or, if developed, will achieve significant customer acceptance. If the Company is unable to successfully define, develop and introduce competitive new products, and enhance existing products, future results would be adversely affected.

8. *Intellectual Property*

The industry in which the Company operates has many participants that own, or claim to own, proprietary intellectual property. The Company has received, and may receive, claims from third parties claiming that the Company has infringed on their intellectual property rights. Determination of the rights to intellectual property is very complex, and costly litigation may be required to establish if the Company has violated the intellectual property rights of others. Also, a competitor might infringe on the Company's proprietary intellectual property forcing the Company to pursue litigation to defend its ownership of that proprietary intellectual property. As a result of such claims, the Company could be subject to losses arising from product injunctions, awards for damages and third party litigation costs, requirements to license intellectual property, legal expenses, diversion of Managements' time and attention, and other costs.

9. *Government Regulation*

The Company's products are subject to government regulation in the United States, Canada and other regions in which we operate. Although the Company believes that it has obtained the necessary approvals for the products that it currently sells, it may not be able to obtain approvals for future products on a timely basis, or at all. In addition, regulatory requirements may change or the Company may not be able to obtain regulatory approvals from countries in which it may desire to sell products in the future. In addition, the China market has been impacted the last 2 years by regulatory changes, and US/China trade relations are currently strained due to tariff impositions, which has weakened farm incomes in the US. Finally, the recent US government shutdown had an impact on farmers and their ability to get loans for planting their 2019 crop.

10. *Availability of Key Suppliers*

The Company is reliant upon certain key suppliers for raw materials and components, and no assurances can be given that we will not experience delays or other difficulties in obtaining supplies, as a result of trade disputes, financial failures impacting suppliers, or from a variety of other potential issues. The raw materials used in certain operations are available only through a limited number of vendors. Although the Company believes there are alternative suppliers for most of its key requirements, if current suppliers are unable to provide the necessary raw materials or fail to deliver products in the quantities required on a timely basis, then the related delays in the manufacture or distribution of products could have a material adverse effect on the Company's results of operations and its financial condition.

11. *Credit Risk*

The Company has an increasing exposure to credit risk related to trade balances owing from customers. In the normal course of business, the Company monitors the financial condition of its customers and reviews the credit history of new customers to establish credit limits. The Company establishes an allowance for doubtful accounts that corresponds to the credit risk of its customers, historical trends and economic circumstances. Losses could be realized by the Company if customers default on their balances owing.

12. *Technology Risk*

The Company's success may depend in part on our ability to develop products that keep pace with the continuing changes in technology, evolving industry standards and changing customer and end-user preferences and requirements. The Company's products embody complex technology that may not meet those standards, changes and preferences. The Company may be unable to successfully address

these developments on a timely basis or at all. Failure to respond quickly and cost-effectively to new developments through the development of new products or enhancements to existing products could cause the Company to be unable to recover significant research and development expenses and could reduce its Sales.

13. Future Acquisitions

The Company may seek to expand its business and capabilities through the acquisition of compatible technology, products or businesses. There can be no assurance that suitable acquisition candidates can be identified and acquired on favorable terms, or that the acquired operations can be profitably operated or integrated into the Company. In addition, any internally generated growth experienced by the Company could place significant demands on Management, thereby restricting or limiting the Company's available time and opportunity to identify and evaluate potential acquisitions. To the extent Management is successful in identifying suitable companies or products for acquisition, the Company may deem it necessary or advisable to finance such acquisitions through the issuance of Common Shares, securities convertible into Common Shares, debt financing, or a combination thereof. In such cases, the issuance of Common Shares, Preferred Shares or convertible securities could result in dilution to the holders of Common Shares at the time of such issuance or conversion. The issuance of debt to finance acquisitions may result in, among other things, the encumbrance of certain assets, impeding the Company's ability to obtain bank financing, decreasing its liquidity, and adversely affecting its ability to declare and pay dividends to its shareholders.

14. Proprietary Protection

The Company's success will depend, in part, on its ability to obtain patents, maintain trade secrets and unpatented know-how protection, and to operate without infringing on the proprietary rights of third parties or having third parties circumvent its rights. The Company relies on a combination of contract, copyright, patent, trademark and trade secret laws, confidentiality procedures and other measures to protect its proprietary information. There can be no assurance that the steps taken will prevent misappropriation of its proprietary rights. The Company's competitors also could independently develop technology similar to its technology. Although the Company does not believe that its products or services infringe on the proprietary rights of any third parties, there can be no assurance that infringement or invalidity claims (or claims for indemnification resulting from infringement claims) will not be asserted or prosecuted against the Company, or that any such assertions or prosecutions will not materially adversely affect its business, financial condition or results of operations. Irrespective of the validity or the successful assertion of such claims, the Company could incur significant costs and diversion of resources with respect to the defense thereof, which could have a material adverse effect on its business.

15. Product Liability

The sale and use of the Company's products entail risk of product liability. Although the Company has product liability insurance, there is no assurance that such insurance will be sufficient or will continue to be available on reasonable terms.

16. New and Emerging Markets

Many of the markets for the Company's products are new and emerging. The Company's success will be significantly affected by the outcome of the development of these new markets.

17. Physical Facilities

The Company has facilities in several different locations, as well as component inventory, finished goods and capital assets at third-party manufacturing facilities. Tangible property at each location is subject to risk of fire, earthquake, flood, and other natural acts of God. In the event of such acts, there could be delays in production and shipments of product due to both the loss of inventory and/or capacity to produce.

18. Legal Risks

In common with other companies, the Company is subject to legal risks related to operations, contracts, relationships and otherwise under which it may be served with legal claims. Whether or not the claims are legally valid, such claims may result in legal fees, damages, settlement costs and other costs as well as significant time and distraction of Management and employees – which could negatively impact

the Company's ability to execute its business plans. Management believes the Company carries appropriate insurance coverage to sufficiently mitigate related financial risk.

19. Technology Failures or Cyber-Attacks

We rely on information technology systems to process, transmit and store electronic information. In addition, a significant portion of internal communications, as well as communication with customers and suppliers depends on information technology. Further, certain of our products depend upon GPS and other systems through which our products interact with government computer systems and other centralized information sources. We are exposed to the risk of cyber incidents in the normal course of business. Cyber incidents may be deliberate attacks for the theft of intellectual property or other sensitive information or may be the result of unintentional events. Like most companies, our information technology systems may be vulnerable to interruption due to a variety of events beyond our control, including, but not limited to, natural disasters, terrorist attacks, telecommunications failures, computer viruses, hackers and other security issues. Further, attacks on centralized information sources could affect the operation of our products or cause them to malfunction. We have technology security initiatives and disaster recovery plans in place to mitigate our risk to these vulnerabilities, but these measures may not be adequate or implemented properly to ensure that our operations are not disrupted. Potential consequences of a material cyber incident include damage to our reputation, litigation and increased cyber security protection and remediation costs. Such consequences could adversely affect our results of operations.

20. Foreign Private Issuer Status

As of June 30, 2014, AgJunction determined that a majority of its outstanding shares were held directly or indirectly by US residents. As a result, AgJunction lost its "foreign private issuer" status effective January 1, 2015 as defined in Rule 3b-4 of the Securities and Exchange Act of 1934. AgJunction however continues to be governed by Canadian securities laws and reporting obligations and is not required to register with the Securities and Exchange Commission or make any filings under the Securities and Exchange Act of 1934.

21. Business Focus

AgJunction Inc., the Autosteering Company™ is a global leader of advanced guidance and autosteering solutions for precision agriculture applications. Its technologies are critical components in over 30 of the world's leading precision Ag manufacturers and solution providers and it holds over 130 fundamental steering and machine control patents. AgJunction markets its solutions under leading brand names including Novariant®, Wheelman™, and Whirl™ and is committed to advancing its vision by bringing affordable hands-free farming to every farm, regardless of terrain or size.

The Company's products and solutions offer accurate guidance and positioning, autosteering and machine control systems for the agriculture markets and are used throughout a farming operation during tilling, planting, spraying and harvesting. These products and solutions enable a farmer's machine to precisely reach a pre-planned path and then "steer" the path with as little additional input from the farmer as possible. This requires a substantial expertise in technologies like GNSS, position and motion sensors, situational awareness technologies like lidar, radar and cameras etc., understanding hydraulics and machine control, and various types of vehicle communication protocols.

During 2018, the Company made a strategic decision to go to a direct to customer model and made the decision to sell our dealer channel aftermarket business.

On August 31, 2018, the Company closed the sale of certain assets and liabilities of its Outback Guidance (Outback) business and on November 15, 2018, the Company closed the sale of certain assets and liabilities of its SATLOC® aerial guidance and flow control business. These transactions will allow AgJunction to focus on its core strategy to grow the market for autosteering.

Disclosure Controls and Procedures

Our Management is responsible for establishing and maintaining adequate disclosure controls and procedures for the Company. Our disclosure controls and procedures are designed to ensure that information required to be disclosed in our reports filed with securities regulatory authorities is recorded, processed, summarized and reported within prescribed time periods and is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

An evaluation was carried out under the supervision of, and with the participation of, our Management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as of December 31, 2018. Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under applicable securities laws and regulations is recorded, processed, summarized, and reported within the time periods specified thereby.

It should be noted that while the Company's Chief Executive Officer and Chief Financial Officer believe that the Company's disclosure controls and procedures have been designed with the objective to provide a reasonable level of assurance that they are effective, they do not expect that the disclosure controls and procedures or internal controls over financial reporting would prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. We considered these limitations during the development of our disclosure controls and procedures and will periodically re-evaluate them to ensure they provide reasonable assurance that such controls and procedures are effective.

Internal Controls Over Financial Reporting

The Chief Executive Officer and the Chief Financial Officer of the Company are responsible for designing disclosure controls and internal controls over financial reporting as defined in National Instrument 52-109 Certification of Disclosure in Issuer's Annual and Interim Filings ("52-109"), or causing them to be designed under their supervision in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

The Company is currently under the Internal Control - Integrated Framework: 2013 released by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer, Management has conducted an evaluation of the effectiveness of our internal controls over financial reporting as of December 31, 2018 for all locations consolidated in the financial statements.

Forward-Looking Information

The information in the Management's Discussion and Analysis ("MD&A") contains certain forward-looking statements. These statements relate to future events or our future performance. All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect",

"may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe", "would" and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. We believe the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this MD&A should not be unduly relied upon. These statements speak only as of the date of this MD&A and except as required by law, we undertake no obligation to publicly update or revise any forward-looking statements.

In particular, this MD&A contains forward-looking statements pertaining to the following:

- financial results;
- new and emerging markets;
- impact of market conditions;
- forecast net farm income;
- changes in foreign currency rates;
- losses available to reduce future taxable income;
- customer adoption of technology and products;
- implementation of International Financial Reporting Standards;
- technological developments;
- expectations regarding the ability to raise capital; and
- research and capital expenditures programs.

The actual results could differ materially from those anticipated in these forward-looking statements as a result of the risk factors set forth below and elsewhere in this MD&A:

- competition;
- departure of key personnel or consultants;
- inability to introduce new technology and new products in a timely manner;
- changes in the Global Navigation Satellite System ("GNSS") and other systems outside of our control;
- costs to purchase GNSS and other components could increase significantly;
- misappropriation of proprietary information;
- legal claims for the infringement of intellectual property and other claims;
- other legal risks;
- incorrect assessments of the value of acquisitions;
- successful development of new and emerging markets that we serve;
- fluctuation in foreign exchange or interest rates;
- uncertainties in the global economy;
- negative conditions in general economic and financial markets;
- reliance on key suppliers and third parties;
- availability of key supplies and components;
- dependence on major customers;
- losses from credit exposures;
- product liability;
- damage or loss of use of physical facilities;
- cyber-security risks;
- stock market volatility and market valuations;
- conflicts of interest;
- changes in income tax laws and other government regulations;
- political uncertainty and tariffs; and
- other factors discussed under "Business and Market Risks".

With respect to forward-looking statements contained in this document, we have made assumptions regarding, among other things: future technological developments; availability of key supplies, components, services, networks and developments; future exchange rates; the cost of expanding the Company's product lines; the impact of increasing competition; the nature and outcome of legal proceedings; the continuity of existing business relationships; conditions in general economic and financial markets; and our ability to obtain financing on acceptable terms.

Management has included the above summary of assumptions and risks related to forward-looking information provided in this MD&A in order to provide shareholders and readers with a more complete perspective on the Company's current and future operations and such information may not be appropriate for other purposes. Readers are cautioned that the foregoing lists of factors are not exhaustive. The forward-looking statements contained in this MD&A are expressly qualified by this cautionary statement.

Consolidated Financial Statements of
AgJunction, Inc.

Years ended December 31, 2018 and 2017

(Expressed in U.S. dollars)

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

Management of AgJunction Inc. ("AgJunction" or the "Company") is responsible for the preparation and the presentation of the consolidated financial statements and related information published in the annual report. These consolidated financial statements were prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The preparation of the financial information necessarily requires the use of some estimates and judgments, such as selection and application of accounting principles appropriate to the circumstances and with due consideration to materiality. Where appropriate, management seeks and receives guidance in these matters from external legal, accounting and other advisors.

To ensure the reliability of the consolidated financial statements, management relies on the Company's system of internal controls. The accounting procedures and related systems of internal control are designed to provide reasonable assurance that its assets are safeguarded and its financial records are reliable.

Management continuously monitors and adjusts the Company's internal controls and management information systems to accommodate a changing environment while ensuring financial integrity.

The Board of Directors is responsible for overseeing management's responsibility for financial reporting and is ultimately responsible for reviewing and approving the consolidated financial statements. The Board carries out this responsibility through its Audit Committee which is comprised entirely of independent directors.

The Audit Committee meets periodically with management, as well as with the external auditors, to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues; to satisfy itself that each party is properly discharging its responsibilities; and to review Management's Discussion and Analysis, the consolidated financial statements and the external auditors' report. The Audit Committee reports its findings to the Board of Directors for consideration when approving the consolidated financial statements for issuance to the shareholders. The Committee also considers, for review by the Board of Directors and approval by the shareholders, the engagement or re-appointment of the external auditors.

Management also recognizes its responsibility for ensuring that the Company, at all times, conducts its affairs in an ethical manner, conforming to all applicable laws and regulations, and in accordance with the highest standards of personal and corporate conduct.

AgJunction Inc.

Report on the Financial Statements

We have audited the accompanying consolidated financial statements of AgJunction Inc. and its subsidiaries (the Company), which comprise the consolidated statements of financial position as of December 31, 2018 and 2017, the related consolidated statements of profit or loss, changes in equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements (collectively, the financial statements).

We are independent of the Company in accordance with ethical requirements that are relevant to our audit of the financial statements in the United States of America, together with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants*, and we have fulfilled our other ethical responsibilities in accordance with these requirements, respectively.

Responsibilities of Management and Those Charged With Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate the Company or to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high level of assurance but is not a guarantee that an audit will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We design audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error because fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. **RSM US LLP**

In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation, structure and content of the financial statements, including disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the consolidated financial position of AgJunction Inc. and its subsidiaries as of December 31, 2018 and 2017, and the consolidated financial performance and their consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board.

Emphasis of Matter

As discussed in Note 3 to the financial statements, in 2018, the Company adopted new accounting guidance, International Financial Reporting Standard 15. Our opinion is not modified with respect to this matter.

RSM US LLP

Kansas City, Missouri

AgJunction Inc.

Notes to the Consolidated Financial Statements

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

1. Reporting entity:

AgJunction Inc. (the "Company") is a publicly traded company listed on the Toronto Stock Exchange under the ticker symbol "AJX", domiciled in Canada with its primary office located at 9150 E. Del Camino Drive, Suite 109, Scottsdale, Arizona. AgJunction Inc. is a leading provider of innovative hardware and software solutions for precision agriculture worldwide. The Company holds fundamental steering and machine control patents and its autosteering and machine control solutions are critical components in over 30 of the world's leading precision Ag manufacturers and solution providers. The consolidated financial statements of the Company as of and for the years ended December 31, 2018 and 2017 comprise the accounts of the Company and its subsidiaries (together referred to as the "Company"). The consolidated financial statements were authorized for issue by the Board of Directors on March 20, 2019.

2. Basis of preparation:

(a) Statement of compliance:

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

(b) Basis of measurement:

The consolidated financial statements have been prepared on the going concern and historical cost basis except for non-derivative financial assets at fair value through profit and loss.

(c) Functional and presentation currency:

These consolidated financial statements are presented in United States dollars, which is also the Company's functional currency.

(d) Use of estimates and judgments:

The preparation of the consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Some of the significant estimates and assumptions used in preparing the consolidated financial statements are as follows:

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 2

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

2. Basis of preparation (continued):

(i) Allowance for doubtful accounts (note 6):

The Company maintains an allowance for doubtful accounts for estimated losses that may occur if customers are unable to pay balances owing to the Company. This allowance is determined based on a review of specific customers, historical experience and economic circumstances.

(ii) Deferred tax assets (note 17):

Deferred tax assets are recognized for all deductible temporary differences, carry-forward of unused tax losses and other tax assets, to the extent future taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax losses and other tax assets can be utilized. Changes in the timing of the reversals of temporary differences and potential changes of the income tax rates applicable in future years could result in significant differences between the estimates and the actual amounts realized, which would affect net earnings in a subsequent period.

(iii) Goodwill impairment (note 21):

The Company has a single cash-generating unit ("CGU"), the agricultural business unit which represents the lowest level within the Company at which the goodwill is monitored for internal management purposes.

Goodwill impairment is determined by assessing the recoverable amount of the assets or CGU to which the asset relates. The recoverable amount of an asset or CGU is the greater of fair value less cost to sell and the value in use.

Fair value less cost to sell takes into consideration the market capitalization of the Company as there is only one CGU. The value in use of the CGU is determined using a "discounted cash flow" model, consistent with recognized valuation methods. The most significant assumptions underlying the model prepared by Management include: revenues, revenue growth, gross margins, operating expenses, income taxes, weighted average cost of capital, and capital expenditures. Significant factors impacting these assumptions include estimates of future market share, competition, technological developments, interest rates, and market trends. Assumptions incorporated into the discounted cash flow model reflect Management's long-term view of the Company's business and the markets in which it competes.

Impairment losses are measured as the difference between the carrying amount of the goodwill and its recoverable amount.

(iv) Inventory obsolescence (note 7):

Inventory is measured at the lower of cost or net realizable value. The Company evaluates inventory based on movement over an 18 month period classifying inventory as active, slow-movement or zero-movement. Items classified as zero-movement are deemed obsolete and

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 3

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

2. Basis of preparation (continued):

are estimated to have no value. Items classified as slow-moving are valued based on historical cost recovery rates.

(v) Provisions (note 10):

Based on historical information of warranty claims compared to revenue, the Company provisions an amount for future claims on items sold in the current period. Any expenses directly relating to warranty claims are expected to offset the provision in the period.

(vi) Share-based payments (note 11):

Share-based payments are measured at fair value at the date of grant. Fair value is measured by using a Black Scholes option pricing model, taking into account the terms and conditions upon which the equity instruments were granted as well as management's best estimate of the expected life of such share options. The following inputs are utilized in determining the fair value of share-based payments: the Company's share price at issuance; share option exercise price; weighted average volatility; interest rate; and expected life.

