

CONFIDENT IN OUR FUTURE

2008 Annual Report

**MACATAWA
BANK**
Corporation

“Confidence In The Eyes of Our Customers”

“Macatawa has always been so customer-focused. They hire bright, friendly and intelligent people and retain them.”

Jack Groot
JP's Coffee

“They made it easy to switch – and to stay. I appreciate the great customer service I receive, and I can't say enough good things about that.”

Karla Scheifele
Karla's Place

“I trust them. They're the nicest people, all of them. It's a pleasure to come in here – and I never thought I would say that about a bank.”

Dick Olson

“They understand entrepreneurs and are trying to make a name for themselves in this area. Although Macatawa is a big bank, **I like the personal touch & small business atmosphere.**”

Dave Crysler
Damar Machinery

“Macatawa really tries to understand what our needs are, rather than say
‘This is all I can do for you’. I always tell everyone that I love Macatawa. I have only good
things to say about the bank.”

Chris VanderWall
Midwest Cleanroom Associates

“Macatawa Bank is local. At my old bank, if I had a question, I had to call
an 800-number and wait. At Macatawa, I come in and the first thing they ask is
‘How can I help you?’”

Ricardo Aleman

“Macatawa Bank is such a personal bank. The people are wonderful – you can
develop a real relationship with the tellers and staff. It’s more than a business: Macatawa Bank
has created great relationships.”

Bob Tift

“I am a big believer in the idea of ‘Do what you say and say what you do.’
Macatawa Bank has been pretty stellar in this regard.”

Craig Seaver
Seaver Finishing

**“One of the major points in their favor is the fact that Macatawa has Spanish-speaking
representatives.** This is a big help, not only to the West Michigan Hispanic Chamber of
Commerce, but to the business community we serve.”

Melissa Rincones

To Our Shareholders

These are unprecedented times – for our country, our state, our local community, our Bank, and for you, our shareholders.

As a country, we moved through heightened uncertainties that prompted a crisis of confidence in banks and financial institutions. Closer to home, we struggled with rising job losses, which led to slower consumer spending, declining real estate values, and higher rates of home foreclosures.

At Macatawa Bank, we responded by tightening our belts, reducing expenses and 10 percent of our workforce. We also raised capital! Despite these proactive measures, we posted our first year-end loss since the Company's first full year of operation.

As the global economy continues to struggle, we are determined that Macatawa Bank will return to strong health and remain well capitalized. While challenges remain, we are confident in the future of our community – and in the future of Macatawa Bank.

Our 2008 financial results were disappointing, but reflect the difficulties of the current operating environment. Our earnings were impacted by a number of factors, including continuing loan losses in our land and residential development portfolio, additional expenses related to managing our non-performing assets, and a one-time, non-cash, impairment charge to write down the goodwill associated with two acquisitions.

For the year ended December 31, 2008, we incurred a net loss available to common shares of \$39.7 million, or \$2.34 loss per common share, compared with net income of \$9.3 million for 2007. Excluding the impact of the goodwill and intangible asset impairment charges, the net loss would have been \$11.8 million for 2008.

It's important to note that the impairment charges did not impact our tangible equity, regulatory capital ratios or liquidity position. We have always been a well-capitalized financial institution under federal regulatory standards, and it is our intention to always remain so.

As our earnings deteriorated, we took a number of steps to strengthen our capital and liquidity positions. We raised \$31.3 million of new capital in the fourth quarter through a preferred stock offering. All of these funds came from West Michigan investors, and we are grateful for their continued support. These additional funds further enhanced our capital ratios, strengthened our balance sheet and helped preserve the community bank we started 11 years ago.

In addition to improved capital ratios, increased FDIC insured depository limits for many of our depositors helped our customers remain confident in the safety of their bank deposits. As you know, the FDIC now insures individual accounts up to \$250,000, a step taken to improve confidence in the banking industry. We worked to communicate this significant change to our customers as quickly and comprehensively as possible.

Additionally, we:

- Significantly improved liquidity by building short-term investments and increasing our borrowing capacity
- Temporarily suspended the cash dividend on our common stock
- Eliminated all bonuses and pay increases
- Implemented “lean” initiatives, including process improvements, staff and expense reductions that resulted in a savings of more than \$6 million annually
- Strengthened risk management initiatives and enhanced lending policies and procedures
- Established programs to work with borrowers to reduce foreclosures

Despite a declining market and a reduction in cash reserves and wealth amongst our customers, Macatawa Bank continued to grow during 2008. We added new accounts, made new loans and built our brand within Ottawa, Kent and Allegan counties.

This is testament to the strength and success of our community bank model. We were founded 11 years ago when a vacuum in our market resulted in locally grown West Michigan banks being swallowed by larger regional and national banks. We felt, and the market agreed, there was room for a locally owned, locally managed bank that offered superior financial products and excellent customer service.

Eleven years later, the larger regional and national banks have again redirected their focus to other markets due to the difficulties in Michigan today. This has opened a significant window of opportunity for us, as we remain committed to serving the banking needs of our community. Despite these challenging times, we continue to provide financing for our individual and business customers, consistent with our mission. As we have grown, we have added capabilities, expertise and resources that enable us to face the challenges of this economy, and the risks associated with becoming a larger organization.

Throughout the coming year, we will focus on retaining and expanding the relationships we have with current customers, as well as acquiring new relationships. We have established aggressive deposit goals that will help increase the value of our franchise. We will continue to make loans to qualified borrowers, providing needed investment dollars for West Michigan. We will concentrate on reducing our non-performing asset

levels, and we will continue to work closely with our borrowers to avoid foreclosure.

We will strive to increase our profitability by working more efficiently and effectively. We have major core process improvements planned in 2009 that will allow us to be more streamlined while providing better products and services. Enhanced customer service initiatives and products will ensure that we are able to remain competitive and continue to grow our franchise. We are building on our needs-based sales initiatives, which focus on rewarding employees for educating consumers and putting them in the right financial products and services to meet their individual financial goals. This process creates loyal customers who provide the best word of mouth advertising in our communities. As always, these initiatives will be done with an eye on managing risk, and maintaining our standing as a well-capitalized bank. When the economy rebounds, as we are sure that it will, we will be well positioned to capture additional, profitable market share.

We remain committed to the vision of being a strong community bank. We have the employees, products and services, financial resources and leadership that will enable us to meet the financial needs of the communities we serve, despite these unparalleled times.

We would like to close with a special word of thanks to Ben Smith. It has been his vision and leadership that have provided us with such a strong foundation on which to build. He has instilled in all of us a spirit of entrepreneurship and the principles of excellent customer service.

Now more than ever, we appreciate your continued support, and your confidence in our ability to guide the bank through challenging times.

PART I

ITEM 1: Business

As used in this Annual Report, the terms "we," "us," "our" and "Macatawa" mean Macatawa Bank Corporation and its subsidiaries, unless the context indicates another meaning.

General

Macatawa Bank Corporation is a Michigan corporation and is the bank holding company for its wholly owned banking subsidiary, Macatawa Bank, as well as Macatawa Statutory Trust I and Macatawa Statutory Trust II. Effective November 1, 2006, Macatawa Investment Services, Inc., which was a subsidiary of the holding company, ceased doing business as a registered broker-dealer. On November 1, 2006 Macatawa Bank began offering brokerage services to its customers through an arrangement with Infinex Investments, Inc. ("Infinex"). Infinex is a full service investment provider, a registered broker-dealer and a member of the Financial Industry Regulatory Authority (FINRA) and the Securities Investor Protection Corporation (SIPC). As more fully discussed in our Form 8-K dated October 11, 2006, Macatawa Bank Corporation entered into an Agreement and Plan of Merger with the Smith & Associates investment advisory firm based in Holland, Michigan. The Smith & Associates acquisition became effective on January 1, 2007 and that business is now part of Macatawa Bank. Macatawa Bank commenced operations on November 25, 1997. Grand Bank was formed in 1987 and operated from a single location in Grand Rapids, Michigan. Grand Bank became a wholly owned subsidiary effective April 1, 2002 upon the completion of the acquisition of Grand Bank Financial Corporation (GBFC), and its results are included in the consolidated statements of income since this effective date. To achieve further synergies from the Grand Bank acquisition, we merged Grand Bank into Macatawa Bank effective January 1, 2003 with the combined bank named Macatawa Bank. At the same time, Grand Bank Mortgage Company was merged into Macatawa Bank Mortgage Company.

Macatawa Bank is a Michigan chartered bank with depository accounts insured by the Federal Deposit Insurance Corporation. The bank operates twenty-six branch offices and a lending and operational service facility offering commercial and personal banking services, including checking, savings and certificates of deposit accounts, cash management, safe deposit boxes, travelers checks, money orders, trust services and commercial, mortgage and consumer loans in Kent County, Ottawa County, and northern Allegan County, Michigan. Other service delivery channels we offer include ATMs, internet banking, telephone banking and debit cards. Macatawa Bank provides various brokerage services including discount brokerage through Infinex, personal financial planning and consultation regarding mutual funds. Macatawa Statutory Trust I is a grantor trust that issued a pooled trust preferred security in July, 2003. Macatawa Statutory Trust II is a grantor trust that issued a pooled trust preferred security in March, 2004. Macatawa Bank Mortgage Company, a subsidiary of Macatawa Bank, originates and sells residential mortgage loans into the secondary market on a servicing released basis. As of December 31, 2008, we had total assets of \$2.15 billion, total deposits of \$1.67 billion, approximately 102,000 deposit accounts and shareholders' equity of \$149.2 million.

Our headquarters and administrative offices are located at 10753 Macatawa Drive, Holland, Michigan 49424, and our telephone number is (616) 820-1444. Our internet website address is www.macatawabank.com. We make available free of charge through this website our annual report on Form 10-K, our quarterly reports on Form 10-Q and our current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after filing such reports with the Securities and Exchange Commission. The reference to our website address does not constitute incorporation by reference of the information contained on the website, and the information contained on the website is not part of this document.

Products and Services

Deposit Services. We offer a broad range of deposit services, including checking accounts, savings accounts and time deposits of various types. Transaction accounts and savings and time certificates are tailored to the principal market area at rates competitive with those offered in the area. All deposit accounts are insured by the FDIC up to the maximum amount permitted by law. In the fourth quarter of 2008, we also elected to participate in the FDIC's Temporary Liquidity Guarantee Program which provides insurance on all noninterest-bearing deposits and certain interest-bearing deposits. We solicit deposit services from individuals, businesses, associations, churches, nonprofit organizations, financial institutions and government authorities. We may also use alternative funding sources as needed, including short-term borrowings, advances from the Federal Home Loan Bank of Indianapolis or the Federal Reserve Bank of Chicago, securities sold under agreements to repurchase ("repo borrowings") and certificates of deposit purchased from brokers and the packaging of loans for securitization and sale.

Deposits are gathered primarily from the communities we serve through our network of 26 branches. We offer business and consumer checking accounts, regular and money market savings accounts, and certificates of deposit with many term options.

We set our deposit pricing to be competitive with other banks in our market area. We periodically purchase brokered deposits to supplement funding needs. These are time accounts originated outside of our local market area. Brokered deposits comprised approximately 20% of total deposits at December 31, 2008 and approximately 13% at December 31, 2007. We operate in a very competitive environment, competing with other local banks similar in size and with significantly larger regional banks. We monitor rates at other financial institutions in the area to ascertain that our rates are competitive with the market. We also attempt to offer a wide variety of products to meet the needs of our customers.

Deposit Portfolio Composition. The following table sets forth the average deposit balances and the weighted average rates paid thereon.

(Dollars in thousands)	Average for the Year					
	2008		2007		2006	
	Amount	Average Rate	Amount	Average Rate	Amount	Average Rate
Noninterest bearing demand	\$171,425	--	\$165,059	--	\$167,144	--
Interest bearing demand	238,633	1.2%	268,999	2.8%	232,577	2.5%
Savings and money market accounts	411,645	1.6%	476,681	3.7%	463,799	3.4%
Time	777,086	4.1%	696,759	4.9%	710,924	4.5%
Total deposits	<u>\$1,598,789</u>	<u>2.6%</u>	<u>\$1,607,498</u>	<u>3.7%</u>	<u>\$1,574,444</u>	<u>3.4%</u>

The following table summarizes time deposits in amounts of \$100,000 or more by time remaining until maturity as of December 31, 2008:

(Dollars in thousands)	Amount
Three months or less	\$ 85,732
Over 3 months through 6 months	97,093
Over 6 months through 1 year	129,022
Over 1 year	263,014
Total	<u>\$ 574,861</u>

Lending Activities.

Loan Portfolio Composition. The following table reflects the composition of our loan portfolio and the corresponding percentage of our total loans represented by each class of loans as of the dates indicated.

(Dollars in thousands)	Year Ended December 31									
	2008		2007		2006		2005		2004

Totals	<u>\$ 712,631</u>	<u>\$ 551,805</u>	<u>\$ 509,627</u>	<u>\$ 1,774,063</u>

Interest Sensitivity. Below is a schedule of the loan amounts maturing or repricing which are classified according to their sensitivity to changes in interest rates at December 31, 2008.

(dollars in thousands)	<u>Fixed Rate (a)</u>	<u>Variable Rate (a)</u>	<u>Total</u>
Due within 3 months	\$ 134,143	\$ 764,989	\$ 899,132
Due after 3 months, but within 1 year	239,700	39,107	278,807
Due after one but within 5 years	442,015	28,329	470,344
Due after 5 years	<u>36,728</u>	<u>3</u>	<u>36,731</u>
Total	<u>\$ 852,586</u>	<u>\$ 832,428</u>	<u>\$ 1,685,014</u>

(a) Does not include loans on non-accrual.

Residential Real Estate Loans. We originate owner-occupied residential mortgage loans, which are generally long-term with either fixed or adjustable interest rates. Our general policy, which is subject to review by our management as a result of changing market and economic conditions and other factors, is to sell the majority of our fixed rate residential mortgage loans in the secondary market due primarily to the interest rate risk associated with these loans. During 2008 and 2007, we retained a larger portion of our residential mortgage loan volume than we have historically. We retained approximately half of the dollar volume of our loan originations in these two years, selling the remaining half in the secondary market. In late 2008, we focused on refinancing and selling existing portfolios to the secondary market, reducing our balance sheet exposure.

Our borrowers generally qualify and are underwritten using industry standards for quality residential mortgage loans. We do not originate loans that are considered sub-prime. Residential mortgage loan originations derive from a number of sources, including advertising, direct solicitation, real estate broker referrals, existing borrowers and depositors, builders and walk-in customers. Loan applications are accepted at most of our offices. The substantial majority of these loans are secured by properties in our market area.

Our adjustable rate mortgage loans are fully amortizing loans with contractual maturities of up to 30 years. These loans generally carry interest rates which are reset to a stated margin over an independent index, generally the one-year constant maturity treasury index or the one year LIBOR index. Increases or decreases in the interest rate of our adjustable rate mortgage loans are generally limited to 2% annually with lifetime interest rate caps of 6% over the initial interest rate. Our adjustable rate mortgage loans do not contain prepayment penalties and do not produce negative amortization. Our borrowers are generally qualified at the fully indexed rate.

We also offer fixed rate mortgage loans to owner occupants with maturities up to 30 years, which conform to secondary market standards. Interest rates charged on these fixed rate loans are priced on a daily basis according to market conditions. These loans generally do not include prepayment penalties. We generally sell long-term, conforming fixed-rate loans with terms of 15 years or greater in the secondary market.

We generally originate residential mortgage loans with loan-to-value ratios not to exceed 80%. For loans with loan-to-value ratios that equal or exceed 90% at origination, we require private mortgage insurance in an amount sufficient to reduce our exposure to 80% or less of the lower of the appraised value or purchase price of the underlying collateral. In underwriting one-to four-family residential real estate loans, we evaluate both the borrower's ability to make monthly payments and the value of the property securing the loan. Properties securing one- to four-family residential real estate loans that we made are appraised by independent appraisers. We require borrowers to obtain title insurance and fire, property and, if necessary, flood insurance.

Multi-Family and Commercial Real Estate Loans. We originate permanent loans secured by multi-family and commercial real estate. Our permanent multi-family and commercial real estate loan portfolio includes loans secured by apartment buildings, condominiums, small office buildings, small business facilities, medical facilities and other non-residential building properties, substantially all of which are located within our primary market area.

Permanent multi-family and commercial real estate loans have a maximum maturity of 10 years with an amortization period of up to 20 years. Most of these loans, however, have maturities of 5 years or less with amortization periods of 15 and 20 years. Multi-family loans and commercial real estate loans are generally written in amounts of up to 80% of the lesser of the appraised value of the property or the purchase price, and borrowers are generally personally liable for all or part of the indebtedness.

Appraisals on properties securing multi-family and commercial real estate loans that we originate are primarily performed by independent appraisers who we designate at the time the loan is made. Management reviews all appraisals on multi-family and commercial real estate loans. In addition, our underwriting procedures generally require verification of the borrower's credit history, income and financial statements, banking relationships, references, and historical and projected cash flows for the property that indicate minimum debt service coverage ratios.

Multi-family and commercial real estate loans generally present a higher level of risk than loans secured by owner occupied one- to four-family residences. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effects of general economic conditions on income producing properties and the increased difficulty of evaluating and monitoring these types of loans. Furthermore, the repayment of loans secured by multi-family and commercial real estate is typically dependent upon the successful operation of the related real estate project. If cash flow from the project is reduced, the borrower's ability to repay the loan may be impaired. For example, if leases are not obtained or renewed, or a bankruptcy court modifies a lease term, or a major tenant is unable to fulfill its lease obligations, cash flow from the project will be reduced.

Construction and Development Loans. We make construction loans to individuals for the construction of their residences and to commercial customers for the construction of their business facilities. Construction loans are also made to builders and developers for the construction of one- to four-family residences and the development of one- to four-family lots, residential subdivisions, condominium developments and other commercial developments.

Construction and development loans are obtained principally through continued business from commercial customers, developers and builders who have previously borrowed from us, as well as referrals from existing customers. As part of the application process, the applicant must submit accurate plans, specifications and costs of the project to be constructed or developed. These items are used as a basis to determine the appraised value of the subject property. Loans are based on the lesser of current appraised value and/or the cost of construction (land plus building). Construction and development loans to borrowers other than owner-occupants involve many of the same risks discussed above regarding multi-family and commercial real estate loans and tend to be more sensitive to general economic conditions than many other types of loans. Further, because of the uncertainties inherent in estimating development and construction costs and the market for the project upon completion, it is relatively difficult to evaluate accurately the total loan funds required to complete a project, the related loan-to-value ratios and the likelihood of ultimate success of the project.

Construction loans to individuals for their residences are structured to be refinanced to permanent loans at the end of the construction phase, which typically runs six to nine months. These construction loans have rates and terms which generally are competitive in the marketplace. The interest rate for the end loan is not guaranteed until the home is complete. The borrower pays interest only. Residential construction loans are generally underwritten pursuant to the same guidelines used for originating permanent, owner-occupied one-to-four family residential real estate loans.

Construction or development loans to builders of one- to four-family residences generally require the payment of interest only for up to one year with adjustable rates. These loans may also provide for the payment of loan fees from loan proceeds. We also make loans to residential land developers for the purpose of developing one- to four-family lots and residential condominium projects. These loans typically have terms of two years or less with maximum loan to value ratios of 80%. These loans may provide for the payment of loan fees from loan proceeds. Loan principal is typically paid down as lots or units are sold. During 2007 and 2008, the Company experienced a significant increase in non-performing loan levels primarily associated with this loan segment. The increase in nonperforming loan balances is more fully discussed under the section Loan Portfolio and Asset Quality included in the Management Discussion and Analysis of Results of Operations and Financial Condition. The increase was largely associated with a decline in general market conditions that significantly reduced the demand for new construction of one-to-four family residential real estate. Accordingly, the Company has generally curtailed this type of lending for new customers. For current borrowing customers, we will continue to support the projects for which we have already advanced funds in order to facilitate success of the projects and ultimate repayment of our loans. Any new loans made for the development of residential real estate are only to current borrowers that can establish repayment ability from sources independent of the project itself.

Commercial Business Loans. Our commercial business lending portfolio contains loans with a variety of purposes and security, including loans to finance operations and equipment. Generally, our commercial business lending has been limited to borrowers headquartered, or doing business, in our primary market area. These credit relationships typically require the satisfaction of appropriate loan covenants and debt formulas; including, but not limited to, net worth, debt to net worth, and accounts receivable aging requirements. These loan covenants and debt formulas are monitored through periodic, required reporting of accounts receivable aging schedules and financial statements, and in the case of larger business operations, reviews or audits by independent professional firms.

Unlike residential mortgage loans, which generally are made on the basis of the borrower's ability to make repayment from his or her employment and other income, and which are secured by real property whose value tends to be more easily ascertainable, commercial business loans are of higher risk and typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business. As a result, the availability of funds for the repayment of commercial business loans may be substantially dependent on the success of the business itself. Further, the collateral securing the loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business.

Consumer Loans. We originate a variety of different types of consumer loans, including automobile loans, home equity lines of credit and installment loans, home improvement loans, deposit account loans and other loans for household and personal purposes. Our automobile loans typically are originated at fixed interest rates with terms up to 60 months for new and used vehicles. Loans secured by automobiles are generally originated for up to 80% of the National Automobile Dealers Association book value of the automobile securing the loan.

Our home equity installment loans are written so that the total commitment amount, when combined with the balance of the first mortgage lien, generally will not exceed the greater of 85% of the appraised value of the property or 85% of one and one-half times the Michigan real estate assessment value. These loans have a maximum maturity of 5 years with an amortization period of up to 15 years, and carry fixed rates of interest.

We also originate home equity lines of credit utilizing the same underwriting standards as for home equity installment loans. Home equity lines of credit are revolving line of credit loans. The majority of our existing home equity line of credit portfolio has variable rates with floors and ceilings, interest only payments and a maximum maturity of ten years.

The underwriting standards that we employ for consumer loans include a determination of the applicant's payment history on other debts and ability to meet existing obligations and payments on the proposed loan. Although creditworthiness of the applicant is of primary consideration, the underwriting process also includes a comparison of the value of the security, if any, in relation to the proposed loan amount. Consumer loans may entail greater credit risk than do residential mortgage loans, particularly in the case of consumer loans which are unsecured or are secured by rapidly depreciable assets, such as automobiles. In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be affected by adverse personal circumstances. Furthermore, the application of various federal and state laws, including bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

Securities. Our security portfolio is classified as either "available for sale" or "held to maturity." Securities classified as "available for sale" may be sold prior to maturity due to changes in interest rates, prepayment risks, and availability of alternative investments, or to meet our liquidity needs. The primary objective of our investing activities is to provide for the safety of the principal invested. Our secondary considerations include the maximization of earnings, liquidity and to help decrease our overall exposure to changes in interest rates. The following table reflects the composition of our securities portfolio as of the dates indicated.

(Dollars in thousands)

	Year Ended December 31		
	2008	2007	2006
U.S. Treasury and U.S. Government Agencies	\$ 133,634	\$ 150,045	\$ 146,910
State and municipal bonds	51,890	52,377	53,366
Other equity securities	992	993	981
Total	<u>\$ 186,516</u>	<u>\$ 203,415</u>	<u>\$ 201,257</u>

Excluding our investment portfolio holdings in U.S. Treasury and U.S. Government Agency Securities, we had no investments in securities of any one issuer which exceeded 10% of shareholders' equity.