(vii) Revenue recognition (note 16):

The Company generates revenue from the sale of equipment, software and extended service programs and from usage-based royalty agreements. Equipment sales revenue is recognized upon transfer of control to the customer (shipment) and when all significant contractual obligations have been satisfied and collection is reasonably assured. Revenue from the sale of software is recognized upon transfer of control to the customer (release of the software code). Both the revenue from the sale of equipment and the sale of software codes is deemed to be earned at a point in time with each contract constituting one performance obligation. Revenues from the sale of extended service programs are recorded as deferred revenue at the time the extended service is invoiced and are recognized on a pro-rata basis over the extended service period. The Company recognizes sales-based or usage-based royalty revenue when the Company satisfies its performance obligations, as identified in the agreement, over the contractual term. Both the extended service plan and the royalty revenue were deemed to be recognized over time. The transaction price associated with the performance obligations are determined by the respective contractual agreements.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 4

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies:

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements.

(a) Principles of consolidation:

These consolidated financial statements include the accounts of the Company and its subsidiaries, all of which are wholly-owned. All inter-company transactions, balances and unrealized gains or losses on inter-company transactions have been eliminated upon consolidation. AgJunction LLC (formerly Hemisphere GPS LLC), AgJunction AUS Pty Ltd. (formerly Hemisphere AUS Pty Ltd.), Novariant, Inc., and AgJunction Machinery (Shanghai) Ltd. are wholly owned operating subsidiaries of the Company.

(b) Foreign currency translation:

Under IFRS, functional currency of each entity in the Company is determined separately in accordance with the indicators as per International Accounting Standard (IAS) 21, The Effects of Changes in Foreign Exchange Rates, and should be measured using the currency of the primary economic environment in which the entity operates (the “functional currency”). Based on IAS 21, the functional currency of the Company and its subsidiaries is determined to be United States dollar.

Foreign currency transactions denominated in other than United States dollars are translated into the functional currency on the following basis:

- (i) Monetary assets and liabilities are translated at the rates of exchange prevailing at statement of financial position date.
- (ii) Non-monetary assets, liabilities and related depreciation expenses that are measured at historical cost are translated using the exchange rate at the date of the transaction.
- (iii) Income and expenses for each statement of profit or loss presented are translated at average exchange rates during the month in which they are recognized.

Exchange differences resulting from the settlement of foreign currency transactions and the gain or loss due to remeasurement of assets and liabilities held in foreign currencies are recognized directly in the “foreign exchange (gain) loss, net” line item of the consolidated statement of profit or loss in the period in which incurred.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 5

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

(c) Financial instruments:

(i) Non-derivative financial assets:

The Company initially recognizes trade and other receivables and deposits on the date they originate. All other financial assets are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

The Company classifies non-derivative financial assets not held at amortised cost into the following categories: financial assets at fair value through profit or loss ("FVTPL") or held-to-maturity financial assets and receivables.

Financial assets at fair value through profit or loss ("FVTPL"):

Financial assets designated as FVTPL are stated at fair value with the gain or loss recognized in the consolidated statement of profit or loss. The net gain or loss recognized incorporates any interest earned on the financial asset.

The Company's financial assets measured at amortized cost include cash, trade and other receivables, notes receivable and prepaid assets.

Held-to-maturity financial assets:

These assets are initially recognized at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortized cost using the effective interest method. The Company classifies short-term investments as held-to-maturity financial assets.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 6

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

Receivables:

Receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition receivables are measured at amortized cost using the simple effective interest method, less any impairment losses. The effective interest method calculates the amortized cost of a financial asset and allocates interest income over the corresponding period.

Trade receivables are defined as receivables to the Company resulting from credit sales to its customers and/or suppliers. The Company elected to apply the practical expedient to trade receivables which do not have a significant financing component as the expected term is less than one year on trade receivables. The Company evaluates the potential for credit loss using an Expected Credit Loss (ECL) model which categorizes accounts and notes receivable in one of three credit stages at initial recognition. The Company has chosen to apply the practical expedient to accounts and notes receivable items with low credit risk.

The Company has classified accounts receivable and other receivable as receivables. Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

Notes Receivable:

Notes Receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition receivables are measured at amortized cost using the simple effective interest method, less any impairment losses. The simple effective interest method calculates the amortized cost of a financial asset and allocates interest income over the corresponding period. The Company excludes adjustment for potential credit loss from the effective interest method calculation because credit losses are evaluated and reserved against independently. Any impairment resulting from an evaluation is reserved for in accordance with the company's reserve policy. The Company evaluates the potential for credit loss using an Expected Credit Loss (ECL) model which categorizes accounts and notes receivable in one of three credit stages at initial recognition.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 7

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

(ii) Non-derivative financial liabilities:

Non-derivative financial liabilities are recognized initially at fair value plus any directly attributable transaction costs on the date that they are originated. Financial liabilities are derecognized when the contractual obligations are discharged, cancelled or expire. The Company has classified accounts payable and accrued liabilities as non-derivative financial liabilities.

(iii) Share capital:

Common shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognized as a deduction from equity, net of any tax effects.

(d) Cash and cash equivalents:

Cash and cash equivalents consists of cash on hand. The cash on hand is denominated in Canadian dollars (CDN \$), United States dollars (US \$), Australian dollars (AUS \$), New Zealand dollars (NZD \$), Chinese Yuan (RMB ¥), Euros (EUR €), British Pounds (GBP £), and Hungarian Forints (HUF Ft). The Company holds cash on hand with Canadian, United States, Australian, Chinese and European chartered banks.

(e) Revenue recognition:

The Company generates revenue from the sale of equipment and extended warranty programs (note 16). Product sale price is determined based on cost of component parts, shipping, assembly labor and market conditions. The Company may include variable consideration in contracts with customers which could include volume or other discounts and/or the right of return. Volume and other discounts are determined by company policy and sales and marketing promotions. When a customer has the right to return a product, the Company will ship a new product to the customer or will refund the purchase price. Revenue from the sale of equipment is recognized when control passes to the customer (shipment) and when all significant contractual obligations have been satisfied and collection is reasonably assured. Accruals for warranty costs, sales returns and other allowances are recorded at the time control passes to the customer (shipment) and are based upon contract terms and anticipated claims. Revenue from sale of software relates mainly to perpetual licenses, which provide the customer with the right to use the licensed products.

Revenues from the sale of extended service programs are recorded as deferred revenue at the time the extended service is invoiced and are recognized on a pro-rata basis over the extended service period.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 8

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

The Company recognizes sales-based or usage-based royalty revenue when the Company satisfies its performance obligations, as identified in the agreement, over the contractual term. Royalty revenue is located within the Revenue line of the Consolidated Statements of Profit or Loss.

(f) Inventories:

Inventories are measured at the lower of cost and net realizable value. Net realizable value is the estimated selling price less estimated costs of completion and selling expenses. Cost, which is based on a weighted average, includes expenditures incurred in acquiring stock and bringing it to its existing location and condition. In the case of manufactured inventories cost includes an appropriate share of overheads attributable to manufacturing, based on normal operating capacity.

(g) Property, plant and equipment:

Property, plant and equipment is measured at cost less accumulated depreciation and impairments. Cost includes expenditures that are directly attributable to the acquisition of the asset. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate. All other repairs and maintenance are charged to the statement of profit or loss during the financial period in which they are incurred.

The carrying amounts of property, plant and equipment are depreciated from the date of acquisition to their estimated residual value over the estimated useful lives of the assets.

Estimates of residual values and useful lives are reassessed annually and any change in estimate is taken into account in the determination of remaining depreciation charges.

Depreciation is charged from the date of acquisition of an asset and is provided at the following annual rates:

Assets	Method	Rate
Buildings and leasehold improvements	straight-line	4 – 20 years
Computer equipment and software	declining balance	30%
Office and production equipment	declining balance	20% - 30%
Licenses and other assets	straight-line	2 – 10 years

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 9

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

(h) Intangible assets:

Intangible assets are measured at cost less accumulated amortization and impairments. The carrying value of intangible assets is amortized over the estimated useful lives based on management's best estimates. Estimates of the useful lives are reassessed annually and any change in estimate is taken into account in the determination of the remaining amortization charges.

Assets	Rate
Trademarks and brands	20 years
Technology	5 – 10 years
Internally developed intangibles	3 – 5 years

(i) Goodwill:

Goodwill acquired in a business combination is initially measured at cost, being the excess of the cost of the business acquisition over the net fair value of the identifiable assets, liabilities and contingent liabilities of the acquired entity at the date of acquisition. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment annually or more frequently if events or changes in circumstances indicate that such carrying value may be impaired.

The Company has a single cash-generating unit (CGU), the agricultural business unit, which represents the lowest level within the Company at which the goodwill is monitored for internal management purposes based on the Company's primary reporting format determined in accordance with IFRS 8, Operating Segments.

(j) Impairment:

Goodwill and intangible assets with indefinite useful lives are not subject to amortization and are tested for impairment annually and whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Assets that are subject to depreciation and amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable.

Impairment is determined by assessing the recoverable amount of the assets or cash-generating units (CGU) to which the asset relates. A CGU is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or group of assets. The recoverable amount of an asset or CGU is the greater of fair value less cost to sell and the value in use.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 10

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

An impairment loss is measured as the difference between the carrying amount of the goodwill and its recoverable amount. Fair value less cost to sell takes into consideration the market capitalization of the Company as there is only one cash generating unit, relevant multiples, and peer transactions. Value in use is determined using a detailed discounted cash flow analysis using management's estimates, including a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

Impairment losses recognized in respect of the CGU are allocated first to reduce the carrying amount of any goodwill of the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis. Where intangible assets have been allocated to the CGU and part of the operation within the CGU is disposed of, the intangible assets associated within the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Intangible assets disposed of in such cases are measured based on the relative values of the operation disposed of and the portion of the CGU retained.

An impairment loss in respect of goodwill is not reversed. For assets other than goodwill, an impairment loss recognized in prior periods shall be reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If this is the case, the carrying amount of the asset shall be increased to its recoverable amount and an impairment loss is reversed, however, the increased carrying amount shall not exceed the carrying value that would have been determined, net of depreciation and amortization, if no impairment loss had been recognized.

(k) Research and development:

Expenditures on research activities are recognized under the Research and development line item in the Consolidated Statement of Profit or Loss in the period in which they are incurred.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 11

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

An internally generated intangible asset arising from product development is recognized only if all of the following conditions are met:

- (i) the technical feasibility of completing the intangible asset so that it will be available for use or sale
- (ii) its intention to complete the intangible asset and use or sell it
- (iii) its ability to use or sell the intangible asset
- (iv) if the intangible asset will generate probable future economic benefits
- (v) the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset
- (vi) its ability to measure reliably the expenditure attributable to the intangible asset during its development

Internally generated intangible assets are amortized on a straight-line basis over their useful lives. Where no internally generated intangible asset can be recognized, development expenditure is recognized as an expense in the period in which it is incurred. Capitalized expenses include the cost of material, direct labor, direct overhead and outsourcing costs directly attributable to preparing the asset for its intended use.

(l) Earnings per share:

Basic earnings or loss per share represents the profit or loss for the period, divided by the weighted average number of ordinary shares in issue during the period. Diluted earnings or loss per share represents the profit or loss for the period, divided by the weighted average number of ordinary shares in issue during the period plus the weighted average number of dilutive potential shares resulting from share options where the inclusion of these would not be antidilutive.

(m) Share-based payments:

The Company awards share options to certain directors, officers, employees, consultants and agents of the Company, from time to time, on a discretionary basis subject to certain terms and conditions. Share options are measured at fair value at the date of grant. Fair value is measured by using the Black Scholes option pricing model, taking into account the terms and conditions upon which the equity instruments were granted and also based on management's best estimate of the expected life of such share options. The fair value of such awards is expensed over the vesting period with a corresponding increase in reserve under equity. Upon exercise of share options, proceeds received are credited to share capital.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 12

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

The Company has a restricted share unit ("RSU") plan. The Company may award RSUs to certain directors, officers, employees, key consultants and agents of the Company, from time to time, on a discretionary basis subject to certain terms and conditions. No RSUs have been awarded in the periods 2014 through 2017. In addition, the plan expired in 2017. Accordingly, no RSUs will be awarded in future periods.

The Company also has a restricted share award ("RSA") plan. The Company may award RSAs to certain directors, officers, and employees of the Company, from time to time, on a discretionary basis subject to certain terms and conditions. RSAs are measured at fair value at the date of grant, taking into account the terms and conditions upon which the equity instruments were granted and also based on management's best estimate of the expected life of such restricted share awards. Based on a specified period of service, RSAs under this plan vest over a period of one to four years as the fair value of such awards is expensed over the vesting period with a corresponding increase in reserve under equity. From their issue date, the holders of RSAs have voting rights and are entitled to dividends equivalent to common shareholders.

As of December 31, 2018, 2,828 (2017 – 1,765) RSAs were held by senior management and certain members of the Board of Directors.

(n) Income taxes:

Income taxes comprise both current tax and deferred tax. Income tax is recognized in the consolidated statement of profit or loss except to the extent that it relates to items recognized directly in equity. Current income tax is the tax expected to be payable on the taxable profit for the period, using tax rates enacted or substantively enacted by the reporting date.

Deferred taxes are recognized on all temporary differences at the consolidated statement of financial position date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax assets are recognized for all deductible temporary differences, carry-forward of unused tax losses and other tax assets, to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax losses and other tax assets can be utilized. Deferred tax is calculated using the tax rates that are expected to be applied to temporary differences when they reverse, based on tax rates and laws enacted, or substantively enacted, by the reporting date.

(o) Provisions:

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 13

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

be required to settle the obligation, and reliable estimate of the amount of the obligation can be made.

Provisions for obsolete inventory are based on management's best estimates which consider a variety of factors that may affect the carrying values of inventories. These factors include, but are not limited to, market demand, technology and design changes. A provision for warranty is recognized when the underlying products and services are sold. Warranty provision is based on historical warranty data and a weighting of all possible outcomes against their associated probabilities.

Where the time effect of money is material, significant provision balances are discounted to current values using appropriate pre-tax discount rates. The unwinding of the discount is recorded as finance cost under general and administrative expenses.

(p) Vacation pay:

Employee entitlements to annual leave are recognized as they are earned by the employees. A provision, stated at current cost, is made for the estimated liability at period end.

(q) Termination benefits:

Termination benefits are recognized as an expense when the Company is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized as an expense if the Company has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting period, they are discounted to their present value.

(r) Leased assets:

Leases of which the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with accounting policy applicable to that asset. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability.

Payments made under operating leases are recognized in the consolidated statement of profit or loss on a straight line basis over the term of the lease.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 14

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

(s) Segment reporting:

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company's other components. The operating results are reviewed regularly by the Company's CEO to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. The Company sells its products within the Agriculture market and reports associated revenue and expense under this one business segment.

(t) Restructuring costs:

A provision for restructuring is recognized when it is material, and the restructuring plans have been approved and announced before the reporting date. Restructuring costs are recognized, as incurred, in the consolidated statement of profit or loss within operating income (loss). These costs mainly involve the outsourcing of manufacturing costs, termination and severance benefits, legal and consulting fees, redundancy costs and scrapping of property and equipment as well as other costs that are directly related to the restructuring plan and that provide no benefit to the ongoing operations.

(u) Initial adoption of new standards and interpretations:

The Company has adopted the following standards, with the date of initial application of January 1, 2018. The nature and effect of the changes are explained below:

IFRS 9, Financial Instruments

In July 2014, the IASB issued IFRS 9, *Financial Instruments*, which clarified how entities are to classify and measure financial assets, financial liabilities, and some contracts to buy or sell non-financial items. The standard was adopted as of January 1, 2018 and had negligible impact on the financial results of the Company upon adoption.

Amendments to IFRS 2, Share-based Payment

In June 2016, the IASB issued amendments to IFRS 2, *Share-based Payment*, which clarified the classification and measurement of share-based payment transactions. The amended standard was adopted as of January 1, 2018 and had negligible impact on the financial results of the Company.

IFRIC 22, Foreign Currency Transactions and Advance Consideration

In December 2016, the IASB published IFRIC 22, *Foreign Currency Transactions and Advance Consideration* which was developed by the IFRS Interpretations Committee to clarify the accounting for transactions which include receipt or payment of advance consideration in a foreign currency. The interpretation was adopted as of January 1, 2018 and had negligible impact on the financial results of the Company.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 15

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

IFRS 15, *Revenue from Contracts with Customers*:

In May 2014, the IASB issued IFRS 15, *Revenue from Contracts with Customers*, a new standard related to revenue recognition which was effective January 1, 2018. Under the standard, revenue is recognized when the Company satisfies its performance obligations. Performance obligations are satisfied when a customer obtains control of promised goods or services in an amount that reflects the consideration the entity expects to be entitled to in exchange for those goods or services. In addition, the standard requires revenue to be disaggregated into categories and disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The company has three categories of revenue from contracts with customers including sales to customers, non-recurring engineering ("NRE") and royalty revenue.

The Company adopted the new standard effective January 1, 2018. The cumulative effect of initially implementing IFRS 15 under the modified retrospective method as of that date resulted in an adjustment to retained earnings of \$253, an adjustment to contract assets of \$189 and an adjustment to contract liabilities of (\$442). The most significant impact of implementing IFRS15 relates to our accounting for NRE agreements, which had previously not met the criteria for revenue recognition under past standards.

These NRE agreements fall into one of three categories, software upgrades, equipment prototype design ("hardware"), and feature code development. The contract price is determined based on material and labor costs incurred to develop and/or build the product and company resources, including facility and storage, used or allocated to the product. Revenue generated from software upgrade NRE is recognized upon delivery of the software upgrade to the customer. Revenue generated from equipment prototype design and feature code development NRE is initially deferred and later recognized on a pro-rata basis as new equipment or feature codes connected with those NRE agreements are purchased.

Costs related to NRE agreements under all three categories are capitalized as a contract asset as the expenses are incurred, not to exceed contractual NRE billings. Capitalized expenses include amounts paid to external vendors as well as internal labor costs. Contract assets related to software upgrades are fully expensed upon delivery of the software upgrade to customers. Contract assets related to equipment prototype design and feature code development are expensed on a pro-rata basis as new equipment or feature codes connected with those NRE agreements are purchased. This requires an estimate of future sales of related hardware and feature codes. Capitalized expenses related to these NRE agreements are represented as net contract assets on the Consolidated Statements of Financial Position and total \$63 as of December 31, 2018. These net contract assets relate solely to software NRE agreements.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 16

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

3. Significant accounting policies (continued):

Under the standard, sales-based or usage-based royalty revenue is recognized when the Company satisfies its performance obligations over the contractual term. In addition, the standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. Royalty revenue is located within the Revenue line of the Consolidated Statements of Profit or Loss. Royalty revenue recognized in the period ending December 31, 2018 totals \$294. Deferred royalty revenue is represented as net contract liabilities on the Consolidated Statements of Financial Position and total \$5,395 as of December 31, 2018.

(000's)	2018
Sales to Customer	\$ 64,221
Royalty	294
	<hr/> \$ 64,515

(v) New standards and interpretations not yet adopted:

In January 2016, the IASB issued IFRS 16, *Leases*, which requires major revisions in the way lessees currently account for leases under IAS 17, *Leases*. The standard is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted if IFRS 15, *Revenue from Contracts with Customers*, has also been applied. The standard allows for full retrospective or modified retrospective implementation along with various options, exemptions and practical expedients that can be elected at implementation. This standard is expected to have a significant impact on the Company's Consolidated Statement of Financial Position.

In June 2018, the IASB published IFRIC 23, *Uncertainty over Income Tax Treatments* which was developed by the IFRS Interpretations Committee to enhance transparency and to clarify the accounting for income tax treatments that have yet to be accepted by tax authorities. The interpretation is effective for annual periods beginning on or after January 1, 2019, with early application permitted. This standard is not expected to have a significant impact on the Company's financial results.

4. Determination of fair values:

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 17

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

4. Determination of fair values (continued):

(a) Derivatives:

The fair value of forward exchange contracts is based on their listed market price, if available. If a listed market price is not available then fair value is estimated by discounting the difference between the contractual forward price and the current forward price for the residual maturity of the contract using a risk-free interest rate (based on government bonds). There were no derivatives held as of December 31, 2018 and 2017.

(b) Share-based payment transactions:

The fair value of the employee share options is measured using the Black-Scholes option pricing model. Measurement inputs include the share price on measurement date, the exercise price of the instrument, the expected volatility (based on weighted average historic volatility adjusted for changes expected due to publicly available information), the weighted average expected life of the instruments (based on historical experience of forfeiture rates), and the risk-free interest rate (based on government bonds). Service and non-market performance conditions are not taken into account in determining fair value.

(c) Notes Receivable:

The fair value of notes receivable is measured at present value.

(d) Goodwill:

Refer to note 21.

5. Cash and cash equivalents:

	December 31, 2018	December 31, 2017
Cash on hand		
US \$	\$ 20,657	\$ 13,452
AUS \$	265	204
Other currencies	476	237
Cash and cash equivalents	\$ 21,398	\$ 13,893

6. Accounts receivable:

	December 31, 2018	December 31, 2017
Trade	\$ 6,227	\$ 3,791
Other receivable	2,334	622
Allowance for doubtful accounts	(53)	(228)
	\$ 8,508	\$ 4,185

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 18

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

6. Accounts receivable (continued):

Included within the December 31, 2018 and 2017 other receivable line items above is a \$305 income tax receivable related to refundable alternative minimum tax credits paid in prior years. Due to legislation passed on December 22, 2017, the realization of these credits became probable and accordingly, a receivable was recorded. Additional information regarding this legislation may be found in footnote 17. The Company has applied a practical expedient to trade receivables as the expected term is less than one year.

Aging of receivables that are past due but not impaired:

	December 31, 2018	December 31, 2017
1 to 30 days	\$ 32	\$ 436
31 to 60 days	—	78
61 to 90 days	—	73
Over 90 days	—	14
	\$ 32	\$ 601

Reconciliation of changes in the allowance for doubtful accounts:

	December 31, 2018	December 31, 2017
Balance beginning of year	\$ 228	\$ 74
Provisions	(181)	172
Accounts receivable written off (recovered)	6	(18)
	\$ 53	\$ 228

7. Inventories:

Inventories include material, labor and manufacturing overhead costs. The components of inventories were as follows:

	December 31, 2018	December 31, 2017
Finished goods	\$ 4,733	\$ 5,791
Raw materials	1,010	1,836
	\$ 5,743	\$ 7,627

During the year ended December 31, 2018, the Company recorded write-downs of finished goods and raw materials to net realizable value in the amount of (\$7) (2017 – \$601) which was recognized in the cost of sales line item of the consolidated statement of profit or loss.

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

8. Property, plant and equipment (continued):

During 2018 and 2017, the Company disposed of fixed assets no longer required for the ongoing operations of the business for a gain of \$13 and a loss of \$19, respectively, as noted in the consolidated statement of profit or loss.

9. Intangible assets:

The Company incurs research and development expenses during the general course of business to enhance existing products by increasing and/or extending the functionality and/or performance of existing products or to create new products.

During 2018, the Company capitalized \$1,763 in development costs (2017 - nil). This capitalization is captured on the Intangible assets line under the assets section on the Consolidated Statements of Financial Position.

Cost

Provisions used	(392)	—	(392)
Balance at December 31, 2017	\$ 613	\$ 16	\$ 629

The provision for warranties relates mainly to products sold during the years ended December 31, 2018, 2017 and 2016. The provision is based on historical warranty data and a weighting of all possible outcomes against their associated probabilities. The Company expects to incur the majority of the warranty liability over the next three years.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 22

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

10. Provisions (continued):

In February 2019, the Company identified performance issues with a single model of a high-volume product which is produced under an OEM supply agreement. The Company immediately halted production and shipment of the product and conducted a Root Cause Analysis which determined that a single connector could fail in certain circumstances once the product was put into use in the field. Based on management's estimate of remediation costs per unit, a warranty provision of \$422 was recorded as of December 31, 2018 which related to units that had shipped in 2018 and have been or could be impacted. Warranty costs related to units that were manufactured and shipped in 2019 before the issue was identified are not believed to be material and will be charged to cost of goods sold as incurred. The Company is in discussion with the supplier of the connector regarding cost sharing. An agreement reached would mitigate a portion of the Company's remediation costs.

11. Share capital:

(a) Authorized:

Unlimited common shares

Unlimited first preferred shares, issuable in series

Unlimited second preferred shares, issuable in series

(b) Issued:

Issued share capital consists of 119,085 common shares at \$148,475.

(c) Par value:

No par value.

(d) The Company has a share option plan, whereby options to purchase common shares may be issued at market price to directors, officers, employees, key consultants and agents of the Company subject to certain terms and conditions. The Company also has a restricted share award plan, whereby common shares may be issued at market price to directors, officers, and employees of the Company subject to certain terms and conditions. The Company's shareholders have approved the combined issuance of total share options and restricted share awards with a rolling maximum limit equal to 13% of outstanding common shares. Share options granted vest over a period of two to five years and expire at various dates through to 2020. Restricted share awards granted vest over a period of one to four years and have no expiration date.

(e) During the year ended December 31, 2018, the Company recorded \$239 (2017 - \$491) as share based compensation expense relating to options and \$427 (2017 - \$321) relating to restricted share awards for total compensation expense of \$666 (2017 - \$812).

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 23

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

11. Share capital (continued):

- (f) The grant date fair value of RSAs granted is estimated by using the Black-Scholes put option pricing model. The following assumptions were used in determining the fair value of the March 2018 grants: Company share price at issuance; weighted average volatility of 57%; interest rate of 1.74%; and weighted average expected life of 3.0 years. The following assumptions were used in determining the fair value of the April 2018 grants: Company share price at issuance; weighted average volatility of 56%; interest rate of 1.79%; and weighted average expected life of 3.0 years.

The grant date fair value of share options granted is estimated by using the Black-Scholes call option pricing model. The following assumptions were used in determining the fair value of the January 2017 share option issuances: Company share price at issuance; share option exercise price; weighted average volatility of 56%; interest rate of 0.76%; and weighted average expected life of 4.0 years. The following assumptions were used in determining the fair value of the June 2017 share option issuances: Company share price at issuance; share option

exercise price; weighted average volatility of 54%; interest rate of 0.85%; and weighted average expected life of 4.0 years. The following assumptions were used in determining the fair value of the September 2017 share option issuances: Company share price at issuance; share option exercise price; weighted average volatility of 55-58%; interest rate of 1.22-1.50%; and weighted average expected life of 4.0 years.

The grant date fair value of RSAs granted is estimated by using the Black-Scholes put option pricing model. The following assumptions were used in determining the fair value of the January 2017 grants: Company share price at issuance; weighted average volatility of 64%; interest rate of 0.76%; and weighted average expected life of 3.0 years. The following assumptions were used in determining the fair value of the June 2017 grants: Company share price at issuance; weighted average volatility of 57%; interest rate of 0.69%; and weighted average expected life of 3.0 years. The following assumptions were used in determining the fair value of the September 2017 grants: Company share price at issuance; weighted average volatility of 52-53%; interest rate of 1.22-1.27%; and weighted average expected life of 3.0 years. The following assumptions were used in determining the fair value of the December 2017 grants: Company share price at issuance; weighted average volatility of 56%; interest rate of 1.41%; and weighted average expected life of 3.0 years.

11. Share capital (continued):

Change in the number of restricted share awards, with their weighted average grant prices are summarized below:

(Share price in CAD)	December 31, 2018		December 31, 2017	
	Number RSAs	Weighted average grant price	Number RSAs	Weighted average grant price
Total RSAs outstanding, beginning of period	2,280	\$ 0.53	4,132	\$ 0.60
Granted	2,538	0.88	812	0.52
Cancelled	(962)	0.86	(67)	0.67
Vested	(331)	0.71	(2,597)	0.59
RSAs outstanding, end of period	3,525	\$ 0.76	2,280	\$ 0.53

The restricted share awards outstanding as of December 31, 2018 have a weighted average remaining vesting life of 28 months and vest over the years 2019 through 2021.

- (g) On June 27, 2017, the Company repurchased and returned to treasury for cancellation 7,853 of its common shares under an arm's length private transaction for \$1,767.

12. Sale of Divisions:

On August 31, 2018, the Company closed the sale of certain assets and liabilities of its Outback Guidance (Outback) business to Hemisphere GNSS (HGNSS) for \$6,355, \$6,000 plus a working capital adjustment of \$355. The transaction will allow AgJunction to focus on its core strategy to grow the market for autosteering.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 26

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

12. Sale of Divisions (continued):

The sale of Outback included the Outback Guidance® brand, the REBEL™ autosteering products, and AgJunction's Hiawatha, Kansas and Winnipeg, Canada facilities. HGNSS will take over the relationships with the Outback independent dealer network, and the majority of the Outback workforce are transitioning to HGNSS. Certain assets and liabilities associated with the Outback Guidance business operations sold and are as follows:

	Total
Prepaid expenses	\$ 31
Inventories	2,946
Property, plant and equipment, net	1,543
Assets Sold	\$ 4,520
Deferred revenue	166
Warranty Provisions	137
Accounts payable and accrued expenses	33
Liabilities Sold	336
Assets Sold, net	\$ 4,184

In connection with the sale of Outback, the Company wrote off \$693 of intangible assets related to the Outback division that no longer had any future value to the Company. This \$693 is included in the gain on sale of division. A gain on the sale of division of \$1,478, was recognized and is reported on the December 31, 2018 Consolidated Statements of Profit or Loss.

On November 15, 2018, the Company closed the sale of certain assets and liabilities of its SATLOC® aerial guidance and flow control business to Texas Transland, LLC ("Transland") for cash of \$1,480 and a note receivable of \$1,422. The note is payable in equal installments over a five year period commencing December 2018. The note is carried at amortized cost using the simple effective interest method, less any impairment losses. The simple effective interest method calculates the amortized cost of a financial asset and allocates interest income over the corresponding period. Interest income relating to the Satloc note, calculated using the effective interest method is \$178. The transaction will allow AgJunction to focus on its core strategy to grow the market for autosteering. A gain on the sale of division in the amount of \$1,679 was recognized and is reported on the year ended December 31, 2018 Consolidated Statements of Profit or Loss.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 27

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

12. Sale of Divisions (continued):

The sale of SATLOC® includes the SATLOC® brand and aerial guidance products. Certain assets and liabilities associated with the SATLOC® aerial guidance business operations sold and are as follows:

	Total
Accounts receivable	\$ 143
Prepaid expenses	14
Inventories	1,158
Property, plant and equipment, net	2
Assets Sold	1,317
Warranty Provisions	94
Liabilities Sold	94
Assets Sold, net	\$ 1,223

13. Operating leases:

The Company is committed to annual minimum operating lease payments, excluding tenant-operating costs, of:

	December 31, 2018	December 31, 2017
Within 1 year	\$ 632	\$ 524
1 to 5 years	1,375	1,369
After 5 years	-	96
Total	\$ 2,007	\$ 1,989

The Company leases a number of buildings for its operations under operating leases. The leases typically run for periods of 5-10 years, with options to renew the lease. Lease payments are increased in certain situations to reflect market conditions. Lease payments recognized as an expense during the year amount to \$724 (2017 – \$634).

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 28

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

14. Expenses by nature from continuing operations:

Operating results include the following items:

	2018	2017
Salaries and employee benefits	\$ 16,075	\$ 15,864
Defined contribution expenses	472	360
Share based payment expenses	666	812
Directors fees, cash portion	98	173
Amortization and depreciation expense	1,839	1,948
Consulting expenses	1,648	2,013
Travel and related expenses	1,318	1,559
Software, information technology and licensing expenses	777	707
Legal expenses	1,142	498
Lease payments recognized as expense	724	634
Advertising and promotional expenses	1,002	990
Insurance expense	320	343
Communication expenses	183	249
External audit fees	225	272
Public company expenses	242	232
Net research and development project specific costs	-	91
Other corporate overhead expenses	1,553	1,639
Inventories recognized as costs of sales	33,610	21,223
Other costs of sales	4,492	3,130
	\$ 66,386	\$ 52,737

15. Earnings (Loss) per share:

The calculation of basic and diluted income (loss) per share from operations was based on the earnings (loss) attributable to ordinary shareholders of \$1,464 (2017 – loss of \$2,976).

At year end, weighted-average number of shares outstanding used to calculate basic loss per share was as follows:

	2018	2017
Opening balance January 1	116,878	124,074
Effect of share options exercised	–	–
Purchase and cancellation of common shares	–	(4,023)
Issue of restricted share awards, net	1,112	397
Issue of common shares	–	–
Ending balance December 31	117,990	120,448

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 29

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

15. Earnings (Loss) per share (continued):

At year end, weighted-average number of shares outstanding used to calculate diluted loss per share was as follows:

	2018	2017
Opening balance January 1	116,878	124,074
Effect of share options exercised	—	—
Purchase and cancellation of common shares	—	(4,023)
Issue of restricted share awards, net	1,112	397
Issue of common shares	—	—
Effect of dilutive share options not exercised	7,313	709
Ending balance December 31	125,303	121,157

At December 31, 2018, 96 share options (2017 – 6,739) were excluded from the diluted weighted-average number of ordinary shares calculation because their effect would have been anti-dilutive.

16. Entity-wide disclosure:

Revenue by operating segment:

	2018	2017
Agriculture	\$ 64,515	\$ 46,781

Revenue by geographic region:

	2018	2017
Americas	\$ 21,434	\$ 26,428
Asia-Pacific (APAC)	1,518	2,472
Europe, the Middle East, and Africa (EMEA)	41,563	17,881
	\$ 64,515	\$ 46,781

Two customers each individually account for over 10 percent of Company total revenue. One customer approximates 63% or \$40,411 of total revenue and is included in the EMEA geographic region. The other customer approximates 17% or \$11,036 of total revenue and is included in the Americas geographic region. In 2017, two customers each individually accounted for over 10 percent of total revenue. One customer approximated 31% or \$14,277 of total revenue and is included in the EMEA geographic region, the other customer approximated 25% or \$11,619, of total revenue and is included in the Americas geographic region.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 30

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

16. Entity-wide disclosure (continued):

Non-current assets by geographic region:

	2018	2017
Americas	\$ 12,704	\$ 12,794
Asia-Pacific (APAC)	-	104
	\$ 12,704	\$ 12,898

17. Income taxes:

The Company is taxable in multiple jurisdictions, each with varying tax rates, tax regulations, and tax structures. This results in a blended effective income tax rate. Accordingly, the income tax expense recorded on the Consolidated Statements of Profit or Loss varies from the amount that would be computed by applying the combined Canadian Federal and Provincial income tax rate of 27% (2017 – 27%). The Rate Reconciliation schedule below summarizes these differences.

Rate reconciliation of effective tax rate:

	2018	2017
Expected income tax (recovery)	\$ 509	\$ (799)
Increase (decrease) resulting from:		
Change in unrecognized deferred tax assets	(83)	524
Nondeductible expenses	(272)	367
Effective tax rates differences by jurisdictions	(159)	(77)
Recognition of previously unrecognized deferred tax assets	-	(305)
Income tax (recovery)	\$ (5)	\$ (290)

For the year ended December 31, 2017, a \$305 income tax benefit was recognized in the income tax benefit line item of the consolidated statement of profit or loss. This income tax benefit relates to previously unrecognized deferred tax assets generated from prior year US alternative minimum tax (AMT) credits. The recognition of AMT credits came pursuant to the December 22, 2017 enactment of US legislation, H.R.1, An Act to provide for reconciliation pursuant to titles II and V of the concurrent resolution on the budget for fiscal year 2018. Within this legislation, section 12002 made 50 percent of AMT credits refundable over the years 2018 through 2021. In addition, this legislation modified net operating loss deductions and reduced corporate tax rates from a graduated set of rates with a maximum of 35 percent to a flat rate of 21 percent. Accordingly, a rate of 21 percent was used in the Company's 2018 and 2017 US income tax and net operating loss calculations.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 32

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

17. Income taxes (continued):

The net operating loss carry-forwards as of December 31, 2018 reflected in the unrecognized deferred tax assets will expire as follows:

	Net operating losses
United States:	
2023	\$ 346
2024	526
2025 and beyond	50,931
	<u>\$ 51,803</u>
Canada:	
2028 and beyond	\$ 10,925
Australia:	
No expiry date	\$ 7,655

18. Financial instruments and financial risk management:

The Company is exposed to various financial risks through its financial instruments. The nature of these instruments and the Company's operations expose the Company to the following risks:

(a) Credit risk:

Credit risk reflects the risk that the Company may be unable to collect amounts due to the Company from customers for its products or for other transactions that may be entered into by the Company. The extent of the risk depends on the credit quality of the party from which the amount is due.

The Company employs established credit approval and monitoring practices to mitigate this risk, including reviewing the creditworthiness of new customers to establish credit limits, monitoring customer payment performance and, where considered appropriate, reviewing the financial condition of its existing customers and other debtors. The Company establishes an allowance for doubtful accounts based upon individual account assessment along with the credit risk of its customers, historical trends and economic circumstances.

(b) Interest rate risk:

The Company is exposed to interest rate risk on cash balances or term deposits earning interest income and to the extent that it may draw on its operating line of credit or carry other forms of debt which calculate interest as a function of variable interest rates. At December 31, 2018, the Company does not carry material liabilities that are exposed to variable interest rates.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 33

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

18. Financial instruments and financial risk management (continued):

(c) Liquidity risk:

The Company may be exposed to liquidity risk if it is unable to collect its trade accounts receivable balances on a timely basis, which in turn could impact the Company's ability to meet commitments to creditors.

The Company manages its liquidity risks by carrying a target level of cash by maintaining a conservative capital structure, by prudently managing its credit risks and by maintaining sufficient capacity within its credit facilities to meet any near-term liquidity requirements.