Schedule of Maturities of Investment Securities and Weighted Average Yields. The following is a schedule of investment security maturities and their weighted average yield by category at December 31, 2008.

(dollars in thousands)	Due Within <u>One Year</u>		One to <u>Five Years</u>		Five to <u>Ten Years</u>		After <u>Ten Years</u>		<u>No Contractual</u> <u>Maturity</u>	
	<u>Amount</u>	<u>Average</u> <u>Yield</u>	<u>Amount</u>	<u>Average</u> <u>Yield</u>	<u>Amount</u>	<u>Average</u> <u>Yield</u>	<u>Amount</u>	<u>Average</u> <u>Yield</u>	<u>Amount</u>	<u>Average</u> <u>Yield</u>
U.S. Treasury and U.S. Government Agencies	\$53,314	3.91%	\$70,214	4.11%	\$10,018	4.26%	\$88	5.05%	--	--
Tax-exempt state and municipal bonds (1)	--	--	7,856	6.52%	31,260	6.06%	12,774	6.09%	--	--

Total (1)	<u>\$53,314</u>	<u>3.91%</u>	<u>\$78,070</u>	<u>4.36%</u>	<u>\$41,278</u>	<u>5.64%</u>	<u>\$ 12,862</u>	<u>6.08%</u>	<u>\$ 992</u>	<u>4.20%</u>

(1) Yields on tax-exempt securities are computed on a fully taxable-equivalent basis.

Trust Services. We began offering trust services in January 1999 to further provide for the financial needs of our customers. With the acquisition of Grand Bank in April 2002 our trust assets increased by over \$500 million, and with the acquisition of Smith & Associates our trust assets increased by over \$100 million. As of December 31, 2008, the Trust Department had assets of approximately \$860.6 million. Our types of service include both personal trust and retirement plan services.

Our personal trust services include financial planning, investment management services, trust and estate administration and custodial services. As of December 31, 2008, our personal trust assets totaled approximately \$737.9 million. Our retirement plan services provide all types of qualified retirement plans including profit sharing, 401(k)s and pension plans. As of December 31, 2008, our retirement plan assets totaled approximately \$122.7 million.

Market Area

Our primary market area includes Ottawa, Kent and northern Allegan Counties, all located in Western Michigan. This area consists of two mid-sized cities, Grand Rapids and Holland, and rural areas. Grand Rapids is the second largest city in Michigan and Holland is the largest city in Ottawa County. Both cities and surrounding areas have a solid and diverse economic base, which includes health and life sciences services, tourism, office furniture, automotive components and assemblies, pharmaceutical, transportation, equipment, food and construction supplies. Companies operating in the market area include the Van Andel Institute, Steelcase, Herman Miller, Alticor, Gentex, Spectrum Health, Haworth, Johnson Controls, General Motors, Gerber, SPX, Magna Donnelly, and Meijer.

Much of our success as a retail and small to mid-sized business lender has been due to our market area's favorable population, housing and income demographics. Population growth levels have been positive year over year, but most recently population levels have slowed and stabilized. Population within our three county market area grew 18.0% from 1990 to 2000, and 6% from 2000 to 2007. Median household income levels in our market area exceed state and national levels while unemployment levels are generally below state levels but above national levels.

Competition

There are many bank, thrift and credit union offices located within our market area. Most are branches of larger financial institutions. We also face competition from finance companies, insurance companies, mortgage companies, securities brokerage firms, money market funds and other providers of financial services. Many of our competitors have been in business a number of years, have established customer bases, are larger and have higher lending limits than we do. We compete for loans, deposits and other financial services based on our ability to communicate effectively with our customers, to understand and meet their needs and to provide high quality customer service. Our management believes that our personal service philosophy enhances our ability to compete favorably in attracting individuals and small businesses. We actively solicit customers by offering our customers personal attention, professional service, and competitive interest rates.

Environmental Matters

We do not believe that existing environmental regulations will have any material effect upon our capital expenditures, our earnings or our competitive position.

Employees

As of December 31, 2008, we had 338 full-time and 120 part-time employees. We have assembled a staff of experienced, dedicated and highly qualified professionals whose goal is to meet the financial needs of our customers while providing outstanding service. The majority of our management team has at least 10 years of banking experience, and several key personnel have more than 20 years of banking experience. None of our employees is represented by collective bargaining agreements with us.

Acquisitions

On April 1, 2002, Grand Bank Financial Corporation was merged into Macatawa Bank Corporation. Macatawa Bank Corporation became the holding company for Grand Bank. Effective January 1, 2003, Grand Bank was merged into Macatawa Bank. On January 1, 2007, the Company completed the acquisition of Smith & Associates. The Company in turn contributed the business to Macatawa Bank.

SUPERVISION AND REGULATION

The following is a summary of certain statutes and regulations affecting Macatawa Bank Corporation and Macatawa Bank. This summary is qualified in its entirety by such statutes and regulations. A change in applicable laws or regulations may have a material effect on us and our business.

General

Financial institutions and their holding companies are extensively regulated under federal and state law. Consequently, our growth and earnings performance can be affected not only by management decisions and general economic conditions, but also by the statutes administered by, and the regulations and policies of, various governmental regulatory authorities. Those authorities include, but are not limited to, the Board of Governors of the Federal Reserve System (the "Federal Reserve Board"), the Federal Deposit Insurance Corporation ("FDIC"), the Commissioner of the Michigan Office of Financial and Insurance Regulation ("Commissioner"), the Internal Revenue Service, and state taxing authorities. The effect of such statutes, regulations and policies can be significant, and cannot be predicted with a high degree of certainty.

Federal and state laws and regulations generally applicable to financial institutions and their holding companies regulate, among other things, the scope of business, investments, reserves against deposits, capital levels relative to operations, lending activities and practices, the nature and amount of collateral for loans, the establishment of branches, mergers, consolidations and dividends. The system of supervision and regulation applicable to us and our bank establishes a comprehensive framework for our respective operations and is intended primarily for the protection of the FDIC's deposit insurance funds, our depositors, and the public, rather than our shareholders.

Federal law and regulations establish supervisory standards applicable to the lending activities of our bank, including internal controls, credit underwriting, loan documentation and loan-to-value ratios for loans secured by real property.

Macatawa Bank Mortgage Company, a subsidiary of Macatawa Bank, is subject to various state and federal regulations.

Recent Regulatory Developments

Emergency Economic Stabilization Act of 2008. On October 3, 2008, the Emergency Economic Stabilization Act of 2008 (EESA) was enacted. EESA enables the federal government, under terms and conditions to be developed by the Secretary of the Treasury, to insure troubled assets, including mortgage-backed securities, and collect premiums from participating financial institutions. EESA includes, among other provisions: (a) the \$700 billion Troubled Assets Relief Program (TARP), under which the Secretary of the Treasury is authorized to purchase, insure, hold, and sell a wide variety of financial instruments, and (b) an increase in the amount of deposit insurance provided by the Federal Deposit Insurance Corporation (FDIC). Both of these specific provisions are discussed in the below sections.

Under the TARP, the Department of Treasury authorized a voluntary capital purchase program (CPP) to purchase senior preferred shares of qualifying financial institutions that elected to participate by November 14, 2008. We have applied to participate in the CPP but as of February 26, 2009, we have not yet been approved to participate and we have not made a final decision about whether we would participate if our application is approved. Participating companies must adopt certain standards for executive compensation, including (a) prohibiting "golden parachute" payments as defined in EESA to senior Executive Officers; (b) requiring recovery of any compensation paid to senior Executive Officers based on criteria that is later proven to be materially inaccurate; and (c) prohibiting incentive compensation that encourages unnecessary and excessive risks that threaten the value of the financial institution. The terms of the CPP also limit certain uses of capital by the issuer, including repurchases of company stock, and increases in dividends.

Federal Deposit Insurance Corporation (FDIC). EESA temporarily raised the limit on federal deposit insurance coverage from \$100,000 to \$250,000 per depositor. Separate from EESA, in October 2008, the FDIC also announced the Temporary Liquidity Guarantee Program. Under one component of this program, the FDIC temporarily provides unlimited coverage for noninterest bearing transaction deposit accounts through December 31, 2009. The limits are scheduled to return to \$100,000 on January 1, 2010.

Financial Stability Plan. On February 10, 2009, the Financial Stability Plan (FSP) was announced by the U.S. Treasury Department. The FSP is a comprehensive set of measures intended to shore up the financial system. The core elements of the plan include making bank capital injections, creating a public-private investment fund to buy troubled assets, establishing guidelines for loan modification programs and expanding the Federal Reserve lending program. The U.S. Treasury Department has indicated more details regarding the FSP are to be announced at a future date.

American Recovery and Reinvestment Act of 2009. On February 17, 2009, the American Recovery and Reinvestment Act of 2009 (ARRA) was enacted. ARRA is intended to provide a stimulus to the U.S. economy in the wake of the economic downturn brought about by the subprime mortgage crisis and the resulting credit crunch. The bill includes federal tax cuts, expansion of unemployment benefits and other social welfare provisions, and domestic spending in education, healthcare, and infrastructure, including the energy structure. The new law also includes numerous non-economic recovery related items, including a limitation on executive compensation in federally aided banks. Under ARRA, an institution will be subject to a number of restrictions and standards throughout the period in which any obligation arising from financial assistance provided under TARP remains outstanding.

Homeowner Affordability and Stability Plan. On February 18, 2009, the Homeowner Affordability and Stability Plan (HASP) was announced by the President of the United States. HASP is intended to support a recovery in the housing market and ensure that workers can continue to pay off their mortgages through the following elements:

- Provide access to low-cost refinancing for responsible homeowners suffering from falling home prices.
- A \$75 billion homeowner stability initiative to prevent foreclosure and help responsible families stay in their homes.
- Support low mortgage rates by strengthening confidence in Fannie Mae and Freddie Mac.

More details regarding HASP are to be announced at a future date.

Macatawa Bank Corporation

General. Macatawa Bank Corporation is registered with, and subject to regulation by, the Federal Reserve Board under the Bank Holding Company Act, as amended (the "BHCA"). Under the BHCA, we are subject to periodic examination by the Federal Reserve Board, and are required to file with the Federal Reserve Board periodic reports of our operations and such additional information as the Federal Reserve Board may require.

In accordance with Federal Reserve Board policy, we are expected to act as a source of financial strength to Macatawa Bank and to commit resources to support Macatawa Bank in circumstances where we might not do so absent such policy. In addition, if the Commissioner deems Macatawa Bank's capital to be impaired, the Commissioner may require Macatawa Bank to restore its capital by a special assessment upon us as the bank's sole shareholder. If we were to fail to pay any such assessment, the directors of Macatawa Bank would be required, under Michigan law, to sell the shares of the bank's stock owned by us to the highest bidder at either a public or private auction and use the proceeds of the sale to restore the bank's capital.

Investments and Activities. In general, any direct or indirect acquisition by us of any voting shares of any bank which would result in our direct or indirect ownership or control of more than 5% of any class of voting shares of such bank, and any merger or consolidation between us and another financial holding company or bank holding company, will require the prior written approval of the Federal Reserve Board under the BHCA. No Federal Reserve Board approval is required for us to acquire a company, other than a bank holding company or bank, engaged in activities that are financial in nature as determined by the Federal Reserve Board.

The merger or consolidation of an existing bank subsidiary of ours with another bank, or the acquisition by such a subsidiary of assets of another bank, or the assumption of liability by such a subsidiary to pay any deposits in another bank, will require the prior written approval of the responsible Federal depository institution regulatory agency under the Bank Merger Act. In addition, in certain such cases an application to, and the prior approval of, the Federal Reserve Board under the BHCA and/or the Commissioner under the Michigan Banking Code, may be required.

Capital Requirements. The Federal Reserve Board uses capital adequacy guidelines in its examination and regulation of bank holding companies. If capital falls below minimum guidelines, a bank holding company may, among other items, be denied approval to acquire or establish additional banks or non-bank businesses.

The Federal Reserve Board's capital guidelines establish the following minimum regulatory capital requirements for bank holding companies: (i) a leverage capital requirement expressed as a percentage of total average assets, and (ii) a risk-based requirement expressed as a percentage of total risk-weighted assets. The leverage capital requirement consists of a minimum ratio of Tier 1 capital (which consists principally of shareholders' equity) to total average assets of 3% for the most highly rated companies, with minimum requirements of 4% to 5% for all others. The risk-based requirement consists of a minimum ratio of total capital to total risk-weighted assets of 8%, of which at least one-half must be Tier 1 capital.

Dividends. Macatawa Bank Corporation is a corporation separate and distinct from Macatawa Bank. Most of our revenues are dividends paid by our bank. Thus, our ability to pay dividends to our shareholders is indirectly limited by statutory restrictions on our bank's ability to pay dividends described below. Further, in a policy statement, the Federal Reserve Board has expressed its view that a bank holding company experiencing earnings weaknesses should not pay cash dividends exceeding its net income or which can only be funded in ways that weaken the bank holding company's financial health, such as by borrowing. Additionally, the Federal Reserve Board possesses enforcement powers over bank holding companies and their non-bank subsidiaries to prevent or remedy actions that represent unsafe or unsound practices or violations of applicable statutes and regulations. Among these powers is the ability to proscribe the payment of dividends by banks and bank holding companies. Similar enforcement powers over our bank are possessed by the FDIC. The "prompt corrective action" provisions of federal law and regulation authorizes the Federal Reserve Board to restrict the payment of dividends by us for an insured bank which fails to meet specified capital levels.

In addition to the restrictions on dividends imposed by the Federal Reserve Board, the Michigan Business Corporation Act provides that dividends may be legally declared or paid only if after the distribution a corporation, like us, can pay its debts as they come due in the usual course of business and its total assets equal or exceed the sum of its liabilities plus the amount that would be needed to satisfy the preferential rights upon dissolution of any holders of preferred stock whose preferential rights are superior to those receiving the distribution.

Federal Securities Regulation. Our common stock is registered with the Securities and Exchange Commission ("SEC") under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended. The Sarbanes-Oxley Act of 2002 provides for numerous changes to the reporting, accounting, corporate governance and business practices of companies as well as financial and other professionals who have involvement with the U.S. public markets. The SEC continues to issue new and proposed rules implementing various provisions of the Sarbanes-Oxley Act.

Macatawa Bank

General. Macatawa Bank is a Michigan banking corporation, and its deposit accounts are insured by the Deposit Insurance Fund (the "DIF") of the FDIC. As a DIF insured Michigan chartered bank, Macatawa Bank is subject to the examination, supervision, reporting and enforcement requirements of the Commissioner, as the chartering authority for Michigan banks, and the FDIC, as administrator of DIF. These agencies and the federal and state laws applicable to our bank and its operations, extensively regulate various aspects of the banking business including, among other things, permissible types and amounts of loans, investments and other activities, capital adequacy, branching, interest rates on loans and on deposits, the maintenance of non-interest bearing reserves on deposit accounts, and the safety and soundness of banking practices.

Deposit Insurance. As an FDIC-insured institution, we are required to pay deposit insurance premium assessments to the FDIC. The FDIC has adopted a risk-based assessment system under which all insured depository institutions are placed into one of four categories and assessed insurance premiums, based upon their respective levels of capital and results of supervisory evaluation. Institutions classified as well-capitalized (as defined by the FDIC) and considered healthy pay the lowest premium while institutions that are less than adequately capitalized (as defined by the FDIC) and considered of substantial supervisory concern pay the highest premium. Risk classification of all insured institutions is made by the FDIC for each semi-annual assessment period.

The FDIC is required to establish assessment rates for insured depository institutions at levels that will maintain the DIF at a Designated Reserve Ratio (DRR) selected by the FDIC within a range of 1.15% to 1.50%. The FDIC is allowed to manage the pace at which the reserve ratio varies within this range. The DRR is currently established at 1.25%.

Under the FDIC's rate schedule, most well-capitalized banks will pay from 12 to 14 basis points (calculated against the bank's deposit base) annually for the first quarter of 2009, increasing to 50 basis points for banks that pose significant supervisory concerns. Effective April 1, 2009, most well-capitalized banks will pay from 12 to 16 basis points annually, increasing to 45 basis points for banks that pose significant supervisory concerns. This base rate may be adjusted based upon the level of unsecured debt, secured liabilities or brokered deposits, as defined, resulting in adjusted rates ranging from 7 to 24 basis points annually for most well capitalized banks and 43 to 77.5 basis points annually for banks that pose significant supervisory concerns.

The FDIC issued an interim rule that provides for a special assessment on June 30, 2009 to be collected on September 30, 2009, and that the Board may impose additional special assessments thereafter under certain circumstances. The interim rule was adopted to ensure the strength of the DIF in response to the recent and anticipated failures of FDIC-insured institutions resulting from the deterioration in banking and economic conditions. The FDIC has sought comment on the interim rule and thus, it could be revised prior to its effective date of April 1, 2009.

FICO Assessments. Our bank, as a member of the BIF, is subject to assessments to cover the payments on outstanding obligations of the Financing Corporation ("FICO"). FICO was created to finance the recapitalization of the Federal Savings and Loan Insurance Corporation, the predecessor to the FDIC's Savings Association Insurance Fund (the "SAIF") which insures the deposits of thrift institutions. From now until the maturity of the outstanding FICO obligations in 2019, BIF members and SAIF members will share the cost of the interest on the FICO bonds on a *pro rata* basis. It is estimated that FICO assessments during this period will be less than 0.025% of deposits.

Commissioner Assessments. Michigan banks are required to pay supervisory fees to the Commissioner to fund the operations of the Commissioner. The amount of supervisory fees paid by a bank is based upon the bank's total assets, as reported to the Commissioner.

Capital Requirements. The FDIC has established the following minimum capital standards for state-chartered, FDIC insured non-member banks, such as Macatawa Bank: a leverage requirement consisting of a minimum ratio of Tier 1 capital to total average assets of 3% for the most highly-rated banks with minimum requirements of 4% to 5% for all others, and a risk-based capital requirement consisting of a minimum ratio of total capital to total risk-weighted assets of 8%, at least one-half of which must be Tier 1 capital. Tier 1 capital consists principally of shareholders' equity. These capital requirements are minimum requirements. Higher capital levels will be required if warranted by the particular circumstances or risk profiles of individual institutions.

Federal law provides the federal banking regulators with broad power to take prompt corrective action to resolve the problems of undercapitalized institutions. The extent of the regulators' powers depends on whether the institution in question is "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized," or "critically undercapitalized."

Federal regulations define these capital categories as follows:

	<u>Total Risk-Based Capital Ratio</u>	<u>Tier 1 Risk-Based Capital Ratio</u>	<u>Leverage Ratio</u>
Well capitalized	10% or above	6% or above	5% or above
Adequately capitalized	8% or above	4% or above	4% or above
Undercapitalized	Less than 8%	Less than 4%	Less than 4%
Significantly undercapitalized	Less than 6%	Less than 3%	Less than 3%
Critically undercapitalized	--	--	A ratio of tangible equity to total assets of 2% or less

As of December 31, 2008, each of Macatawa Bank's ratios exceeded minimum requirements for the well capitalized category.

Depending upon the capital category to which an institution is assigned, the regulators' corrective powers include: requiring the submission of a capital restoration plan; placing limits on asset growth and restrictions on activities; requiring the institution to issue additional capital stock (including additional voting stock) or to be acquired; restricting transactions with affiliates; restricting the interest rate the institution may pay on deposits; ordering a new election of directors of the institution; requiring that senior executive officers or directors be dismissed; prohibiting the institution from accepting deposits from correspondent banks; requiring the institution to divest certain subsidiaries; prohibiting the payment of principal or interest on subordinated debt; and ultimately, appointing a receiver for the institution.

In general, a depository institution may be reclassified to a lower category than is indicated by its capital levels if the appropriate federal depository institution regulatory agency determines the institution to be otherwise in an unsafe or unsound condition or to be engaged in an unsafe or unsound practice. This could include a failure by the institution, following receipt of a less-than-satisfactory rating on its most recent examination report, to correct the deficiency.

Dividends. Under Michigan law, our bank is restricted as to the maximum amount of dividends it may pay on its common stock. Our bank may not pay dividends except out of net income after deducting its losses and bad debts. A Michigan state bank may not declare or pay a dividend unless the bank will have surplus amounting to at least 20% of its capital after the payment of the dividend.

Federal law generally prohibits a depository institution from making any capital distribution (including payment of a dividend) or paying any management fee to its holding company if the depository institution would thereafter be undercapitalized. The FDIC may prevent an insured bank from paying dividends if the bank is in default of payment of any assessment due to the FDIC. In addition, the FDIC may prohibit the payment of dividends by our bank, if such payment is determined, by reason of the financial condition of our bank, to be an unsafe and unsound banking practice.

Insider Transactions. Our bank is subject to certain restrictions imposed by the Federal Reserve Act on any extensions of credit to us or our subsidiaries, on investments in the stock or other securities of us or our subsidiaries and the acceptance of the stock or other securities of us or our subsidiaries as collateral for loans. Certain limitations and reporting requirements are also placed on extensions of credit by our bank to its directors and officers, to our directors and officers, the directors and officers of our bank, to our principal shareholders and to "related interests" of such directors, officers and principal shareholders. In addition, federal law and regulations may affect the terms upon which any person becoming a director or officer of our company or one of its subsidiaries or a principal shareholder in our company may obtain credit from banks with which our bank maintains a correspondent relationship.

Safety and Soundness Standards. The federal banking agencies have adopted guidelines to promote the safety and soundness of federally insured depository institutions. These guidelines establish standards for internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, asset quality and earnings.

Investments and Other Activities. Under federal law and FDIC regulations, FDIC insured state banks are prohibited, subject to certain exceptions, from making or retaining equity investments of a type, or in an amount, that are not permissible for a national bank. Federal law, as implemented by FDIC regulations, also prohibits FDIC insured state banks and their subsidiaries, subject to certain exceptions, from engaging as principal in any activity that is not permitted for a national bank or its subsidiary, respectively, unless the bank meets, and continues to meet, its minimum regulatory capital requirements and the FDIC determines the activity would not pose a significant risk to the deposit insurance fund of which the bank is a member. Impermissible investments and activities must be divested or discontinued within certain time frames set by the FDIC in accordance with federal law. These restrictions are not currently expected to have a material impact on the operations of our bank.

Consumer Protection Laws. Our bank's business includes making a variety of types of loans to individuals. In making these loans, we are subject to State usury and regulatory laws and to various federal statutes, including the privacy of consumer financial information provisions of the Gramm-Leach-Bliley Act and regulations promulgated thereunder, the Equal Credit Opportunity Act, the Fair Credit Reporting Act, the Truth in Lending Act, the Real Estate Settlement Procedures Act, and the Home Mortgage Disclosure Act, and the regulations promulgated thereunder, which prohibit discrimination, specify disclosures to be made to borrowers regarding credit and settlement costs, and regulate the mortgage loan servicing activities of our bank, including the maintenance and operation of escrow accounts and the transfer of mortgage loan servicing. In receiving deposits, our bank is subject to extensive regulation under State and federal law and regulations, including the Truth in Savings Act, the Expedited Funds Availability Act, the Bank Secrecy Act, the Electronic Funds Transfer Act, and the Federal Deposit Insurance Act. Violation of these laws could result in the imposition of significant damages and fines upon our bank and its directors and officers.

Branching Authority. Michigan banks have the authority under Michigan law to establish branches anywhere in the State of Michigan, subject to receipt of all required regulatory approvals. Banks may establish interstate branch networks through acquisitions of other banks. The establishment of de novo interstate branches or the acquisition of individual branches of a bank in another state (rather than the acquisition of an out-of-state bank in its entirety) is allowed only if specifically authorized by state law.

Michigan permits both U.S. and non-U.S. banks to establish branch offices in Michigan. The Michigan Banking Code permits, in appropriate circumstances and with the approval of the Michigan Office of Financial and Insurance Regulation, Division of Financial Institutions, (1) acquisition of Michigan banks by FDIC-insured banks, savings banks or savings and loan associations located in other states, (2) sale by a Michigan bank of branches to an FDIC-insured bank, savings bank or savings and loan association located in a state in which a Michigan bank could purchase branches of the purchasing entity, (3) consolidation of Michigan banks and FDIC-insured banks, savings banks or savings and loan associations located in other states having laws permitting such consolidation, (4) establishment of branches in Michigan by FDIC-insured banks located in other states, the District of Columbia or U.S. territories or protectorates having laws permitting a Michigan bank to establish a branch in such jurisdiction, and (5) establishment by foreign banks of branches located in Michigan.

ITEM 1A: Risk Factors

You should carefully consider the following risk factors, together with the other information provided in this Annual Report on Form 10-K.

The state of financial markets and the economy may adversely affect our sources of liquidity and capital.

There has been significant recent turmoil and volatility in worldwide financial markets which is, at present, ongoing. These conditions have resulted in a disruption in the liquidity of financial markets, and could directly impact us to the extent we need to access capital markets to raise funds to support our business and overall liquidity position. This situation could affect the cost of such funds or our ability to raise such funds. If we were unable to access any of these funding sources when needed, it could adversely impact our financial condition, results of operations, cash flows, and level of regulatory-qualifying capital.

There Can Be No Assurance that the Emergency Economic Stabilization Act of 2008 and the American Recovery and Reinvestment Act Will Stabilize the U.S. Economy and Financial System

The U.S. Congress enacted the EESA in response to the impact of the volatility and disruption in the capital and credit markets on the financial sector. The U.S. Department of the Treasury and the federal banking regulators are implementing a number of programs under this legislation that are intended to address these conditions and the asset quality, capital and liquidity issues they have caused for certain financial institutions and to improve the general availability of credit for consumers and businesses. In addition, the U.S. Congress recently enacted the American Recovery and Reinvestment Act ("ARRA") in an effort to save and create jobs, stimulate the U.S. economy and promote long-term growth and stability. There can be no assurance that EESA, ARRA or the programs that are implemented under them will achieve their intended purposes. The failure of EESA, ARRA or the programs that are implemented under them to achieve their intended purposes could result in a continuation or worsening of current economic and market conditions, and this could adversely affect our financial condition, results of operations, and/or the trading price of our common stock.

Changes in economic conditions or interest rates may negatively affect our profitability.

The results of operations for financial institutions, including our bank, may be materially and adversely affected by changes in prevailing local and national economic conditions, including declines in real estate market values, rapid increases or decreases in interest rates and changes in the monetary and fiscal policies of the federal government. Our profitability is heavily influenced by the quality of the Company's loan portfolio, and the spread between the interest rates we earn on investments and loans and the interest rates we pay on deposits and other interest-bearing liabilities. Substantially all our loans are to businesses and individuals in Western Michigan and any decline in the economy of this area could adversely affect us. Like most banking institutions, our net interest spread and margin will be affected by general economic conditions and other factors that influence market interest rates and our ability to respond to changes in such rates. At any given time, our assets and liabilities may be such that they are affected differently by a given change in interest rates.

Our credit losses could increase and our allowance for loan losses may not be adequate to cover actual loan losses.

The risk of nonpayment of loans is inherent in all lending activities and nonpayment, if it occurs, may have a material adverse affect on our earnings and overall financial condition as well as the value of our common stock. We make various assumptions and judgments about the collectibility of our loan portfolio and provide an allowance for potential losses based on a number of factors. If our assumptions are wrong, our allowance for loan and lease losses may not be sufficient to cover our losses, thereby having an adverse affect on our operating results, and may cause us to increase the allowance in the future. The actual amount of future provisions for loan losses cannot now be determined and may exceed the amounts of past provisions. Additionally, federal banking regulators, as an integral part of their supervisory function, periodically review our allowance for credit losses. These regulatory agencies may require us to increase our provision for credit losses or to recognize further loan or lease charge-offs based upon their judgments, which may be different from ours. Any increase in the allowance for credit losses could have a negative effect on our net income, financial condition and results of operations.

Our loan portfolio has and will continue to be affected by the on-going correction in residential real estate prices and reduced levels of home sales.

At December 31, 2008, we had approximately \$203.7 million of loans for the development or sale of 1-4 family residential properties, down from \$235.8 million at December 31, 2007. There continues to be a general slowdown in the housing market in our market area, reflecting declining prices and excess inventories of houses to be sold. As a result, home builders have shown signs of financial deterioration. We expect the home builder market to continue to be volatile and anticipate continued pressure on the home builder segment in the coming months. As we continue our on-going portfolio monitoring, we will make credit and reserve decisions based on the current conditions of the borrower or project combined with our expectations for the future. If the slow down in the housing market continues, we could experience higher charge-offs and delinquencies in this portfolio.

Our business is subject to various lending risks depending on the nature of the borrower's business, its cash flow and our collateral.

Repayment of our commercial loans is often dependent on cash flow of the borrower, which may be unpredictable, and collateral securing these loans may fluctuate in value. Our commercial loans are primarily made based on the cash flow of the borrower and secondarily on the underlying collateral provided by the borrower. Most often, this collateral is accounts receivable, inventory, equipment or real estate. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers. Other collateral securing loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business.

Our commercial real estate loans involve higher principal amounts than other loans, and repayment of these loans may be dependent on factors outside our control or the control of our borrowers. Commercial real estate lending typically involves higher loan principal amounts, and the repayment of these loans generally is dependent, in large part, on sufficient income from the properties securing the loans to cover operating expenses and debt service. Because payments on loans secured by commercial real estate often depend upon the successful operating and management of the properties, repayment of such loans may be affected by factors outside the borrower's control, such as adverse conditions in the real estate market or the economy or changes in government regulation. If the cash flow from the project is reduced, the borrower's ability to repay the loan and the value of the security for the loan may be impaired.

Our construction and development loans are based upon estimates of costs to construct and value associated with the completed project. These estimates may be inaccurate. Because of the uncertainties inherent in estimating construction costs, as well as the market value of the completed project, it is relatively difficult to evaluate accurately the total funds required to complete a project and the related loan-to-value ratio. As a result, construction loans often involve the disbursement of substantial funds with repayment dependent, in part, upon the success of the ultimate project and the ability of the borrower to sell or lease the property, rather than the ability of the borrower or guarantor to repay principal and interest. Delays in completing the project may arise from labor problems, material shortages and other unpredictable contingencies. If the estimate of the cash of construction is inaccurate, we may be required to advance additional funds to complete construction. If our appraisal of the value of the completed project proves to be overstated, we may have inadequate security for the repayment of the loan upon completion of the project.

Our construction and development loans also include loans to residential land developers for which repayment is generally from the sale of residential lots and/or new construction residential one-to-four family homes. Residential development loans typically involve higher loan principal amounts. In addition, the sale of residential lots and/or new construction residential one-to-four family residences is contingent upon general market conditions and the resulting impact on the demand for residential property. If the demand for residential lots and/or new construction residential one-to-four family residences slows, the borrowers' ability to repay the loan and the value of the security for the loan may be impaired.

Our consumer loans generally have a higher risk of default than our other loans. Consumer loans entail greater risk than our other loans, particularly in the case of consumer loans that are unsecured or secured by rapidly depreciating assets. In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of damage, loss or depreciation. The remaining deficiency often does not warrant further substantial collection efforts against the borrower beyond obtaining a deficiency judgment. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus, are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy, all of which increase when the economy is weak. Furthermore, the application of various Federal and state laws, including Federal and state bankruptcy and insolvency laws, may limit the amount that can be recovered on such loans.

Litigation involving Trade Partners may have a material adverse effect on our financial condition.

Item 3 of this Form 10-K includes information about the Trade Partners, Inc. receivership and pending legal actions involving Trade Partners, Inc., the Macatawa Bank Corporation and Macatawa Bank. If one or more of these legal actions is determined adversely to the Macatawa Bank Corporation and Macatawa Bank, or if one or more of these legal actions results in Macatawa Bank Corporation or Macatawa Bank paying a substantial settlement, then such adverse determination or settlement may have a material adverse effect on our financial condition.

The Company has reached a contingent settlement agreement with counsel representing the majority of the Plaintiff's. The settlement agreement remains subject to a number of conditions, as discussed further in Item 3 of this Form 10-K.

We may experience difficulties in managing our growth.

To sustain our continued growth, we require additional capital to fund our expanding lending activities. As part of our strategy for continued growth, we intend to open additional branches. New branches often experience a period of unprofitability due to the impact of overhead expenses and the start-up phase of generating loans and deposits. To the extent that we continue to open additional branches, we may experience the effects of higher operating expenses relative to operating income from the new operations, which may have an adverse affect on our levels of net income, return on average equity and return on average assets.

In addition, we may acquire banks and related businesses that we believe provide a strategic fit with our business. To the extent that we grow through acquisitions, we cannot assure you that we will be able to adequately or profitably manage such growth. Acquiring other banks and businesses involves risks commonly associated with acquisitions.

We rely heavily on our management and other key personnel, and the loss of any of them may adversely effect our operations.

We are and will continue to be dependent upon the services of our management team, including our President and Chief Executive Officer of Macatawa Bank, our Executive Vice President of Macatawa Bank, and our other senior managers and commercial lenders. Losing one or more key members of the management team could adversely affect our operations. We do not maintain key man life insurance on any of our officers or directors.

We continually encounter technological change, and we may have fewer resources than our competitors to continue to invest in technological improvements.

The banking industry is undergoing rapid technological changes with frequent introductions of new technology-driven products and services. In addition to better serving customers, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our future success will depend, in part, on our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. There can be no assurance that we will be able to effectively implement new technology-driven products and services or be successful in marketing such products and services to our customers.

Our future success is dependent on our ability to compete effectively in the highly competitive banking industry.

We face substantial competition in all phases of our operations from a variety of different competitors. Our future growth and success will depend on our ability to compete effectively in this highly competitive environment. We compete for deposits, loans and other financial services with numerous Michigan-based and out-of-state banks, thrifts, credit unions and other financial institutions as well as other entities which provide financial services. Some of the financial institutions and financial services organizations with which we compete are not subject to the same degree of regulation as we are. Most of our competitors have been in business for many years, have established customer bases, are larger, and have substantially higher lending limits than we do. The primary competitors in our market area include Fifth Third Bancorp, Huntington Bancshares, and LaSalle Bank. The financial services industry is also likely to become more competitive as further technological advances enable more companies to provide financial services. These technological advances may diminish the importance of depository institutions and other financial intermediaries in the transfer of funds between parties.

We are subject to significant government regulation, and any regulatory changes may adversely affect us.

The banking industry is heavily regulated under both federal and state law. These regulations are primarily intended to protect customers, not our creditors or shareholders. As a bank holding company, we are also subject to extensive regulation by the Federal Reserve, in addition to other regulatory and self-regulatory organizations. Our ability to establish new facilities or make acquisitions is conditioned upon the receipt of the required regulatory approvals from these organizations. Regulations affecting banks and financial services companies undergo continuous change, and we cannot predict the ultimate effect of such changes, which could have a material adverse effect on our profitability or financial condition.

Our articles of incorporation and by-laws and Michigan laws contain certain provisions that could make a takeover more difficult.

Our articles of incorporation and by-laws, and the laws of Michigan, include provisions which are designed to provide our board of directors with time to consider whether a hostile takeover offer is in our best interest and the best interests of our shareholders. These provisions, however, could discourage potential acquisition proposals and could delay or prevent a change in control. The provisions also could diminish the opportunities for a holder of our common stock to participate in tender offers, including tender offers at a price above the then-current price for our common stock. These provisions could also prevent transactions in which our shareholders might otherwise receive a premium for their shares over then current market prices, and may limit the ability of our shareholders to approve transactions that they may deem to be in their best interests.

The Michigan Business Corporation Act contains provisions intended to protect shareholders and prohibit or discourage certain types of hostile takeover activities. In addition to these provisions and the provisions of our articles of incorporation and by-laws, Federal law requires the Federal Reserve Board's approval prior to acquisition of "control" of a bank holding company. All of these provisions may have the effect of delaying or preventing a change in control at the company level without action by our shareholders, and therefore, could adversely affect the price of our common stock.

The market price for our common stock fluctuates.

The market price for our common stock has fluctuated, ranging between \$2.60 and \$14.49 for 2008. The overall market and the price of our common stock may continue to fluctuate. There may be a significant impact on the market price for our common stock due to, among other things:

- Variations in our anticipated or actual operating results or the results of our competitors;
- Changes in investors' or analysts' perceptions of the risks and conditions of our business;
- The size of the public float of our common stock;
- Regulatory developments;
- Market conditions; and
- General economic conditions.

Additionally, the average daily trading volume for our common stock as reported on the Nasdaq National Market was 78,593 shares during 2008, with daily volume ranging from a low of 7,901 shares to a high of 1,927,311 shares. There can be no assurance that a more active or consistent trading market in our common stock will develop. As a result, relatively small trades could have a significant impact on the price of our common stock.

Our ability to pay dividends is limited by law and contract.

We are a holding company and substantially all of our assets are held by our bank. Our ability to continue to make dividend payments to our shareholders will depend primarily on available cash resources at the holding company and dividends from our bank. Dividend payments or extensions of credit from our bank are subject to regulatory limitations, generally based on capital levels and current and retained earnings, imposed by regulatory agencies with authority over our bank. The ability of our bank to pay dividends is also subject to its profitability, financial condition, capital expenditures and other cash flow requirements. We also are prohibited from paying dividends on our common stock if the required payments on our subordinated debentures have not been made. We cannot assure you that our bank will be able to pay dividends to us in the future.

ITEM 1B: Unresolved Staff Comments.

None.

ITEM 2: Properties.

We own or lease facilities located in Ottawa County, Allegan County and Kent County, Michigan. Our administrative offices are located at 10753 Macatawa Drive, Holland, Michigan 49424. Our administrative offices are approximately 49,000 square feet and contain our administration, human resources, trust, loan underwriting and processing, and deposit operations.

Our facilities as of February 26, 2009, were as follows:

<u>Location of Facility</u>	<u>Use</u>
10753 Macatawa Drive, Holland	Main Branch, Administrative, and Loan Processing Offices
815 E. Main Street, Zeeland	Branch Office
125 Ottawa Avenue N.W., Grand Rapids*	Trust and Mortgage Offices
126 Ottawa Avenue N.W., Grand Rapids*	Branch Office
141 E. 8th Street, Holland	Branch Office
489 Butternut Dr., Holland	Branch Office
701 Maple Avenue, Holland	Branch Office
699 E. 16th Street, Holland	Branch Office
41 N. State Street, Zeeland	Branch Office
2020 Baldwin Street, Jenison	Branch Office
6299 Lake Michigan Dr., Allendale	Branch Office
132 South Washington, Douglas	Branch Office
4758 – 136th Street, Hamilton*	Branch Office
3526 Chicago Drive, Hudsonville	Branch Office
20 E. Lakewood Blvd., Holland	Branch Office
3191 – 44th Street, S.W., Grandville	Branch Office
2261 Byron Center Avenue S.W., Byron Center	Branch Office
5271 Clyde Park Avenue, S.W., Wyoming	Branch Office and Loan Center
4590 Cascade Road, Grand Rapids	Branch Office

6330 28 th Street, S.E., Grand Rapids	Branch Office

* Leased facility

We believe our facilities are well-maintained and adequately insured. Because of our growth, we are continually evaluating the need for additional space and branches.

ITEM 3. LEGAL PROCEEDINGS.

Please refer to the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2003, (Part II, Item 1 Legal Proceedings) for information concerning legal proceedings related to Trade Partners, Inc.

A lawsuit was filed in April 2003 by John and Kathryn Brand in Oklahoma state court against Grand Bank, the Company, Trade Partners and certain individuals and entities associated with Trade Partners. The complaint sought damages for the asserted breach of certain escrow agreements for which Grand Bank served as custodian and escrow agent. The claims asserted against the Company and Grand Bank in this action have been settled and dismissed with prejudice.

In May 2003, a purported class action complaint was filed by Forrest W. Jenkins and Russell S. Vail against the Company in the United States District Court for the District of Western Michigan. As amended, this suit alleges that Grand Bank breached escrow agreements and fiduciary duties and violated the Michigan Uniform Securities Act with respect to the investments secured by the purported class in viaticals and in interests in limited partnerships which made loans to Trade Partners secured by viaticals, and with respect to loans made by purported class members directly to Trade Partners. Plaintiffs' motion for class certification was denied in November 2006. The Company has answered this complaint denying the material allegations and raising certain affirmative defenses.

Following denial of class certification in the Jenkins case, nine new cases were filed in several different jurisdictions. These complaints are identical in all material respects other than the identity of the plaintiffs, and are substantially identical to the complaint in the Jenkins litigation. None of these complaints contain class action allegations, but the total number of named plaintiffs in all the nine cases is currently about 1,200. The cases are: Ronald Ash, et. al. v. Macatawa Bank Corporation, et. al.—filed November 17, 2006 in the District Court for Oklahoma County, Oklahoma, subsequently removed by the Company to the United States District Court for the Western District of Oklahoma; Steven M. Adamson, et. al. v. Macatawa Bank Corporation, et. al.—filed November 15, 2006 in the United States District Court for the Western District of Oklahoma; James Lee Myers et. al. v. Macatawa Bank Corporation, et. al.—filed November 14, 2006 in the Superior Court for Los Angeles County, California, subsequently removed by the Company to the United States District Court for the Central District of California; Frank V. Bailey et. al. v. Macatawa Bank Corporation, et. al.—filed November 29, 2006 in the United States District Court for the Northern District of Texas; Eddie Elkins, et. al. v. Macatawa Bank Corporation—filed January 29, 2007 in the United States District Court for the Western District of Oklahoma; William A. Giese, et. al. v. Macatawa Bank Corporation, et. al.—filed November 17, 2006 in the Circuit Court for Kent County, Michigan; Gerald Abraham, et. al. v. Macatawa Bank Corporation, et. al.—filed November 29, 2006 in the Circuit Court for Kent County, Michigan; Jorge Acevedo, et. al. v. Macatawa Bank Corporation, et. al.—filed December 17, 2006 in the Circuit Court for Kent County, Michigan; and Jose Javier Acasuso, et. al. v. Macatawa Bank Corporation, et. al.—filed January 17, 2007 in the Circuit Court for Kent County, Michigan.

The Company believes it has meritorious defenses to these cases, and has vigorously defended them.

On October 6, 2008 the Company reached a preliminary contingent settlement with counsel for the Plaintiffs in these proceedings. This agreement required various conditions to be satisfied by January 15, 2009. The Company does not believe it is likely that the contingencies, which are discussed in more detail below, will be satisfied and entered into the agreement anticipating that the plaintiffs' response would help it assess the uncertainties of the litigation.

Both parties entered into a re-negotiation of the agreement in December and the preliminary contingent settlement was amended on January 29, 2009. Under the terms of the Amended Agreement, if all contingencies are satisfied and the settlement becomes final, the Company will pay the plaintiffs \$5.75 million in cash, and issue warrants to purchase a total of 1,500,000 shares of common stock at an exercise price of \$9.00 per share with the warrants having a term of five years from the date of issuance. The Amended Agreement further provides that the plaintiffs are to receive amounts collected by the Company from other defendants up to \$250,000. If the Company collects less than \$250,000 from these other defendants, it is to make up the difference with cash. The Company's insurers will contribute \$950,000 to the cash portion of the settlement. The Amended Agreement includes deadlines for satisfying certain contingencies. Under the terms of the Amended Agreement, the Company will not issue shares of common stock as part of the settlement (except pursuant to the warrant as described above).

The settlement involves no admission of fault or wrongdoing by the Company or Macatawa Bank.

The original contingent settlement agreement provided for a settlement of \$2.75 million in cash, including \$950,000 from the Company's insurers, \$250,000 in cash from third parties defendants or the Company, common stock valued at \$3.0 million and three warrants for each share of common stock to be issued in the proposed settlement. The common stock was to have been issued at a price based on the average closing price for the 20 trading days preceding the date the settlement would have become final after the contingencies are satisfied, the stock warrants would have expired after three years and would have had an exercise price equal to 150% of the price per share at which the common stock was issued with the result that the number of shares and warrants to be issued would have been determined based on the stock price at the time the settlement becomes final. The Company's lower stock price affected their ability to offer stock causing both parties to enter into re-negotiation in December, 2008. The preliminary contingent settlement agreement was amended on January 29, 2009. The stock component of the original offer was replaced with cash, but the value of the contingent settlement agreement was essentially unchanged.

Significant contingencies contained in the Amended Agreement are beyond the Company's control and there can be no assurance about if and when such additional contingencies will be satisfied. The contingencies include the requirement that by no later than April 30, 2009, ninety-eight percent (98%) of the total number of plaintiffs and ninety-eight percent (98%) of the total dollar amount of the claims must be resolved by said plaintiffs signing a release of claims. If the contingencies were satisfied and the litigation was settled, as proposed, the impact on the Company would be the recording of an additional expense of approximately \$3.3 million, net of tax.

There are approximately 1,200 plaintiffs located in 40 states and 13 different countries. Plaintiffs' claims differ widely depending upon which of the many different escrow agreements to which they were a party. This is not a class action and Plaintiff's counsel cannot act to bind the Plaintiffs. The Company believes that resolving this litigation would be in the best interests of the Company and its shareholders. However, based on the significance of the contingencies precedent within the contingent settlement agreement, particularly given the geographic disparity of the plaintiffs, the complicated nature of their varied claims, and the high number of plaintiffs involved combined with the high threshold (98%) required for release of claims, we do not believe it is probable that the contingencies will be satisfied and the litigation settled as contemplated by the contingent settlement agreement. The Company made the offer to settle, containing the contingencies noted above, in an attempt to avoid exposure to future litigation and to avoid the cost of litigation, although the Company did and does not believe the plaintiffs are likely to meet the terms of the offer so as to be able to accept it.

If the contingencies are not satisfied, and the offer accepted under its terms, the Company does not intend to extend or amend the offer, the Trade Partners litigation will not be settled and the litigation process will resume. If the litigation resumes, the Company believes it has strong defenses and intends to continue to vigorously defend these actions. The outcome under litigation, however, is uncertain, and we are therefore unable to determine to what extent it will impact the Company. The outcome could involve less or more loss to the Company than the amount proposed in the settlement offer. Accordingly, no amount has been accrued at December 31, 2008 for this matter.