Approximate remaining contractual obligations at year end:

	Within 1 year	1 to 5 years	After 5 years
Accounts payable and accrued liabilities	\$ 8,500	\$ –	\$ –
Operating leases (note 13)	632	1,375	–
	\$ 9,132	\$ 1,375	\$ –

(d) Foreign exchange risk:

The Company is exposed to foreign exchange risk primarily in the following ways:

- i. Cash flow – A significant portion of the Company's revenues and expenses are denominated in US dollars, however certain of its expenses are denominated in Canadian dollars and Australian dollars.
- ii. Working capital – The Company has a US dollar measurement or functional currency. As a result, the Company is exposed to foreign exchange risk for working capital items denominated in Canadian dollars, Australian dollars, Euros, British Pounds and Hungarian Forints. At year end, working capital denominated in Canadian dollars was \$939 (1,278 CAD). A 1% change in Canadian to US dollar exchange rate will impact net income by approximately \$9 (13 CAD). At year end, working capital denominated in Australian dollars, Euros, British Pounds, Hungarian Forints, and Chinese Yuan was not material.

The Company does not use forward contracts for trading or speculative purposes. Foreign exchange contracts are recorded at fair value with changes in fair value recognized through earnings and are included in "Foreign exchange gain (loss)" in the consolidated statement of profit or loss. There were no foreign exchange contracts outstanding at December 31, 2018.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 34

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

18. Financial instruments and financial risk management (continued):

(e) Fair value of financial instruments:

The Company classifies its financial instruments measured at fair value using a fair value hierarchy defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company records cash and cash equivalents at fair value each reporting period by using "Level 1" under fair value hierarchy.

As of year end, carrying values of financial assets and liabilities approximate fair value.

19. Capital management:

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern so that it can continue to seek to provide returns for shareholders and benefits for other stakeholders, to maintain an optimal structure to reduce the cost of capital and to facilitate the growth strategy of the Company.

The Company monitors its capital management through analysis of near-term and mid-term cash flow expectations to ensure an adequate amount of liquidity and through the monthly review of financial results and business expectations. The Company considers the shareholders' equity to be the capital of the Company.

Based upon the dynamic nature of the technology markets that the Company engages in, and the low level of tangible assets required, the capital strategy is to carry a very low level of debt (including capital lease). As of December 31, 2018, the Company does not have covenants that require a maximum debt to equity ratio, and the ratio of debt to equity has not exceeded 5% at year-end in each of the last four years.

In February 2014, the Company entered into an agreement for a credit facility, which provides up to a maximum of \$3 million in an operating line of credit. The operating line of credit has been renewed annually and currently bears interest at the bank's prime rate minus 1.0%. The operating line of credit matures on July 31, 2019. No amount has been drawn from the facility in any year.

Where considered appropriate by Management and/or the Board of Directors, the Company may incur and carry long-term debt from time to time as a result of expansion activities, including acquisitions.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 35

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

20. Related party transactions:

The Company has related party relationships with its subsidiaries, key management personnel, and Board of Directors. Key management personnel include the Company's Chief Executive Officer, Chief Financial Officer and the top four senior officers for 2018 and 2017.

Key management personnel and Board member compensation:

	2018	2017
Salaries and benefits	\$ 1,882	\$ 1,633
Share based compensation	450	629
	\$ 2,332	\$ 2,262

The Board of Directors and Executive Officers participate in the Company's share option and restricted stock unit programs (note 12). During 2018, no options and 1,798 RSAs were granted to such persons (2017 - 1,497 options and 417 RSAs). Share options outstanding for key management personnel and Board members as of December 31, 2018 totaled 7,113 (2017 - 6,463). Restricted share awards outstanding for key management personnel and Board members as of December 31, 2018 totaled 2,828 (2017 - 1,765).

Key management personnel and Board member transactions:

As of December 31, 2018, key management personnel, board members and entities to which certain board members are related, controlled 31.1% (2017 - 30.2%) of the voting shares of the Company.

A number of Board members, or their related parties, hold positions in other companies that result in them having control or significant influence over these companies.

In 2016, Jonathan Ladd, Chairman of the Board of the Company was engaged by the Company to act as a Senior Strategic Advisor to the CEO at an hourly rate plus 800 thousand options as share-based compensation whereby the options vest equally over a 48-month period.

For the period January 1, 2018 through December 31, 2018, the Company incurred short term compensation expense in the amount of \$84 (2017 - \$178) for duties performed by Mr. Ladd as well as \$22 (2017 - \$47) in travel and other business related expenses associated with this service agreement. These expenses are located within the General and Administrative line item of the Consolidated Statement of Profit or Loss. Of these expenses, \$10 was unpaid as of December 31, 2018 (2017 - \$21) and is located within the Accounts Payable and Accrued liabilities line item of the Consolidated Statement of Financial Position.

The options issued to Mr. Ladd in connection to his role as Senior Strategic Advisor have a fair value of \$144 (209 CAD) as of the options' grant date, January 18, 2017. Related share based compensation expense recognized within the General and Administrative line item of the

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 36

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

20. Related party transactions (continued):

Consolidated Statement of Profit or Loss for year ended December 31, 2018 totals \$30 (2017 – \$55). Information relating to calculation of fair value can be found in note 14(f).

The terms and conditions of this transaction with Mr. Ladd were no more favorable than those available, or which might reasonably be expected to be available, in similar arrangements with non-Board members related to the Company on an arm's length basis.

21. Goodwill impairment:

The Company carried goodwill of \$143 at December 31, 2018 and 2017. For the purpose of impairment testing, goodwill is allocated to the Company's only cash generating unit (CGU), the agriculture CGU. In accordance with IFRS, goodwill is assessed for impairment at least annually, and more often if an event or circumstance indicates an impairment may have occurred.

At December 31, 2018, the closing price of the Company's common shares was \$0.80 (CAD) per share or \$0.58 (USD) per share. As such, total market value of the Company's common shares was \$69.8 million (USD) which was above the Company's total equity prior to impairment charges, of \$34.4 million (USD). While this information indicates recoverability, management tested goodwill for impairment as of December 31, 2018 for reasons described below.

Continued decline of the Agriculture industry in the near term was factored into the discounted cash flow model via beginning sales base and lower growth rates than those used in prior year's goodwill impairment estimates which impacted estimated future cash flows. Management believes the estimates and assumptions used in the impairment assessment are reasonable and in line with available market information but notes variations in such assumptions could result in materially different calculations of fair value and determinations of whether or not an impairment is indicated.

As of December 31, 2018 and 2017, the Company assessed goodwill for impairment using a discounted cash flow model in order to determine value in use. The most significant assumptions underlying the model prepared by management include: revenue, revenue growth, gross margins, operating expenses, income taxes, weighted average cost of capital, capital expenditures, estimates of future market share, competition, technological developments, interest rates and market trends. The assumptions incorporated into the discounted cash flow model reflect management's long-term view of the company's business and the market in which it competes. The discount rate used in management's analysis as of December 31, 2018 was 14.0%. Management's value in use assessment as of December 31, 2018 and 2017 concluded goodwill totaling \$143 was not impaired.

AgJunction Inc.

Notes to the Consolidated Financial Statements, page 37

Years ended December 31, 2018 and 2017

(Expressed in U.S. thousand dollars, except where noted)

22. Release of license restriction:

During the first quarter of 2017, the Company entered a strategic agreement with Hemisphere GNSS, Inc. (Hemisphere), a world-class provider of global navigation satellite systems (GNSS) technology, whereby the Company received a one-time payment of \$3,000 in exchange for releasing Hemisphere from a license restriction that prevented them from selling their GNSS products directly into the global agricultural market. This one-time payment is located within the Other income line of the Consolidated Statements of Profit or Loss.

23. Subsequent events:

The Company evaluated subsequent events through March 20, 2019, the date the consolidated financial statements were authorized to be issued by the Company's Board of Directors. On February 13, 2019, the Company settled a warranty claim in the amount of \$103 thousand. There were no other subsequent events through the evaluation date which merit disclosure.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements contained in this annual information form ("**Annual Information Form**") constitute forward-looking statements. These statements relate to future events or our future performance. All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. We believe the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this Annual Information Form should not be unduly relied upon. These statements speak only as of the date of this Annual Information Form.

In particular, this Annual Information Form contains forward-looking statements pertaining to, but not limited to, the following:

- financial results;
- new and emerging markets;
- customer adoption of technology and products;
- technological developments;
- plans to develop existing and create new customer relationships;
- plans to invest in relationships with original equipment manufacturers and value added resellers;
- sources of competition;
- benefits to be derived from launching HandsFreeFarm.com;
- opportunities to reduce customer costs;
- drivers of future success;
- market drivers of product innovation;
- adequacy of facilities;
- dividend policy;
- plans to invest resources in research and product development;
- focus on international expansion and its anticipated effect on growth opportunities;
- opportunities to mitigate seasonality;
- our business strategy and benefits to be derived therefrom;
- expectations regarding the ability to raise capital; and
- research and capital expenditures programs.

The actual results could differ materially from those anticipated in these forward-looking statements as a result of, but not limited to, the risk factors set forth below and elsewhere in this Annual Information Form:

- negative conditions in the agricultural, general economic and financial markets;
- inability to introduce new technology and new products in a timely manner;
- departure of key personnel;
- competition;
- reliance on key suppliers and third parties;
- availability of key supplies and components;
- changes in the Global Navigation Satellite System ("GNSS") and other systems outside of our control;
- costs to purchase GNSS and other components could increase significantly;
- misappropriation of proprietary information;
- changes in income tax laws and other government regulations;
- political uncertainty, tariffs and other trade barriers;
- losses from credit exposures;
- product liability;
- incorrect assessments of the value of acquisitions;
- fluctuation in foreign exchange or interest rates;
- conflicts of interest;

- successful development of new and emerging markets that we serve;
- damage or loss of use of physical facilities;
- legal claims for the infringement of intellectual property and other claims;
- other legal risks;
- stock market volatility and market valuations;
- cyber-security risks; and
- other factors discussed under "Risk Factors".

With respect to forward-looking statements contained in this document, we have made assumptions regarding, among other things: future technological developments; availability of key supplies, components, services, networks and developments; future exchange rates; the cost of expanding AgJunction's product lines; the impact of increasing competition; the nature and outcome of legal proceedings; the continuity of existing business relationships; conditions in general economic and financial markets; the sufficiency of budgeted capital expenditures in carrying out planned activities; the availability and cost of labour and services; that AgJunction's future results of operations will be consistent with past performance and management expectations in relation thereto; the continued availability of capital at attractive prices to fund future capital requirements relating to existing assets and projects; ability to obtain financing on acceptable terms; future operating costs; that counterparties to material agreements will continue to perform in a timely manner; and that there are no unforeseen events preventing the performance of contracts.

Management has included the above summary of assumptions and risks related to forward-looking information provided in this Annual Information Form in order to provide shareholders with a more complete perspective on AgJunction's current and future operations and such information may not be appropriate for other purposes. Readers are cautioned that the foregoing lists of factors are not exhaustive. The forward-looking statements contained in this Annual Information Form are expressly qualified by this cautionary statement. Readers should also carefully consider the matters discussed under the heading "*Risk Factors*" in this Annual Information Form. Except as required by law, we undertake no obligation to publicly update or revise any forward-looking statements.

GENERAL MATTERS

This Annual Information Form contains company names, product names, trade names, trademarks and service marks of AgJunction and other organizations, all of which are the property of their respective owners.

CORPORATE STRUCTURE

AgJunction Inc. (the "**Corporation**", "**AJX**", "**AgJunction**", "**us**", "**we**", or "**our**", and where the context requires, also includes our predecessors and our subsidiaries) was incorporated as Canadian Systems International Inc. pursuant to the *Business Corporations Act* (Alberta) (the "**ABCA**") on July 31, 1990. On October 26, 1992, the Corporation changed its name to Communication Systems International Inc. On June 21, 2000, the Corporation changed its name to CSI Wireless Inc. On May 9, 2007, the Corporation changed its name to Hemisphere GPS Inc. On May 24, 2013, the Corporation changed its name to AgJunction Inc.

Effective April 30, 1996, the Corporation amended its articles to effect, among other things, a re-designation of the Corporation's Class A common shares to common shares of the Corporation ("**Common Shares**"), a stock split of the Common Shares on a 12,500 to 1 basis and to delete the "private company" share transfer restrictions. On May 23, 2013, the Corporation amended the "Other Provisions" contained in the articles of the Corporation to allow the Corporation to hold meetings of shareholders at any place within or outside of the Province of Alberta.

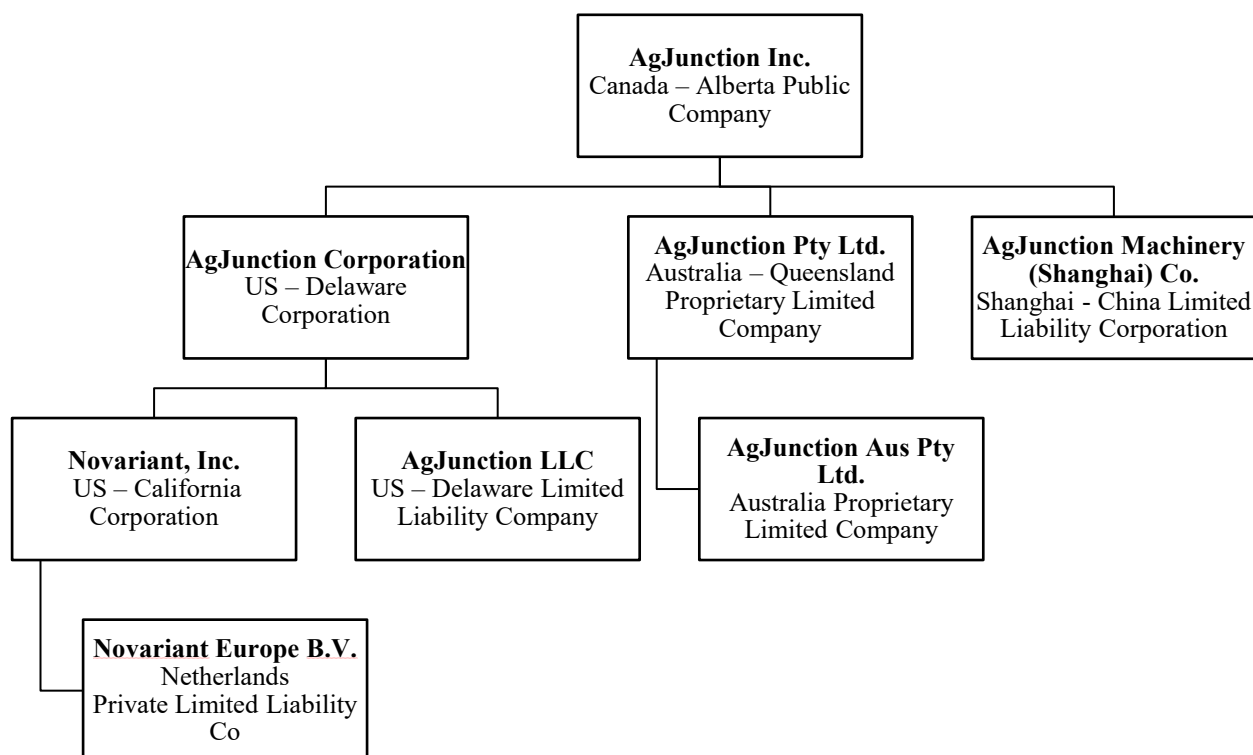

Our corporate head office is located at 9105 E Del Camino #115, Scottsdale, Arizona, 85258. The Corporation's registered office is located at 2400, 525-8th Avenue S.W., Calgary, Alberta T2P 1G1.

The Common Shares are listed and posted for trading on the Toronto Stock Exchange (the "**TSX**") under the symbol "**AJX**".

Inter-Corporate Relationships

AgJunction has two subsidiaries incorporated under the laws of the state of Delaware: AgJunction Corporation and AgJunction LLC. AgJunction Corporation is a wholly owned subsidiary of the Corporation and AgJunction Corporation holds 100% of the shares of AgJunction LLC. AgJunction has two subsidiaries incorporated in Australia. AgJunction Pty Ltd. is incorporated under the laws of the Australian State of Queensland. Its wholly-owned subsidiary, AgJunction AUS Pty Ltd. is incorporated under the laws of Australia. AgJunction has one subsidiary, AgJunction Machinery (Shanghai) Co., formed under the laws of China. On October 15, 2015, AgJunction completed a merger with Novariant, Inc. ("**Novariant**") a company incorporated under the laws of the state of California, whereby Novariant became the wholly owned subsidiary of AgJunction Corporation. Novariant has one subsidiary Novariant Europe B.V., an entity formed under the laws of the Netherlands.

The following chart sets forth, as of the date hereof, the name of each of our active subsidiaries and the jurisdiction of incorporation and laws of incorporation of each. Each of the subsidiary companies is a wholly owned subsidiary of its parent.

GENERAL DEVELOPMENT OF THE BUSINESS

This section discusses the major events or conditions that have influenced the general development of the Corporation over the last three completed financial years, as applicable, including significant acquisitions and dispositions that have occurred. All financial information referenced in this Annual Information Form is denominated in US dollars, unless otherwise indicated.

Three Year History

2016

On January 28, 2016, we announced that Mr. Bobac (Bob) Barjesteh was appointed to the newly formed position of Vice President, Mergers and Acquisitions, Intellectual Property and General Counsel (U.S.).

On March 28, 2016, we announced that Mr. Michael Manning was appointed Chief Financial Officer and Senior Vice President. Mr. Manning was previously Interim Chief Financial Officer and Senior Vice-President.

On June 28, 2016, we announced the global strategic partnership with TeeJet Technologies ("**TeeJet**") whereby AgJunction became the preferred steering supplier for TeeJet's range of precision farming solutions.

On July 5, 2016, we announced that we had engaged Liolios Group to lead an expanded strategic investor relations and financial communications program for AgJunction.

On November 14, 2016, we announced that effective December 1, 2016, Scott Edmonds, Lori Ell and Ryan Levenson were appointed to our board of directors (the "**Board**"). We also announced that Mr. John M. Tye III and Mr. Mark Anderson had resigned from our Board.

On December 6, 2016, AgJunction released the IntelliFlow2 application controller at the National Agricultural Aviation Association's annual convention. IntelliFlow2 replaces the current IntelliFlow product with a number of advancements, including a much smaller size and more robust enclosure, capable of better withstanding the harsh environment of an agricultural aircraft. Additionally, IntelliFlow2 is designed to control both liquid and dry gate systems using a single electronic control unit, enabling pilots to switch between liquid and dry application with the press of a button.

On December 19, 2016, we announced our purchase of the business assets, software, hardware, intellectual property and manufacturing rights of the GAC2 controller product from one of our long-term supply partners, Forkworks.

2017

On February 27, 2017, we announced that we had entered into a letter of intent to licence certain of AgJunction's automated steering patents to Reichardt GmbH Steuerungstechnik. The letter of intent set forth terms under which the parties were to negotiate a non-exclusive worldwide license to certain AgJunction patents in exchange for a license fee. A definitive agreement has not yet been completed.

On March 20, 2017, we announced that we entered into a new strategic agreement with Hemisphere GNSS, Inc. ("**Hemisphere**"). For a one-time payment received by AgJunction and a new long-term supply agreement, AgJunction agreed to release Hemisphere from a license restriction that prevented them from selling their GNSS products directly into the global agricultural market. Supply and market restriction agreements previously created between AgJunction and Hemisphere ended in 2016 while the market restriction agreements continued indefinitely.