On April 15, 2003, the United States District Court for the Western District of Michigan appointed a receiver for Trade Partners. In order to prevent or minimize any loss to investors in the viaticals sold by Trade Partners to investors, the court-appointed receiver coordinated the payment of premiums on the approximately 1,000 outstanding viaticated insurance policies in the Trade Partners portfolio so that the policies would not lapse. The receiver informed the Company that nine policies with a total face value of approximately \$1.4 million lapsed for failure to pay premiums prior to the receiver's coordination efforts. In addition, the receiver unsuccessfully contested a partial lapse totaling about \$700,000. In February 2008 the receiver reported that he had discovered that an unspecified number of group policies in an unspecified face amount had apparently lapsed prior to the receivership "for various reasons, including companies that went out of business or employees who had been terminated."

On July 1, 2003, the United States District Court for the Western District of Michigan authorized the receiver to borrow money from Macatawa Bank to pay premiums, if needed. Macatawa Bank agreed to extend a \$4 million line of credit to the receiver, conditioned upon obtaining a security interest in the viaticals. No draws were made against the line, and the line expired during the fourth quarter of 2004.

The receiver received authorization from the Court in July 2005 to sell the entire portfolio, which the receiver said had a face value of approximately \$170 million, to Universal Settlements International, Inc., a Canadian company, for an amount equal to 26.58% of face value. Under the terms of the sale, payments are to be made by Universal Settlements to the receivership as policy transfers are processed by the issuing insurance companies. The receiver has reported that as of January 15, 2009 he had received sale payments of approximately \$39.7 million and proceeds of maturities aggregating another \$33.1 million.

The receiver on July 21, 2006 filed a proposed amended plan of distribution and related disclosure statement, contemplating a complete liquidation of the assets of Trade Partners. The plan was approved by the Court on January 7, 2007. The receiver reported as of February 5, 2008 that claims against the receivership estate totaled \$169,430,383.85, but that contrary to his earlier reports he now expected that there may be “one or two” additional claims in unspecified amounts that will be filed.

The receiver reported that he commenced distributions on January 19, 2007, and that as of January 15, 2009 \$46,990,300 in court-approved claims and settlements had been distributed. There may be additional distributions, but the Company does not know when they might be made or in what amount.

It is possible that one or more additional legal actions may be initiated involving the custodial and escrow agent services provided by Grand Bank in connection with Trade Partners. If any such legal actions are commenced, the Company intends to defend them vigorously.

As of the date hereof, except as disclosed above, there were no material pending legal proceedings, other than routine litigation incidental to the business of banking to which we or any of our subsidiaries are a party of or which any of our properties are the subject.

ITEM 4: Submission of Matters to a Vote of Security Holders.

No matters were submitted during the fourth quarter of 2008 to a vote of our shareholders.

PART II

ITEM 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market Information. The Company's common stock is quoted on the Nasdaq Global Select Market under the symbol MCBC. High and low sales prices (as reported on the Nasdaq Global Select Market) for each quarter for the years ended December 31, 2008 and 2007 are set forth in the table below. This information has been restated to reflect the impact of all previously paid stock dividends and splits.

<u>Quarter</u>	<u>2008</u>			<u>2007</u>		
	<u>High</u>	<u>Low</u>	<u>Dividends Declared</u>	<u>High</u>	<u>Low</u>	<u>Dividends Declared</u>
First Quarter	\$14.49	\$8.00	\$0.13	\$20.28	\$17.01	\$0.12
Second Quarter	\$11.90	\$7.48	\$0.13	\$17.90	\$14.70	\$0.13
Third Quarter	\$10.06	\$6.50	\$ ---	\$16.44	\$11.04	\$0.13
Fourth Quarter	\$7.44	\$2.60	\$ ---	\$14.44	\$7.56	\$0.13

On February 26, 2009, there were approximately 826 owners of record and, in addition, approximately 7,875 beneficial owners of our common stock.

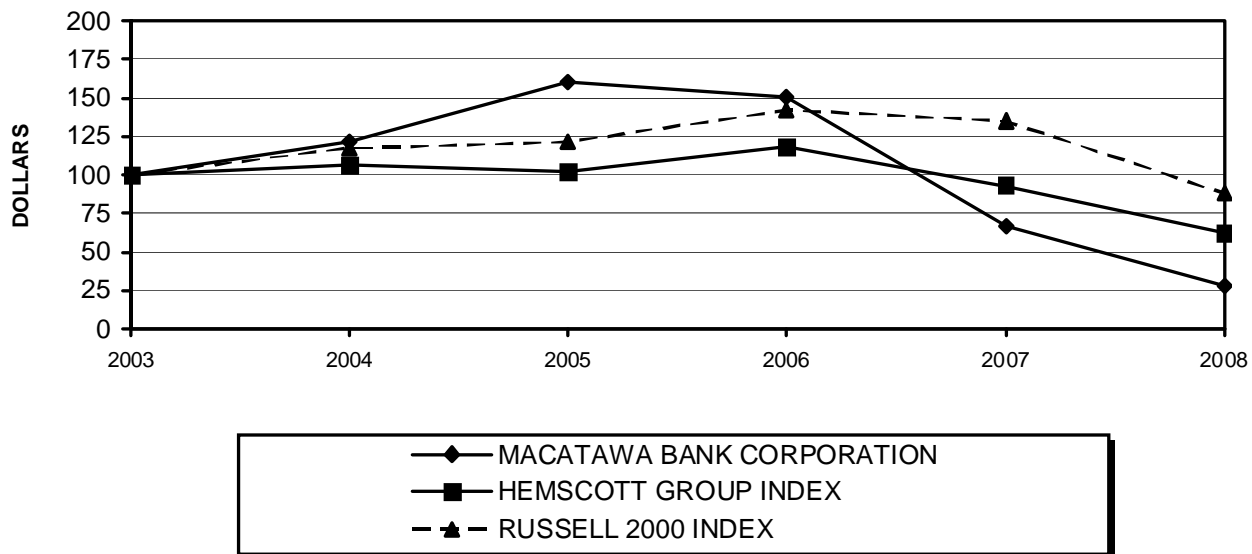

The Company declared its first cash dividend, amounting to \$.03 per share, during the fourth quarter of 2000. Quarterly cash dividends totaling \$.13 were paid during 2001, and a 3% stock dividend was declared during the second quarter of 2001. Quarterly cash dividends totaling \$.16 were paid during 2002, and a 4% stock dividend was declared during the second quarter of 2002. Quarterly cash dividends totaling \$.21 were paid during 2003, and a 5% stock dividend was declared during the second quarter of 2003. Quarterly cash dividends totaling \$.27 were paid during 2004, and a 5% stock dividend was declared during the second quarter of 2004. Quarterly cash dividends totaling \$.37 were paid during 2005, and a 15% stock dividend was declared during the second quarter of 2005. Quarterly cash dividends totaling \$.46 were paid during 2006, and a 5% stock dividend was declared in the second quarter of 2006. In addition, a 3-for-2 stock split was paid during the second quarter of 2006. Quarterly cash dividends totaling \$.51 were paid during 2007, and a 5% stock dividend was declared during the second quarter of 2007. Quarterly cash dividends totaling \$.26 were paid during 2008. All of these cash dividend amounts have been retroactively adjusted to reflect the effect of the stock dividends and stock split.

In order to augment its capital position, the Company temporarily suspended its cash dividend to common shareholders after payment of the second quarter cash dividend in 2008. Funds for the payment of future cash dividends are primarily dependent upon cash currently held at the Company and from dividends received from Macatawa Bank out of its earnings. The Company will continue to reevaluate, on a quarterly basis, the declaration of cash and stock dividends on common shares based primarily on the current and future projected levels of capital and cash held by the Company, and the current and future projected levels of capital and earnings of Macatawa Bank. There can be no assurance that we will have the financial resources to continue to pay dividends in the future.

SHAREHOLDER RETURN PERFORMANCE GRAPH

The following graph shows the cumulative total shareholder return on an investment in the Company's common stock compared to the Hemscott Group Index of Regional-Midwest Banks and the Russell 2000 Index. The comparison assumes a \$100 investment on December 31, 2003 and assumes that dividends are reinvested. The comparisons in this table are set forth in response to Securities and Exchange Commission (SEC) disclosure requirements, and therefore are not intended to forecast or be indicative of future performance of the common stock.

COMPARISON OF 5-YEAR CUMULATIVE TOTAL RETURN AMONG MACATAWA BANK CORPORATION, RUSSELL 2000 INDEX AND HEMSCOTT GROUP INDEX

ASSUMES \$100 INVESTED ON DEC. 31, 2003
ASSUMES DIVIDEND REINVESTED
FISCAL YEAR ENDED DEC. 31, 2008

Macatawa Bank Corporation	121.72	160.41	150.57	66.36	27.61
Hemscott Group Index	106.62	102.38	118.68	92.95	62.70
Russell 2000 Index	117.49	121.40	142.12	135.10	88.09

Issuer Purchases of Equity Securities. On May 17, 2007, the Company announced a repurchase plan that authorized share repurchases of up to \$30 million of our common stock. The Company did not repurchase any of its common stock in open market transactions under the repurchase plan during 2008. The Company has remaining authority to repurchase up to \$26,103,695 of market value of its common stock under the repurchase plan.

ITEM 6: Selected Financial Data.

The following selected consolidated financial and other data are derived from the Company's Financial Statements and should be read with the Consolidated Financial Statements and Notes thereto, and Management's Discussion and Analysis of Results of Operations and Financial Condition. The Consolidated Balance Sheets as of December 31, 2008 and 2007, and the Consolidated Statements of Income for the years ended December 31, 2008, 2007, and 2006, are included elsewhere in this Annual Report.

ITEM 7: Management's Discussion and Analysis of Results of Operations and Financial Condition.

Management's discussion and analysis of results of operations and financial condition contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those projected in such forward-looking statements.

The following section presents additional information to assess the results of operations and financial condition of the Company. This section should be read in conjunction with the consolidated financial statements and the supplemental financial data contained elsewhere in this Annual Report.

Overview

Macatawa Bank Corporation is a Michigan corporation and is the holding company for a wholly owned subsidiary, Macatawa Bank and for two trusts, Macatawa Statutory Trust I and Macatawa Statutory Trust II. Effective November 1, 2006, Macatawa Investment Services, Inc., a wholly owned subsidiary of Macatawa Bank Corporation, ceased doing business as a registered broker-dealer. Macatawa Bank is a Michigan chartered bank with depository accounts insured by the Federal Deposit Insurance Corporation. The bank operates twenty-six branch offices and a lending and operational service facility, providing a full range of commercial and consumer banking and trust services in Kent County, Ottawa County, and northern Allegan County, Michigan. On November 1, 2006, Macatawa Bank began offering brokerage services to its customers through an arrangement with Infinex Investments, Inc. ("Infinex"). Infinex is a full service investment provider, a registered broker-dealer and a member of the Financial Industry Regulatory Authority (FINRA) and the Securities Investor Protection Corporation (SIPC). As more fully discussed in our Form 8-K dated October 11, 2006, Macatawa Bank Corporation entered into an Agreement and Plan of Merger with the Smith & Associates investment advisory firm based in Holland, Michigan. The Smith & Associates acquisition became effective on January 1, 2007 and that business is now part of Macatawa Bank. Macatawa Statutory Trusts I and II are grantor trusts and issued \$20.0 million each of pooled trust preferred securities. These trusts are not consolidated in the Corporation's financial statements. For further information regarding consolidation, see the Notes to the Consolidated Financial Statements included herein. Macatawa Bank Mortgage Company, a subsidiary of Macatawa Bank, originates and sells residential mortgage loans into the secondary market on a servicing released basis.

We have generally experienced rapid growth since opening Macatawa Bank in November of 1997 with assets reaching \$2.1 billion as of December 31, 2008. At the end of 2007 and into 2008, the Company has managed its growth at a slower rate to focus on maintaining asset quality within the generally weak economic conditions in West Michigan. Since our inception in 1997, we have raised approximately \$131.9 million in capital through private and public common and preferred stock offerings and trust preferred offerings to ensure the Company's safety and soundness and to facilitate our growth and progress over these years.

We believe that growth in core deposits is key to our long-term success and is our primary funding source for asset growth. Establishing a branching network in our markets has been of high importance in order to facilitate this core deposit growth. We have gained community awareness and acceptance in our markets through this expanding branch network and our high quality service standards.

The West Michigan markets within which we operate continue to provide significant expansion opportunities for us. We opened our twenty-sixth branch during the second quarter of 2007 on the southeast side of the greater Grand Rapids area. Because of the significance of the greater Grand Rapids market and as it represents the greatest opportunity for market share growth, we anticipate additional branch openings in this market within the next few years. We also continue to enjoy success in building new and existing relationships in the Holland/Zeeland and Grand Haven markets. We anticipate that when economic conditions strengthen again we will continue to experience growth in our balance sheet and in our earnings due to these expansion opportunities.

RESULTS OF OPERATIONS

Summary: Net loss available to common shares was \$39.7 million or \$2.34 loss per common share for 2008 compared to net income of \$9.3 million or \$0.54 per common diluted share for 2007, and net income of \$19.8 million or \$1.14 per common diluted share for 2006. The results for 2008 include a non-cash, after tax impairment charge for goodwill and intangible assets of \$27 million, discussed more fully below.

The primary reason for the remaining decline in earnings for 2008 and 2007 compared to 2006 was an increase in the provision for loan losses to address continued deterioration in the loan portfolio, primarily commercial real estate loans to residential land developers. The provision for loan losses was \$37.4 million in 2008, \$15.8 million in 2007 and \$7.7 million in 2006. Circumstances associated with these losses are described under Loan Portfolio and Asset Quality and Allowance for Loan Losses.

Net Interest Income: Net interest income totaled \$58.1 million during 2008 compared to \$62.9 million during 2007 and \$67.4 million during 2006.

The decrease in net interest income during 2008 compared to 2007 was primarily due to a decline in the net interest margin partially offset by an increase in average earning assets. Average interest earning assets increased by \$21.2 million, to \$1.98 billion for 2008. The net interest margin decreased 27 basis points to 2.94% for 2008 from 3.21% for 2007. Approximately half of the decline in net interest margin was from rising balances of non-performing assets throughout 2008. The remaining decline was largely driven by the Federal funds and prime rate cuts that began in late 2007, resulting in a more rapid decline in the yield on assets compared to the cost of funds.

The yield on earning assets decreased 125 basis points to 5.86% for 2008 from 7.11% for 2007. The 325 basis point decline in the prime rate that began in the third quarter of 2007 caused a decrease in the yield on our variable rate loan portfolio and was the primary reason for the decrease in yield on earning assets. Also contributing to the decrease was the impact of rising balances of nonperforming loans throughout 2007 and into 2008 which resulted in a decline of approximately 13 basis points in the yield on assets. The cost of funds decreased 109 basis points to 3.23% in 2008 from 4.32% in 2007. A decrease in the rates paid on our deposit accounts in response to declining market rates, the rollover of time deposits at lower rates, and the repositioning of other borrowings within the lower rate environment, were the primary reasons for the decrease in the cost of funds.

The decrease in net interest income during 2007 compared to 2006 was primarily due to a decline in the net interest margin partially offset by an increase in average earning assets. Average interest earning assets increased by \$120.5 million, or 7%, to \$1.96 billion for 2007. The net interest margin decreased 46 basis points to 3.21% for 2007 from 3.67% for 2006 from both a decrease in the yield on earning assets and an increase in the cost of funds.

The impact of rising balances of nonperforming loans during 2007 was the primary reason for the 15 basis point decline in the yield on assets during the period. The general increase in rates paid on deposit accounts, the rollover of time deposits at higher rates and a shift to higher costing funds within the generally high interest rate environment that occurred throughout 2006 and through the third quarter of 2007 are the primary reasons for the 31 basis point increase in cost of funds during the period. The decrease in market rates that began in late September of 2007, however, led to a decline in the cost of funds during the fourth quarter of 2007, partially offsetting the increase in cost of funds for the year.

Anticipated growth in earning assets is expected to continue at lower levels than we have experienced in the past due to the generally weak economic conditions in Michigan that remain and are expected to continue into 2009. The declines in the Federal funds and prime rates that occurred into late 2008 may have a negative impact on net interest income in early 2009, although the impact is expected to be more than offset by a continued decline in the cost of funds, as term funding is expected to rollover at lower costs throughout 2009.

The following table shows an analysis of net interest margin for the years ended December 31, 2008, 2007 and 2006.

Provision for Loan Losses: The provision for loan losses for 2008 was \$37.4 million as compared to \$15.8 million for 2007 and \$7.7 million for 2006. The increase in the provision for loan losses for 2008 was the result of higher net charge-offs and additional reserves considered necessary from increasing impaired loan levels in 2008 as compared to 2007. The increase in the provision for loan losses in 2007 was the result of additional reserves considered necessary from increasing impaired loans in 2007 as compared to 2006. These higher charge-off and reserve requirements are mostly associated with significant declines in the value of collateral securing real estate loans primarily for residential land development.

The ultimate amount of the loan loss provision in all periods is a byproduct of establishing our allowance for loan losses at levels deemed necessary in our methodology for determining the adequacy of the allowance. For more information about our allowance for loan losses and our methodology for establishing its level, see the discussion under the section Allowance for Loan Losses.

Noninterest Income: Noninterest income totaled \$18.1 million during 2008 compared to \$16.1 million during 2007 and \$14.2 million in 2006.

The 2.0 million overall increase in 2008 included approximately \$412,000 and \$832,000 of gains on the sale of securities and gains realized on the settlement of interest rate swaps which were free standing derivatives carried at fair value. The Company chose to execute these transactions to support its shift to a more balanced sensitivity to future interest rate changes. For more information about the interest rate swaps, refer to the notes of the Financial Statements.

Deposit service charge income increased \$255,000 or 5% to \$5.3 million for 2008 compared to \$5.1 million for 2007 and \$4.9 million for 2006. The increase in each period primarily reflects the continued expansion of our deposit customer account base.

Gain on sales of loans primarily includes gains on the sale of real estate mortgage loans, and to a lesser extent, gains on the sale of the SBA guaranteed portion of certain commercial loans. We sell the majority of the fixed-rate mortgage loans we originate. We do not retain the servicing rights for the loans we sell. A summary of gain on sales of loans and related volume was as follows:

(Dollars in thousands)	For The Year Ended December 31		
	2008	2007	2006
Gain on the sale of SBA guaranteed loans	\$ --	\$ --	\$ 60
Net gain on the sale of real estate mortgage loans	<u>1,250</u>	<u>1,290</u>	<u>1,661</u>
Gain on sales of loans	<u>\$ 1,250</u>	<u>\$ 1,290</u>	<u>\$ 1,721</u>
Real estate mortgage loans originated for sale	\$ 81,044	\$ 86,440	\$ 103,655
Real estate mortgage loans sold	83,160	86,150	106,100
Net gain on the sale of real estate mortgage loans as a percent of real estate mortgage loans sold ("Loan sales margin")	1.50%	1.50%	1.57%

Gain on sales of loans decreased \$40,000 and \$431,000, respectively, in 2008 and 2007. The decline in 2008 was the result of a slight decline in sales volumes. The decline in 2007 was impacted by lower sales volumes and a declining sales margin. As sales volumes have declined since 2006, competition has generally increased and resulted in the slight decline in loan sales margin since 2006. Mortgage interest rate levels generally increased from 2007 into 2008 from corrections in the housing market, which contributed to the decline in residential refinancing and new loan originations since 2006. The declines in 2008 and 2007 also reflect the Company's interest in holding more of its mortgage loan volume in its portfolio as discussed more fully below under Loan Portfolio and Asset Quality. Mortgage interest rate levels have most recently declined in response to weakening economic conditions and resulting government action intended to encourage bank lending. We expect increased refinancing activity from these lower rates to positively impact gains on sales of loans as we enter 2009.

Revenues from trust services decreased \$458,000 or 9% to \$4.4 million for 2008 and increased \$1.3 million or 37% to \$4.9 million for 2007. General declines in customer stock portfolio values associated with the significant decline in the stock market during 2008 were the primary reason for the decrease in trust income in 2008. The majority of the increase in trust fees in 2007 was related to the impact of customer relationships added from the Smith & Associates acquisition on January 1, 2007 and from the addition of new trust customers throughout 2007.

Other income increased \$1.0 million in 2008 and \$822,000 in 2007. The increase for 2008 includes a \$243,000 gain on the termination of certain borrowings and the increase for 2007 includes a \$288,000 unrealized gain on the Company's interest rate swaps, both associated with the Company's overall management of interest rate risk. For more information about the Company's other borrowing activities and interest rate swaps, refer to the Notes to the Financial Statements. The remaining increases in each period are primarily a result of growth in customers and customer activity related to various banking services. Debit and ATM card processing income increased \$593,000 in 2008 and \$443,000 in 2007, representing the majority of the increase in other income. The increase in debit and ATM card processing income reflects a continued increase in usage from current customers and overall growth in the number of debit and ATM card customers. Promotional efforts to increase volume in these low cost transaction alternatives continue to be met with success. Also contributing to the increase in other income was increased revenues from investment services which grew \$234,000 or 41% to \$802,000 for 2008 and \$41,000 or 8% to \$568,000 for 2007.

Noninterest Expense: Noninterest expense totaled \$86.1 million for 2008 as compared to \$50.3 million for 2007 and \$44.9 million for 2006.

The increase of \$35.8 million in 2008 is primarily due to a non-recurring impairment charge for goodwill of \$25.9 million and an impairment charge for intangible assets of \$1.7 million. During the fourth quarter of 2008, the Company completed its annual impairment testing for goodwill and intangible assets. The Company's common stock price dropped during the fourth quarter resulting in a decline in its market capitalization below its book value. Accordingly, the results of its impairment testing showed that the estimated fair value of the Company was less than its carrying value of equity and the value of certain intangible assets were less than their carrying value. These impairment charges do not impact the Company's tangible equity or regulatory capital ratios, and do not affect the Company's liquidity position.

The remaining \$8.2 million increase in 2008 and the \$5.4 million increase in 2007 is discussed more fully below.

The primary reason for the remaining increase in total noninterest expense for 2008 related to the cost of higher levels of nonperforming assets. Costs associated with nonperforming assets include legal costs, repossessed and foreclosed property administration expense and losses on foreclosed properties. Repossessed and foreclosed property administration expense includes survey and appraisal, property maintenance and management and other disposition and carrying costs. Losses on foreclosed properties include both net losses on the sale of foreclosed properties and subsequent reductions from value declines for outstanding foreclosed properties. These costs amounted to approximately \$6.7 million for 2008, \$1.2 million for 2007 and \$461,000 for 2006 as itemized in the following table (in thousands):

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Legal and professional	\$ 582	\$ 425	\$ 260
Repossessed and foreclosed property administration	3,700	401	153
Losses on foreclosed properties	<u>2,412</u>	<u>372</u>	<u>48</u>
Total	<u>\$ 6,694</u>	<u>\$ 1,198</u>	<u>\$ 461</u>

Salaries increased \$1.0 million in 2008 primarily due to staff additions and merit increases. Staff additions occurred primarily in the first half of the year in varied positions throughout the Company, including risk management, credit administration and problem asset departments, and selective sales personnel to support growth in deposits and commercial and industrial lending. During the second half of 2008, salary and benefit levels began to experience a decline primarily from staff reduction initiatives in certain operational and sales functions and the elimination or outsourcing of certain backroom functions associated with expense reduction initiatives. Salaries and benefits increased \$708,000 in 2007 largely from an increase in staff associated with the opening of two new branch locations and the addition of the new Asset Management Group from the acquisition of Smith & Associates on January 1. The costs associated with these staffing increases were partially offset by a reduction in performance incentives associated with the decline in earnings levels.