On June 15, 2017, we announced that Mr. Jeff Morris was appointed our Vice President and Chief Marketing Officer. His title was later changed to Senior Vice President and Chief Marketing Officer on November 10, 2017.

On June 27, 2017, we announced that we had repurchased and returned to treasury for cancellation 7,852,989 of our Common Shares under an arm's length private transaction for consideration of \$1,766,923.

On November 7, 2017, we announced that Dr. M. Brett McMickell, Ph.D. was appointed our Senior Vice President of Global Product Development.

2018

On January 2, 2018, we filed a patent infringement lawsuit in the Western District of Texas against Raven Industries, Inc. ("**Raven**"). The lawsuit alleged that Raven products violated three of our patents related to automated mechanical steering, implement steering, and system calibration technologies. On July 11, 2018, we reached a mutually agreeable business solution with Raven, whereby Raven was granted a non-exclusive license to a significant portion of our extensive patent portfolio.

On January 8, 2018, we launched REBEL, an affordable, all-in-one autosteering solution that is simple-to-use and simple-to-buy. Launched under the Outback Guidance brand, REBEL was the first step in AgJunction's commitment to expand the hands-free revolution to every farmer through its commitment to make autosteering more affordable.

On March 13, 2018, we entered into a bulk purchase order with a customer to deliver products for an aggregate purchase price of approximately \$55 million. Deliveries and payments under the purchase order will occur between July 1, 2018 and June 30, 2019.

On April 12, 2018, we launched our industry's first online store, HandsFreeFarm.com, a web marketplace which provides low-cost precision agriculture solutions to U.S. farmers, opening a new market to smaller farms for our products. In conjunction with launching our online store, we released a new product, RANGER™ which is a complete low-cost GPS guidance solution.

On April 17, 2018, we announced the creation of two technology Centers of Excellence, one based in Scottsdale, Arizona and the other based in Brisbane, Australia. The technology hubs will accelerate innovation in developing low-cost, simple-to-use precision agriculture solutions for farmers. Both Centers of Excellence were established and fully functional as of June 1, 2018.

On August 13, 2018, we introduced Wheelman™ which is a complete, do-it-yourself autosteering system for farm equipment for under \$4,000. Wheelman™ is available online and is designed to allow for installation in less than an hour on most equipment.

On September 4, 2018, we closed the sale of our Outback Guidance business and assets to Hemisphere, which included the sale of the Outback Guidance® brand, the REBEL™ autosteering products, and our Hiawatha, Kansas and Winnipeg, Canada facilities. As part of the transaction, we entered into a technology licensing agreement with Hemisphere whereby Hemisphere received a non-exclusive license to certain of our patents associated with the Outback business. The sale terms included a long term royalty-bearing, license agreement with Hemisphere whereby Hemisphere receives a non-exclusive license to certain of our intellectual property used in other Hemisphere products.

On November 8, 2018, we announced the relocation of our corporate headquarters from Hiawatha, Kansas to Scottsdale, Arizona as part of our overall strategy to align our costs with our business strategy.

On November 15, 2018, we closed the sale of our SATLOC® aerial guidance and flow control business to Texas Transland, LLC. The sale included all of our SATLOC assets and the SATLOC brand name.

On December 13, 2018, we entered into a development agreement with Mahindra & Mahindra Ltd. ("Mahindra") where we will jointly prepare statements of work for future development products that will outline specific deliverable and detailed commercial terms. Mahindra is the world's largest tractor manufacturer by volume.

SIGNIFICANT ACQUISITIONS

We did not complete any significant acquisitions during our most recently completed financial year for which disclosure is required under Part 8 of National Instrument 51-102 – *Continuous Disclosure Obligations*.

RECENT DEVELOPMENTS

On February 12, 2019, we announced the expansion of the Wheelman product line to include Wheelman Flex, a portable version of Wheelman that can be moved easily between farm equipment, further reducing the overall cost of outfitting a farming operation with autosteering. Additionally, the Wheelman product line offers install kits to work on over 850 makes and models of existing farm equipment.

On March 19, 2019, we announced the Whirl™ mobile app, the first precision autosteering mobile app that eliminates the need for an expensive display. The Whirl™ mobile app, is used to control Wheelman products and is available on iOS and Android mobile devices.

On March 20, 2019, we announced the departure of Mike Manning, Chief Financial Officer and a plan whereby Mr. Manning will assist in the transition to a new CFO through to the Corporation's annual shareholder meeting scheduled for May 10, 2019.

DESCRIPTION OF OUR BUSINESS

General

AgJunction, "*The Autosteering Company*TM" is a global leader of advanced guidance and autosteering solutions for precision agriculture applications. Its technologies are critical components in over 30 of the world's leading precision agricultural manufacturers and solution providers and it holds over 130 fundamental steering and machine control patents. AgJunction markets its solutions under leading brand names including Novariant®, WheelmanTM, and WhirlTM and is committed to advancing its vision by bringing affordable hands-free farming to every farm, regardless of terrain or size. AgJunction has locations in Arizona, Australia and California.

AgJunction's products and solutions offer accurate guidance and positioning, autosteering and machine control systems for the agriculture markets and are used throughout a farming operation during tilling, planting, spraying and harvesting. AgJunction's products and solutions enable a farmer's machine to precisely reach a pre-planned path and then "steer" the path with as little additional input from the farmer as possible. This requires a substantial expertise in technologies like GNSS, position and motion sensors, situational awareness technologies like lidar, radar and cameras etc., understanding hydraulics and machine control, and various types of vehicle communication protocols.

Industry Growth

Precision agriculture is a key component of the third wave of modern agricultural revolutions. The first agricultural revolution arrived during the advent of increased mechanization, from 1900 to 1930. The average farmer produced enough food to feed about 26 people during this time. The 1990s prompted the Green Revolution with new methods of genetic modification, which led to the average farmer producing enough food to feed about 155 people. It is expected that by 2050, the global population will reach about 9.6 billion, and food production must effectively double from current levels in order to feed that population. With new technological advancements in the agricultural revolution of precision farming, it is estimated that the average farmer will be able to product enough food to feed 265 people on the same acreage.¹

At the heart of precision agriculture is autosteering, and the majority of the 200,000 largest farms in the world (those greater than 1,000 acres/400 hectares) have adopted autosteering technology. The penetration of large farms and the adoption of autosteering in this segment has now created an opportunity to introduce such products to the the world's 10 million smaller annual crop farms (between 10 – 1,000 acres/4 - 400 hectares), where autosteering is relatively rare due to the expense and complexity of systems to date.² Moreover, autosteering allows farmers to focus on farming, not steering, reducing the dependence on expert labor and thus improving the efficiency of farm machinery and as a result crop yields and revenue and profits per acre.

In addition to continuing to provide autosteering technology to large farmers with complex, high value requirements, AgJunction sees the smaller farm market as an untapped opportunity to help all farmers prosper with precision agriculture and a market where we have established first mover advantage, by providing not just all of the benefits of our more complex solutions, but by packaging our product into a self-installed generic solution (Ranger and Whirl) delivered through the auto-steering industries first ever web marketplace (Handfreefarm.com).

Business Strategy

Due to high costs and complexity, autosteering is currently sold as an option on only a fraction of new machines purchased each year and mostly to large farms. This low penetration of autosteering solutions is true for the large machine secondary market as well. As a result, most farm equipment around the world, especially on smaller farms, does not provide for autosteering.

Our strategy is to meet the growing appetite for autosteering with two channels to market:

¹ https://en.wikipedia.org/wiki/Precision_agriculture

² <http://ageconsearch.tind.io/record/249773/err-217.pdf>

1. Direct-to-Farmers: expanding the secondary market by providing low-cost, simple autosteering solutions sold directly to farmers online; and
2. Indirect-to-Farmers: becoming the supplier of choice for machine manufacturers with products that can be used across their product lines.

Direct-to-Farmers:

Success in our direct-to-farmers strategy requires uniquely branded simple, low-cost autosteering products produced in volumes, delivered through a web-based marketplace backed by cost-effective remote support to farmers.

Our direct-to-farmers approach delivered through an e-commerce platform is new in the precision agriculture market. Traditionally, precision agriculture technology has been sold face-to-face through dealer networks. This approach however was not effective in reaching the owner/operators of small farms (less than 1,000 acres), due to price, complexity and branding limitations. As a result, we introduced the HandsFreeFarm.com e-commerce site in 2018 to meet the needs of this market, with a product which addresses the historical limitations listed above.

In 2018, the Corporation introduced Wheelman™ Pro, the first low-cost, simple-to-use complete autosteering solution that farmers can purchase online and install themselves. In 2019, the Corporation expanded the product line to include a portable version, Wheelman™ Flex, and the Whirl™ mobile application, the first autosteering display application that runs natively on both iOS and Android mobile devices.

In 2018, the Corporation established a 24/7 customer support team to respond to inquiries through HandsFreeFarm and to provide support for Wheelman products. The Whirl™ mobile application enables our support team to diagnose issues remotely and provide support remotely to our customers.

Indirect-to-Farmers:

Original equipment manufacturers ("OEMs") in agriculture typically sell autosteering as a high-priced, add-on option to select customers. As a supplier to these OEM's, AgJunction is pursuing the opportunity to work with select OEM's to incorporate autosteering as a standard capability across their product lines. Success with this strategy requires strategic relationships, the right technology and platform architecture, flexible business models, and the ability to cost-effectively manufacture software and hardware to OEM quality standards. AgJunction has many years of experience in supplying such solutions to these OEM's and our indirect strategy is intending to build upon and expand this success.

Strategic relationships with OEM's continue to be key to the Corporation's success. In 2018, AgJunction entered into a new development agreement with the largest tractor manufacturer in the world, Mahindra. This agreement is evidence that OEM's value AgJunction's ability to innovate and deliver accurate guidance and positioning, autosteering, and machine control solutions and the intellectual property protection that the Corporation's patent portfolio affords them. To accelerate integration, the Corporation will continue to advance its modularized platform and data communication and software management infrastructure.

For equipment manufacturers that are new to autosteering, the Corporation provides autosteering packaged solutions for equipment manufacturers to use with their equipment. Starting in 2019, the Corporation extended its packaged offering to include white-label versions of the Wheelman and Whirl technology that allow OEM's and value-added resellers ("VARs") to bring a low-cost simple solution to their customers around the world.

Autosteering Solutions

AgJunction provides a portfolio of software and hardware autosteering solutions built off a common platform architecture. In 2018, the Corporation extended that architecture to include native iOS and Android mobile applications integrated with a cloud-hosted infrastructure along with continuing innovations in guidance and machine control to enable our customers to autosteer more cost-effectively.

The Corporation's portfolio supports its direct-to-farmer and indirect-to-farmer business strategies.

Direct-to-Farmer Products:

For the direct-to-farmer products sold online through HandsFreeFarm.com, the solutions need to be low-cost, simple-to-use, easy-to-install, reliable, and remotely supportable. The first three products on HandsFreeFarm.com were designed with these requirements in mind.

- **RANGER™ guidance solution** was released in April 2018 and is a complete low-cost GPS guidance solution. RANGER™ is ready to use right out of the box and generally installs in just minutes. The intuitive, patented steering guide shows visual cues in advance affording farmers the time to focus on farming instead of focusing on a map display. The system provides the essential accuracy for spraying, spreading, tilling and planting crops like soybeans and supports both straight line and free-form contours useful for terraces and irregular fields.
- **Wheelman™ autosteering systems** (Wheelman Pro and Wheelman Flex) and Whirl™ software were released in the second half of 2018 as a new way for farmers to automatically and accurately steer farm equipment. These new products are sold direct-to-farmer, and deliver a complete, affordable do-it-yourself autosteering system that can be ordered online and installed in less than an hour on most equipment. The Wheelman autosteering systems are powered by our Whirl software making it easy to operate the Wheelman autosteering systems, collect and store farming data, and inform farmers about their farming efficiency. The Whirl app is a free download for iOS and Android devices. The Whirl app allows farmers to use their existing smart devices (phone, tablet, etc.) as the display, eliminating the need for an expensive custom display.

In 2018, the Corporation transitioned away from its independent dealer network and focused its direct-to-farmer business exclusively online with the sale of the Outback Guidance business to Hemisphere, which included the sale of the Outback Guidance® brand, the REBEL™ autosteering products, and our Hiawatha, Kansas and Winnipeg, Canada facilities. AgJunction retained the intellectual property and engineering staff related to these products and continues to provide the software for the REBEL autosteering products to Hemisphere through a licensing/royalty arrangement.

Indirect-to-Farmer Products:

For the indirect-to-farmer solutions, the Corporation needs to both service the unique requirements of strategic OEM's seeking to standardize on AgJunction for autosteering across their product line as well as OEMs and VARs new to autosteering who want to autosteer-enable their existing equipment.

For strategic OEM's, the AgJunction platform supports OEM-tailored solutions that can be delivered on AgJunction hardware or configured for OEM hardware. The modular architecture allows the Corporation to tailor the solution to meet the OEM's requirements and deliver unique competitive advantage.

For OEMs and VARs seeking to add autosteering to their existing equipment, the Corporation provides three levels of autosteering solutions depending on the underlying technology the OEM/VAR supports.

- **Wheelman "white-label"** for simple, low-cost autosteering for OEM/VAR. The Wheelman system provides low-cost, simple autosteering that is simple to integrate with nearly any equipment with a wheel. Through the AgJunction platform, Wheelman and Whirl can be configured and rebranded to match the OEM/VAR's standards.
- **ECU-S1 hardware controller family** of sophisticated autosteering for OEM/VAR. The award-winning ECU-S1 family of autosteering solutions includes the ECU-S1 autosteering controller, the *SimpleSteer™* web browser-based autosteering display and the MDU-G4 steering wheel motor. The ECU-S1 family includes support for over 1000 install kits and a variety of GNSS inputs.
- **Soft-ECU software controller** for sophisticated autosteering for steering-enabled OEM/VARs. By enabling autosteering to be delivered as a pure software solution, the Soft-ECU software controller solution lets autosteering embed seamlessly and completely into the OEM/VAR's equipment offering.

Air Agriculture Products

On November 15, 2018, we closed the sale of our SATLOC® aerial guidance and flow control business to Texas Transland, LLC. The sale included all SATLOC assets and the SATLOC brand name.

Research and Product Development and Specialized Skills and Knowledge

The focus of AgJunction's research and development team is the expansion of our core machine control solutions and positioning sensor technologies and on developing new products and applications. We believe that our research and product development capabilities are critical factors contributing to our success and are primary barriers to potential competitors' entry into the machine control agricultural industry. Accordingly, we intend to continue investing significant resources in research and product development.

Our research and development team include individuals with specialized skills in the following disciplines, among others: electrical engineering, radio-frequency engineering, geomatics engineering, vision engineering, mechanical design, system architecture, software design and cloud computing services. Although the availability of these resources is limited, we have not experienced significant problems accessing the required skill and knowledge required for our research and development activities.

Intellectual Property and Intangible Properties

We have developed a significant portfolio of intellectual property including trade secrets, technology, product designs, software, patents, trademarks and brand names, among others. As of December 31, 2018, on a consolidated basis, we hold approximately 185 patents and patents pending in the USA, Canada, Europe and Australia in addition to a few other international filings.

Marketing, Sales and Distribution

Our strategy for sales and distribution of our products has historically been to sell our products to and through large OEMs and VARs. This, in combination with our new direct-to-farmer online strategy eliminates the need to devote significant direct resources to developing distribution channels on our own. This enhanced strategy will continue to enable us to participate in a broader range of high-growth commercial and consumer GNSS-enabled markets.

AgJunction serves global markets. Of our 2018 sales, 33%% (2017 – 57%) occurred in North America, 64% (2017 – 38%) occurred in Europe, the Middle East and Africa, 3% (2017 – 5%) occurred in Asia and the Pacific, including Australia. Our 2018 sales information includes sales from the Outback and Satloc products. From a customer's perspective, the primary benefits provided by our products are increased accuracy in navigation, improvements in productivity, increased safety and savings in costs and time. For example, in farming applications, our autosteering products result in savings to users through reduced overlap and reduced driver fatigue. In addition, our products can be used in conjunction with precision farming techniques focused on improved efficiency, productivity and yields such as "strip-till" farming which requires highly accurate planting and application of fertilizer and other chemicals. Significant cost savings can be achieved by using these types of precision farming techniques.

Competition

We have competitors in each of our target markets and expect competition to intensify as acceptance and awareness of machine control technology increases. One of our largest competitors is Trimble Navigation Limited ("**Trimble**"). Trimble's products currently address the survey and mapping, tracking and communications, navigation, precision agriculture, construction, and military systems markets. Other competitors offering products similar to those of AgJunction include Topcon Positioning Systems Inc. and Raven. In addition, we expect to face competition from new market entrants over time.

The Corporation's direct-to-farmer and indirect-to-farmer strategies position AgJunction favorably versus our traditional competitors. Historically, the clear return-on-investment for autosteering has led to wide adoption by the 200,000 large farm operators who can justify the high price and can deal with the complexity by summoning dealer support. Our strategies enable us to bring autosteering to 10 million more farmers globally that are underserved today.

For the secondary market, with the introduction of Wheelman at under \$4,000 in the U.S., AgJunction puts autosteering in reach economically to 1 million more U.S. farmers. Unlike our competitors who depend on expensive dealer channels with limited reach to sell their complex products, AgJunction sells Wheelman through the HandsFreeFarm online store.

For the new equipment market, AgJunction's product architecture allows our technology to be readily integrated into our OEM and VAR partner's offerings. Unlike our competitors who require manufacturers to purchase complete systems, our modular packaging allows our partners to adopt our technology and incorporate it more broadly in their product line.

Manufacturing

We utilize outsourced manufacturing partners in lower cost regions in the procurement of materials per our specification, applying highly skilled labour and best in class manufacturing practices to manufacture, test and directly ship products to our customers. We utilize our third-party logistics facility for some product configuration activities as needed and utilize outsourced service and repair centers in Europe and North America.

Our operations organization provides production engineering services internally and for our external manufacturing partners to ensure that our products can be manufactured at the highest level of quality and test coverage, technical production problems are corrected and averted, and alternative production methodologies are introduced to remain competitive. In addition, vendor and subcontractor qualifications are reviewed by the operations engineering and quality group whilst test engineering provides test methodologies, equipment and software and guides our internal engineering and our external manufacturing partners in achieving specifications and ensuring product integrity. We carefully select, classify and qualify our suppliers. Achieving multiple supply sources for all components used in our assemblies is our ultimate and desired goal, and is evaluated on a regular basis, but currently is not available in all circumstances. However, we do apply various risk mitigation solutions in dealing with single sourced components.

The continued utilization of our Enterprise Resource Planning system has assisted us to improve the effectiveness and efficiency of our operations, including inventory management and manufacturing. In addition, we have undertaken a number of initiatives focused on improving our effectiveness in quality, procurement, inventory management, design cost, product-life cycle management, among others.

Optimize Product Cost:

We will continue to aggressively pursue opportunities to reduce customer costs through product design, manufacturing efficiencies, procurement and logistics strategies, with an objective to balance functionality, performance and quality with customer needs.

Enhance Manufacturing Quality and Capacity:

All manufacturing activities have been outsourced to trusted partners that procure materials and manufacture our products to our specification. These outsourcing partners carry the highest level of quality certifications required by us and expected by our customers. This strategy allows us to reduce costs, gives us flexibility to both increase and decrease capacity according to demand and continue to provide a high-level of continuous process and quality improvements.

Quality Certification:

In respect to our internal quality process and procedures, we have received ISO 9001:2015 certification for our three sites in Fremont California, Scottsdale Arizona and Brisbane Australia, confirming the Corporation's commitment to improving customer satisfaction in all aspects of its operations. AgJunction received its ISO 9001:2015 from NQA USA, an accredited registrar that performs assessments of management systems against requirements of national and international standards for quality. The certification ISO 9001:2015 is valid until January 15, 2020 and is applicable to all facets of AgJunction operations - design, development, production and distribution of its precision agriculture hardware solutions and associated components.

Facilities

We conduct operations from leased facilities in Scottsdale, Arizona; Fremont, California and Brisbane, Australia; to assemble certain of our products, carry out research and development, sales and marketing, and finance and administration activities.

Cyclicality

The cyclical nature and competitiveness of the industry in which we sell and distribute our products may have an effect on the Corporations' ability to generate revenue and earnings. Our business tends to peak during the first six months of the year, drop off significantly in the third quarter and then demand for our products and services increases again in the fourth quarter. This volatility can create fluctuating demand for our products and services, which can have an adverse effect on the Corporation's business, financial condition, cash flow and results of operations.

Personnel

At December 31, 2018, we had 106 employees in total, with 45 in research and development, 17 in sales and marketing, 12 in operations and 32 in administrations. At December 31, 2018, we had 9 contractors in total working in various divisions.

Anticipated Changes in the Business

As at the date hereof and other than as disclosed herein, we do not anticipate that any material change in our business will occur during the balance of the 2019 financial year. See "*General Development of the Business*" and "*Recent Developments*".

Reorganizations

As at the date hereof and other than as disclosed herein, there have been no material reorganizations of the Corporation and or any of our subsidiaries within the three most recently completed financial years or proposed for the current financial year. See "*General Development of the Business*".

CAPITAL STRUCTURE

The Corporation is authorized to issue an unlimited number of Common Shares, an unlimited number of first preferred shares, issuable in series (the "**First Preferred Shares**") and an unlimited number of second preferred shares, issuable in series ("**Second Preferred Shares**"). As at March 29, 2019, an aggregate of 118,982,897 Common Shares, no First Preferred Shares and no Second Preferred Shares were issued and outstanding.

The following is a summary of the rights, privileges, restrictions and conditions attaching to each class of shares.

Common Shares

The holders of Common Shares are entitled to one vote at all meetings of our shareholders except at meetings of which only holders of a specified class of shares are entitled to vote. The holders of Common Shares are entitled to receive, subject to the prior rights and privileges attaching to any other class of our shares, such dividends as may be declared by us. Holders of Common Shares are entitled upon any liquidation, dissolution or winding-up of the Corporation, subject to the prior rights and privileges attaching to any other class of shares of the Corporation, to receive the remaining property and assets of the Corporation.

First Preferred Shares

Our Board may at any time and from time to time issue First Preferred Shares in one or more series, each series to consist of such number of shares as may, before the issuance thereof, be determined by the Board. The Corporation has no outstanding First Preferred Shares at this time.

The First Preferred Shares of each series rank on a parity with the First Preferred Shares of every other series with respect to accumulated dividends and return of capital. The First Preferred Shares shall be entitled to a preference over the Second Preferred Shares and the Common Shares and over any other shares of the Corporation ranking junior to the First Preferred Shares with respect to priority in the payment of dividends and in the distribution of assets in the event of the liquidation, dissolution or winding-up of the Corporation, whether voluntary or involuntary, or any other distribution of our assets among our shareholders for the purpose of winding-up our affairs.

The rights, privileges, restrictions and conditions attaching to the First Preferred Shares as a class may be added to, changed or removed but only with the approval of the holders of the First Preferred Shares given as specified in our articles.

Second Preferred Shares

Our Board may at any time and from time to time issue Second Preferred Shares in one or more series, each series to consist of such number of shares as may, before the issuance thereof, be determined by the Board. The Corporation has no outstanding Second Preferred Shares at this time.

The Second Preferred Shares of each series rank on a parity with the Second Preferred Shares of every other series with respect to accumulated dividends and return of capital. The Second Preferred Shares shall be entitled to a preference over the Common Shares and over any other shares of the Corporation ranking junior to the Second Preferred Shares with respect to priority in the payment of dividends and in the distribution of assets in the event of the liquidation, dissolution or winding-up of the Corporation, whether voluntary or involuntary, or any other distribution of our assets among our shareholders for the purpose of winding-up our affairs.

The rights, privileges, restrictions and conditions attaching to the Second Preferred Shares as a class may be added to, changed or removed but only with the approval of the holders of the Second Preferred Shares given as specified in our articles.

Shareholder Rights Plan

On March 19, 2010, our Board approved the adoption of a shareholder protection rights plan, which was approved by our shareholders on May 18, 2010 and was re-approved by shareholders on May 15, 2013. On May 26, 2016, shareholders approved an amended and restated shareholders rights plan agreement (the "**Shareholder Rights Plan**"), which was amended in response to the legislative changes to Canada's take-over bid regime, which were adopted in 2016. The Shareholder Rights Plan is effective until the close of business of the annual general meeting of shareholders of AgJunction to be held on May 10, 2019 (the "**AGM**"), unless it is reconfirmed at the AGM or it is otherwise terminated in accordance with its terms. After consideration, the Board determined not to place the Shareholder Rights Plan before shareholders at the AGM for reconfirmation. Accordingly, the Shareholder Rights Plan will terminate immediately following the AGM.

Prior Sales

During the year ended December 31, 2018, we did not issue any securities, other than 2,538,130 Common Shares under the restricted share plan of the Corporation.

DIVIDEND POLICY

We have not paid any dividends on the Common Shares during the last three financial years. The future payment of dividends will be determined by the Board, and will depend on the financial needs of the Corporation to fund future growth, the general financial condition of the Corporation, capital expenditure requirements, potential acquisition opportunities, debt position and other conditions that the Board may consider relevant at such future time, including the satisfaction of the liquidity and solvency tests imposed by the ABCA for the declaration and payment of dividends. The amount of future cash dividends, if any, may also vary depending on a variety of factors, including capital expenditure requirements, general and administrative costs and foreign exchange rates.

ESCROWED SECURITIES AND SECURITIES SUBJECT TO CONTRACTUAL RESTRICTION ON TRANSFER

To our knowledge, as of March 29, 2019, the only Common Shares held in escrow or subject to contractual restriction on transfer are the following:

Designation of class	Number of securities held in escrow or that are subject to a contractual restriction on transfer	Percentage of class
Common Shares (restricted shares ⁽¹⁾)	3,276,348	2.8%

Note:

- (1) These Common Shares are issued to directors, officers and other service providers of ours and are subject to vesting and risk of forfeiture under the terms of our restricted share plan.

MARKET FOR SECURITIES

Our Common Shares are listed and posted for trading on the TSX under the symbol "AJX".

The following table shows the price range and trading volume of the Common Shares as reported by the TSX for the periods indicated:

Period	High (Cdn\$)	Low (Cdn\$)	Volume
<u>2018</u>			
January	0.54	0.495	915,479
February	0.54	0.48	2,999,500
March	0.90	0.50	1,492,928
April	0.91	0.80	952,318
May	0.90	0.84	880,515
June	0.90	0.81	353,107
July	0.87	0.76	291,875
August	0.93	0.81	1,046,757
September	0.91	0.67	638,452
October	0.88	0.80	520,430
November	0.86	0.70	817,494
December	0.83	0.70	1,642,652
<u>2019</u>			
January	0.86	0.75	342,163
February	0.79	0.67	434,326
March 1 – March 29	0.75	0.63	482,940

DIRECTORS AND OFFICERS

The names, provinces/states and countries of residence, positions with the Corporation and principal occupation during the last five years of the directors and officers of the Corporation are set out below and in the case of directors, the period each has served as a director of the Corporation.

Name, State/Province and Country of Residence	Position	Principal Occupation During the Last Five Years
Scott B. Edmonds ⁽¹⁾⁽²⁾⁽³⁾ British Columbia, Canada	Director since December 2016 and Chair of the Audit Committee	Mr. Edmonds is an independent consultant and corporate director who has served on a variety of public company boards since the early 2000's, including with high tech hardware manufacturers Vecima Networks Inc. (TSX:VCM) and Apivio Systems Inc. (TSX.V:APV). Mr. Edmonds was formerly the CEO of two high tech hardware companies, Photon Control Inc. (TSX:PHO) and Webtech Wireless Inc. (TSX:WEW) and spent ten years with The Walt Disney Company in France and Asia. Mr. Edmonds qualified as a Chartered Accountant, holds a BBA in Finance, has completed the Executive Development Program at the Kellogg School and holds an ICD.D designation from the Institute of Corporate Directors.
Lori S. Ell ⁽¹⁾⁽²⁾⁽³⁾ Alberta, Canada	Director since December 2016 and Chair of the Board	President of Growing Ideas, a business consulting practice located in Calgary, Alberta. From 2004 to 2012, Ms. Ell was the President of Agristar Inc, an agri-food manufacturing company. Prior thereto, Ms. Ell was CFO for Quortech Solutions Ltd. a technology company. Ms. Ell is a Certified Public Accountant, holds a Bachelor of Management degree, and holds an ICD.D designation from the Institute of Corporate Directors. Ms. Ell sits on the board of directors for the Calgary Co-op, Wild Rose Brewery and Sawridge Group. She is a director on two Canadian Federal Departmental Audit Committees – Crown-Indigenous Relations and Northern Affairs Canada and Indigenous Services Canada.
Jonathan W. Ladd ⁽³⁾ New Hampshire, USA	Director and Senior Strategic Advisor since October 2015 and Chair of the Corporate Governance Committee since December 2018	Independent Business Consultant, a Board Member and Senior Strategic Advisor for AgJunction since October 2015. Director of Novariant Inc. from October 2012 to October 2015. Prior thereto, over 35 years of senior management experience in the GPS/GNSS and the wireless industries, including Chief Executive Officer and Chair at Brilliant Telecommunications, President and Chief Executive Officer at NovAtel Inc., senior executive positions at Thales Navigation, Magellan Inc. and Ashtech Inc. and board positions at Hemisphere, Trusted Positioning Inc., Nexteq Navigation Corporation, RF Monolithics and Ashtech A/O.
Ryan J. Levenson Georgia, USA	Director since December 2016 and Chair of the Compensation Committee	Founding Principal, Managing Member and Portfolio Manager of Privet Fund Management LLC since 2007. Mr. Levenson is a board member with Hardinge, Inc., Cicero Inc. and Great Lakes Dredge and Dock Corp.
Jose F. Suarez ⁽¹⁾⁽²⁾ California, USA	Director since October 2015	Managing Director of Patricia Industries (formerly, Investor Growth Capital, Inc). Prior thereto, based in Investor Growth Capital, Inc.'s Asian office managing a broad range of investments both in the public markets and in privately negotiated situations.
David E. Vaughn California, USA	Director, President and Chief Executive Officer since October 2015	President and Chief Executive Officer of AgJunction since October 2015. Prior thereto, President and Chief Executive Officer of Novariant from May 2012 to October 2015. Prior thereto, over 20 years of senior executive experience in precision guidance and agri-businesses similar to AgJunction. His roles included executive-level positions with Topcon

Name, State/Province and Country of Residence	Position	Principal Occupation During the Last Five Years
		Positioning Systems Inc., NovAtel Inc., Magellan Inc. and Trimble Navigation Limited. He has served on the board of directors for a number of technology corporations and has extensive professional experience in the high-tech sector, including serving in an executive capacity with Apple Inc. and Hewlett-Packard.
Bobac (Bob) A. Barjesteh Colorado, USA	Vice President, Mergers and Acquisitions, Intellectual Property and General Counsel (US) since January 2016	Vice President, Mergers and Acquisitions, Intellectual Property and General Counsel (US) of AgJunction since January 2016. Managing Director and Chief Legal Officer with ClaroVia Technologies LLC from November 2012 to December 2015. Other roles included executive and management positions at 3M Company and Arthur Anderson LLC.
Mark S. Bittner California, USA	Senior Vice President of Global Sales and Customer Care since October 2015	Senior Vice President of Global Sales and Customer Care of AgJunction since October 2015. Over 30 years of sales management experience, serving in an executive role at Novariant from July 2012 to October 2015. Prior thereto, held executive positions at Topcon Positioning Systems Inc., Tierra S.p.A, Proxim Wireless, At Road and held other leadership roles at Trimble Navigation Limited and ExxonMobil.
Husam Kal California, USA	Senior Vice President of Global Operations since October 2015.	Senior Vice President of Global Operations of AgJunction since October 2015. Over 25 years of supply chain, operations and engineering experience, including executive roles at Novariant from July 2012 to October 2015 and TRIA Beauty, Inc. from August 2011 to November 2012. Prior thereto, held influential leadership roles at Trimble Navigation Limited, Proxim Wireless Corporation, Lucent Technologies, Inc. and Hypercom Corporation.
Michael A. Manning Missouri, USA	Senior Vice President and Chief Financial Officer since July 2015	Senior Vice President and Chief Financial Officer of AgJunction since July 2015. Interim CFO for Heartland Automotive from January to July 2015. Chief Financial Officer with Unitech Holdings from 2012 to 2014. Prior to joining AgJunction, Dr. McMickell served as Senior Director of Engineering in charge of Actuation Systems at Honeywell Aerospace. He brings experience from leading electrical, software, and mechanical system development companies. He was awarded the American Institute of Aeronautics and Astronautics (AIAA) Lawrence Sperry Award for his achievement in the advancement of small satellite technology. Dr. McMickell holds a Masters in Business Administration in Global Management from the Thunderbird School of Global Management. He received his Masters in Science and PhD in Aerospace and Mechanical Engineering from the University of Notre Dame. He also received a Bachelor of Science in Mechanical Engineering from the University of Utah.

Notes:

- (1) Member of the Audit Committee.
- (2) Member of the Compensation Committee.
- (3) Member of the Corporate Governance Committee.

Our directors will hold office until the next annual general meeting of our shareholders or until each director's successor is appointed or elected pursuant to the ABCA.

As at March 29, 2019, our directors and officers as a group, beneficially owned or controlled or directed, directly or indirectly, 36,779,739 Common Shares or approximately 32.0% of the issued and outstanding Common Shares.

Cease Trade Orders, Bankruptcies, Penalties or Sanctions

No current director or executive officer of the Corporation has, within the last ten years prior to the date of this document, been a director, chief executive officer or chief financial officer of any issuer (including the Corporation) that: (i) while the person was acting in the capacity as director, chief executive officer or chief financial officer, was the subject of a cease trade or similar order or an order that denied the company access to any exemption under securities legislation, that was in effect for a period of more than thirty (30) consecutive days; or (ii) was subject to an order that was issued, after the director or executive officer ceased to be a director, chief executive officer or chief financial officer of an issuer, and which resulted in the issuer being subject to a cease trade or similar order or an order that denied the relevant issuer access to any exemption under securities legislation, for a period of more than thirty (30) consecutive days, which resulted from an event that occurred while that person was acting as a director, chief executive officer or chief financial officer of the issuer.

Other than disclosed below, no current director or executive officer or security holder holding a sufficient number of securities of the Corporation to affect materially the control of the Corporation has, within the last ten years prior to the date of this document, been a director or executive officer of any company (including the Corporation) that, while such person was acting in that capacity, or within a year of that person ceasing to act in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any

proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets;

- Mr. Vaughn acted as chief executive officer and a director of Soil and Topography Information, Inc. ("**STI**"), a Delaware corporation which was incorporated on October 19, 2010. STI entered into a security agreement dated February 10, 2010 with Pivotal Investment Partners I, L.P. ("**Pivotal**"). The security agreement secured a loan agreement between STI and Pivotal and a secured convertible promissory note in the principal amount of \$250,000. STI was formally dissolved on October 27, 2013, following a management approved assignment of assets in lieu of foreclosure in favor of Pivotal, through its assignee, Soil Data, LLC.
- Mr. Ladd acted as chief executive officer and a director of Brilliant Telecommunications, Inc. ("**Brilliant**"). On February 18, 2011, Brilliant reached an agreement regarding the sale of substantially all of its assets to Juniper Networks. Such sale was conducted via an assignment for the benefit of creditors' process under the laws of the State of California. As part of this process, all of Brilliant's assets were transferred to a trustee who then distributed the proceeds of the sale. Mr. Ladd resigned from his positions with Brilliant shortly after the agreement with Juniper Networks was reached. On or about August 9, 2011, one of Brilliant's former customers filed a lawsuit against Brilliant and Juniper Networks alleging breach of contract and unfair business practice. On or about September 28, 2011, a default judgment was entered by the court against Brilliant. No director or executive officer of Brilliant was ever named in such law suit and Mr. Ladd had no involvement nor any liability in connection with such law suit or any other proceeding.

No current director or executive officer or security holder holding a sufficient number of securities of the Corporation to affect materially the control of the Corporation has, within the last ten years prior to the date of this document, become bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or become subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold his or her assets.

No current director or executive officer or security holder holding a sufficient number of securities of the Corporation to affect materially the control of the Corporation has been subject to: (i) any penalties or sanctions imposed by a court relating to securities legislation or by a securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority; or (ii) any other penalties or sanctions imposed by a court or regulatory body that would likely be considered important to a reasonable investor in making an investment decision.

Conflicts of Interest

The directors and officers of the Corporation may, from time to time, be involved in the business and operations of other issuers, in which case a conflict may arise. See "*Risk Factors*".

The ABCA provides that in the event a director has an interest in a contract or proposed contract or agreement, the director shall disclose his interest in such contract or agreement and shall refrain from voting on any matter in respect of such contract or agreement unless otherwise provided under the ABCA. To the extent that conflicts of interests arise, such conflicts will be resolved in accordance with the provisions of the ABCA.

INTEREST OF MANAGEMENT AND OTHERS IN MATERIAL TRANSACTIONS

There were no material interests, direct or indirect, of our directors or executive officers, any person or company who beneficially owns or controls or directs, directly or indirectly, more than 10% of the outstanding Common Shares, or any known associate or affiliate of such persons, in any transaction within the three most recently completed financial years or during the current financial year that has materially affected or is reasonably expected to materially affect the Corporation. See "*Directors and Officers*".

INTERESTS OF EXPERTS

There is no person or company whose profession or business gives authority to a statement made by such person or company and who is named as having prepared or certified a statement, report or valuation described or included in a filing, or referred to in a filing, made under National Instrument 51-102 – *Continuous Disclosure Obligations* by us during, or related to, our most recently completed financial year other than RSM US LLP, AgJunction's auditors

appointed on April 8, 2015. RSM US LLP has confirmed that it is independent within the meaning of the Rules of Professional Conduct of the Professional Chartered Accountants of Alberta.

In addition, neither RSM US LLP, nor any director, officer or employee of RSM US LLP, is or is expected to be elected, appointed or employed as a director, officer or employee of the Corporation or of any associate or affiliate of the Corporation.