Occupancy expense increased \$217,000 in 2008 and \$627,000 in 2007 and furniture and equipment expense increased \$123,000 in 2008 and \$735,000 in 2007. The increase in occupancy expense is consistent with our branch and facility expansion. The Company opened four new facilities in 2007, including two new branches and two branch relocations. The increase in furniture and equipment expense relates to costs associated with improving our internal and customer technologies, as well as costs associated with our facility expansion.

The \$1.4 million increase in legal and professional fees in 2008 relates to invoices received over time in connection with the Trade Partners litigation which were expected to be paid by the Company's insurance carrier, but have since been deemed non-reimbursable. The Trade Partners litigation is further discussed in the Notes to the Financial Statements. When excluding the impact of these legal costs, legal and professional fees have remained relatively flat since 2006.

FDIC assessments increased by \$358,000 and \$888,000 in 2008 and 2007. The increase in 2008 was primarily due to an increase in insurance rates related to higher nonperforming asset levels. The increase in 2007 was primarily related to a change by the FDIC in their charges for all banks effective January 1, 2007.

Remaining expense categories, including marketing, data processing and other expense, declined in 2008 as a result of expense reduction initiatives. In addition to eliminating or outsourcing certain backroom functions discussed above, these initiatives further included restructuring third party contracts, acceleration of electronic delivery for certain customers and significantly trimming controllable costs. The increase in other expense of \$1.3 million in 2007 was primarily due to increases in various categories consistent with our customer account growth. These costs included debit card and ATM processing, customer and internal courier, brokerage account processing and outside service support.

Expense reduction initiatives that began in early 2008 have allowed the Company to manage costs in other areas to offset the increases driven by higher nonperforming asset levels. We expect efficiency, excluding the additional costs necessary to manage non-performing assets, to continue to improve in response to these initiatives and by better utilizing our capacity as we grow.

Federal Income Tax Expense (Benefit): Our federal income tax expense has fluctuated generally commensurate with changes in pre-tax earnings. In 2008, the Company recorded a tax benefit of \$8.4 million as a result of the net loss during the year. In 2007 and 2006, our federal income tax expense was lower than the amount computed by applying our statutory federal income tax rate of 35% to our pre-tax earnings primarily due to tax-exempt interest income and income from bank-owned life insurance. Our effective tax rate was 28.7% and 31.5% for 2007 and 2006, respectively.

FINANCIAL CONDITION

Summary: Total assets were \$2.15 billion at December 31, 2008, an increase of \$16.4 million from \$2.13 billion at December 31, 2007. An increase in Federal funds and short-term investments and portfolio loans were largely offset by declines in securities available for sale and goodwill and other intangible assets. The growth in assets during 2008 was lower than historical levels primarily because of the weak economic conditions in West Michigan that began in 2007 and has continued throughout 2008. Because of these declining conditions, management focused much of its efforts in 2008 on improving its financial condition, including diversifying its asset base and improving its capital position, liquidity and asset quality.

The slight growth in assets during 2008 was funded by growth in deposits. The growth in deposits in excess of assets allowed the Company to reduce its other borrowing levels.

Cash and Cash Equivalents: Our cash and cash equivalents, which include federal funds sold and short-term investments, were \$68.3 million at December 31, 2008 compared to \$49.8 million at December 31, 2007. The increase in 2008 included an increase in seasonal balances associated with institutional depositors, including municipalities and public fund authorities. In addition, the Company increased its short-term investments to improve its liquidity position during these turbulent times.

Securities: Securities decreased \$16.9 million to \$186.5 million at December 31, 2008 from \$203.4 million at December 31, 2007. The decrease was primarily due to calls and maturities and the sale of approximately \$21.7 million of U.S. Government Agency bonds, partially offset by purchases of U.S. Government Agency bonds. The sales of securities resulted in gross gains of \$412,000 and helped position its assets and liabilities to a more balanced sensitivity to interest rates.

We maintain our security portfolio at a level to provide diversity in the level of credit risk within our asset base, to support our liquidity needs and to balance our interest rate risk. Our portfolio consists primarily of high quality U.S government agency and state and local municipal bonds classified as available for sale. These securities are generally purchased at fixed rates to help offset the interest sensitivity of our variable rate loan portfolio. We expect growth of our securities portfolio to be consistent with the growth of our company to maintain the diversity of our assets and support our liquidity and interest rate risk management.

Loan Portfolio and Asset Quality: Our total loan portfolio increased \$23.4 million to \$1.77 billion at December 31, 2008 from \$1.75 billion at December 31, 2007. During 2008, residential mortgage loans increased by \$26.4 million, consumer loans increased \$968,000, commercial and industrial loans increased \$8.6 million and commercial real estate loans declined \$12.5 million.

Our residential real estate loan portfolio, which also includes residential construction loans made to individual homeowners, comprised approximately 16% and 15% of portfolio loans at the end of 2008 and 2007, respectively. Our residential real estate portfolio represents only a portion of our residential origination loan volume, as we also sell a large portion of our fixed-rate obligations on the secondary market with servicing released. We originated for sale \$81.0 million in residential mortgages in 2008, \$86.4 million in 2007 and \$103.7 million in 2006. Loans held for sale were \$2.3 million at December 31, 2008 compared to \$3.1 million at December 31, 2007.

Because of the relatively short duration of our assets, the increase in rates on residential mortgage loans through most of 2008 provided us an opportunity to hold more of these higher quality loans in our portfolio. In response to continued corrections in the housing market and deterioration in the economy, mortgage portfolio volume began to decline near the end of 2008. As we head into 2009, mortgage interest rate levels have declined in response to the weakening economic conditions and resulting government action intended to encourage bank lending. This has generated an increase in residential real estate refinancing activity. As a result, we anticipate a higher volume of residential mortgage loan sales into the secondary market during 2009.

The slower loan growth in our commercial and consumer loan portfolios during 2008 was a reflection of the weak economic conditions in West Michigan. In particular, deterioration in residential land development has impacted both asset growth and asset quality. Accordingly, the Company focused much of its efforts in 2008 on reducing its reliance on residential land development, diversifying its commercial loan portfolios and improving asset quality.

Total commercial and commercial real estate loans were \$1.29 billion at both December 31, 2008 and 2007. This portfolio remains our largest loan segment and accounted for approximately 73% and 74% of the total loan portfolio at December 31, 2008 and 2007, respectively. Our commercial and commercial real estate portfolios are made up of loans to small and mid-sized business. The commercial loan portfolio we have built reflects the acceptance of our lending approach by our customers and the ability of our lending team to respond to their needs effectively. Our commercial loan department is built around a well-seasoned officer team and our lending approach involves an efficient loan approval process.

Our commercial and industrial portfolio was \$447 million at December 31, 2008 and represented 35% of our commercial portfolio, up from 34% at December 31, 2007. A further breakdown of the composition of the commercial loan portfolio is shown in the table below (in thousands):

	December 31, 2008	December 31, 2007
Construction/Land Development	\$ 307,933	\$ 335,366
Farmland and Agriculture	27,950	30,371
Nonfarm, Nonresidential	477,775	454,764
Multi-family	<u>29,701</u>	<u>35,381</u>
Total Commercial Real Estate Loans	843,359	855,882
Commercial and Industrial	<u>447,352</u>	<u>438,743</u>
Total Commercial Loans	<u>\$1,290,711</u>	<u>\$1,294,625</u>

Approximately 44% of the balance of commercial real estate loans at December 31, 2008 was owner-occupied while 56% was non-owner occupied.

Loans for the development or sale of 1-4 family residential properties were approximately \$203.7 million and \$235.8 million at December 31, 2008 and 2007, respectively, representing approximately 66% and 70% of the construction and land development portfolio. Of the balance at December 31, 2008, approximately \$27.1 million was secured by vacant land, \$117.4 million was secured by developed residential land and \$59.3 million was secured by 1-4 family properties held for speculative purposes. Vacant land is land zoned for residential purposes but with no further development. Developed residential land is land that has been further developed for future residential construction, including but not limited to completed lot surveys, road work, water, sewer and other utility preparation and general land grade. 1-4 family properties held for speculative purposes are on developed residential lots and include completed residential homes or residential homes in the process of construction.

Our consumer loan portfolio includes loans secured by personal property and home equity fixed term and line of credit loans. Our consumer loan portfolio increased to \$190.7 million at December 31, 2008 from \$189.7 million at December 31, 2007. Consumer loans comprised approximately 11% of our portfolio loans at the end of both 2008 and 2007.

Our loan portfolio is reviewed regularly by an independent, internal loan review team, our own loan officers, and our senior management. An administrative loan committee consisting of senior management and seasoned lending and collections personnel meets monthly to manage the Company's internal watch list and proactively manage high risk loans. When reasonable doubt exists concerning collectibility of interest or principal of one of our loans, that loan is placed in non-accrual status. Any interest previously accrued but not collected is reversed and charged against current earnings.

Nonperforming assets are comprised of nonperforming loans, foreclosed assets and repossessed assets. Nonperforming loans include loans on non-accrual status, restructured loans and loans delinquent more than 90 days but still accruing. Foreclosed and repossessed assets include assets acquired in settlement of loans.

Nonperforming loans as of December 31, 2008 totaled \$92.3 million or 5.20% of total portfolio loans compared to \$73.9 million or 4.22% of total portfolio loans at December 31, 2007.

Nonperforming loans for the development or sale of 1-4 family residential properties were approximately \$59.9 million or 65% of total non-performing loans at December 31, 2008. Of this total, approximately \$3.8 million was secured by vacant land, \$38.5 million was secured by developed residential land and \$17.6 million was secured by 1-4 family properties held for speculative purposes. The remaining balance of nonperforming loans at the end of 2008 consist of a number of commercial loans most of which are on nonaccrual for which we consider to be well collateralized or adequately reserved.

Loans for the development or sale of 1-4 family residential properties were approximately \$57.4 million or 78% of total non-performing loans at December 31, 2007. Of this total, approximately \$3.2 million was secured by vacant land, \$40.8 million was secured by developed residential land and \$13.4 million was secured by 1-4 family properties held for speculative purposes.

Foreclosed assets totaled \$19.5 million at December 31, 2008 compared to \$5.7 million at December 31, 2007. The increase is the result of the migration of non-performing loans secured by real estate into foreclosed assets as the foreclosure process is completed and any redemption period expires. Of the \$19.5 million, there were 33 commercial real estate properties totaling \$17.7 million. The remaining balance was comprised of 19 residential real estate properties totaling \$1.8 million. All properties are carried at their fair value less costs to sell.

Total nonperforming assets amounted to \$112.1 million or 5.21% of total assets at December 31, 2008 compared to \$79.8 million or 3.75% as of December 31, 2007.

The following table shows the composition and amount of our nonperforming assets.

(Dollars in thousands)	As of December 31		
	2008	2007	2006
Nonaccrual loans	\$89,049	\$70,999	\$5,811
Loans 90 days or more delinquent and still accruing	3,200	2,872	16,479
Restructured loans	<u>21</u>	<u>38</u>	<u>--</u>
Total nonperforming loans	<u>92,270</u>	<u>73,909</u>	<u>22,290</u>
Foreclosed assets	19,516	5,704	3,212
Reposessed assets	<u>306</u>	<u>172</u>	<u>81</u>
Total nonperforming assets	<u>\$112,092</u>	<u>\$79,785</u>	<u>\$25,583</u>
Nonperforming loans to total loans	5.20%	4.22%	1.30%
Nonperforming assets to total assets	5.21%	3.75%	1.23%

Allowance for Loan Losses: Our allowance for loan losses at December 31, 2008 was \$38.3 million, or 2.16% of total portfolio loans, compared to \$33.4 million or 1.91% of total portfolio loans at December 31, 2007.

Our allowance for loan losses is maintained at a level considered appropriate based upon our regular, quarterly assessment of the probable estimated losses inherent in the loan portfolio. Our methodology for measuring the appropriate level of allowance relies on several key elements, which include specific allowances for loans considered impaired, formula allowance for graded loans, general allocations based on historical trends for pools of similar loan types and under certain circumstances, reserves related to current market conditions that are pertinent to certain aspects of the loan portfolio. Based upon our internal analysis, in our judgment, we have provided adequate allowances for loan losses, although there can be no assurance that the allowance for losses on loans will be adequate to cover all losses.

The increase in the level of the allowance was primarily related to an increase in impaired loans and a related increase in the level of reserves for these loans. Specific allowances are established in cases where senior credit management has identified significant conditions or circumstances related to an individually impaired credit that we believe indicates the probability that a loss may be incurred. This amount is determined by methods prescribed by SFAS No. 114, "Accounting by Creditors for Impairment of a Loan". Impaired loans increased \$52.9 million to \$151.9 million at December 31, 2008. The specific allowance for impaired loans was \$20.0 million at December 31, 2008 and \$15.8 at December 31, 2007.

Approximately \$76.0 million or 50% of impaired loans were for the development or sale of 1-4 family residential properties. Of this total, approximately \$5.6 million was secured by vacant land, \$53.8 million was secured by developed residential land and \$16.6 million was secured by 1-4 family properties held for speculative purposes. In 2007, approximately \$62.3 million or 63% of impaired loans were for the development or sale of 1-4 family residential properties. Of this total, approximately \$3.3 million was secured by vacant land, \$42.5 million was secured by developed residential land and \$16.5 million was secured by 1-4 family properties held for speculative purposes.

The allowance allocated to commercial loans that are not considered to be impaired is calculated by applying loss factors to outstanding loans based on the internal risk grade of such loans. We use a loan rating method based upon an eight point system. Loans are assigned a loss allocation factor for each loan classification category. The lower the grade assigned to a loan category, the greater the allocation percentage that is applied. Changes in risk grade of loans affect the amount of the allowance allocation. The determination of our loss factors is based upon our actual loss history by loan grade, and adjusted for consideration of significant factors that, in management's judgment, affect the collectibility of the portfolio as of the analysis date. The commercial loan allowance was \$15.4 million at December 31, 2008 compared to \$15.3 million at December 31, 2007.

Groups of homogeneous loans, such as residential real estate, open- and closed-end consumer loans, etc., receive general allowance allocations based on a review of loss trends by specific loan segments. These loss allocations are then adjusted based upon past due status, and consideration for general economic and business conditions, collateral values, seasoning of the portfolios and most recent loss experience for similar pools of loans. The general allowance was \$2.9 million at December 31, 2008 and \$2.3 million at December 31, 2007. The increase was largely related to an increase in the balance of residential real estate loans and a slight increase in the past due status of these loans.

The following table shows the allocation of the allowance for loan loss at the dates indicated to the extent specific allocations have been determined relative to particular loans.

(Dollars in thousands)	As of December 31					
	2008		2007		2006	
	Allowance Amount	% of Each Category to Total Loans	Allowance Amount	% of Each Category to Total Loans	Allowance Amount	% of Each Category to Total Loans
Commercial and commercial						
real estate	\$35,427	72.8%	\$31,132	74.0%	\$21,417	75.5%
Residential real estate	982	16.5%	699	15.2%	502	13.1%
Consumer	1,853	10.7%	1,591	10.8%	1,340	11.4%
Unallocated	---	---	---	---	---	---
Total	<u>\$38,262</u>	<u>100.0%</u>	<u>\$33,422</u>	<u>100.0%</u>	<u>\$23,259</u>	<u>100.0%</u>

The above allocations are not intended to imply limitations on usage of the allowance. The entire allowance is available for any loan losses without regard to loan type. Of the \$38.3 million allowance at December 31, 2008, 52% related to specific allocations on impaired loans, 40% related to commercial loan portfolio allocations and 8% related to general allocations for homogeneous loans.

Net charge-offs totaled \$32.6 million or 1.85% of average loans for 2008 compared to \$5.6 million, or 0.32% of average loans for 2007 and \$5.4 million or 0.33% of average loans for 2006. The majority of the net charge-offs in 2008 and 2007 were largely associated with an increase in the level of impaired loans from continued deterioration in the economy and significant declines in the value of collateral securing impaired real estate loans, primarily residential land development loans. For residential land development loans, cash flow to service the debt is primarily expected from sales of lots and properties securing these loans, which has declined markedly throughout 2007 and 2008. This significant deterioration in cash flows and resulting expected future cash flows is the primary reason for the declines in the value of the real estate securing these loans. Net charge-offs in 2006 include a \$4.7 million charge-off related to one commercial borrower whose loans were allegedly falsely secured by nonexistent collateral. The Company filed a lawsuit against this borrower in 2007 that is still pending. These charge-offs were considered necessary to bring loan balances to levels considered collectible based upon current information.

The following is a summary of our portfolio loan balances and changes in the allowance for loan losses and related ratios.

(Dollars in thousands)	December 31		
	2008	2007	2006
Portfolio Loans:			
Average daily balance of loans for the year	\$1,762,102	\$1,725,453	\$1,635,391
Amount of loans outstanding at end of period	1,774,063	1,750,632	1,711,450
Allowance for loan losses:			
Balance at beginning of year	\$ 33,422	\$ 23,259	\$ 20,992
Addition to allowance charged to operations	37,435	15,750	7,715
Loans charged-off:			
Commercial	(32,405)	(5,065)	(5,601)
Residential real estate	(228)	(139)	(43)
Consumer	(684)	(716)	(410)
Recoveries:			
Commercial	666	263	399
Residential real estate	28	2	10
Consumer	28	68	197
Balance at end of year	<u>\$ 38,262</u>	<u>\$ 33,422</u>	<u>\$ 23,259</u>
Ratios:			
Net charge-offs to average loans outstanding	1.85%	.32%	.33%
Allowance for loan losses to loans outstanding at year end	2.16%	1.91%	1.36%

Premises and Equipment: Premises and equipment totaled \$63.5 million at December 31, 2008, representing a decrease of \$1.1 million from December 31, 2007. The decline was largely from depreciation of current facilities in excess of capital additions during 2008. There were no new facilities constructed during 2008.

Deposits: Total deposits increased \$142.2 million to \$1.67 billion at December 31, 2008, as compared to \$1.52 billion at December 31, 2007. Of the \$142.2 million in deposit growth, approximately \$135.0 million was from deposits generated through brokers.

The Company chose to utilize brokered deposits in 2008 to replace borrowed funds and support asset growth because of their generally low cost compared to other alternatives and to support improved liquidity. The utilization of brokered deposits allowed the Company to reduce its reliance on borrowed funds, increase its borrowing capacity and grow Federal funds and short-term investments for future liquidity needs.

The growth in deposits within the Company's markets was slower than historical levels. Because of the weakening economic conditions that occurred in West Michigan and nationally throughout 2008, the deposit base slowed or contracted in many of the Company's markets and access to liquidity from the national sources impacted many financial institutions. Accordingly, competition within the Company's markets continued to intensify for fewer deposit dollars. Despite these market dynamics, the Company continued to experience overall new account growth.

Noninterest bearing demand accounts comprised approximately 12% of total deposits at both December 31, 2008 and December 31, 2007. Interest bearing demand, including money market and savings accounts, comprised approximately 38% of total deposits at December 31, 2008, as compared to 43% at the end of 2007. Time accounts as a percentage of total deposits were approximately 50% at December 31, 2008, as compared to 45% at the end of 2007.

Although the current environment presents challenges for core deposit growth in the near term, we believe that our continued focus on quality customer service, the desire of customers to deal with a local bank, and the convenience of our expanding and maturing branch network, will provide growth in our core deposits over time.

Borrowed Funds: Borrowed funds consist of advances from the Federal Home Loan Bank, securities sold under agreements to repurchase ("repo borrowings"), long-term debt associated with the issuance of trust preferred securities and federal funds purchased provided by our correspondent banks.

Borrowed funds totaled \$326.0 million at December 31, 2008, including \$194.8 million of Federal Home Loan Bank advances, \$90.0 million in repo borrowings and \$41.2 million in long-term debt associated with trust preferred securities. Borrowed funds totaled \$441.8 million at December 31, 2007 including \$244.1 million of Federal Home Loan Bank advances, \$110.0 million in repo borrowings, \$41.2 million in long-term debt associated with trust preferred securities and \$46.5 million in federal funds purchased. The decrease in borrowed funds in 2008 was primarily due to the increase in deposits discussed above.

CAPITAL RESOURCES AND LIQUIDITY

Capital Resources: Total shareholders' equity was \$149.2 million at December 31, 2008 compared to \$160.6 million at December 31, 2007. The decrease of \$11.4 million was primarily from the \$38.9 million net loss the Company incurred in 2008, offset by an increase of \$31.3 million from the issuance of convertible preferred stock. Cash dividends of \$4.4 million, or \$.26 per share, were declared and paid on common shares and \$817,000, or \$26.11 per share, were declared on preferred shares during 2008.

In order to augment its capital position, the Company temporarily suspended its cash dividend to common shareholders during 2008. In addition, the Company completed a private offering of 31,290 shares of 12.0% Series A Non-Cumulative Perpetual Convertible Preferred Stock (Series A Preferred Stock) with a liquidation preference of \$1,000 per share, resulting in capital proceeds of \$31.3 million. The shares are convertible into common stock at the option of the holder at a price per share of \$8.95. On or after October 31, 2011, the preferred stock will be subject to mandatory conversion into common stock under certain circumstances. For more information regarding the private offering, see the Notes to the Consolidated Financial Statements.

The increase in accumulated other comprehensive income was due to an increase in the market value of securities available for sale, as market interest rates for similar securities declined markedly during 2008.

Capital levels for the Company continue to be maintained at levels well in excess of regulatory minimums for bank holding companies.

The following table shows the Company's various capital ratios for 2008 and 2007.

As of and for the year ended December 31,	<u>2008</u>	<u>2007</u>
Average equity to average assets	6.9%	7.8%
Total risk-based capital	11.3%	10.7%
Tier 1 risk-based capital	10.0%	9.4%
Tier 1 capital to average assets	8.8%	8.3%

The regulatory ratios increased in 2008 primarily due to the issuance of the convertible preferred stock. The after-tax impairment charge for goodwill and intangible assets did not impact the Company's regulatory capital ratios.

The entire \$40.0 million of trust preferred securities outstanding at December 31, 2007 qualified as Tier 1 capital. For more information regarding the trust preferred securities, please refer to the Notes to the Consolidated Financial Statements.

Capital sources include, but are not limited to, additional common stock offerings, preferred stock and trust preferred securities offerings and subordinated debt. The Company is also carefully evaluating the U.S. Treasury Department's Capital Purchase Program for making equity investments in banks, and has applied to participate in that program.

Liquidity: The liquidity of a financial institution reflects its ability to manage a variety of sources and uses of funds. Our Consolidated Statements of Cash Flows categorize these sources and uses into operating, investing and financing activities. We primarily focus on developing access to a variety of borrowing sources to supplement our deposit gathering activities and provide funds for growing our investment and loan portfolios. Our sources of liquidity include our borrowing capacity with the Federal Reserve Bank of Chicago's discount window, the Federal Home Loan Bank, federal funds purchased lines and other secured borrowing sources with our correspondent banks, loan payments by our borrowers, maturity and sales of our securities available for sale, growth of our deposits and deposit equivalents, federal funds sold, and the various capital resources discussed above.