MATERIAL CONTRACTS

As of December 31, 2018, we currently have no material contracts in place that were entered into outside of the ordinary course of business.

AUDITORS, TRANSFER AGENT AND REGISTRAR

RSM US LLP, Suite 400, 4801 Main Street, Kansas City, Missouri, are the auditors of the Corporation.

Computershare Trust Company of Canada, 600, 530 – 8th Avenue S.W., Calgary, Alberta, T2P 3S8, is the Transfer Agent and Registrar of the Corporation.

AUDIT COMMITTEE INFORMATION

Our audit committee (the "**Audit Committee**") is appointed by the Board to assist the Board in fulfilling its oversight responsibilities. The Audit Committee is composed of three external, independent directors. All three are financially literate, meaning they are able to read and understand financial statements that present a breadth and level of complexity at accounting issues that are generally comparable to the breadth and complexity of the issues that can reasonably be expected to be raised by the financial statements of AgJunction. The Audit Committee's Charter is available in Appendix "A" to this Annual Information Form.

Audit Committee Members

Scott B. Edmonds, Vancouver, British Columbia

Mr. Edmonds has over 30 years' experience in various operational, strategic and financial leadership roles in both large and small companies in Canada, Europe and Asia and currently is an independent consultant and corporate director who has served on a variety of public company boards since the early 2000's, including with high tech hardware manufacturers Vecima Networks Inc. (TSX:VCM) and Apivio Systems Inc. (TSX.V:APV). Mr. Edmonds was formerly the CEO of two high tech hardware companies, Photon Control Inc. (TSX:PHO) and Webtech Wireless Inc. (TSX:WEW) and spent ten years with The Walt Disney Company in France and Asia. Mr. Edmonds qualified as a Chartered Accountant, holds a BBA in Finance, has completed the Executive Development Program at the Kellogg School and holds an ICD.D designation from the Institute of Corporate Directors.

Lori S. Ell, Calgary, Alberta

Ms. Ell has over 25 years of broad-based executive experience working with multi-billion dollar, start-up, and mid-market companies in diverse industries including oil & gas, technology, and food manufacturing. Her most recent position is President of Growing Ideas, a business consulting practice located in Calgary, Alberta. From 2004 to 2012, Ms. Ell was the President of Agristar Inc, an agri-food manufacturing company. Prior thereto, Ms. Ell was CFO for Quortech Solutions Ltd. a technology company. Ms. Ell is a Certified Public Accountant, holds a Bachelor of Management degree, and holds an ICD.D designation from the Institute of Corporate Directors. Ms. Ell sits on the board of directors for the Calgary Co-op, Wild Rose Brewery and Sawridge Group. She is a director on two Canadian Federal Departmental Audit Committees – Crown-Indigenous Relations and Northern Affairs Canada and Indigenous Services Canada.

Jose F. Suarez, Atherton, California

Jose Suarez is the managing director of Patricia Industries (formerly, Investor Growth Capital, Inc). Prior thereto, based in Investor Growth Capital, Inc.'s Asian office managing a broad range of investments both in the public markets and in privately negotiated situations.

Pre-approval Policies and Procedures – Audit and Non-Audit Services

We have adopted policies and procedures with respect to the pre-approval of audit and permitted non-audit services to be provided by RSM US LLP as set forth in the Audit Committee charter, which is reproduced in Appendix "A" to this Annual Information Form. The Audit Committee has approved the provision of a specified list of audit and permitted non-audit services that the Audit Committee believes to be typical, reoccurring or otherwise likely to be provided by RSM US LLP during the current fiscal year. The list of services is sufficiently detailed as to the particular services to be provided to ensure that the Audit Committee knows precisely what services it is being asked to pre-approve and it is not necessary for any member of management to make a judgment as to whether a proposed service fits within pre-approved services.

Auditor Service Fees

The following fees are for services provided by RSM US LLP for the years ended December 31, 2017 and December 31, 2018.

Type of Service Provided	Year ended December 31, 2017	Year ended December 31, 2018
Audit and Quarterly Review Fees	229,461	215,157
Audit-Related Fees	-	-
Tax Fees (compliance related)	78,500	78,125
All Other Fees	40,814	16,265
Total	348,775	309,547

Audit and quarterly review fees consist of fees for the audit of the Corporation's annual financial statements, including the aggregate fees billed for assurance and related services by the Corporation's external auditor that are reasonably related to the performance of the audit or review of the Corporation's financial statements, which include services that are normally provided in connection with statutory and regulatory filings or engagements and include fees related to the application of International Financial Reporting Standards. Tax Fees consist of the aggregate fees billed for professional services rendered by the Corporation's external auditor for tax compliance, tax advice, and tax planning. All Other Fees for the year ended December 31, 2018 relate to adoption of new IFRS standards, consultation regarding the sale of our Outback Guidance business and AgJunction's subsidiary in China. All Other Fees listed for the year ended December 31, 2017 relate to services provided by RSM US LLP in connection with goodwill analysis, setting up AgJunction's subsidiary in China, transfer pricing and unclaimed property.

RISK FACTORS

The following is a summary of certain risk factors relating to our business. The information is only a summary of certain risk factors and is qualified in its entirety by reference to, and must be read in conjunction with, the detailed information appearing elsewhere in this Annual Information Form. An investment in the Common Shares of the Corporation involves a significant degree of risk. Prospective investors should carefully consider the following factors, together with other information contained in this Annual Information Form.

Market Conditions

In March 2019, the US Department of Agriculture ("USDA") reported total farm cash receipts are projected to modestly increase through 2028, primarily due to increasing crop cash receipts reflecting steady domestic and international economic growth that supports longer term demand for U.S. agricultural products. Total farm production expenses are projected to decline modestly to \$360 billion in 2019 due to lower expenditures on feed/livestock purchased. The USDA reports, global demand and trade for agricultural products are projected to continue rising through 2028/2029. Income growth is projected to remain strong, especially in many emerging and developing

economies, giving strong impetus for sustained growth in demand and trade for agricultural products. Per the USDA, net farm income for 2019 is forecasted to increase by \$8.4 billion, or 12.1% over 2018. Cash receipts from crops are forecasted to increase by \$2.2 billion in 2019 compared to the 2018 decrease of \$0.5 billion over 2017.

Recent volatility in agricultural commodity prices, coupled with projections of world population growth, raise concerns about the ability of global agricultural production to meet future demand. A number of factors are likely to affect the potential for future agricultural production. These include demand drivers such as changes in population and per capita income, as well as supply drivers such as changes in agricultural productivity. The world's population is projected to grow from 7 billion to approximately 9 billion by 2050, and per capita income is projected to grow in nearly all the world's regions.³ Agricultural productivity has improved rapidly in recent decades, but prospects for future growth are uncertain, especially in light of climate change. These supply-and-demand drivers will determine not only what farmers will produce in the future, where they will produce it, and how affordable it will be, but also how much land and other scarce resources the sector will use.

Management views the 2019 fundamentals of its global agriculture markets to be neutral with expectations of new machine sales to remain flat. The outlook for future years is positive, driven by the following key factors: population growth, limited arable land, the need for increased output, and a relatively low global penetration of precision agriculture technologies such as Global Navigation Satellite Systems (GNSS) and autosteering. Should negative conditions arise in any of the key markets in 2019, we could realize lower-than-expected revenues in the impacted market areas and this could affect the Corporation's ability to obtain equity or debt financing on acceptable terms.

Dependence on Farming Operations

Our end-user customer (farmers) face constant risk in their farming operations. The uncertainties inherent in weather, yields, prices, government policies, global markets, and other factors that impact farming can cause wide swings in farm income and impact their ability to buy our products. There are five general types of risk related to farmers: production risk, price or market risk, financial risk, institutional risk, and human or personal risk.

Production risk derives from the uncertain natural growth processes of crops and livestock. Weather, disease, pests, and other factors affect both the quantity and quality of commodities produced. Price or market risk refers to uncertainty about the prices producers will receive for commodities or the prices they must pay for inputs. The nature of price risk varies significantly from commodity to commodity. Financial risk results when the farm business borrows money and creates an obligation to repay debt. Rising interest rates, the prospect of loans being called by lenders, and restricted credit availability are also aspects of financial risk. Institutional risk results from uncertainties surrounding government actions. Tax laws, regulations for chemical use, rules for animal waste disposal, and the level of price or income support payments are examples of government decisions that can have a major impact on the farm business.

Rollout of Direct-to-Farmer Products through Online Store

There can be no assurance that HandsFreeFarm.com will be successful or will achieve significant customer acceptance on a timely basis or at all. If we are unable to successfully develop and introduce this new online store and continue to enhance existing products, our future results would be adversely affected.

Dependence on New Products

We must continue to make significant investments in research and development to develop new products, enhance existing products and achieve market acceptance for such products. However, there can be no assurance that development-stage products will be successfully completed or, if developed, will achieve significant customer acceptance. If we are unable to successfully define, develop and introduce competitive new products, and enhance existing products, our future results would be adversely affected.

Dependence on Key Personnel

Our success is largely dependent upon the performance of key personnel. The unexpected loss or departure of any of the key officers or employees could be detrimental to our future operations. Our success will depend, in part, upon

³ https://en.wikipedia.org/wiki/Precision_agriculture

our ability to attract and retain qualified personnel, as they are needed. The competition for highly skilled technical, research and development, management, and other employees is high in the GNSS, precision steering and machine control industry. There can be no assurance that we will be able to engage the services of such personnel or retain our current personnel. Investors must rely upon the ability, expertise, judgment, discretion, integrity and good faith of our management.

Competition

We are in a highly competitive industry that is constantly evolving and changing. We expect this competition to increase as new competitors enter the market. Many of our competitors have greater financial, technical, sales, and production and marketing resources. We compete with companies that also have established customer bases and greater name recognition. This may allow competitors to respond more quickly and better implement technological developments. There is no assurance that we will be able to compete on the same scale as these companies. Such competition may result in reduced sales, reduced margins or increased operating expenses.

Third-Party Dependence

Many of our products rely on signals from satellites and other ground support systems that we do not own or operate. Such satellites and their ground support systems are complex electronic systems subject to electronic and mechanical failures and possible sabotage. The satellites have limited design lives and are subject to damage by the hostile space environment in which they operate. If a significant number of satellites were to become inoperable, there could be a substantial delay before they are replaced with new satellites. A reduction in the number of operating satellites would impair the current utility of the GNSS and/or the growth of current and additional market opportunities, which would adversely affect our results of operations. In addition, there is no assurance that the US government will remain committed to the operation and maintenance of GPS satellites over a long period of time; or, that the policies of the US government for the commercial use of GPS without charge will remain unchanged.

We are also largely dependent on the ability of farmers and agricultural subcontractors known as custom operators to purchase agricultural equipment, which includes our products. Agricultural income levels are affected by agricultural commodity prices and input costs. As a result, changes in commodity prices that reduce agricultural income levels could have a negative effect on the ability of growers and their contractors to purchase our products.

Availability of Key Suppliers

We are reliant upon certain key suppliers for raw materials and components and no assurances can be given that we will not experience delays or other difficulties in obtaining supplies, as a result of trade disputes or other matters. Flextronics International Europe B.V. currently supplies more than 10% of the raw materials used by us, the raw materials used in certain operations are available only through a limited number of vendors. Hemisphere, and Flextronics Technologies Corporation provide over 10% of our direct material purchases used in our operations. Although we believe there are alternative suppliers for most of our key requirements, if our current suppliers are unable to provide the necessary raw materials or otherwise fail to timely deliver products in the quantities required, any resulting delays in the manufacture or distribution of existing products could have a material adverse effect on our results of operations and our financial condition. Further, unusual supply disruptions, such as disruptions caused by natural disasters, could cause suppliers to invoke "force majeure" clauses in their supply agreements, causing shortages of material. Success in offsetting higher raw material costs with price increases is largely influenced by competitive and economic conditions and could vary significantly. If we are not able to fully offset the effects of material availability and costs, financial results could be adversely affected.

We consume significant amounts of raw materials, the costs of which reflect in certain instances market prices for natural gas, oil and other market forces. These prices are subject to worldwide supply and demand as well as other factors beyond our control. Although we are sometimes able to pass such price increases to our customers, significant variations in the cost of raw materials can affect our operating results from period to period.

Intellectual Property

The industry in which we operate has many participants that own, or claim to own, proprietary intellectual property. In past years we have received, and may receive in the future, claims from third parties alleging that the Corporation

has infringed the intellectual property rights of others and we have and may in the future commence lawsuits against others who the Corporation believes are infringing upon its rights. Determination of the rights to intellectual property is very complex and costly litigation may be required to establish if we have violated the intellectual property rights of others or if others have violated the Corporation's intellectual property rights. The Corporation's involvement in intellectual property litigation could result in significant expense, adversely affecting the development of its assets or intellectual property or diverting the efforts of its technical and management personnel, whether or not such litigation is resolved in the Corporation's favour. In the event of an adverse outcome as a defendant in any such litigation, the Corporation may, among other things, be required to: (a) pay substantial damages and third party litigation costs; (b) cease the development, use, sale or importation of products that infringe upon other patented intellectual property; (c) expend significant resources to develop, license or acquire non-infringing intellectual property; (d) discontinue products incorporating infringing technology; (e) obtain licences to the infringing intellectual property; and/or (f) incur legal and other costs. The Corporation may not be successful in such development or acquisition or such licences may not be available on reasonable terms. Any such development, acquisition or licence could require the expenditure of substantial time and other resources and could have a material adverse effect on the Corporation's business and financial results.

We license the software, technologies and intellectual property underlying some of our software from third parties. These third party licenses may not continue to be available to us on commercially reasonable terms, or at all, and the software and technologies may not be appropriately supported, maintained or enhanced by the licensors. Some of our software licenses are subject to annual renewals at the discretion of the licensors. In some cases, if we were to breach a provision of these license agreements, the licensor could terminate the agreement immediately. The loss of licenses to, or inability to support, maintain and enhance, any such third party software or technology could result in increased costs, or delays in software releases or updates, until such issues have been resolved. This could have a material adverse effect on our business, financial condition, results of operations, cash flows and future prospects.

We also incorporate open source software into our products. Although we monitor our use of open source software, the terms of many open source licenses have not been interpreted by U.S. and Canadian courts, and there is a risk that such licenses could be construed in a manner that could impose unanticipated conditions or restrictions on our ability to market or sell our products or to develop new products. In that case, we could be forced to seek licenses from third-parties in order to continue offering our products, to disclose and offer royalty-free licenses in connection with our own source code, to re-engineer our products or to discontinue the sale of our products in the event re-engineering cannot be accomplished on a timely basis, any of which could materially adversely affect our business.

Climate Change

A major segment of AgJunction's products are sold to participants in the farming industries in the United States, Canada, and Australia and other regions in which AgJunction operates. These industries are vulnerable to the effects of climate change. If climate change has a significantly negative impact on the farming industries in the regions in which we operate, it may have a material adverse effect on our business and financial results. Demand for our products in those regions may be materially adversely affected and the costs of shifting our operational focus to new regions with a larger customer base may be substantial, if such regions can be found at all.

Government Regulation

Our products are subject to government regulation in the United States, Canada, Australia and other regions in which we operate. Although we believe that we have obtained the necessary approvals for the products that we currently sell, we may not be able to obtain approvals for future products on a timely basis, or at all. In addition, regulatory requirements may change or we may not be able to obtain regulatory approvals from countries in which we may desire to sell products in the future.

Credit Risk

We have an increasing exposure to credit risk related to trade balances owing from customers. In the normal course of business, we monitor the financial condition of our customers and review the credit history of new customers to establish credit limits. We establish an allowance for doubtful accounts that corresponds to the credit risk of our customers, historical trends and economic circumstances. Losses could be realized by us if customers default on their balances owing. To the extent that any of such third parties go bankrupt, become insolvent or make a proposal or

institute any proceedings relating to bankruptcy or insolvency, it could result in the Corporation being unable to collect all or portion of any money owing from such parties. Any of these factors could materially adversely affect the Corporation's financial and operational results.

Major Customers

In 2018, two customers accounted for over 79% of the Corporation's total revenue. One customer accounted for 62% or \$40.4 million of our total revenue and is included in Europe, Middle East and Africa ("EMEA") geographic region. The second customer accounted for 17% or \$11 million of our total revenue and is included in the Americas geographic region. A portion of the above sales were related to a previously announced bulk purchase order. See "*Recent Developments*". If either of these customers ceases to be a customer for our products, this would have an adverse effect on our revenues.

Technology Risk

Our success in the agricultural machine control market may depend in part on our ability to develop products that keep pace with the continuing changes in technology, evolving industry standards and changing customer and end-user preferences and requirements. Our products embody complex technology that may not meet those standards, changes and preferences. We may be unable to successfully address these developments on a timely basis or at all. Failure to respond quickly and cost-effectively to new developments through the development of new products or enhancements to existing products could cause us to be unable to recover significant research and development expenses and could reduce our revenue.

Further, precision agriculture and technological advancements across the agriculture value chain are undergoing massive transformations because of digitization, creating market dynamics that are difficult to predict and keep pace with. The first technology trend shaping the next agricultural revolution is farm robotics. Robotics are improving, and their viability is being explored across the agricultural value chain, from planting to harvesting, to meat processing and grocery logistics. John Deere spent a significant amount of money last year to acquire Blue River Technology Inc., a startup company making robots capable of identifying unwanted plants and spraying them with high-precision herbicide, reducing input costs and increasing efficiency.

The second technology trend shaping the next agricultural revolution is remote sensing. A myriad of remote sensing techniques, from in-field sensors to drones to satellite imagery, are allowing farmers to view their crops from multiple perspectives. With advances in computing and sensor technology, farmers can now get access to high-cadence, broad area coverage with field-level detail. All these provide farmers up-to-date information in real-time, so changes can be made accordingly to their crops. The final technology trend shaping the next agricultural revolution is machine learning and analytics which is being used to mine data for trends in every sector, and agriculture is no exception. These can be applied before seed planting with plant breeders. Machine learning can predict which traits and genes will be best for crop production, giving farmers the best breed for their location and climate. At the field level, machine learning techniques that use satellite data to distinguish between crops, like corn and soy, providing valuable information for crop insurance, logistics, and commodity markets. The intersection of robotics and data from an increasingly connected farm will accelerate this trend even further.

Radio Frequency Spectrum Risks

Our GNSS technology depends on satellite signals and on terrestrial communication bands. International allocations of radio frequency are made by the International Telecommunications Union ("ITU"), a specialized technical agency of the United Nations. The ITU's allocations are governed by radio regulations that have treaty status and which may be subject to modification every two to three years by the World Radio Communication Conference. Each country regulates how each band is used in the country. In the United States, the Federal Communications Commission ("FCC") and the National Telecommunications and Information Administration share responsibility for radio frequency allocations and spectrum usage regulations.

Any ITU or local reallocation of radio frequency bands, including frequency band segmentation and sharing of spectrum, or other modifications of the permitted uses of relevant frequency bands, may materially and adversely affect the utility and reliability of our products and have significant negative impacts on our customers, both of which could reduce demand for our products. For example, the FCC is currently considering proposals to repurpose spectrum

adjacent to the GPS bands for terrestrial broadband wireless operations throughout the United States. If the FCC implements such proposals, or similar proposals, terrestrial broadband wireless operations could create harmful interference to GPS receivers within range of such operations and impose costs to retrofit or replace affected receivers.

Many of our products use other radio frequency bands, such as the public land mobile radio bands, together with the GNSS signal, to provide enhanced GNSS capabilities, such as real-time kinematics precision. Continued access to these non-GNSS radio frequencies is essential to provide enhanced GNSS products to our customers. In addition, transmissions and emissions from other services and equipment operating in adjacent frequency bands or in-band may impair the utility and reliability of our products. Any regulatory changes in spectrum allocation or in allowable operating conditions could have a material adverse effect on our business, results of operations, and financial condition.

Future Acquisitions

We may seek to expand our business and capabilities through the acquisition of compatible technology, products or businesses. There can be no assurance that suitable acquisition candidates can be identified and acquired on favourable terms, or that the acquired operations can be profitably operated or integrated in our operations. In addition, any internally generated growth experienced by us could place significant demands on our Management, thereby restricting or limiting our available time and opportunity to identify and evaluate potential acquisitions. To the extent Management is successful in identifying suitable companies or products for acquisition, we may deem it necessary or advisable to finance such acquisitions through the issuance of Common Shares, securities convertible into Common Shares, debt financing, or a combination thereof. In such cases, the issuance of Common Shares, First or Second Preferred Shares or convertible securities could result in dilution to the holders of Common Shares at the time of such issuance or conversion. The issuance of debt to finance acquisitions may result in, among other things, the encumbrance of certain of our assets, impeding our ability to obtain bank financing, decreasing our liquidity, and adversely affecting our ability to declare and pay dividends to our shareholders.

Proprietary Protection

Our success will depend, in part, on our ability to obtain patents, maintain trade secrets and unpatented know-how protection and to operate without infringing on the proprietary rights of third parties or having third parties circumvent our rights. We rely on a combination of contract, copyright, patent, trademark and trade secret laws, confidentiality procedures and other measures to protect our proprietary information. There can be no assurance that the steps taken will prevent misappropriation of our proprietary rights. Our competitors could also independently develop technology similar to our technology. Although we do not believe that our products or services infringe on the proprietary rights of any third parties, there can be no assurance that infringement or invalidity claims (or claims for indemnification resulting from infringement claims) will not be asserted or prosecuted against us, or that any such assertions or prosecutions will not materially adversely affect our business, financial condition or results of operations. Irrespective of the validity or the successful assertion of such claims, we could incur significant costs and diversion of resources with respect to the defence thereof, which could have a material adverse effect on our business.

Additional Funding Requirements

The Corporation's cash flow from its operations may not be sufficient to fund its ongoing activities at all times and from time to time, the Corporation may require additional financing in order to carry out its activities. Failure to obtain financing on a timely basis could cause the Corporation to miss certain acquisition opportunities and reduce or terminate its operations. Due to global economic and political volatility, the Corporation may from time to time have restricted access to capital and increased borrowing costs.

To the extent that external sources of capital become limited, unavailable or available on onerous terms, the Corporation's ability to make capital investments and maintain existing operations may be impaired, and its assets, liabilities, business, financial condition and results of operations may be affected materially and adversely as a result. In addition, the future development of the Corporation's business may require additional financing and there are no assurances that such financing will be available or, if available, will be available upon acceptable terms. Alternatively, any available financing may be highly dilutive to existing shareholders.

Foreign Currency Exchange Rate Fluctuations

Sales of our products are transacted primarily in US dollars. Expenses are incurred in US dollars, Australian dollars, Canadian dollars, Chinese RMB and European euro and currencies of non-European Union members, and as a result, we are exposed to risk associated with those currency fluctuations.

The majority of our sales are denominated in US dollars. A stronger US dollar, compared to the currencies of countries where AgJunction is selling its products, makes our products more expensive to customers in those countries. As a result, a strengthening US dollar could have a negative impact on sales to such countries. As our operations are expanding with increased global sales, it is expected that it may be necessary to transact sales in foreign currencies other than US dollars, thus exposing us to additional foreign currency risk.

Political Uncertainty and Tariffs

In the last several years, the United States and certain European countries have experienced significant political events that have cast uncertainty on global financial and economic markets. Since the 2016 U.S. presidential election, the American administration has begun taking steps to implement certain of its promises made during the campaign. The administration has withdrawn of the United States from the Trans-Pacific Partnership and Congress has passed sweeping tax reform, which, among other things, significantly reduces U.S. corporate tax rates. This may affect competitiveness of other jurisdictions, including Canada. In addition, the North American Free Trade Agreement ("NAFTA") has been renegotiated and on November 30, 2018, Canada, the U.S. and Mexico signed the Canada-United States-Mexico Agreement which will replace NAFTA once ratified by the three signatory countries. The U.S. administration has also taken action with respect to reduction of regulation which may also affect relative competitiveness of other jurisdictions. It is unclear exactly what other actions the U.S. administration will implement, and if implemented, how these actions may impact the United States and Canada and in particular our industry. Any actions taken by the current U.S. administration may have a negative impact on the Canadian economy and on the businesses, financial conditions, results of operations and the valuation of Canadian companies, including the Corporation.

In addition to the political uncertainty in the United States, the citizens of the United Kingdom recently voted to withdraw from the European Union and the Government of the United Kingdom has taken steps to implement such withdrawal. The terms of the United Kingdom's exit from the European Union and whether it will occur at all remains to be determined. Some European countries have also experienced the rise of anti-establishment political parties and public protests held against open-door immigration policies, trade and globalization. To the extent that certain political actions taken in North America, Europe and elsewhere in the world result in a marked decrease in free trade, access to personnel and freedom of movement it could have an adverse effect on the Corporation's ability to market its products internationally, increase costs for goods and services required for the Corporation's operations, reduce access to skilled labour and negatively impact the Corporation's business, operations, financial conditions and the market value of the Common Shares.

There remains uncertainty related to the trade talks between the United States and China. Depending upon the outcome of those negotiations, tariffs may be imposed by the Chinese government on goods originating from that country. This could have a negative impact on the United States and in particular, our industry.

Conflicts of Interest

Certain of our directors may be serving as directors of our suppliers or competitors and some are engaged and will continue to be engaged in the design, manufacture and marketing of electronic products and situations may arise where the directors may be in direct competition with our business. Conflicts of interest, if any, which arise will be subject to and governed by the procedures prescribed by the ABCA which require a director or officer of a corporation who is a party to, or is a director or an officer of, or has a material interest in any person who is a party to, a material contract or proposed material contract with us to disclose his interest and, in the case of directors, to refrain from voting on any matter in respect of such contract unless otherwise permitted under the ABCA.

Product Liability

The sale and use of our products entail risk of product liability. Although we have product liability insurance, there is no assurance that such insurance will be sufficient or will continue to be available on reasonable terms.

New and Emerging Markets

Many of the markets for our products are new and emerging. Our success will be significantly affected by the outcome of the development of these new markets.

Physical Facilities

We have facilities at several different locations, as well as component inventory, finished goods and capital assets at third-party manufacturing facilities. Tangible property at each location is subject to risk of fire, earthquake, flood and other natural acts of God. In the event of such events or acts, there could be delays in production and shipments of product due to both the loss of inventory and/or capacity to produce.

Litigation

In the normal course of the Corporation's operations, it may become involved in, named as a party to, or be the subject of, various legal proceedings, including regulatory proceedings, tax proceedings and legal actions. Potential litigation may develop in relation to personal injuries (including resulting from property damage, property taxes, patent infringement and contract disputes). The outcome with respect to outstanding, pending or future proceedings cannot be predicted with certainty and may be determined adversely to the Corporation and could have a material adverse effect on the Corporation's assets, liabilities, business, financial condition and results of operations. Even if the Corporation prevails in any such legal proceedings, the proceedings could be costly and time-consuming and may divert the attention of management and key personnel from business operations, which could have an adverse affect on the Corporation's financial condition.

Volatility of Market Price of Common Shares

The market price of our Common Shares may be volatile. This volatility may affect the ability of holders to sell the Common Shares at an advantageous price. Market price fluctuations in the Common Shares may be due to the downward revision in securities analysts' estimates, governmental regulatory action, adverse change in general market conditions or economic trends, acquisitions, dispositions or other material public announcements by us or by our competitors, along with a variety of additional factors, including, without limitation, those set forth in this "*Risk Factors*" section or in the section titled "*Special Note Regarding Forward Looking Statements*".

Dilution

We may make future acquisitions or enter into financings or other transactions involving the issuance of Common Shares of the Corporation which may be dilutive to current and future holders of our Common Shares.

Forward Looking Information May Prove Inaccurate

Shareholders and prospective investors are cautioned not to place undue reliance on forward looking information. By its nature, forward-looking information involves numerous assumptions, known and unknown risks and uncertainties, of both a general and specific nature, that could cause actual results to differ materially from those suggested by the forward-looking information or contribute to the possibility that predictions, forecasts or projections will prove to be materially inaccurate. Additional information on risks, assumptions and uncertainties are found in the section "*Special Note Regarding Forward Looking Statements*".

Breach of Confidentiality

While discussing potential business relationships or other transactions with third parties, the Corporation may disclose confidential information relating to the business, operations or affairs of this Corporation. Although confidentiality

agreements are generally signed by third parties prior to the disclosure of any confidential information, a breach could put the Corporation at competitive risk and may cause significant damage to its business. The harm to the Corporation's business from a breach of confidentiality cannot presently be quantified but may be material and may not be compensable in damages. There is no assurance that, in the event of a breach of confidentiality, the Corporation will be able to obtain equitable remedies, such as injunctive relief, from a court of competent jurisdiction in a timely manner, if at all, in order to prevent or mitigate any damage to its business that such a breach of confidentiality may cause.

Income Taxes

The Corporation files all required income tax returns and believes that it is in full compliance with the provisions of the *Income Tax Act* (Canada), the *Internal Revenue Code* (US) and all other applicable provincial/state tax legislation. However, such returns are subject to reassessment by the applicable taxation authority. In the event of a successful reassessment of the Corporation, such reassessment may have an impact on current and future taxes payable.

Technology Failures or Cyber-Risks

We rely on information technology systems to process, transmit and store electronic information. In addition, a significant portion of internal communications, as well as communication with customers and suppliers depends on information technology. Further, certain of our products depend upon GPS and other systems through which our products interact with government computer systems and other centralized information sources. The Corporation is subject to a variety of information technology and system risks as a part of its normal course operations, including potential breakdown, invasion, virus, cyber-attack, cyber-fraud, security breach and destruction or interruption of the Corporation's information technology systems by third parties or insiders. Cyber risks may be deliberate attacks for the theft of intellectual property or other sensitive information or may be the result of unintentional events. Unauthorized access to these systems by employees or third parties could lead to corruption or exposure of confidential, fiduciary or proprietary information, interruption to communications or operations, disruption to our business activities or our competitive position. The Corporation applies technical and process controls in line with industry-accepted standards to protect our information assets and systems; however, these controls may not be adequate or implemented properly to prevent cyber-security breaches and to ensure that our operations are not disrupted. Potential consequences of a material cyber incident include damage to our reputation, litigation and increased cyber security protection and remediation costs. The significance of any such event is difficult to quantify but may in certain circumstances be material and could have a material adverse effect on the Corporation's business, financial condition and results of operations. The Corporation uses an external specialist to run both intrusion detection system and intrusion prevent system analysis, which then takes actions based on received results. The Corporation has developed an incident response plan.

Growth Management

The Corporation may be subject to growth related risks including pressure on its internal systems and controls. The ability of the Corporation to manage growth effectively will require it to continue to implement and improve its operational and financial systems and to expand, train and manage its employee base. The inability of the Corporation to deal with this potential growth may have a material adverse effect on the Corporation's business, financial condition, results of operations and prospects.

LEGAL PROCEEDINGS AND REGULATORY ACTIONS

We are not aware of any proceeding that involves a claim for damages, exclusive of interest and costs, of more than ten percent of our current assets. We are not aware of any (i) penalties or sanctions imposed against the Corporation by a court relating to securities legislation or by a securities regulatory authority in the year ended December 31, 2018; (ii) any other penalties or sanctions imposed by a court or regulatory body against the Corporation that would likely be considered important to a reasonable investor in making an investment decision; or (iii) settlement agreements the

Corporation entered into before a court relating to securities legislation or with a securities regulatory authority during the year ended December 31, 2018.

ADDITIONAL INFORMATION

Additional information, including directors' and officers' remuneration and indebtedness, principal holders of our securities and securities authorized for issuance under our equity compensation plans, as applicable, is contained in our information circular for the most recent annual meeting of shareholders that involved the election of directors. Additional financial information is provided in our financial statements and management discussion and analysis for the year ended December 31, 2018, which are available on SEDAR at www.sedar.com and are set forth in our 2018 Annual Report. Documents affecting the rights of security holders, along with additional information relating to us, may also be found on SEDAR at www.sedar.com.

APPENDIX "A"

Audit Committee Mandate

1. **Establishment of Audit Committee:** The board of directors (the "**Board**") hereby establishes a committee to be called the Audit Committee (the "**Committee**").
2. **Membership:** The Committee shall be composed of three members or such greater number as the Board may from time to time determine, of whom the majority shall be "independent" directors as defined in National Instrument 52-110 – Audit Committees. Members shall be appointed periodically from among the members of the Board.
3. **Mandate:** The Committee is appointed by the Board of Directors to assist the Board in fulfilling its oversight responsibilities relating to the following:
 - (a) gain reasonable assurance that risk management, Board risk oversight and internal control systems are in place and monitor their effectiveness, including those risks that could affect the reliability of financial reporting;
 - (b) the integrity of the Corporation's financial reporting process and system of internal controls regarding financial reporting and accounting compliance;
 - (c) the independence, selection, compensation, and performance of the Corporation's external auditors;
 - (d) adequate communication among the external auditors, management and the Board, including the resolution of disagreements between management and the external auditors regarding financial reporting;
 - (e) compliance with legal and regulatory requirements; and
 - (f) ensure that effective procedures are in place for the anonymous submission, receipt, retention and treatment of complaints and concerns regarding accounting, internal control and auditing matters.
4. **Authority:** The Committee has the authority to:
 - (a) conduct any investigation appropriate to fulfilling its responsibilities;
 - (b) approve, on behalf of the Board, the Corporation's quarterly financial results and related documents, including the quarterly press releases and MD&A prior to their release;
 - (c) have direct access to the external auditors as well as anyone in the organization; and
 - (d) retain, at the Corporation's expense, special legal, accounting, or other consultants or experts it deems necessary in the performance of its duties.
5. **Duties and Responsibilities**
 - (a) Accounting Policies:
 - (i) review the appropriateness of accounting policies to ensure completeness and acceptability with IFRS as part of the approval of the financial statements;
 - (ii) review with management and the external auditor any significant changes to the Corporation's accounting policies that might be material to financial reporting prior to their

adoption; and

- (iii) review with management and the external auditor the extent to which changes or improvements in financial or accounting practices, as previously reported to the audit committee, have been implemented.

(b) Financial Information and Reporting:

- (i) review the Corporation's annual audited financial statements and related documents, including the press release and MD&A, prior to filing or distribution and recommend their approval by the Board. Review should include discussion with management and external auditors of significant issues regarding accounting policies, practices, and significant management estimates and judgments;
- (ii) review with financial management and the external auditors, and approve, the Corporation's quarterly financial results and related documents, including the quarterly press releases and MD&A, prior to the public release;
- (iii) review significant accounting and reporting issues, including complex or unusual transactions and highly judgmental areas; and
- (iv) review issues related to liquidity, plans for treasury operations, all material off-balance-sheet transactions, contingent liabilities and transactions with related parties.

(c) External Auditor:

- (i) following completion of the annual audit, review separately with each of management and the external auditors any significant difficulties encountered during the course of the audit, including any restrictions on the scope of work or access to required information;
- (ii) facilitate the resolution of any significant disagreements among management and the external auditors in connection with the preparation of the financial statements;
- (iii) the external auditors are ultimately accountable to the Committee and the Board, as representatives of the shareholders. The Committee shall be responsible for the selection, appointment, compensation, retention, termination and oversight of the external auditors and in such regard recommend to the board the nomination of the external auditor for approval by the shareholder;
- (iv) on an annual basis, the Committee should review and discuss with the external auditors all significant relationships they have with the Corporation that could impair the auditors' independence;
- (v) review the external auditors' audit plan - discuss and approve audit scope, staffing, locations, reliance upon management, and general audit approach;
- (vi) approve all non-audit services to be provided to the Corporation by the external auditors' firm, prior to such services being performed;
- (vii) meet regularly with the external auditors in the absence of management to determine that no management restrictions have been placed on the scope and extent of the audit examinations by the external auditors or the reporting of their findings to the Committee;
- (viii) review and approve the Corporation's hiring policies regarding partners, employees and former partners and employees of the present or former auditors;

- (ix) when there is to be a change in external auditors, review the issues related to the change and the information to be included in the required notice to securities regulators of such change; and
 - (x) ensure the significant findings and recommendations made by the external auditors and management's proposed responses are received, discussed and appropriately acted on.
- (d) Internal Controls:
 - (i) periodically, in consultation with management and external auditors, consider the effectiveness of internal and disclosure controls as they relate to the Corporation's financial reporting processes. Discuss significant financial risk exposures and the steps management has taken to monitor, control, and report such exposures; and
 - (ii) approve the Chair of the Board and the Chief Executive Officer expenses to ensure compliance with the Corporation's expense policy.
- (e) Risk Oversight:
 - (i) review risk management policies and procedures of the Corporation, including litigation and insurance coverage;
 - (ii) review enterprise risk and in doing so, recognizing the responsibilities delegated to other committees by the Board and understanding that the other committees may emphasize specific risk monitoring through their respective activities;
 - (iii) review the development and implementation of appropriate systems to identify, monitor and mitigate significant business risks; and
 - (iv) endeavour to implement an effective system for the Board to approve, in conjunction with executive management, risk tolerances and appetites for strategic objectives.
- (f) Laws & Regulations:
 - (i) on at least an annual basis, review with the Corporation's counsel any legal matters that could have a significant impact on the organization's financial statements, the Corporation's compliance with applicable laws and regulations, and inquiries received from regulators or governmental agencies; and
 - (ii) Review the status of the Corporation's tax returns and those of its subsidiaries.
- (g) Personnel:
 - (i) annually consider and satisfy itself of the appropriateness of the expertise and experience of the CFO and the adequacy of the resources of the finance function; and
 - (ii) review financial and accounting personnel succession planning within the organization.
- (h) Other:
 - (i) annually review the Committee's Mandate;
 - (ii) periodically assess the effectiveness of the Committee against its Mandate and report the results of the assessment to the Board;

- (iii) annually review a summary of all related party transactions and potential conflicts of interest;
- (iv) review the confidential, anonymous submission of employees of the Corporation, received from the whistleblowing hotline, of concerns regarding questionable accounting, internal accounting controls, or audit matters; and
- (v) perform any other activities consistent with this Mandate, the Corporation's By-laws, and governing laws that the Board or Auditor Committee determines are necessary or appropriate.