Liquidity management involves the ability to meet the cash flow requirements of our customers. Our customers may be either borrowers with credit needs or depositors wanting to withdraw funds. Our liquidity management involves periodic monitoring of our assets considered to be liquid and illiquid, and our funding sources considered to be core and non-core and short-term (less than 12 months) and long-term. We have established parameters that monitor, among other items, our level of liquid assets to short-term liabilities, our level of non-core funding reliance and our level of available borrowing capacity. We have also developed a contingency funding plan to stress test our liquidity requirements arising from certain events that may trigger liquidity shortages, such as rapid loan growth in excess of normal growth levels or the loss of deposits and other funding sources under extreme circumstances.

We have historically grown our portfolio loans more rapidly than our core deposits. Accordingly, we have relied upon other wholesale funding sources (including brokered deposits, borrowings from the Federal Home Loan Bank and other borrowing sources). We maintain a diversified wholesale funding structure and actively manage our maturing wholesale sources to reduce the risk to liquidity shortages.

In response to the volatile conditions in the national markets throughout 2007 and 2008, we actively pursued initiatives to further strengthen our liquidity position. During 2008, we reduced our reliance on other borrowed funds by over \$115 million, increased our liquid investments by nearly \$40 million and secured a borrowing facility under the Federal Reserve Bank of Chicago's discount window. We feel our liquidity position is sufficient to meet our normal and contingent liquidity needs.

In the normal course of business, we enter into certain contractual obligations including obligations which are considered in our overall liquidity management. The table below summarizes our significant contractual obligations at December 31, 2008.

(dollars in thousands)	<u>1 year or less</u>	<u>2-3 years</u>	<u>4-5 years</u>	<u>After 5 years</u>
Time deposit maturities	\$469,167	\$341,328	\$20,964	\$ ---
Other borrowed funds	90,123	176,000	---	18,667
Long-term debt	---	---	---	41,238
Total	<u>\$559,290</u>	<u>\$517,328</u>	<u>\$20,964</u>	<u>\$59,905</u>

In addition to normal loan funding, we also maintain liquidity to meet customer financing needs through unused lines of credit, unfunded loan commitments and standby letters of credit. The level and fluctuation of these commitments is also considered in our overall liquidity management. At December 31, 2008, we had a total of \$403.3 million in unused lines of credit, \$10.3 million in unfunded loan commitments and \$14.8 million in standby letters of credit.

CRITICAL ACCOUNTING AND POLICIES ESTIMATES:

To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and future results could differ. The allowance for loan loss, the status of contingencies, income taxes and goodwill and other intangible assets are deemed critical due to the required level of management judgment and the use of estimates, making them particularly subject to change.

Our methodology for determining the allowance for loan loss and the related provision for loan losses is described above in the "Allowance for Loan Loss" discussion. This area of accounting requires significant judgment due to the number of factors which can influence the collectibility of a loan. Unanticipated changes in these factors could significantly change the level of the allowance for loan losses and the related provision for loan losses. Although, based upon our internal analysis, and in our judgment, we have provided an adequate allowance for loan losses, there can be no assurance that our analysis has properly identified all of the probable losses in our loan portfolio.

Loss contingencies, including the legal actions involving Trade Partners as described in the Notes to the Financial Statements, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. This, too, is an accounting area that involves significant judgment. Although, based upon our judgment and internal analysis we have properly accounted for loss contingencies, future changes in the status of such contingencies could result in a significant change in the level of contingent liabilities and a related impact to operating earnings.

Our accounting for income taxes involves the valuation of deferred tax assets and liabilities primarily associated with differences in the timing of the recognition of revenues and expenses for financial reporting and tax purposes. We have recorded no valuation allowance on the balance of our deferred tax assets because we believe that the tax benefits associated with this asset will more likely than not be realized based upon the levels of taxable income in prior years and the expectation of a return to profitability in future years. However, changes in tax laws, changes in tax rates and our future level of earnings can adversely impact the ultimate realization of our net deferred tax asset.

Our goodwill and intangible assets arose from our past acquisition of a Bank and our past acquisition of an investment management firm, as discussed in previous filings. We test our goodwill and intangible assets for impairment utilizing the methodology and guidelines established in SFAS No. 142, *Goodwill and Other Intangible Assets*. This methodology involves assumptions regarding the valuation of the business entities and intangible assets that contain the acquired entities. We believe that the assumptions we utilize are reasonable. Based upon our annual impairment analysis in 2008, we recorded goodwill and intangible asset impairment charges of \$27.6 million as described above under "Noninterest expense." There was no remaining goodwill as of December 31, 2008. Other intangible assets were \$874,000 at December 31, 2008.

Forward-Looking Statements: This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Reform Act of 1995, and are including this statement for purposes of these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe our future plans, strategies, and expectations are generally identifiable by use of the words believe, expect, intend, anticipate, estimate, project, may or similar expressions. The presentation and discussion of the provision and allowance for loan losses, statements concerning future profitability or future growth or increases, and statements about the adequacy of our capital resources are examples of inherently forward-looking statements in that they involve judgments and statements of belief as to the outcome of future events. Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse affect on our operations and future prospects include, but are not limited to, changes in: interest rates, general economic conditions, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in our market area and accounting principles, policies, and guidelines. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Further information concerning us and our business, including additional factors that could materially affect our financial results, is included in our filings with the Securities and Exchange Commission.

ITEM 7A: Quantitative and Qualitative Disclosures About Market Risk.

Our primary market risk exposure is interest rate risk and, to a lesser extent, liquidity risk. All of our transactions are denominated in U.S. dollars with no specific foreign exchange exposure. Macatawa Bank has only limited agricultural-related loan assets, and therefore has no significant exposure to changes in commodity prices.

Our market risk exposure is mainly comprised of our sensitivity to interest rate risk. Our balance sheet has sensitivity, in various categories of assets and liabilities, to changes in prevailing rates in the U.S., including the Federal funds rate, the prime rate, mortgage rates, U.S. Treasury rates and various money market indexes. As part of our asset/liability management process, we identify and evaluate opportunities to structure our balance sheet to maximize our earnings while balancing our liquidity and interest rate risk within established parameters.

We utilize a simulation model as our primary measurement technique in our interest rate risk management. Our simulation analyses monitors the direction and magnitude of variations in net interest income and the economic value of equity ("EVE") resulting from potential changes in market interest rates.

Key assumptions in the model include the repricing of cash flows and maturities of interest-sensitive assets and interest-sensitive liabilities at current market rates, prepayment speeds on certain assets, and changes in market conditions impacting loan and deposit pricing. We also assume certain levels of rate sensitivity to changes in market rates of our non-maturing transaction deposits based upon our historical sensitivity under previous interest rate cycles, and we include pricing floors on discretionary priced liability products which limit how low various checking and savings products could go under declining interest rates. These assumptions reflect our pricing philosophy in response to changing interest rates.

We forecast the next twelve months of net interest income under an assumed environment of gradual changes in market interest rates under various scenarios. The resulting change in net interest income is an indication of the sensitivity of our earnings to directional changes in market interest rates. The simulation also measures the change in EVE, or the net present value of our assets and liabilities, under the same shifts in interest rates, as calculated by discounting the estimated future cash flows using a market-based discount rate.

The following table shows the impact of changes in interest rates on net interest income over the next twelve months and EVE based on our balance sheet as of December 31, 2008 (dollars in thousands).

Interest Rate Scenario	Economic Value of Equity	Percent Change	Net Interest Income	Percent Change
Change in Interest Rates				
200 basis point rise	\$ 166,777	(7.94)%	\$ 55,557	(2.28)%
100 basis point rise	174,505	(3.68)	55,192	(2.93)
Base-rate scenario	181,171	---	56,856	---
100 basis point decline	182,329	0.64	58,094	2.18
200 basis point decline	182,037	0.48	58,815	3.45

This analysis suggests that we are well-balanced, with limited fluctuations in net interest income under each scenario over the next twelve months. Further, our balanced sensitivity in time horizons beyond one year results in little fluctuation in EVE under the various rate shock scenarios.

We also forecast the impact of immediate and parallel interest rate shocks on net interest income under various scenarios to measure the sensitivity of our earnings under extreme conditions.

The quarterly simulation analysis is monitored against acceptable interest rate risk parameters by the Asset/Liability Committee and reported to the Board of Directors.

In addition to changes in interest rates, the level of future net interest income is also dependent on a number of other variables, including: the growth, composition and absolute levels of loans, deposits, and other earning assets and interest-bearing liabilities; economic and competitive conditions; potential changes in lending, investing and deposit gathering strategies; and client preferences.

ITEM 8: Financial Statements and Supplementary Data.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Company management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2008. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on our assessment we believe that, as of December 31, 2008, the Company's internal control over financial reporting is effective based on those criteria.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have audited the accompanying balance sheets of Macatawa Bank Corporation as of December 31, 2008 and 2007, and the related statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2008. We also have audited Macatawa Bank Corporation's internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Macatawa Bank Corporation's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Macatawa Bank Corporation as of December 31, 2008 and 2007, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2008 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, Macatawa Bank Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations and Principles of Consolidation: The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Macatawa Bank and Macatawa Investment Services, Inc., as well as Macatawa Bank's wholly-owned subsidiary, Macatawa Bank Mortgage Company. Macatawa Investment Services, Inc. ceased doing business effective November 1, 2006 as discussed below. All significant intercompany accounts and transactions have been eliminated in consolidation.

The Company also owns all of the common securities of Macatawa Statutory Trust I and Macatawa Statutory Trust II. These are grantor trusts that issued trust preferred securities and are discussed in a separate note.

Macatawa Bank is a Michigan chartered bank with depository accounts insured by the Federal Deposit Insurance Corporation. The Bank operates 26 full service branch offices providing a full range of commercial and consumer banking and trust services in Kent County, Ottawa County, and northern Allegan County, Michigan. Macatawa Bank Mortgage Company originates and sells residential mortgage loans into the secondary market on a servicing released basis. Macatawa Investment Services, a broker/dealer that provided various brokerage services including discount brokerage, personal financial planning and consultation regarding individual stocks and mutual funds ceased doing business as a registered broker-dealer effective November 1, 2006. On November 1, 2006, Macatawa Bank began offering brokerage services to its customers through an arrangement with Infinex Investments, Inc. ("Infinex"). Infinex is a full service investment provider, a registered broker-dealer and a member of the Financial Industry Regulatory Authority (FINRA) and the Securities Investor Protection Corporation (SIPC). On October 11, 2006, Macatawa Bank Corporation entered into an Agreement and Plan of Merger with Benj. A. Smith & Associates, Ltd. and Benj. A. Smith, III. Smith & Associates is an investment advisory firm based in Holland, Michigan. The transaction was structured as a merger of Smith & Associates into Macatawa, which in turn contributed the business to Macatawa Bank. The transaction closed effective as of January 1, 2007. Macatawa Statutory Trust I and Macatawa Statutory Trust II are grantor trusts that were established on July 15, 2003 and March 18, 2004 through which trust preferred securities were issued. Under generally accepted accounting principles, these trusts are not consolidated into the financial statements of the Company.

Use of Estimates: To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided, and future results could differ. The allowance for loan losses, the fair value of intangible assets, the status of contingencies, the fair value of other real estate owned and the fair values of financial instruments are particularly subject to change.

Concentration of Credit Risk: Loans are granted to, and deposits are obtained from, customers primarily in the western Michigan area as described above. Substantially all loans are secured by specific items of collateral, including residential real estate, commercial real estate, commercial assets and consumer assets. Other financial instruments, which potentially subject the Company to concentrations of credit risk, include deposit accounts in other financial institutions.

Cash Flow Reporting: Cash and cash equivalents include cash on hand, demand deposits with other financial institutions and short-term securities (securities with maturities equal to or less than 90 days and federal funds sold). Cash flows are reported net for customer loan and deposit transactions, interest-bearing time deposits with other financial institutions and short-term borrowings with maturities of 90 days or less.

Securities: Securities are classified as held to maturity and carried at amortized cost when management has the positive intent and ability to hold them to maturity. Securities available for sale consist of those securities which might be sold prior to maturity due to changes in interest rates, prepayment risks, yield and availability of alternative investments, liquidity needs or other factors. Securities classified as available for sale are reported at their fair value and the related unrealized holding gain or loss is reported in other comprehensive income, net of tax.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Interest income includes amortization of purchase premium or discount. Premiums and discounts on securities are amortized on the level yield method without anticipating prepayments. Gains and losses on sales are based on the amortized cost of the security sold.

Declines in the fair value of securities below their cost that are other than temporary are reflected as realized losses. In estimating other-than-temporary losses, management considers: the length of time and extent that fair value has been less than cost, the financial condition and near term prospects of the issuer, and the Company's ability and intent to hold the security for a period sufficient to allow for any anticipated recovery in fair value.

Federal Home Loan Bank (FHLB) Stock: The Bank is a member of the FHLB system. Members are required to own a certain amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. FHLB stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment. Because this stock is viewed as a long term investment, impairment is based on ultimate recovery of par value. Both cash and stock dividends are reported as income.

Loans: Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of unearned interest, deferred loan fees and costs and an allowance for loan losses. Loans held for sale are reported at the lower of cost or market, on an aggregate basis. Loans are sold servicing released; therefore no mortgage servicing right assets are established.

Interest income is accrued on the unpaid principal balance and includes amortization of net deferred loan fees and costs over the loan term using the level yield method without anticipating prepayments. Interest income is not reported when full loan repayment is in doubt, typically when the loan is impaired or payments are past due over 90 days (180 days for residential mortgages). Consumer loans are typically charged-off no later than 120 days past due. Past due status is based on the contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not received for loans placed on nonaccrual is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses: The allowance for loan losses is a valuation allowance for probable incurred credit losses, increased by the provision for loan losses and recoveries, and decreased by charge-offs. Management estimates the allowance balance required based on known and inherent risks in the portfolio, past loan loss experience, information about specific borrower situations and estimated collateral values, economic conditions and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired or loans otherwise classified substandard or doubtful. The general component covers non-classified loans and is based on historical loss experience adjusted for current factors.

Loan impairment is reported when full payment under the loan terms is not expected. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Loans are evaluated for impairment when payments are delayed, typically 90 days or more, or when the internal grading system indicates a doubtful classification. Large groups of smaller balance homogeneous loans, such as consumer and residential real estate loans, are collectively evaluated for impairment, and accordingly, they are not separately identified for impairment disclosures.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Transfers of Financial Assets: Transfers of financial assets are accounted for as sales, when control over the assets has been relinquished. Control over transferred assets is deemed to be surrendered when the assets have been isolated from the Company, the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Foreclosed Assets: Assets acquired through or instead of loan foreclosure, primarily other real estate owned, are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. If fair value declines, a valuation allowance is recorded through expense. Costs after acquisition are expensed.

Premises and Equipment: Land is carried at cost. Premises and equipment are stated at cost less accumulated depreciation. Buildings and related components are depreciated using the straight-line method with useful lives ranging from 5 to 40 years.

Furniture, fixtures and equipment are depreciated using the straight-line method with useful lives ranging from 3 to 15 years. Maintenance, repairs and minor alterations are charged to current operations as expenditures occur and major improvements are capitalized.

Bank-Owned Life Insurance: The Bank has purchased life insurance policies on certain officers. Bank-owned life insurance is recorded at its currently realizable cash surrender value. Changes in cash surrender value are recorded in other income.

Goodwill: Goodwill results from prior business acquisitions and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment and any such impairment will be recognized in the period identified.

Acquisition Intangibles: Acquisition intangibles consist of core deposit and acquired customer relationship intangible assets arising from acquisitions. They are initially measured at fair value and then are amortized on an accelerated method with estimated useful lives of ten to sixteen years. These assets are reviewed for impairment when events indicate the carrying amount may not be recoverable.

Long-term Assets: Premises and equipment, core deposit and other intangible assets, and other long-term assets are reviewed for impairment when events indicate their carrying amount may not be recoverable from future undiscounted cash flows. If impaired, the assets are recorded at fair value.

Loan Commitments and Related Financial Instruments: Financial instruments include off-balance sheet credit instruments, such as commitments to make loans and commercial letters of credit, issued to meet customer financing needs. The face amount for these items represents the exposure to loss, before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded.

Derivatives: Derivative financial instruments are recognized as assets or liabilities at fair value. The accounting for changes in the fair value of derivatives depends on the use of the derivatives and whether the derivatives qualify for hedge accounting. The Company's derivatives consist of interest rate swap agreements, which are used as part of its asset liability management to help manage interest rate risk. The Company does not use derivatives for trading purposes.

Changes in the fair value of derivatives that are designated as a hedge of the variability of cash flows to be received on various loans and are effective are reported in other comprehensive income and later reclassified into earnings in the same periods during which the hedged transaction affects earnings. If hedge accounting does not apply, changes in the fair value of derivatives are recognized immediately in current earnings as noninterest income or loss.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

If designated as a hedge, the Company formally documents the relationship between derivatives as hedged items, as well as the risk-management objective and the strategy for undertaking hedge transactions. This documentation includes linking cash flow hedges to specific assets on the balance sheet. If designated as a hedge, the Company also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative instruments that are used are highly effective in offsetting changes in cash flows of the hedged items. The Company discontinues hedge accounting when it determines the derivative is no longer effective in offsetting changes in the cash flows of the hedged item, the derivative is settled or terminates, or treatment of the derivative as a hedge is no longer appropriate or intended.

Mortgage Banking Derivatives: Commitments to fund mortgage loans (interest rate locks) to be sold into the secondary market and forward commitments for the future delivery of these mortgage loans are accounted for as derivatives not qualifying for hedge accounting. Fair values of these mortgage derivatives are estimated based on changes in mortgage interest rates from the date of the commitments. Changes in the fair values of these derivatives are included in other noninterest income.

Stock-Based Compensation: Compensation cost is recognized for stock options and restricted stock awards issued to employees, based on the fair value of these awards at the date of grant. A Black-Scholes model is utilized to estimate the fair value of stock options, while the market price of the Corporation's common stock at the date of grant is used for restricted stock awards. Compensation cost is recognized over the required service period, generally defined as the vesting period. For awards with graded vesting, compensation cost is recognized on a straight-line basis over the requisite service period for the entire award.

Income Taxes: Income tax expense is the sum of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax consequences of temporary differences between the carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

The Company adopted FASB Interpretation 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48"), as of January 1, 2007. A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. The adoption had no effect on the Company's financial statements.

The Company recognizes interest and/or penalties related to income tax matters in income tax expense.

Earnings Per Common Share: Basic earnings per common share is net income divided by the weighted average number of common shares outstanding during the period, excluding unvested restricted stock awards. Diluted earnings per common share include the dilutive effect of additional potential common shares issuable under stock options, restricted stock awards and the conversion of the Company's convertible preferred stock. Earnings and dividends per share are restated for all stock splits and dividends through the date of issue of the financial statements.

Comprehensive Income: Comprehensive income consists of net income and other comprehensive income (loss). Other comprehensive income (loss) includes unrealized gains and losses on securities available for sale and unrealized gains and losses on cash flow hedges which are also recognized as separate components of equity.

Loss Contingencies: Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated.

Restrictions on Cash: Cash on hand or on deposit with the Federal Reserve Bank was required to meet regulatory reserve and clearing requirements. These balances do not earn interest.

Stock Splits and Dividends: The fair value of shares issued for stock dividends of 20% or less is transferred from retained earnings to common stock, to the extent of available retained earnings. No transfer is recorded for stock dividends or splits in excess of 20%. All share and per share amounts are retroactively adjusted for stock splits and dividends.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Dividend Restriction: Banking regulations require maintaining certain capital levels and may limit the dividends paid by the Bank to the Company or by the Company to shareholders.

Fair Values of Financial Instruments: Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed separately. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates. The fair value estimates of existing on-and off-balance sheet financial instruments do not include the value of anticipated future business or the values of assets and liabilities not considered financial instruments.

Segment Reporting: The Company, through the branch network of the Bank, provides a broad range of financial services to individuals and companies in western Michigan. These services include demand, time and savings deposits; lending; ATM processing; cash management; and trust and brokerage services. While the Company's management team monitors the revenue streams of the various Company products and services, operations are managed and financial performance is evaluated on a Company-wide basis. Accordingly, all of the Company's banking operations are considered by management to be aggregated in one reportable operating segment.

Reclassifications: Some items in the prior year financial statements were reclassified to conform to the current presentation.

Adoption of New Accounting Standards:

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements*. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This Statement establishes a fair value hierarchy about the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. The standard is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position (FSP) 157-2, *Effective Date of FASB Statement No. 157*. This FSP delays the effective date of FAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The Company adopted the standard effective January 1, 2008 and disclosures have been added in the accompanying Notes to the Financial Statements.

In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. Effective January 1, 2008, the standard provides companies with an option to report selected financial assets and liabilities at fair value and establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. The Company adopted Statement No. 159 for loans originated for sale beginning April 1, 2008. The impact was not material to the Company's financial statements.

On November 5, 2007, the SEC issued Staff Accounting Bulletin No. 109, *Written Loan Commitments Recorded at Fair Value through Earnings* ("SAB 109"). Previously, SAB 105, *Application of Accounting Principles to Loan Commitments*, stated that in measuring the fair value of a derivative loan commitment, a company should not incorporate the expected net future cash flows related to the associated servicing of the loan. SAB 109 supersedes SAB 105 and indicates that the expected net future cash flows related to the associated servicing of the loan should be included in measuring fair value for all written loan commitments that are accounted for at fair value through earnings. SAB 105 also indicated that internally-developed intangible assets should not be recorded as part of the fair value of a derivative loan commitment, and SAB 109 retains that view. SAB 109 was effective for derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The impact of adoption was not material.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Effect of Newly Issued But Not Yet Effective Accounting Standards:

In December 2007, the FASB issued FAS No. 141 (revised 2007), Business Combinations (“FAS 141(R)”), which establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in an acquiree, including the recognition and measurement of goodwill acquired in a business combination. FAS No. 141(R) is effective for fiscal years beginning on or after December 15, 2008. Earlier adoption is prohibited. The adoption of this standard did not have a material effect on the Corporation’s results of operations or financial position.

In December 2007, the FASB issued SFAS No. 160, “*Noncontrolling Interest in Consolidated Financial Statements, an amendment of ARB No. 51*” (“SFAS No. 160”), which will change the accounting and reporting for minority interests, which will be recharacterized as noncontrolling interests and classified as a component of equity within the consolidated balance sheets. FAS No. 160 is effective as of the beginning of the first fiscal year beginning on or after December 15, 2008. Earlier adoption is prohibited. The adoption of FAS No. 160 did not have any impact on the Corporation’s results of operations or financial position.

In March 2008, the FASB issued SFAS No. 161, “Disclosures about Derivative Instruments and Hedging Activities, an amendment of SFAS No. 133”. FAS No. 161 amends and expands the disclosure requirements of SFAS No. 133 for derivative instruments and hedging activities. FAS No. 161 requires qualitative disclosure about objectives and strategies for using derivative and hedging instruments, quantitative disclosures about fair value amounts of the instruments and gains and losses on such instruments, as well as disclosures about credit-risk features in derivative agreements. FAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The adoption of this standard did not have a material effect on the Corporation’s results of operations or financial position.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 2 – ACQUISITION

On January 1, 2007, the Company completed the acquisition of Benj. A. Smith & Associates, Ltd. (“Smith & Associates”).

Under the terms of the transaction, Smith & Associates was merged into the Company in exchange for 143,783 shares of common stock. The Company in turn contributed the business to Macatawa Bank. The value of the common stock was based on the average closing price during the month of September 2006 (\$21.91 per share). Share and per share amounts have been adjusted for the 5% stock dividend distributed on May 30, 2007.

The acquisition was accounted for under the purchase method of accounting, resulting in customer relationship intangibles valued at \$1,920,000 and goodwill of \$2,004,000. The goodwill and intangible assets are evaluated annually for impairment as discussed in a separate note.

Under the terms of the transaction, one \$300,000 contingent payment would have been paid in the form of the Company’s common stock if revenue from transferred account balances, principal additions to transferred account balances generated by Mr. Smith and new accounts generated by Mr. Smith exceeded \$1,600,000 in 2007. An additional \$300,000 contingent payment would have been paid in the form of the Company’s common stock if such revenue exceeded \$1,700,000 in 2008. For 2008 and 2007, revenue did not exceed these targets; therefore the contingent payments for each year were not made.

NOTE 3 - SECURITIES

The amortized cost and fair value of securities at year-end were as follows (dollars in thousands):

	Amortized <u>Cost</u>	Gross Unrealized <u>Gains</u>	Gross Unrealized <u>Losses</u>	Fair <u>Value</u>

December 31, 2008 and 2007

NOTE 3 – SECURITIES (Continued)

Securities with unrealized losses at year-end 2008 and 2007, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, are as follows (dollars in thousands):

<u>Description of Securities</u>	<u>Less than 12 Months</u>		<u>12 Months or More</u>		<u>Total</u>	
	<u>Fair Value</u>	<u>Unrealized Loss</u>	<u>Fair Value</u>	<u>Unrealized Loss</u>	<u>Fair Value</u>	<u>Unrealized Loss</u>
December 31, 2008						
U.S. Treasury and federal agency securities	\$ 88	\$ (1)	\$ ---	\$ ---	\$ 88	\$ (1)
State and municipal bonds	16,619	(430)	---	---	16,619	(430)
Other equity securities	<u>992</u>	<u>(8)</u>	<u>---</u>	<u>---</u>	<u>992</u>	<u>(8)</u>
Total temporarily impaired	<u>\$ 17,699</u>	<u>\$ (439)</u>	<u>\$ ---</u>	<u>\$ ---</u>	<u>\$ 17,699</u>	<u>\$ (439)</u>

<u>Description of Securities</u>	<u>Less than 12 Months</u>		<u>12 Months or More</u>		<u>Total</u>	
	<u>Fair Value</u>	<u>Unrealized Loss</u>	<u>Fair Value</u>	<u>Unrealized Loss</u>	<u>Fair Value</u>	<u>Unrealized Loss</u>
December 31, 2007						
U.S. Treasury and federal agency securities	\$ --	\$ --	\$ 37,104	\$ (145)	\$ 37,104	\$ (145)
State and municipal bonds	1,777	(6)	4,479	(51)	6,256	(57)
Other equity securities	<u>--</u>	<u>--</u>	<u>993</u>	<u>(7)</u>	<u>993</u>	<u>(7)</u>
Total temporarily impaired	<u>\$ 1,777</u>	<u>\$ (6)</u>	<u>\$ 42,576</u>	<u>\$ (203)</u>	<u>\$ 44,353</u>	<u>\$ (209)</u>

For unrealized losses on securities, no loss has been recognized into income because management has the intent and ability to hold these securities for the foreseeable future and the declines are largely due to differences in market interest rates as compared to those of the underlying securities. The declines in fair value are considered temporary and are expected to recover as the bonds approach their maturity date.

Contractual maturities of debt securities at December 31, 2008 were as follows (dollars in thousands):

	<u>Held-to-Maturity Securities</u>		<u>Available-for-Sale Securities</u>	
	<u>Amortized Cost</u>	<u>Fair Value</u>	<u>Amortized Cost</u>	<u>Fair Value</u>
Due in one year or less	\$ ---	\$ ---	\$ 52,498	\$ 53,314

	<u>\$ 1,835</u>	<u>\$ 1,867</u>	<u>\$ 179,776</u>	<u>\$ 183,689</u>

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 3 – SECURITIES (Continued)

Proceeds from the sale of available for sale securities were \$21,704,000 and resulted in gross gains of \$412,000 for the year ended December 31, 2008. There were no sales of securities for the years ended December 31, 2007 and 2006.

At December 31, 2008 and 2007, securities with a carrying value of approximately \$4,200,000 and \$1,000,000, respectively, were pledged as security for public deposits, letters of credit and for other purposes required or permitted by law. At December 31, 2008 and 2007, securities with a carrying value of approximately \$102,944,000 and \$120,263,000 were pledged as collateral for securities sold under agreements to repurchase.

NOTE 4 - LOANS

Year-end loans were as follows (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Commercial	\$ 447,352	\$ 438,743
Commercial mortgage	843,359	855,882
Residential mortgage	292,702	266,325
Consumer	<u>190,650</u>	<u>189,682</u>
	<u>\$ 1,774,063</u>	<u>\$ 1,750,632</u>

Activity in the allowance for loan losses was as follows (dollars in thousands):

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Beginning balance	\$ 33,422	\$ 23,259	\$ 20,992
Provision for loan losses	37,435	15,750	7,715
Loans charged-off	(33,317)	(5,920)	(6,054)
Recoveries	<u>722</u>	<u>333</u>	<u>606</u>
Ending balance	<u>\$ 38,262</u>	<u>\$ 33,422</u>	<u>\$ 23,259</u>

The increase in both net charge-offs and the provision for loan losses in 2008 and the provision for loan losses in 2007 were largely in response to increased levels of impaired loans resulting from the continued deterioration in the economy and significant declines in the value of collateral securing impaired real estate loans, primarily residential land development loans. For residential land development loans, cash flow to service the debt is primarily expected from sales of lots and properties securing these loans, which has declined markedly throughout 2007 and 2008. This significant deterioration in cash flows and resulting expected future cash flows is the primary reason for the declines in the value of the real estate securing these loans.

Loans charged off in 2006 include a \$4.7 million charge related to one commercial borrower whose loans were allegedly falsely secured by nonexistent collateral. Accordingly, the provision for loan losses for 2006 also included a \$4.7 million additional provision related to this borrower. The Company filed a lawsuit against this borrower in 2007 that is still pending.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 4 – LOANS (Continued)

Impaired loans were as follows (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Loans with no allocated allowance for loan losses	\$ 49,922	\$ 17,580
Loans with allocated allowance for loan losses	<u>102,015</u>	<u>81,440</u>
	<u>\$ 151,937</u>	<u>\$ 99,020</u>
Amount of the allowance for loan losses allocated	<u>\$ 20,008</u>	<u>\$ 15,831</u>

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Average of impaired loans during the period	\$ 125,918	\$ 38,166	\$ 4,630
Interest income recognized during impairment	2,687	782	---
Cash-basis interest income recognized	2,319	189	---

Nonperforming loans were as follows at year-end (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Loans past due over 90 days still on accrual	\$ 3,200	\$ 2,872
Nonaccrual loans	89,049	70,999
Renegotiated loans	<u>21</u>	<u>38</u>
	<u>\$ 92,270</u>	<u>\$ 73,909</u>

Nonperforming loans include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

The balance of impaired and nonperforming loans at the end of 2008 includes approximately \$76.0 and \$59.9 million, respectively, of loans for the development or sale of 1-4 family residential properties. The balance of impaired and nonperforming loans at the end of 2007 includes approximately \$62.3 and \$57.4 million, respectively, of loans for the development or sale of 1-4 family residential properties.

NOTE 5 – OTHER REAL ESTATE OWNED

Year-end other real estate owned was as follows (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Other real estate owned, initial balance transferred in	\$ 21,135	\$ 5,851
Less: valuation allowance	<u>(1,619)</u>	<u>(147)</u>
	<u>\$ 19,516</u>	<u>\$ 5,704</u>

Activity in the valuation allowance was as follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Beginning balance	\$ 147	\$ 5	\$ ---
Additions charged to expense	1,916	304	9
Deletions upon disposition	<u>(444)</u>	<u>(162)</u>	<u>(4)</u>
Ending balance	<u>\$ 1,619</u>	<u>\$ 147</u>	<u>\$ 5</u>

Net losses on sales of other real estate were \$496,000 in 2008, \$68,000 in 2007 and \$39,000 in 2006.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 6 – FAIR VALUE

Statement 157 establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs) or matrix pricing, which is a mathematical technique widely used to in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs).

The fair value of loans held for sale is based upon binding quotes from 3rd party investors (Level 2 inputs)

The fair value of collateral dependent impaired loans with specific allocations of the allowance for loan losses is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available (Level 3 inputs).

Assets and liabilities measured at fair value on a recurring basis are summarized below (in thousands):

Fair Value Measurements at December 31, 2008 Using				
	December 31, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Available for sale securities	\$184,681	\$ ---	\$184,681	\$ ---
Loans held for sale	2,261	\$ ---	2,261	\$ ---

Assets and Liabilities Measured on a Non-Recurring Basis

Assets and liabilities measured at fair value on a non-recurring basis are summarized below (in thousands):

Fair Value Measurements at December 31, 2008 Using				
	December 31, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Impaired loans	\$39,272	\$ ---	\$ ---	\$ 39,272

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 6 – FAIR VALUE (Continued)

The following represent impairment charges recognized during the period:

Impaired loans, which are measured for impairment using the fair value of the collateral for collateral dependent loans, had a carrying amount of \$39.3 million with a valuation allowance of \$3.6 million at December 31, 2008, resulting in an additional provision for loan losses of approximately \$13.2 million for the year.

Carrying amount and estimated fair values of financial instruments, not previously presented, were as follows at year-end (dollars in thousands).

	<u>2008</u>		<u>2007</u>	
	<u>Carrying Amount</u>	<u>Fair Value</u>	<u>Carrying Amount</u>	<u>Fair Value</u>
Financial assets				
Cash and cash equivalents	\$ 68,284	\$ 68,284	\$ 49,816	\$ 49,816
Securities held to maturity	1,835	1,867	1,917	1,961
FHLB stock	12,275	NA	12,275	NA
Loans, net	1,735,801	1,709,672	1,717,210	1,735,745
Accrued interest receivable	7,746	7,746	10,003	10,003
Interest rate swaps	---	---	288	288
Bank-owned life insurance	23,645	23,645	22,703	22,703
Financial liabilities				
Deposits	(1,665,761)	(1,678,591)	(1,523,553)	(1,526,458)
Federal funds purchased	---	---	(46,467)	(46,467)
Other borrowed funds	(284,790)	(292,198)	(354,052)	(356,764)
Long-term debt	(41,238)	(34,906)	(41,238)	(41,011)
Accrued interest payable	(4,366)	(4,366)	(5,584)	(5,584)
Off-balance sheet credit-related items				
Loan commitments	---	---	---	---

The methods and assumptions used to estimate fair value are described as follows.

Carrying amount is the estimated fair value for cash and cash equivalents, short-term borrowings, Federal Home Loan Bank stock, accrued interest receivable and payable, bank-owned life insurance, demand deposits, short-term debt, and variable rate loans or deposits that reprice frequently and fully. Security fair values are based on market prices or dealer quotes, and if no such information is available, on the rate and term of the security and information about the issuer. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk. Fair values for impaired loans are estimated using discounted cash flow analysis or underlying collateral values. Fair value of debt is based on current rates for similar financing. It was not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability. The fair value of off-balance sheet credit-related items is not significant.

December 31, 2008 and 2007

NOTE 7 - PREMISES AND EQUIPMENT - NET

Year-end premises and equipment were as follows (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Land	\$ 18,211	\$ 17,060
Building	44,031	43,857
Leasehold improvements	1,215	1,219
Furniture and equipment	20,130	18,947
Construction in progress	<u>466</u>	<u>664</u>
	84,053	81,747
Less accumulated depreciation	<u>(20,571)</u>	<u>(17,183)</u>
	<u>\$ 63,482</u>	<u>\$ 64,564</u>

Depreciation expense was \$3,404,000, \$3,290,000 and \$2,949,000 for each of the years ending December 31, 2008, 2007 and 2006.

The Bank leases certain office and branch premises and equipment under operating lease agreements. Total rental expense for all operating leases aggregated to \$345,000, \$359,000 and \$382,000 for each of the years ending December 31, 2008, 2007 and 2006. Future minimum rental expense under noncancelable operating leases as of December 31, 2008 is as follows (dollars in thousands):

2009	\$ 196
2010	124
2011	95
2012	<u>6</u>
	<u>\$ 421</u>

NOTE 8 – GOODWILL AND ACQUISITION INTANGIBLES

Goodwill and intangible assets were as follows at year-end (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Goodwill	<u>\$ ---</u>	<u>\$ 25,919</u>
Acquisition Intangibles:		
Core deposits	\$ 3,185	\$ 3,185
Less accumulated amortization	<u>(2,311)</u>	<u>(2,017)</u>
	<u>\$ 874</u>	<u>\$ 1,168</u>
Trust relationships	\$ 478	\$ 478
Customer relationships	<u>1,920</u>	<u>1,920</u>
	2,398	2,398
Less accumulated amortization	(683)	(543)
Less impairment	<u>(1,715)</u>	<u>---</u>
	<u>\$ ---</u>	<u>\$ 1,855</u>

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 8 – GOODWILL AND ACQUISITION INTANGIBLES (Continued)

During the fourth quarter of 2008, the Company completed its annual impairment analysis of goodwill and other intangible assets as required under Statement of Financial Accounting Standards (SFAS) No. 142, “Goodwill and Other Intangible Assets,” and SFAS No. 144, “Accounting for the Impairment or Disposal of Long-Lived Assets.” As a result of its analysis, the Company determined it was necessary to record pre-tax, non-cash impairment charges of \$25.9 million associated with goodwill and \$1.7 million associated with customer relationship intangibles of its trust department.

Like many publicly traded financial institutions, during 2008 the Company’s stock price and market capitalization declined to a level well below its book value, and the Company recorded declining profits primarily associated with much higher credit losses. These trends were evident throughout the financial services sector. Further, continued deterioration in the equity markets has resulted in declining revenues associated with the Company’s trust department. As a result of its annual impairment analysis, the Company determined its goodwill and customer and trust relationship intangibles were fully impaired. The Company’s remaining intangible assets at December 31, 2008 consisted of \$874,000 of core deposit intangibles.

Amortization expense for the years ended December 31, 2008, 2007 and 2006 was \$434,000, \$460,000 and \$378,000. Estimated amortization expense for the next four years is as follows (dollars in thousands):

2009	\$	282
2010		270
2011		258
2012		64

NOTE 9 - DEPOSITS

Deposits at year-end were as follows (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Noninterest bearing demand	\$ 192,842	\$ 185,681
Interest bearing demand	230,091	273,658
Savings and money market accounts	411,369	377,441
Certificates of deposit	831,459	686,773
	<u>\$ 1,665,761</u>	<u>\$ 1,523,553</u>

The following table depicts the maturity distribution of certificates of deposit at December 31, 2008 (dollars in thousands):

2009	\$ 469,167
2010	276,317
2011	65,011
2012	19,791
2013	1,173
	<u>\$ 831,459</u>

Approximately \$574,861,000 and \$457,769,000 in certificates of deposit were in denominations of \$100,000 or more at December 31, 2008 and 2007. Brokered deposits totaled approximately \$337,768,000 and \$202,839,000 at December 31, 2008 and 2007. At December 31, 2008 and 2007, brokered deposits had interest rates ranging from 3.25% to 4.90% and 3.65% to 5.20%, respectively, and at year-end 2008, maturities ranging from February 2009 to December 2011.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 10 - OTHER BORROWED FUNDS

Other borrowed funds include advances from the Federal Home Loan Bank and securities sold under agreements to repurchase.

Federal Home Loan Bank Advances

At year-end, advances from the Federal Home Loan Bank were as follows (dollars in thousands):

<u>Principal Terms</u>	<u>Advance Amount</u>	<u>Range of Maturities</u>	<u>Weighted Average Interest Rate</u>
December 31, 2008			
Single maturity fixed rate advances	\$145,000	April 2009 to December 2011	3.67%
Putable advances	31,000	September 2009 to December 2010	5.80%
Amortizable mortgage advances	<u>18,790</u>	January 2009 to July 2018	3.78%
	<u>\$194,790</u>		
December 31, 2007			
Single maturity fixed rate advances	\$135,000	March 2008 to November 2010	4.77%
Daily variable rate advance	70,000	June 2008	4.32%
Putable advances	31,000	September 2009 to December 2010	5.80%
Amortizable mortgage advances	<u>8,052</u>	February 2008 to July 2018	3.81%
	<u>\$244,052</u>		

Each advance is payable at its maturity date and contains a prepayment penalty. Putable advances are fixed rate advances that can be changed to a variable rate at the option of the FHLB. If the FHLB exercises that option, these advances may be repaid without penalty. These advances were collateralized by residential and commercial real estate loans totaling \$617,899,000 and \$611,055,000 under a blanket lien arrangement at December 31, 2008 and 2007.

Maturities as of December 31, 2008 were as follows (in thousands):

2009	\$40,123
2010	121,000
2011	15,000
2012	---
2013	---
Thereafter	<u>18,667</u>
	<u>\$194,790</u>

Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase ("repo borrowings") are financing arrangements secured by U.S. federal agency securities. These borrowings were collateralized by securities that had a carrying amount of approximately \$102,944,000 and \$120,263,000 at December 31, 2008 and 2007. At maturity, the securities underlying the arrangements are returned to the Company.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 10 - OTHER BORROWED FUNDS (Continued)

At year-end, repo borrowings were as follows (dollars in thousands):

<u>Principal Terms</u>	<u>Amount</u>	<u>Range of Maturities</u>	<u>Weighted Average Interest Rate</u>
December 31, 2008			
Fixed rate borrowings	<u>\$90,000</u>	February 2009 to November 2010	4.66%
December 31, 2007			
Fixed rate borrowings	\$90,000	February 2009 to November 2010	4.66%
Floating rate borrowings	<u>20,000</u>	August 2009 to August 2010	5.72%
	<u>\$110,000</u>		

Maturities as of December 31, 2008 were as follows (in thousands):

2009	\$50,000
2010	<u>40,000</u>
	<u>\$90,000</u>

The Company terminated \$20,000,000 of floating rate borrowings during the second quarter of 2008 resulting in gross gains of \$243,000, which was included in other noninterest income for the year ended December 31, 2008.

NOTE 11 – LONG-TERM DEBT

The Company has issued \$40.0 million of pooled trust preferred securities (“Preferred Securities”) through its wholly-owned subsidiary grantor trusts. Macatawa Statutory Trust I issued \$619,000 of common securities to the Company and \$20.0 million of Preferred Securities on July 15, 2003 at a floating interest rate of three-month LIBOR plus 3.05%. Macatawa Statutory Trust II issued \$619,000 of common securities and \$20.0 million of Preferred Securities on March 18, 2004 at a floating interest rate of three-month LIBOR plus 2.75%.

The Company issued subordinated debentures (“Debentures”) to each trust in exchange for the proceeds of the offerings, which Debentures represent the sole asset of each trust. The Preferred Securities represent an interest in the Company's subordinated debentures, which have terms that are similar to the Preferred Securities. As provided in each trust’s indenture, the Preferred Securities accrue and pay distributions quarterly at a specified rate and are subject to mandatory redemption upon the maturity of the Debentures, 30 years from the date of issuance, or upon earlier redemption. The Company has the right to redeem the Debentures in whole or in part beginning five years from the date of issuance at a redemption price specified in each trust’s indenture.

At December 31, 2008 and 2007, the Debentures totaling \$41,238,000 are reported in liabilities as long-term debt, and the common securities of \$1,238,000 and unamortized debt issuance costs are included in other assets.

At December 31, 2008 and 2007, the entire \$40 million of Preferred Securities issued qualified as Tier 1 capital for regulatory capital purposes.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 12 - RELATED PARTY TRANSACTIONS

Loans to principal officers, directors, and their affiliates were as follows (dollars in thousands).

	<u>2008</u>	<u>2007</u>
Beginning balance	\$ 19,608	\$ 13,905
New loans and renewals	31,437	20,513
Repayments and renewals	<u>(29,147)</u>	<u>(14,810)</u>
Ending balance	\$ <u>21,898</u>	\$ <u>19,608</u>

Deposits from principal officers, directors, and their affiliates at December 31, 2008 and 2007 were \$4,785,000 and \$5,787,000.

On October 11, 2006, Macatawa Bank Corporation ("Macatawa") entered into an Agreement and Plan of Merger with Benj. A. Smith & Associates, Ltd. ("Smith & Associates") and Benj. A. Smith, III ("Mr. Smith"). On October 11, 2006, Macatawa also entered into a Noncompetition Agreement with Mr. Smith. Macatawa completed the acquisition of Smith & Associates on January 1, 2007.

Smith & Associates was an investment advisory firm based in Holland, Michigan. Mr. Smith was the owner of Smith & Associates. Mr. Smith is also the founder and Chairman of Macatawa Bank Corporation. The transaction was structured as a merger of Smith & Associates into Macatawa, which in turn contributed the business to Macatawa Bank. For further details regarding the transaction, refer to Note 2, Acquisition.

NOTE 13 - STOCK-BASED COMPENSATION

The Company has stock-based compensation plans for its employees (the Employees' Plans) and directors (the Directors' Plans). The Employees' Plans permit the grant of stock options or the issuance of restricted stock for up to 1,917,210 shares of common stock. The Directors' Plans permit the grant of stock options or the issuance of restricted stock for up to 473,278 shares of common stock. There were 501,368 shares under the Employees' Plans and 165,375 shares under the Directors' Plans available for future issuance as of December 31, 2008. The Company issues new shares under its stock-based compensation plans from its authorized but unissued shares.

Stock Options

Option awards are granted with an exercise price equal to the market price at the date of grant. Option awards have vesting periods ranging from one to three years and have ten year contractual terms.

The fair value of each option award is estimated on the date of grant using a closed form option valuation (Black-Scholes) model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatilities of the Company's common stock. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted is based on historical data and represents the period of time that options granted are expected to be outstanding, which takes into account that the options are not transferable. The Company expects that all options granted will vest and become exercisable. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 13 - STOCK-BASED COMPENSATION (Continued)

There were no options granted during 2007. The fair value of options granted during 2008 and 2006 was determined using the following weighted-average assumptions as of grant date.

	<u>2008</u>	<u>2006</u>
Risk-free interest rate	3.14%	4.52%
Expected option life	6.5 years	6.5 years
Expected stock price volatility	30.09%	23.68%
Dividend yield	6.07%	2.55%
Weighted average fair value of options granted	\$ 1.35	\$ 4.80

A summary of option activity in the plans is as follows (dollars in thousands, except per option data):

<u>Options</u>	<u>Number Outstanding</u>	<u>Weighted- Average Exercise Price</u>	<u>Weighted-Average Remaining Contractual Life in Years</u>	<u>Aggregate Intrinsic Value</u>
Outstanding at January 1, 2008	957,765	\$ 14.66		
Granted	114,000	8.57		
Exercised	(33,834)	5.42		
Forfeited	(26,890)	16.08		
Expired	(34,450)	7.35		
Outstanding at December 31, 2008	<u>976,591</u>	<u>\$14.49</u>	<u>5.84</u>	<u>\$ ---</u>
Exercisable at December 31, 2008	<u>761,516</u>	<u>\$14.67</u>	<u>5.08</u>	<u>\$ ---</u>

Information related to stock options during each year follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Intrinsic value of options exercised	\$ 135	\$ 464	\$ 1,779
Cash received from option exercises	174	342	1,103
Tax benefit realized from option exercises	40	89	258

Compensation cost for stock options was \$368,000 or \$320,000 after tax, representing \$0.02 per share for 2008, \$446,000 or \$400,000 after tax, representing \$0.02 per share for 2007 and \$657,000 or \$522,000 after tax, representing \$0.03 per share for 2006.

As of December 31, 2008, there was approximately \$309,000 of total unrecognized compensation cost related to nonvested stock options granted under the Company's stock-based compensation plans. The cost is expected to be recognized over a weighted-average period of 1.5 years.

Stock Awards

Stock awards have vesting periods of up to four years. A summary of changes in the Company's nonvested stock awards for the year follows:

<u>Nonvested Stock Awards</u>	<u>Shares</u>	<u>Weighted-Average Grant-Date Fair Value</u>
Outstanding at January 1, 2008	24,339	\$ 18.64
Granted	165,390	3.83
Vested	(1,000)	14.17
Forfeited	<u>(5,097)</u>	<u>13.69</u>
Outstanding at December 31, 2008	<u>183,632</u>	<u>\$ 5.64</u>

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 13 - STOCK-BASED COMPENSATION (Continued)

Compensation cost for stock awarded in 2008 and 2007 was \$223,000 and \$145,000. Compensation cost for stock awarded in 2006 was nominal.

As of December 31, 2008, there was \$663,000 of total unrecognized compensation cost related to nonvested shares granted under the Company's stock-based compensation plans. The cost is expected to be recognized over a weighted-average period of 2.0 years. The total fair value of shares vested was \$6,200 during the year ended December 31, 2008. There were no shares vested during the years ended December 31, 2007 and 2006.

NOTE 14 – EMPLOYEE BENEFITS

The Company sponsors a 401(k) plan which covers substantially all employees. Employees may elect to contribute to the plan up to the maximum percentage of compensation and dollar amount subject to statutory limitations. The Company makes matching contributions equal to 100% of the first 3% of employee contributions and 50% of employee contributions in excess of 3%, up to 6%. The Company's contributions for the years ended December 31, 2008, 2007 and 2006 were approximately \$790,000, \$767,000 and \$691,000.

The Company sponsors an Employee Stock Purchase Plan which covers substantially all employees. Employees are allowed to direct the Company to withhold payroll dollars and purchase Company stock at market price on a payroll by payroll basis. The Company has reserved 210,000 shares of common stock to be issued under the plan. The plan allows for shares to be issued directly from the Company or purchased on the open market.

NOTE 15 – EARNINGS PER COMMON SHARE

A reconciliation of the numerators and denominators of basic and diluted earnings per common share are as follows (dollars in thousands except per share data):

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Net income (loss)	\$ (38,854)	\$ 9,269	\$ 19,831
Dividends declared on preferred shares	817	---	---
Net income (loss) available to common shares	<u>\$ (39,671)</u>	<u>\$ 9,269</u>	<u>\$ 19,831</u>
Weighted average shares outstanding – Basic	16,968,293	17,109,664	17,011,590
Dilutive potential common shares:			
Stock options and restricted stock awards	28,421	173,860	367,883
Conversion of preferred stock	---	---	---
Weighted average shares outstanding – Diluted	<u>16,996,714</u>	<u>17,283,344</u>	<u>17,379,473</u>
Basic earnings (loss) per common share	\$ (2.34)	\$ 0.54	\$ 1.17
Diluted earnings (loss) per common share (1)	(2.34)	0.54	1.14

- (1) For any period in which a loss is recorded, the assumed exercise of stock options and the impact of restricted stock awards would have an anti-dilutive impact on loss per share and thus are ignored in the diluted per share calculation.

Stock options and nonvested stock awards for 1,160,223, 507,562, and 335,959 shares of common stock were not considered in computing diluted earnings per common share for December 31, 2008, 2007 and 2006, respectively, because they were antidilutive. Potential common shares associated with the convertible preferred stock issued in the fourth quarter of 2008 were excluded from dilutive potential common shares as they were antidilutive.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 16 - FEDERAL INCOME TAXES

The consolidated provision for income taxes was as follows (dollars in thousands):

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Current	\$ (5,994)	\$ 7,606	\$ 10,226
Deferred (benefit) expense	(2,379)	(3,870)	(1,091)
	<u>\$ (8,373)</u>	<u>\$ 3,736</u>	<u>\$ 9,135</u>

The difference between the financial statement tax expense (benefit) and amount computed by applying the statutory federal tax rate to pretax income was reconciled as follows (dollars in thousands):

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Statutory rate	35%	35%	35%
Statutory rate applied to income before taxes	\$ (16,529)	\$ 4,552	\$ 10,138
Add (deduct)			
Tax-exempt interest income	(659)	(633)	(634)
Bank-owned life insurance	(330)	(301)	(360)
Goodwill impairment	9,071	---	---
Other, net	74	118	(9)
	<u>\$ (8,373)</u>	<u>\$ 3,736</u>	<u>\$ 9,135</u>

The net deferred tax asset recorded included the following amounts of deferred tax assets and liabilities (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Deferred tax asset		
Allowance for loan losses	\$ 13,392	\$ 11,698
Nonaccrual loan interest	368	956
Valuation allowance on other real estate owned	567	52
Other	910	545
	<u>15,237</u>	<u>13,251</u>
Deferred tax liabilities		
Depreciation	(2,227)	(2,069)
Purchase accounting adjustments	(306)	(1,058)
Unrealized gain on derivative instruments	---	(101)
Unrealized gain on securities available for sale	(1,367)	(706)
Prepaid expenses	(490)	(364)
Other	(359)	(284)
	<u>(4,749)</u>	<u>(4,582)</u>
Net deferred tax asset	<u>\$ 10,488</u>	<u>\$ 8,669</u>

A valuation allowance related to deferred tax assets is required when it is considered more likely than not that all or part of the benefit related to such assets will not be realized. Based on the levels of taxable income in prior years and the Company's expectation of a return to profitability in future years, management has determined that no valuation allowance was required at December 31, 2008 or 2007.

There were no unrecognized tax benefits at December 31, 2008 and the Company does not expect the total amount of unrecognized tax benefits to significantly increase or decrease in the next twelve months.

The Company is no longer subject to examination by the Internal Revenue Service for years before 2005.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 17 - COMMITMENTS AND OFF-BALANCE-SHEET RISK

Some financial instruments are used to meet customer financing needs and to reduce exposure to interest rate changes. These financial instruments include commitments to extend credit and standby letters of credit. These involve, to varying degrees, credit and interest-rate risk in excess of the amount reported in the financial statements.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the commitment, and generally have fixed expiration dates. Standby letters of credit are conditional commitments to guarantee a customer's performance to a third party. Exposure to credit loss if the other party does not perform is represented by the contractual amount for commitments to extend credit and standby letters of credit. Collateral or other security is normally not obtained for these financial instruments prior to their use, and many of the commitments are expected to expire without being used.

A summary of the notional or contractual amounts of financial instruments with off-balance-sheet risk was as follows at year-end (dollars in thousands):

	<u>2008</u>	<u>2007</u>
Commitments to make loans	\$ 10,275	\$ 43,949
Letters of credit	14,824	21,554
Unused lines of credit	403,335	424,582

At year-end 2008, approximately 29% of the Bank's commitments to make loans were at fixed rates, offered at current market rates. The remainder of the commitments to make loans was at variable rates tied to prime and generally expire within 30 days. The majority of the unused lines of credit were at variable rates tied to prime.

NOTE 18 – CONTINGENCIES

The Company and its subsidiaries periodically become defendants in certain claims and legal actions arising in the ordinary course of business.

On July 8, 2003, the Company filed a Form 8-K (dated July 1, 2003) with the Securities and Exchange Commission reporting events related to a former trust customer, Trade Partners, Inc. ("Trade Partners"), of the former Grand Bank, which the Company acquired effective April 1, 2002. Trade Partners was involved in purchasing and selling interests in viaticals, which are interests in life insurance policies of the terminally ill or elderly. Beginning in 1996, Grand Bank served as a custodian and escrow agent with respect to viaticals purchased by Trade Partners and sold to investors. Two lawsuits were filed, one in December 2002 and another in March 2003, against Trade Partners, Grand Bank and the Company alleging that Grand Bank breached certain escrow agreements related to viatical settlement contracts. Both of these lawsuits have been dismissed although the plaintiffs reserved the right to pursue the claims in the future. A third lawsuit was filed in April 2003 by two individual investors against Grand Bank, the Company, Trade Partners and certain individuals and entities associated with Trade Partners. The claims against Grand Bank and the Company in this lawsuit have been settled and dismissed with prejudice. In May 2003 a purported class action complaint was filed against the Company. As amended, this suit alleges that Grand Bank breached escrow agreements and fiduciary duties and violated the Michigan Uniform Securities Act with respect to the investments secured by the purported class in viaticals and in interests in limited partnerships which made loans to Trade Partners secured by viaticals, and with respect to loans made by purported class members directly to Trade Partners. The Company has answered the complaint denying the material allegations and raising certain affirmative defenses. In November 2006 the court denied class certification in this case. The Company believes that the class action, if it had been approved by the court, might have involved as many as 2,000 to 3,000 individual claimants. Since that denial of class certification, nine new actions, none of which is a class action, raising substantially the same allegations as the former class action have been filed in several jurisdictions on behalf of approximately 1,400 Trade Partners investors, though some have been dismissed over the course of the litigation and the current total is approximately 1,200. Management believes the Company has strong defenses and will vigorously defend the cases.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 18 – CONTINGENCIES (Continued)

Trade Partners is now in receivership. The supervising court authorized the receiver to borrow money from Macatawa Bank to pay premiums, if needed. Macatawa Bank extended a \$4 million line of credit to the receiver, conditioned upon obtaining a security interest in the viaticals. No draws were made against the line, and the line expired during the fourth quarter of 2004.

On October 6, 2008 the Company reached a preliminary contingent settlement with counsel for the Plaintiffs in these proceedings. This agreement required various conditions to be satisfied by January 15, 2009. The Company does not believe it is likely that the contingencies, which are discussed in more detail below, will be satisfied and entered into the agreement anticipating that the plaintiffs' response would help it assess the uncertainties of the litigation.

Both parties entered into a re-negotiation of the agreement in December and the preliminary contingent settlement was amended on January 29, 2009. Under the terms of the Amended Agreement, if all contingencies are satisfied and the settlement becomes final, the Company will pay the plaintiffs \$5.75 million in cash, and issue warrants to purchase a total of 1,500,000 shares of common stock at an exercise price of \$9.00 per share with the warrants having a term of five years from the date of issuance. The Amended Agreement further provides that the plaintiffs are to receive amounts collected by the Company from other defendants up to \$250,000. If the Company collects less than \$250,000 from these other defendants, it is to make up the difference with cash. The Company's insurers will contribute \$950,000 to the cash portion of the settlement. The Amended Agreement includes deadlines for satisfying certain contingencies. Under the terms of the Amended Agreement, the Company will not issue shares of common stock as part of the settlement (except pursuant to the warrant as described above).

The settlement involves no admission of fault or wrongdoing by the Company or Macatawa Bank.

The original contingent settlement agreement provided for a settlement of \$2.75 million in cash, including \$950,000 from the Company's insurers, \$250,000 in cash from third parties defendants or the Company, common stock valued at \$3.0 million and three warrants for each share of common stock to be issued in the proposed settlement. The common stock was to have been issued at a price based on the average closing price for the 20 trading days preceding the date the settlement would have become final after the contingencies are satisfied, the stock warrants would have expired after three years and would have had an exercise price equal to 150% of the price per share at which the common stock was issued with the result that the number of shares and warrants to be issued would have been determined based on the stock price at the time the settlement becomes final. The Company's lower stock price affected their ability to offer stock causing both parties to enter into re-negotiation in December, 2008. The preliminary contingent settlement agreement was amended on January 29, 2009. The stock component of the original offer was replaced with cash, but the value of the contingent settlement agreement was essentially unchanged.

Significant contingencies contained in the Amended Agreement are beyond the Company's control and there can be no assurance about if and when such additional contingencies will be satisfied. The contingencies include the requirement that by no later than April 30, 2009, ninety-eight percent (98%) of the total number of plaintiffs and ninety-eight percent (98%) of the total dollar amount of the claims must be resolved by said plaintiffs signing a release of claims. If the contingencies were satisfied and the litigation was settled, as proposed, the impact on the Company would be the recording of an additional expense of approximately \$3.3 million, net of tax.

There are approximately 1,200 plaintiffs located in 40 states and 13 different countries. Plaintiffs' claims differ widely depending upon which of the many different escrow agreements to which they were a party. This is not a class action and Plaintiff's counsel cannot act to bind the Plaintiffs. The Company believes that resolving this litigation would be in the best interests of the Company and its shareholders. However, based on the significance of the contingencies precedent within the contingent settlement agreement, particularly given the geographic disparity of the plaintiffs, the complicated nature of their varied claims, and the high number of plaintiffs involved combined with the high threshold (98%) required for release of claims, we do not believe it is probable that the contingencies will be satisfied and the litigation settled as contemplated by the contingent settlement agreement. The Company made the offer to settle, containing the contingencies noted above, in an attempt to avoid exposure to future litigation and to avoid the cost of litigation, although the Company did and does not believe the plaintiffs are likely to meet the terms of the offer so as to be able to accept it.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 18 – CONTINGENCIES (Continued)

If the contingencies are not satisfied, and the offer accepted under its terms, the Company does not intend to extend or amend the offer, the Trade Partners litigation will not be settled and the litigation process will resume. If the litigation resumes, the Company believes it has strong defenses and intends to continue to vigorously defend these actions. The outcome under litigation, however, is uncertain, and we are therefore unable to determine to what extent it will impact the Company. The outcome could involve less or more loss to the Company than the amount proposed in the settlement offer. Accordingly, no amount has been accrued at December 31, 2008 for this matter.

It is possible that one or more additional legal actions may be initiated involving the custodial and escrow agent services provided by Grand Bank in connection with Trade Partners. If any such legal actions are commenced, the Company intends to defend them vigorously.

NOTE 19 – INTEREST RATE SWAPS

The Company entered into five interest rate swap agreements (i.e. swaps) during 2002, 2003 and 2004, each with a notional amount of \$20,000,000. A large portion of the Company's assets are loans on which the interest rates are variable. The Company entered into these swaps to convert the variable rate interest cash inflows on certain of its loans to fixed rates of interest. These swaps paid interest to the Company at a fixed rate and required interest payments from the Company at a variable rate.

Prior to December 31, 2007, these interest rate swap agreements were reported, and had been since their inception, as cash flow hedges as the Company believed the critical terms of the swap agreements matched the critical terms of the variable rate loans and concluded that interest rate swap agreements were effective cash flow hedges. At December 31, 2007, the Company determined that accounting for these swaps as cash flow hedges was not appropriate. Accordingly, changes in fair value of these swaps are reported in noninterest income rather than other comprehensive income.

At December 31, 2007, outstanding swaps with a notional amount of \$60,000,000 had weighted average pay rates of 7.25%, weighted average receive rates of 6.65% and a weighted average maturity of 1.5 years. These swaps had a fair value of \$288,000 which was reported in other noninterest income.

In February of 2008, the Company chose to terminate all of its outstanding swaps, which had a total notional amount of \$60,000,000. The Company realized a gain of approximately \$832,000 associated with their settlements which was included in other noninterest income. There were no outstanding swaps at December 31, 2008.

NOTE 20 - SHAREHOLDERS' EQUITY

Regulatory Capital

The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings, and other factors, and the regulators can lower classifications in certain cases. Failure to meet various capital requirements can initiate regulatory action that could have a direct material effect on the financial statements.

The prompt corrective action regulations provide five classifications, including well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If the Bank is only adequately capitalized, regulatory approval is required to accept brokered deposits; and if the Bank is undercapitalized, capital distributions are limited, as is asset growth and expansion, and plans for capital restoration are required.

MACATAWA BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2008 and 2007

NOTE 20 - SHAREHOLDERS' EQUITY (Continued)

Actual capital levels (dollars in thousands) and minimum required levels were as follows at year-end:

	<u>Actual</u>		<u>Minimum Required For Capital Adequacy Purposes</u>		<u>To Be Well Capitalized Under Prompt Corrective Action Regulations</u>	
	<u>Amount</u>	<u>Ratio</u>	<u>Amount</u>	<u>Ratio</u>	<u>Amount</u>	<u>Ratio</u>
<u>December 31, 2008</u>

Tier 1 capital (to average assets)						
Consolidated	171,434	8.3	82,850	4.0	N/A	N/A
Bank	169,778	8.2	82,754	4.0	103,443	5.0

The Bank was categorized as well capitalized at December 31, 2008 and 2007. There are no conditions or events since December 31, 2008 that management believes have changed its category.

Issuance of Convertible Preferred Stock

In the fourth quarter of 2008, the Company completed a private offering of 31,290 shares of 12.0% Series A Non-Cumulative Perpetual Convertible Preferred Stock (Series A Preferred Stock) with a liquidation preference of \$1,000 per share, resulting in an aggregate liquidation preference of \$31.3 million. Proceeds of \$30.6 million from issuance were net of \$653,000 of costs.

Each share of the Series A Preferred Stock is non-voting and may be convertible at any time, at the option of the holder, into 111.73 shares of common stock of the Company, which represents an approximate initial conversion price of \$8.95 per share of common stock (for a total of approximately 3.5 million shares at December 31, 2008). The conversion rate and conversion price will be subject to adjustments in certain circumstances. On or after the third anniversary of the issue date, at the option of the Company, the Series A Preferred Stock will be subject to mandatory conversion into common stock at the prevailing conversion rate, if the closing price of the Company's common stock exceeds 130% of the then applicable conversion price for 20 trading days during any 30 consecutive trading day period and the Company has paid full dividends on the Series A Preferred Stock for four consecutive quarters.

On December 18, 2008, the board of directors declared a quarterly cash dividend on the Series A Preferred Stock of \$26.11 per share. This amount was pro-rated over the initial dividend period as further set forth in the Certificate of Designation classifying the preferred stock. The dividend is payable February 2, 2009, to shareholders of record on January 15, 2009.

Net income for the fourth quarter of 2008 includes a \$27.6 million (\$27.0 million after tax, or \$1.60 per share) impairment charge for goodwill and other intangible assets, as discussed in a separate note.

ITEM 9: Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

There have been no disagreements with our independent public accountants.

ITEM 9A: Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures.

The Company's Co-Chief Executive Officers and Chief Financial Officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Report, have concluded that as of the end of the period covered by this Report the Company's disclosure controls and procedures were adequate and effective to ensure that material information relating to the Company would be made known to them by others within the company, particularly during the period in which this Form 10-K Annual Report was being prepared.

(b) Management's Report on Internal Control over Financial Reporting.

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Company management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2008. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on our assessment we believe that, as of December 31, 2008, the Company's internal control over financial reporting is effective based on those criteria.

Internal control over financial reporting as of December 31, 2008 has been audited by Crowe Horwath LLP, an independent registered certified public accounting firm, as stated in their report included in Item 8 to this Annual Report on Form 10-K.

(c) Changes in Internal Controls.

There were no significant changes in the Company's internal controls over financial reporting during the fourth quarter ended December 31, 2008, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B: Other Information.

None.

PART III

ITEM 10: Directors, Executive Officers and Corporate Governance.

The information set forth under the captions "Information About Directors", "Audit Committee Report", "Corporate Governance-Director Nominations", and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive Proxy Statement relating to our April 23, 2009 Annual Meeting of Shareholders and the information within that section is incorporated by reference.

Information relating to our Executive Officers is included in Part I hereof entitled "Executive Officers of the Registrant." There are no family relationships between or among the above-named executive officers. There are no arrangements or understandings between any of the above-named officers pursuant to which any of them was named an officer.

We have adopted a Senior Officer Code of Ethics. A copy of our Senior Officer Code of Ethics is available upon request by writing to the Chief Financial Officer, Macatawa Bank Corporation, 10753 Macatawa Drive, Holland, Michigan 49424 and is also available at www.macatawabank.com under investor relations.

ITEM 11: Executive Compensation.

Information relating to compensation of our executive officers and directors is contained under the captions "Compensation of Directors", "Executive Compensation", "Compensation Discussion and Analysis", "Summary Compensation Table" and "Potential Payments Upon Termination or Change of Control" in our definitive Proxy Statement relating to our April 23, 2009 Annual Meeting of Shareholders and the information within those sections is incorporated by reference.

ITEM 12: Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information relating to security ownership of certain beneficial owners and management is contained under the captions "Voting Securities and Principal Holders Thereof" and "Security Ownership of Management" in our definitive Proxy Statement relating to our April 23, 2009 Annual Meeting of Shareholders and the information within that section is incorporated by reference.

Equity Compensation Plan Information. The Company maintains certain equity compensation plans under which common stock is authorized for issuance to employees, consultants and directors in exchange for services, including the 1998 Stock Compensation Plan, the 1998 Directors' Stock Option Plan, the 2006 Stock Compensation Plan, the 2006 Directors' Stock Compensation Plan, the Grand Bank Financial Corporation 1998 Stock Option Plan and the Grand Bank Financial Corporation Stock Option Plan of 1997.

The following table sets forth certain information regarding the above referenced equity compensation plans as of December 31, 2008. The following information has been adjusted to reflect the effect of all stock dividends and stock splits.

<u>Plan Category</u>	Equity Compensation Plan Information		
	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights (1)	(b) Weighted-average Exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	976,591	\$14.49	666,743
Equity compensation plans not approved by security holders	0	N/A	0
Total	976,591	\$14.49	666,743

ITEM 13: Certain Relationships and Related Transactions, and Director Independence.

Information relating to certain relationships and related transactions, and director independence is contained under the captions "Transactions Involving Management" and "Corporate Governance-Director Independence" in our definitive Proxy Statement relating to our April 23, 2009 Annual Meeting of Shareholders and the information within that section is incorporated by reference.

ITEM 14: Principal Accountant Fees and Services.

Information relating to principal accountant fees and services is contained under the caption "Principal Accounting Firm Fees" in our definitive Proxy Statement relating to our April 23, 2009 Annual Meeting of Shareholders and the information within that section is incorporated by reference.

PART IV

ITEM 15: Exhibits and Financial Statement Schedules.

- (a) 1. The following documents are filed as part of Item 8 of this report:
