A MISSION DRIVEN BY A NEW GENERATION

At TRI Pointe Homes we honor a deep commitment to exceed homebuyer expectations and deliver quality homes with exceptional value.

We inspire trust in all relationships from employees, to our industry trades, homebuyers and investment partners. Our progressive thinking motivates us to design for the future. Our dedication to excellence is at the core of our high standards. As a company we are fueled by an unwavering passion and challenge ourselves to think differently, every day, always striving for the best and never settling for the ordinary. We are a new generation builder, TRI Pointe Homes, building for today's homebuyers, stockholders and team members.

THINK. RENEW. INSPIRE

DEAR STOCKHOLDERS:

2013 was a tremendous year for TRI Pointe Homes, Inc. We produced significant growth and exceeded our objectives by outperforming all key financial and operating metrics. We also achieved two major milestones in our strategy to build a best-in-class homebuilder.

First, in January 2013 we successfully completed our initial public offering, raising net proceeds of \$155.4 million, and emerged as the first homebuilder to go public in over 10 years. This was not only a significant event for the company, but we believe a turning point and catalyst for the entire industry.

Second, in November 2013, the company entered into a definitive agreement to purchase Weyerhaeuser Real Estate Company (WRECO) in a Reverse Morris Trust transaction valued when announced at approximately \$2.7 billion. We expect that this powerful combination will position the combined entity with over 30,000 lots in many of the nation's leading housing markets. We also expect that it will provide greater liquidity and value for our stockholders by increasing our market capitalization and number of shares outstanding.

SETTING THE FOUNDATION

TRI Pointe Homes was established to capitalize on unique market conditions and a commitment to transform the industry.	Created a strategic alliance with Starwood Capital Group which provided \$150 equity commitment.	Expanded operations and opened Northern California division.
	151 Orders 113 Deliveries	76 Orders 104 Deliveries
2009	2010	2011
	217 Lots	793 Lots
Fee-building was a capital-efficient method of establishing the company.		Rapid expansion of owned projects through deployment of Starwood equity investment.

When the transaction closes, which we anticipate to occur early in the 3rd quarter of 2014, we will have added many of the finest regional brands (Winchester, Trendmaker, Maracay, Pardee and Quadrant) to our TRI Pointe family and will have an inventory of 19,000 lots in California and an additional 11,000 lots in such key markets as Washington DC, Richmond, Houston, Phoenix, Las Vegas, Seattle and Denver. In addition to expanding our geographic footprint and significantly enhancing our land inventory, we are also further strengthening our management team with the addition of WRECO's highly experienced leadership teams, long-regarded among the finest in the industry. This transaction is expected to establish TRI Pointe Homes as an industry leader and one of the 10 largest homebuilders in the United States based upon estimated equity market value.

Our experienced management team, strong business partnerships and dedicated employees enabled us to deliver record results for 2013 while initiating the WRECO transaction. For 2013, new home deliveries increased by 175% to 396 homes. Home sales revenue more than tripled to \$247.1 million with an average sales price of \$624,000. This placed TRI Pointe Homes as the number one fastest-growing homebuilding company by both sales volume and gross homebuilding revenue in the Builder 100 - Hanley Wood. We also realized significant operational efficiencies as evidenced by the improvement in our SG&A expense to 10.3% of home sale revenue. Net income for 2013 was \$15.4 million or \$0.50 per diluted share. In addition to these key metrics, we were also very successful in acquiring lots for future development and ended the year with 3,466 owned or controlled lots.

Continued growth strategy
by launching Colorado division.

Completed IPO which raised
\$155.4 million of growth capital.

Anticipate closing WRECO
transaction in early 3rd quarter.

249 Orders
170 Deliveries

518 Orders
462 Deliveries

2012

2013

2014

1,550 Lots

3,466 Lots

First public offering
from a homebuilder in
over 10 years.

We believe that TRI Pointe Homes is well positioned for continued growth as we build on the positive momentum in our business. With the housing market in the early stages of a long term recovery based on consensus forecasts and economic data, we believe there are significant opportunities ahead of us in 2014 and beyond. We will continue to pursue smart, strategic business opportunities and be disciplined in our approach to all aspects of the business. We believe that we laid the necessary foundation for future growth and success in 2013. The contributions from our entire team, both in the field and at our headquarters, the guidance from our board of directors, and the confidence that our stockholders have shown in TRI Pointe Homes is highly valued. We look forward to growing with you in the years ahead.

Best regards,

Barry Sternlicht, Chairman

CAUTIONARY NOTE CONCERNING FORWARD-LOOKING STATEMENTS

This annual report on Form 10-K contains certain statements relating to future events of our intentions, beliefs, expectations, predictions for the future and other matters that are “forward-looking” statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended.

These statements:

- use forward-looking terminology;
- are based on various assumptions made by TRI Pointe; and
- may not be accurate because of risks and uncertainties surrounding the assumptions that are made.

Factors listed in this section—as well as other factors not included—may cause actual results to differ significantly from the forward-looking statements included in this annual report on Form 10-K. There is no guarantee that any of the events anticipated by the forward-looking statements in this annual report on Form 10-K will occur, or if any of the events occurs, there is no guarantee what effect it will have on our operations or financial condition.

We will not update the forward-looking statement contained in this annual report on Form 10-K, unless otherwise required by law.

Statements

These forward-looking statements are generally accompanied by words such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “goal,” “intend,” “may,” “might,” “plan,” “potential,” “predict,” “project,” “will,” “would,” or other words that convey the uncertainty of future events or outcomes, including, without limitation, the WRECO Transactions described below in Part 1, Item 1 of this annual report on Form 10-K. These forward-looking statements include, but are not limited to, statements regarding expected benefits of the WRECO Transactions, integration plans and expected synergies therefrom, the expected timing of consummation of the WRECO Transactions, and our anticipated future financial and operating performance and results, including our estimates for growth.

Forward-Looking statements are based on a number of factors, including the expected effect of:

- the economy;
- laws and regulations;
- adverse litigation outcome and the adequacy of reserves;
- changes in accounting principles;
- projected benefit payments;
- projected tax rates and credits; and
- other related matters.

Risks, Uncertainties and Assumptions

The major risks and uncertainties – and assumptions that are made – that affect our business and may cause actual results to differ from these forward looking statements include, but are not limited to:

- the effect of general economic conditions, including employment rates, housing starts, interest rate levels, availability of financing for home mortgages and strength of the U.S. dollar;

- Market demand for TRI Pointe products, which is related to the strength of the various U.S. business segments and U.S. and international economic conditions;
- levels of competition;
- the successful execution of TRI Pointe's internal performance plans, including restructuring and cost reduction initiatives;
- global economic conditions;
- raw material prices;
- energy prices;
- the effect of weather;
- the risk of loss from earthquakes, volcanoes, fires, floods, windstorms, hurricanes, pest infestations and other natural disasters;
- transportation cost;
- federal and state tax policies;
- the effect of land use, environment and other governmental regulations;
- legal proceedings;
- risks relating to any unforeseen changes to or effects on liabilities, future capital expenditures, revenues, expenses, earnings, synergies, indebtedness, financial condition, losses and future prospects;
- the satisfaction of the conditions to the consummation of the proposed merger and other risks relates to the consummation of the WRECO Transactions and the actions related thereto;
- the risk that disruptions from the WRECO Transactions will harm TRI Pointe's business;
- TRI Pointe's ability to complete the WRECO Transactions on the anticipated terms and schedule, including the ability to obtain required stockholder and regulatory approvals;
- TRI Pointe's ability to achieve the benefits of the WRECO Transactions in the estimated amount and the anticipated timeframe, if at all;
- TRI Pointe's ability to integrate WRECO successfully after the consummation of the WRECO Transactions and to achieve the anticipated synergies therefrom;
- change in accounting principles; and
- other factors described in "Risk Factors."

PART I

Item 1. Business

As used in this annual report on Form 10-K, unless the context otherwise requires or indicates, references to “the Company,” “our company,” “we,” “our” and “us” (1) for periods from and after September 24, 2010 and prior to January 30, 2013, refer to TRI Pointe Homes, LLC and, unless the context otherwise requires, its subsidiaries and affiliates, which we sometimes refer to as “TPH LLC,” and (2) following the completion of our formation transactions, refer to TRI Pointe Homes, Inc. and its subsidiaries and affiliates; references to “the Starwood Fund” refer to VII/TPC Holdings, L.L.C., a private equity fund managed by an affiliate of Starwood Capital Group; and references to “Starwood Capital Group” refer to Starwood Capital Group Global, L.P., its predecessors and owned affiliates. On January 30, 2013, TRI Pointe Homes, LLC converted into a Delaware corporation and renamed TRI Pointe Homes, Inc. in connection with its initial public offering.

The following discussion and analysis should be read in conjunction with our consolidated financial statements and related notes thereto contained elsewhere in this annual report on Form 10-K. Unless otherwise indicated, the following discussion describes our business as presently being conducted. We expect that consummation of the proposed WRECO Transactions will significantly affect our business and operations. See the discussion in the section entitled “WRECO Transactions” below.

Our Company

We are currently engaged in the design, construction and sale of innovative single-family homes in major metropolitan areas located throughout California and Colorado. Our company was founded in April 2009, towards the end of an unprecedented downturn in the national homebuilding industry, by our current management team with over a century of collective industry experience. Since our formation, we have grown from our three founders (Messrs. Bauer, Mitchell and Grubbs) to over 145 employees.

As a “next-generation” regional homebuilder, we are focused on taking advantage of opportunities in select geographic markets. Our growth strategy generally has been to capitalize on high demand in selected “core” markets with favorable population and employment growth as a result of proximity to job centers or primary transportation corridors. As of December 31, 2013, our operations consisted of 27 communities, ten of which are actively selling, containing 2,282 lots under various stages of development in California and Colorado.

Our company was founded by the members of our management team, who have worked together for over 20 years. They have firmly established our company’s core values of quality, integrity and excellence, which are the driving forces behind our innovative designs and strong customer commitment. Given our regional focus, our management team employs a disciplined, hands-on approach, leveraging strong local market relationships and established reputation to source acquisitions, achieve land entitlements (which provide basic development rights to the owner) and deliver quality homes on budget and on schedule.

Since our formation, we have sold over 950 homes (including fee building projects), a number of which are located in prestigious master planned communities in California, and we have forged relationships with several leading national land developers. Our construction expertise across an extensive product offering allows us flexibility to pursue a wide array of land acquisition opportunities and appeal to a broad range of potential homebuyers, including entry-level, first time move-up and move-up homes. As a result, we build across a variety of base sales price points, ranging from approximately \$300,000 to \$1.5 million, and home sizes, ranging from approximately 1,200 to 4,300 square feet. Cutting edge product development as well as exemplary customer service are key components of the lifestyle connection we seek to establish with each individual homebuyer. Additionally, we believe our diversified product strategy enables us to adapt quickly to changing market conditions and to optimize returns while strategically reducing portfolio risk.

Our home sales revenue has grown rapidly from \$13.5 million in 2011 to \$247.1 million for the year ended December 31, 2013. As of December 31, 2013, we owned 2,282 lots and controlled 1,184 lots that are under land option or purchase contracts, representing approximately two to three years of supply to support our current growth plan. Our land acquisition strategy has focused on the development of entitled parcels that we can complete within approximately 24 to 36 months from the start of sales in order to reduce development and market cycle risk while maintaining an inventory of owned and controlled lots sufficient for construction of homes over a two to three-year period. We continually evaluate new communities and have an attractive pipeline of land acquisition opportunities.

Net new home orders for our owned projects for the years ended December 31, 2013, 2012 and 2011 were 477, 204, and 42 respectively. For the year ended December 31, 2013, we delivered 396 homes from our owned projects for total home sales revenue of \$247.1 million. For the year ended December 31, 2012, we delivered 144 homes from our owned projects for total home sales revenue of \$77.5 million. For the year ended December 31, 2011, we delivered 36 homes from our owned projects for total home sales revenue of \$13.5 million. The cancellation rates of buyers for our owned projects who contracted to buy a home but did not close escrow (as a percentage of overall orders) were approximately 10%, 16% and 13% during the years ended December 31, 2013, 2012 and 2011, respectively. The dollar amount of our backlog of homes sold but not closed for our owned projects as of December 31, 2013, 2012 and 2011 was approximately \$111.6 million, \$33.3 million and \$3.4 million, respectively.

Refer to Part II, Item 6 “Selected Financial Data” and Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this annual report on Form 10-K for selected financial and operating data of the Company. These items should be read in conjunction with our consolidated financial statements and the related notes included elsewhere in this annual report on Form 10-K.

WRECO Transactions

On November 4, 2013, the Company announced that it had entered into a Transaction Agreement with Weyerhaeuser Company, a Washington corporation (“Weyerhaeuser”), Weyerhaeuser Real Estate Company, a Washington corporation and an indirect wholly owned subsidiary of Weyerhaeuser (“WRECO”), and Topaz Acquisition, Inc., a Washington corporation and a wholly owned subsidiary of TRI Pointe (“Merger Sub”). Pursuant to the Transaction Agreement, Weyerhaeuser will distribute all the shares of common stock of WRECO (the “WRECO Common Shares”) to its shareholders (i) on a pro rata basis, (ii) in an exchange offer, or (iii) in a combination thereof (the “Distribution”). Weyerhaeuser will determine which approach it will take to consummate the Distribution prior to closing the transaction and no decision has been made at this time. Immediately following the Distribution, Merger Sub will merge with and into WRECO (the “Merger”), with WRECO surviving the Merger and becoming a wholly owned subsidiary of the Company. We expect to issue 129,700,000 shares of our common stock in the Merger, excluding shares to be issued for equity awards held by WRECO employees that are being assumed by us.

In order to complete the Merger and the related transactions, (i) WRECO will incur new indebtedness of approximately \$800 million or more in the form of (a) debt securities, (b) senior unsecured bridge loans, or (c) a combination thereof (ii) WRECO will make a cash payment of approximately \$739 million, subject to adjustment, to Weyerhaeuser NR Company, the current direct parent of WRECO and a subsidiary of Weyerhaeuser, which cash will be retained by Weyerhaeuser and its subsidiaries (other than WRECO and its subsidiaries); and (iii) Weyerhaeuser will cause certain assets relating to Weyerhaeuser’s real estate business to be transferred to, and certain liabilities relating to Weyerhaeuser’s real estate business to be assumed by, WRECO and its subsidiaries and cause certain assets of WRECO that will be excluded from the transaction to be transferred to, and certain liabilities that will be excluded from the transaction to be assumed by, Weyerhaeuser and its subsidiaries (other than WRECO and its subsidiaries).

In this annual report on Form 10-K, we refer to the transactions contemplated in the Transaction Agreement and related documents as the “WRECO Transactions”. The foregoing description of the WRECO Transactions is not complete. We have filed a registration statement on Form S-4 (Reg. No. 333-193248) to register the shares to be issued in connection with the Merger. For additional information regarding the WRECO Transactions, you are encouraged to read the information included in the Registration Statement, which is incorporated by reference in this annual report on Form 10-K, as well as the sections of this annual report on Form 10-K entitled “Risk Factors,” “Cautionary Note Concerning Forward-Looking Statements,” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Our Competitive Strengths

We believe the following strengths will provide us with a significant competitive advantage in implementing our business strategy:

Experienced and Proven Leadership

Douglas Bauer, our Chief Executive Officer, Thomas Mitchell, our President and Chief Operating Officer, and Michael Grubbs, our Chief Financial Officer, have worked together for over 20 years and have a successful track record of managing and growing a public homebuilding company. Their combined real estate industry experience includes land acquisition, financing, entitlement, development, construction, marketing and sales of single-family detached and attached homes in communities in a variety of markets. Prior to forming our company in 2009, Messrs. Bauer, Mitchell and Grubbs worked together for 17 years at William Lyon Homes from its formation in 1992, ultimately serving as its President and Chief Operating Officer, Executive Vice President and Senior Vice President and Chief Financial Officer, respectively. William Lyon Homes was formed with a nominal investment, and listed its shares on the New York Stock Exchange in 1999 until the company was taken private in 2006. During their tenure at William Lyon Homes, the company focused its operations in California, Arizona and Nevada. During its public operating period, the company delivered over 2,800 homes per year on average, generated revenues averaging over \$1.0 billion per year and increased shareholders’ equity from \$53 million to over \$600 million. We believe that our management team’s prior experience, extensive relationships and strong local reputation provide us with a competitive advantage in being able to secure projects, obtain entitlements, build quality homes and complete projects within budget and on schedule.

Focus on High Growth Core Markets

Our business is well-positioned to capitalize on the broader national housing market recovery. We are focused on the design, construction and sale of innovative single-family detached and attached homes in major metropolitan areas in California and Colorado. In Southern California, we principally operate in the counties of Los Angeles, Orange, Riverside-San Bernardino, and San Diego, and in Northern California, we principally operate in the counties of Alameda, Contra Costa, San Joaquin, San Mateo, Santa Clara and Solano. In Colorado, we principally operate in the counties of Denver, Douglas, and Jefferson. These markets are generally characterized by high job growth and increasing populations, creating strong demand for new housing, and we believe they represent attractive homebuilding markets with opportunities for long-term growth. Moreover, our management team has deep local market knowledge of the California and Colorado homebuilding and development industries. We believe this experience and strong relationships with local market participants enable us to efficiently source, entitle and close on land.

Attractive Land Positions to Support Future Growth

We believe that we have strong land positions strategically located within our core markets, all of which have been acquired since 2010. We select communities with convenient access to metropolitan areas that are generally characterized by diverse economic and employment bases and demographics that we believe will support long-term growth. Our California assets are well located along key transportation corridors in major job

centers in our submarkets. Additionally, our projects in Colorado are conveniently located near employment centers in Denver, including the Denver Tech Center and the U.S. 36 Corridor, major employment centers in Denver, with a concentration of larger technology and communications companies and excellent schools.

Strong Operational Discipline and Controls

Our management team possesses significant operating expertise, including running a much larger public homebuilder. The perspective gained from that experience has helped shape the strict discipline and hands-on approach with which our company is managed. Our strict operating discipline including financial accountability at the project management level is a key part of our strategy to maximize returns while minimizing risk.

Our Relationship with Starwood Capital Group

The Starwood Fund owns 11,985,905 shares of our common stock, which represents 37.9% of our common stock as of February 21, 2014. The Starwood Fund is managed by an affiliate of Starwood Capital Group. We believe that our relationship with Starwood Capital Group, which has approximately \$33 billion of real estate-related assets under management, gives us a strong competitive advantage, in particular by providing us with access to the personnel, relationships and the investing and operational expertise of Starwood Capital Group. Additionally, Barry Sternlicht, the Chairman and Chief Executive Officer of Starwood Capital Group, is also the chairman of our board. As a former Chairman and Chief Executive Officer of Starwood Hotels & Resorts Worldwide, Inc., a Fortune 500 company, and current Chairman and Chief Executive Officer of Starwood Property Trust, Inc., a commercial real estate finance company, Mr. Sternlicht brings a unique perspective on building a world class real estate operating business to the chairman position of our board. The Starwood Fund will have the right to designate two members of our board for as long as the Starwood Fund owns 25% or more of our outstanding common stock (excluding shares of common stock that are subject to issuance upon the exercise or exchange of rights of conversion or any options, warrants or other rights to acquire shares) and one member for as long as it owns at least 10%. Messrs. Bauer, Mitchell and Grubbs will agree to vote all shares of our common stock that they own in favor of the Starwood Fund nominees in any election of directors for as long as the Starwood Fund owns at least 10%. Mr. Sternlicht is expected to continue as chairman of our board of directors and Mr. Chris Graham, a Senior Managing Director at Starwood Capital Group, is expected to be appointed a director at the consummation of the WRECO Transactions. For information concerning our board of directors after consummation of the WRECO Transactions, please see the section of the Registration Statement entitled “Information on TRI Pointe—Directors and Officers of TRI Pointe Before and After the Transactions.” Following consummation of the Merger, Starwood Fund will have the right to designate one member of our board of directors for as long as it owns at least 5% of our outstanding common stock.

Through our relationship with Starwood Capital Group, our management team has drawn upon the deep real estate knowledge base of Starwood Capital Group’s personnel and its established track record of investing in real estate operating companies. Starwood Capital Group has invested in most major classes of real estate, including residential land and communities, multi-family condominiums and apartments, office, industrial, retail, hotel, senior housing, mixed-use, health clubs, resorts and golf courses. Affiliates of Starwood Capital Group may make available to us for purchase, at market prices, certain of their owned residential land holdings.

No Legacy Issues

Given our recent formation in 2009 and that our current land inventory was accumulated following the Starwood Fund’s investment in us in September 2010, we do not have distressed legacy assets or liabilities to manage, unlike many competitors that were affected by the unprecedented downturn in the real estate markets that resulted from the recession of 2008 – 2009. As a result, all of our real estate assets as well as those we have under option contracts or purchase contracts are located in markets that we targeted after the downturn commenced, whereas many of our competitors continue to own legacy properties in economically stagnant

locations or land options either on undesirable properties or with unfavorable terms. The absence of legacy issues has also allowed us to hire experienced and talented real estate development personnel who became available during the downturn. We believe that our strong balance sheet and absence of legacy issues has enabled us to focus on future growth, as opposed to having resources diverted to manage troubled assets.

Our Business Strategy

Our business strategy is focused on the design, construction and sale of innovative single-family detached and attached homes in major metropolitan areas in California and Colorado. Our business strategy is driven by the following:

Acquire Attractive Land Positions While Reducing Risk

We believe that our reputation and extensive relationships with land sellers, master plan developers, financial institutions, brokers and other builders, as well as our relationship with Starwood Capital Group, will enable us to continue to acquire well-positioned land parcels in our target markets and provide us access to a greater number of acquisition opportunities. We believe our expertise in land development and planning enables us to create desirable communities that meet or exceed our target customer's expectations, while operating at competitive costs. We also believe that our strategy of holding an inventory of land that will provide us with a two to three year supply of developed lots and focusing on the development of entitled parcels that we can complete within approximately 24 to 36 months from the start of sales allows us to limit exposure to land development and market cycle risk while pursuing attractive returns on our capital. We also seek to minimize our exposure to land risk through disciplined management of entitlements, as well as the use of land options and other flexible land acquisition arrangements.

Increase Market Position in Growth Markets

We believe that there are significant opportunities to profitably expand in our existing and target markets, and we continually review our selection of markets based on both aggregate demographic information and our own operating results. We use the results of these reviews to re-allocate our investments to those markets where we believe we can maximize our profitability and return on capital over the next several years. While our primary growth strategy has focused on increasing our market position in our existing markets, we may, on an opportunistic basis, explore expansion into other markets through organic growth or acquisition. In addition, we believe that the WRECO Transactions will uniquely position us to build on our established momentum as a "next-generation" homebuilder, and expand our land holdings to capitalize on new growth opportunities in WRECO's current markets, including Arizona, Maryland, Nevada, Texas, Virginia, and Washington.

Provide Superior Design and Homeowner Experience and Service

We consider ourselves a "progressive" homebuilder driven by exemplary customer experience, cutting-edge product development and exceptional execution. Our core operating philosophy is to provide a positive, memorable experience to our homeowners through active engagement in the building process, tailoring our product to the buyer's lifestyle needs and enhancing communication, knowledge and satisfaction. We believe that the new generation of home buying families has different ideas about the kind of home buying experience it wants. As a result, our selling process focuses on the homes' features, benefits, quality and design in addition to the traditional metrics of price and square footage. In addition, we devote significant resources to the research and design of our homes to better meet the needs of our buyers. Through our "TRI-e³ Green" platform, we provide homes that we believe are earth-friendly, enhance homeowners' comfort, promote a healthier lifestyle and deliver tangible operating cost savings versus less efficient resale homes. Collectively, we believe these steps enhance the selling process, lead to a more satisfied homeowner and increase the number of buyers referred to our communities.

Offer a Diverse Range of Products

We are a builder with a wide variety of product lines that enable us to meet the specific needs of each of our core markets, which we believe provides us with a balanced portfolio and an opportunity to increase market share. We have demonstrated expertise in effectively building homes across product offerings from entry-level through first-time and second-time “move-up” housing. We spend extensive time studying and designing our products through the use of architects, consultants and homeowner focus groups for all levels and price points in our target markets. We believe our diversified product strategy enables us to best serve a wide range of buyers, adapt quickly to changing market conditions and optimize performance and returns while strategically reducing portfolio risk. Within each of our core markets we determine the profile of buyers we hope to address and design neighborhoods and homes with the specific needs of those buyers in mind.

Focus on Efficient Cost Structure and Target Attractive Returns

We believe that our homebuilding platform, which currently carries no legacy assets or liabilities, and our focus on controlling costs position us well to generate attractive returns for our shareholders. Our experienced management team is vigilant in maintaining its focus on controlling costs. We competitively bid each phase of development while maintaining strong relationships with our trade partners by managing production schedules closely and paying our vendors on time.

We combine decentralized management in those aspects of our business where we believe detailed knowledge of local market conditions is critical (such as governmental processing, construction, land acquisition, land development and sales and marketing), with centralized management in those functions where we believe central control is required (such as approval of land acquisitions, financial, treasury, human resources and legal matters). We have also made significant investments in systems and infrastructure to operate our business efficiently and to support the planned future growth of our company as a result of executing our expansion strategy.

Utilize Prudent Leverage

Our ongoing financial strategy includes redeployment of cash flows from continuing operations and debt to provide us with the financial flexibility to access capital on the best terms available. In that regard, we expect to employ prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. As of December 31, 2013, we had approximately \$270.6 million of aggregate loan commitments, of which \$138.1 million was outstanding. At that date, our aggregate loan commitments consisted of \$205 million of secured revolving credit facilities, which provide financing for several real estate projects, two project-specific revolving loans and several other loan agreements related to the acquisition and development of lots and the construction of model homes and homes for sale. For information concerning indebtedness to be incurred in connection with consummation of the WRECO Transactions, please see the section of the Registration Statement entitled “Debt Financing” and Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this annual report on Form 10-K.

Description of Projects and Communities under Development

Our homebuilding projects usually take approximately 24 to 36 months to complete from the start of sales. The following table presents project information relating to each of our markets as of December 31, 2013 and includes information on current projects under development where we are building and selling homes for our own account and current projects under development where we are active as a fee builder.

County, Project, City	Year of First Delivery ⁽¹⁾	Total Number of Homes ⁽²⁾	Cumulative Homes		Backlog as of December 31, 2013 ⁽⁴⁾⁽⁵⁾	Homes Closed for the Year Ended December 31, 2013	Sales Price Range (in 000's) ⁽⁶⁾

(1) Year of first delivery for future periods is based upon management's estimates and is subject to change.

(2) The number of homes to be built at completion is subject to change, and there can be no assurance that we will build these homes.

(3) Owned lots and fee building lots as of December 31, 2013 include owned lots and fee building lots in backlog as of December 31, 2013.

(4) Backlog consists of homes under sales contracts that had not yet closed, and there can be no assurance that closings of sold homes will occur.

(5) Of the total homes subject to pending sales contracts that have not closed as of December 31, 2013, 127 homes are under construction, 4 homes have completed construction and 18 homes have not started construction.

(6) Sales price range reflects base sales price only and excludes any lot premium, buyer incentives and buyer selected options, which may vary from project to project. Sales prices for homes required to be sold pursuant to affordable housing requirements are excluded from sales price range.

(7) We entered into a construction management agreement to only build homes in this community for an independent third-party property owner. This project is marketed under the third-party owner's name.

(8) We entered into a construction management agreement to build, sell and market homes in this community for an independent third-party property owner. This project is marketed under the TRI Pointe Homes brand name.

Owned and Controlled Lots

As of December 31, 2013, we owned or controlled, pursuant to land option contracts or purchase contracts, an aggregate of 3,466 lots. The following table presents certain information with respect to our owned and controlled lots as of December 31, 2013⁽¹⁾.

Market	Lots Owned	Lots Controlled ⁽¹⁾	Lots Owned and Controlled ⁽¹⁾
Southern California	1,072	674	1,746
Northern California	947	192	1,139
Colorado	263	318	581
Total	2,282	1,184	3,466

(1) Includes lots that are under land option contracts or purchase contracts.

Acquisition Process

As of December 31, 2013, we had 27 communities containing 2,282 owned lots under various stages of development. All of these lots are entitled. We believe that our current inventory of owned and controlled lots will be adequate to supply our homebuilding operations for approximately two to three years.

Our land acquisition strategy focuses on the development of entitled parcels that we can complete within approximately 24 to 36 months from the start of sales in order to reduce development and market cycle risk while maintaining an inventory of owned and controlled lots sufficient for construction of homes over a two to three-year period. Our acquisition process generally includes the following steps to reduce development and market cycle risk:

- review of the status of entitlements and other governmental processing, including title reviews;
- limitation on the size of an acquisition to minimize investment levels in any one project;
- completion of due diligence on the land parcel prior to committing to the acquisition;
- preparation of detailed budgets for all cost categories;
- completion of environmental reviews and third-party market studies;
- utilization of options, joint ventures and other land acquisition arrangements, if necessary; and
- employment of centralized control of approval over all acquisitions through a land committee process. Our executive committee, which is comprised of Barry Sternlicht, the chairman of our board, Douglas Bauer, our Chief Executive Officer, and J. Marc Perrin, a member of our board has the authority to review and consider the approval of any land acquisition with a purchase price of up to \$35 million.

Before purchasing a land parcel, we also engage outside architects and consultants to help review our proposed acquisition and design our homes and communities.

We acquire land parcels pursuant to purchase agreements that are often structured as option contracts. These option contracts require us to pay non-refundable deposits, which can vary by transaction, and entitle (but do not obligate) us to acquire the land typically at fixed prices. The term within which we can exercise our option varies by transaction and our acquisition is often contingent upon the completion of entitlement or other work with regard to the land (such as “backbone” improvements, such as the installation of main roads or sewer mains). Depending upon the transaction, we may be required to purchase all of the land involved at one time or we may have a right to acquire identified groups of lots over a specified timetable. In some transactions, a portion of the consideration that we pay for the land may be in the form of a share of the profits of a project after we receive an agreed to level of profits from the project. In limited instances such as when we acquire land from a master developer that is part of a larger project, the seller may have repurchase rights entitling it to repurchase the land from us under circumstances when we do not develop the land by an outside deadline (unless the delay is caused by certain circumstances outside our control), or when we seek to sell the land directly to a third party or indirectly through a change in control of our company. Repurchase rights typically allow the seller to repurchase the land at the price that we paid the seller to acquire the land plus the cost of improvements that we have made to the land and less some specified discount.

Homebuilding, Marketing and Sales Process

Our detached homes range in size from approximately 1,300 to 4,300 square feet, and our attached homes range in size from approximately 1,200 to 2,500 square feet. The prices of our homes also vary substantially. Base sales prices for our detached homes range from approximately \$300,000 to \$1.5 million and base sales prices for our attached homes range from approximately \$300,000 to \$1.1 million. The average sales price of our owned homes delivered was approximately \$624,000 and \$538,000, respectively, for years ended December 31, 2013 and 2012.

We typically develop communities in phases based upon projected sales, and we construct homes in each phase whether or not they have been pre-sold. We have the ability to control the timing of construction of subsequent phases in the same community based on sales activity in the prior phase, market conditions and other

factors. We also will attempt to delay much of the customization of a home until a qualified buyer has been approved, so as to enable the buyer to tailor the home to such buyer's specifications; however, we will complete the build out of any unsold homes in a particular phase where deemed appropriate for marketing purposes of such home.

The design of our homes is limited by factors such as zoning requirements, building codes and energy efficiency laws. As a result, we contract with a number of architects and other consultants in connection with the design process. Substantially all of our construction work is done by subcontractors with us acting as the general contractor. We also enter into contracts as needed with design professionals and other service providers who are familiar with local market conditions and requirements. We do not have long-term contractual commitments with our subcontractors, suppliers or laborers. We maintain strong and long-standing relationships with many of our subcontractors. We believe that our relationships have been enhanced through both maintaining our schedules and making timely payment to our subcontractors. By dealing fairly, we are able to keep our key subcontractors attentive to our projects.

Sales and Marketing

In connection with the sale and marketing of our homes, we make extensive use of advertising and other promotional activities, including our website (www.TRIPointeHomes.com), mass-media advertisements, brochures, direct mail and the placement of signboards in the immediate areas of our developments. Except for the Registration Statement, the information contained in, or that can be accessed through, our website is not incorporated by reference and is not a part of this annual report on Form 10-K.

We sell our homes through our own sales representatives and through independent real estate brokers. Our in-house sales force typically works from sales offices located in model homes close to or in each community. Sales representatives assist potential buyers by providing them with basic floor plans, price information, development and construction timetables, tours of model homes, and the selection of options. Sales personnel are licensed by the applicable real estate bodies in their respective markets, are trained by us and generally have had prior experience selling new homes in the local market. Our personnel, along with subcontracted marketing and design consultants, carefully design exteriors and interiors of each home to coincide with the lifestyles of targeted homebuyers.

As of December 31, 2013, we owned 32 model homes. Generally, we build model homes at each project and have them professionally decorated to display design features. We believe that model homes play a significant role in helping homebuyers understand the efficiencies and value provided by each floor plan type. Interior decorations vary among our models and are selected based upon the lifestyles of our targeted homebuyers. Structural changes in design from the model homes are not generally permitted, but homebuyers may select various other optional construction and design amenities. In addition to model homes, customers can gain an understanding of the various design features and options available to them using third-party design centers. At each design center, customers can meet with a designer and are shown the standard and upgraded selections available to them.

We typically sell homes using sales contracts that include cash deposits by the purchasers. Before entering into sales contracts, we pre-qualify our customers. However, purchasers can generally cancel sales contracts if they are unable to sell their existing homes, if they fail to qualify for financing, or under certain other circumstances. Although cancellations can delay the sale of our homes, they have historically not had a material impact on our operating results. The cancellation rate of buyers who contracted to buy a home but did not close escrow (as a percentage of overall orders) was approximately 10% and 16% during the years ended December 31, 2013 and 2012. Cancellation rates are subject to a variety of factors beyond our control such as adverse economic conditions and increases in mortgage interest rates. Our inventory of completed and unsold homes was 7 homes as of December 31, 2013.

Customer Financing

We seek to assist our homebuyers in obtaining financing by arranging with mortgage lenders to offer qualified buyers a variety of financing options. Substantially all homebuyers utilize long-term mortgage financing to purchase a home and mortgage lenders will usually make loans only to qualified borrowers.

Quality Control and Customer Service

We pay particular attention to the product design process and carefully consider quality and choice of materials in order to attempt to eliminate building deficiencies. The quality and workmanship of the subcontractors we employ are monitored and we make regular inspections and evaluations of our subcontractors to seek to ensure that our standards are met.

We maintain quality control and customer service staff whose role includes providing a positive experience for each customer throughout the pre-sale, sale, building, closing and post-closing periods. These employees are also responsible for providing after sales customer service. Our quality and service initiatives include taking customers on a comprehensive tour of their home prior to closing and using customer survey results to improve our standards of quality and customer satisfaction.

Warranty Program

Our company currently provides a limited one year warranty covering workmanship and materials. In addition, our limited warranty (generally ranging from a minimum of two years up to the period covered by the applicable statute of repose) covers certain defined construction defects. The limited warranty covering construction defects is transferable to subsequent buyers not under direct contract with us and requires that homebuyers agree to the definitions and procedures set forth in the warranty, including the submission of unresolved construction-related disputes to binding arbitration. We reserve up to 1.0% of the sales price of each home we sell to provide the customer service to our homebuyers. We believe that our reserves are adequate to cover the ultimate resolution of our potential liabilities associated with known and anticipated warranty and construction defect related claims and litigation.

We subcontract our homebuilding work to subcontractors who generally provide us with an indemnity and a certificate of insurance prior to receiving payments for their work and, therefore, claims relating to workmanship and materials are generally the primary responsibility of our subcontractors.

There can be no assurance, however, that the terms and limitations of the limited warranty will be effective against claims made by homebuyers, that we will be able to renew our insurance coverage or renew it at reasonable rates, that we will not be liable for damages, the cost of repairs, and/or the expense of litigation surrounding possible construction defects, soil subsidence or building related claims or that claims will not arise out of uninsurable events or circumstances not covered by insurance and not subject to effective indemnification agreements with our subcontractors.

Seasonality

We have experienced seasonal variations in our quarterly operating results and capital requirements. We typically take orders for more homes in the first half of the fiscal year than in the second half, which creates additional working capital requirements in the second and third quarters to build our inventories to satisfy the deliveries in the second half of the year. We expect this seasonal pattern to continue over the long-term, although it may be affected by volatility in the homebuilding industry.

Raw Materials

Typically, all the raw materials and most of the components used in our business are readily available in the United States. Most are standard items carried by major suppliers. However, a rapid increase in the number of homes started could cause shortages in the availability of such materials or in the price of services, thereby leading to delays in the delivery of homes under construction. We continue to monitor the supply markets to achieve the best prices available.

Fee Building Services

Although, since the investment by the Starwood Fund in 2010, our primary business focus is building and selling homes for our own account, we also selectively provide construction services whereby we build, market and sell homes for independent third-party property owners with whom we have revenue sharing agreements on projects typically marketed under the TRI Pointe Homes brand name (“fee building projects”). Our services with respect to fee building projects may include design, development, construction and sale of the homes, and we may take a project at any stage of development through its completion and sale. We earn revenue on our fee building projects either as a flat fee for the project or as a percentage of the cost or revenue of the project depending upon the terms of the agreement with our customer. For the years ended December 31, 2013 and 2012, we delivered 63 and 26 homes, respectively, at our fee building projects.

Our Financing Strategy

We intend to employ both debt and equity as part of our ongoing financing strategy, coupled with redeployment of cash flows from continuing operations, to provide us with the financial flexibility to access capital on the best terms available. In that regard, we expect to employ prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. As of December 31, 2013, we had approximately \$270.6 million of aggregate loan commitments, of which \$138.1 million was outstanding. At that date, our aggregate loan commitments consisted of \$205 million secured revolving credit facilities, which provide financing for several real estate projects, two project-specific revolving loans and several other loan agreements related to the acquisition and development of lots and the construction of model homes and homes for sale. Our board of directors will consider a number of factors when evaluating our level of indebtedness and when making decisions regarding the incurrence of new indebtedness, including the purchase price of assets to be acquired with debt financing, the estimated market value of our assets and the ability of particular assets, and our company as a whole, to generate cash flow to cover the expected debt service. As a means of sustaining our long-term financial health and limiting our exposure to unforeseen dislocations in the debt and financing markets, we currently expect to remain conservatively capitalized. However, our charter does not contain a limitation on the amount of debt we may incur and our board of directors may change our target debt levels at any time without the approval of our stockholders.

We intend to finance future acquisitions and developments with the most advantageous source of capital available to us at the time of the transaction, which may include a combination of common and preferred equity, secured and unsecured corporate level debt, property-level debt and mortgage financing and other public, private or bank debt. For information concerning indebtedness to be incurred in connection with consummation of the WRECO Transactions, please see the section of the Registration Statement entitled “Debt Financing” and Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this annual report on Form 10-K.

We carry out our business generally through a number of project-specific, wholly owned subsidiaries. Our fee building business is conducted primarily through TRI Pointe Contractors, LP, and TRI Pointe Communities, Inc. is our wholly owned subsidiary through which we conduct real estate brokerage activities relating to our business.

Segments

The Company's operations are organized into two reportable segments: homebuilding and construction services. For financial information about our segments, see Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 8 to the consolidated financial statements of this annual report on Form 10-K.

Government Regulation and Environmental Matters

We are subject to numerous local, state, federal and other statutes, ordinances, rules and regulations concerning zoning, development, building design, construction and similar matters which impose restrictive zoning and density requirements, the result of which is to limit the number of homes that can be built within the boundaries of a particular area. Projects that are not entitled may be subjected to periodic delays, changes in use, less intensive development or elimination of development in certain specific areas due to government regulations. We may also be subject to periodic delays or may be precluded entirely from developing in certain communities due to building moratoriums or "slow-growth" or "no-growth" initiatives that could be implemented in the future. Local governments also have broad discretion regarding the imposition of development fees and exactions for projects in their jurisdiction. Projects for which we have received land use and development entitlements or approvals may still require a variety of other governmental approvals and permits during the development process and can also be impacted adversely by unforeseen health, safety and welfare issues, which can further delay these projects or prevent their development.

We are also subject to a variety of local, state, federal and other statutes, ordinances, rules and regulations concerning the environment. The particular environmental laws which apply to any given homebuilding site vary according to multiple factors, including the site's location, its environmental conditions and the present and former uses of the site, as well as adjoining properties. Environmental laws and conditions may result in delays, may cause us to incur substantial compliance and other costs, and can prohibit or severely restrict homebuilding activity in environmentally sensitive regions or areas. In addition, in those cases where an endangered or threatened species is involved, environmental rules and regulations can result in the restriction or elimination of development in identified environmentally sensitive areas. From time to time, the United States Environmental Protection Agency and similar federal or state agencies review homebuilders' compliance with environmental laws and may levy fines and penalties for failure to strictly comply with applicable environmental laws or impose additional requirements for future compliance as a result of past failures. Any such actions taken with respect to us may increase our costs. Further, we expect that increasingly stringent requirements will be imposed on homebuilders in the future. Environmental regulations can also have an adverse impact on the availability and price of certain raw materials such as lumber. California is especially susceptible to restrictive government regulations and environmental laws.

Under various environmental laws, current or former owners of real estate, as well as certain other categories of parties, may be required to investigate and clean up hazardous or toxic substances or petroleum product releases, and may be held liable to a governmental entity or to third parties for related damages, including for bodily injury, and for investigation and clean-up costs incurred by such parties in connection with the contamination. A mitigation system may be installed during the construction of a home if a cleanup does not remove all contaminants of concern or to address a naturally occurring condition such as methane. Some buyers may not want to purchase a home with a mitigation system.

Refer to Part I, Item 1A "Risk Factors" of this annual report on Form 10-K for risks related to government regulation and environmental matters.

Competition

Competition in the homebuilding industry is intense, and there are relatively low barriers to entry into our business. Homebuilders compete for, among other things, home buying customers, desirable land parcels, financing, raw materials and skilled labor. Increased competition could hurt our business, as it could prevent us

from acquiring attractive land parcels on which to build homes or make such acquisitions more expensive, hinder our market share expansion, and lead to pricing pressures on our homes that may adversely impact our margins and revenues. If we are unable to successfully compete, our business, prospects, liquidity, financial condition and results of operations could be materially and adversely affected. Our competitors may independently develop land and construct housing units that are superior or substantially similar to our products. Furthermore, a number of our primary competitors are significantly larger, have a longer operating history and may have greater resources or lower cost of capital than ours; accordingly, they may be able to compete more effectively in one or more of the markets in which we operate. Many of these competitors also have longstanding relationships with subcontractors and suppliers in the markets in which we operate. We also compete for sales with individual resales of existing homes and with available rental housing.

Employees

As of December 31, 2013, we had 147 employees, 74 of whom were executive, management and administrative personnel, 20 of whom were sales and marketing personnel and 53 of whom were involved in field construction. Although none of our employees are covered by collective bargaining agreements, certain of the subcontractors engaged by us are represented by labor unions or are subject to collective bargaining arrangements. We believe that our relations with our employees and subcontractors are good.

Legal Proceedings

We are not involved in any material litigation nor, to our knowledge, is any material litigation threatened against us.

Our Offices

Our principal executive offices are located at 19520 Jamboree Road, Suite 200, Irvine, California 92612. Our main telephone number is (949) 478-8600. Our internet website is www.TRIPointeHomes.com. We will make available through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(d) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after filing with, or furnishing to, the Securities and Exchange Commission. Copies of these reports, and any amendment to them, are available free of charge upon request. Except for the Registration Statement, the information contained in, or that can be accessed through, our website is not incorporated by reference and is not a part of this annual report on Form 10-K.

Item 1A. Risk Factors

You should carefully consider the following risk factors, which address the material risks concerning our business, together with the other information contained in this annual report on Form 10-K. If any of the risks discussed in this annual report on Form 10-K occur, our business, prospects, liquidity, financial condition and results of operations could be materially and adversely affected, in which case the trading price of our common stock could decline significantly and you could lose all or a part of your investment. Some statements in this annual report on Form 10-K, including statements in the following risk factors, constitute forward-looking statements. Please refer to the initial section of this annual report on Form 10-K entitled “Cautionary Note Concerning Forward-Looking Statements.” For information concerning risks related to the WRECO Transactions, please see the section of the Registration Statement entitled “Risk Factors – Risks Related to the Transactions.” For information concerning the risks that we will face after consummation of the WRECO Transactions, please see the section of the Registration Statement entitled “Risk Factors – Risks Related to TRI Pointe’s Industry and Business, Including the Real Estate Business, After the Transactions.”

Risks Related to Our Business

Our long-term growth depends upon our ability to successfully identify and acquire desirable land parcels for residential buildout.

Our future growth depends upon our ability to successfully identify and acquire attractive land parcels for development of our single-family homes at reasonable prices and with terms that meet our underwriting criteria. Our ability to acquire land parcels for new single-family homes may be adversely affected by changes in the general availability of land parcels, the willingness of land sellers to sell land parcels at reasonable prices, competition for available land parcels, availability of financing to acquire land parcels, zoning and other market conditions. If the supply of land parcels appropriate for development of single-family homes is limited because of these factors, or for any other reason, our ability to grow could be significantly limited, and the number of homes that we build and sell could decline. Additionally, our ability to begin new projects could be impacted if we elect not to purchase land parcels under option contracts. To the extent that we are unable to purchase land parcels timely or enter into new contracts for the purchase of land parcels at reasonable prices, our home sales revenue and results of operations could be negatively impacted.

Adverse changes in general economic conditions could reduce the demand for homes and, as a result, could have a material adverse effect on us.

The residential homebuilding industry is cyclical and is highly sensitive to changes in general economic conditions such as levels of employment, consumer confidence and income, availability of financing for acquisitions, construction and permanent mortgages, interest rate levels, inflation and demand for housing. Since early 2006, the U.S. housing market has been negatively impacted by declining consumer confidence, restrictive mortgage standards and large supplies of foreclosures, resales and new homes, among other factors. When combined with a prolonged economic downturn, high unemployment levels, increases in the rate of inflation and uncertainty in the U.S. economy, these conditions have contributed to decreased demand for housing, declining sales prices and increasing pricing pressure. In the event that these economic and business trends continue or decline further, we could experience declines in the market value of our inventory and demand for our homes, which could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

The health of the residential homebuilding industry may also be significantly affected by “shadow inventory” levels. “Shadow inventory” refers to the number of homes with a mortgage that are in some form of distress but that have not yet been listed for sale. Shadow inventory can occur when lenders put properties that have been foreclosed or forfeited to lenders on the market gradually, rather than all at once, or delay the foreclosure process. They may choose to do so because of regulations and foreclosure moratoriums, because of the additional costs and resources required to process and sell foreclosed properties, or because they want to

avoid depressing housing prices further by putting many distressed properties up for sale at the same time. A significant shadow inventory in our markets could, were it to be released into our markets, adversely impact home prices and demand for our homes, which could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

In addition, an important segment of our customer base consists of first time and second time “move-up” buyers, who often purchase homes subject to contingencies related to the sale of their existing homes. The difficulties facing these buyers in selling their homes during recessionary periods may adversely affect our sales. Moreover, during such periods, we may need to reduce our sales prices and offer greater incentives to buyers to compete for sales that may result in reduced margins.

Our geographic concentration could materially and adversely affect us if the homebuilding industry in our current markets should decline.

Our business strategy is focused on the design, construction and sale of innovative single-family detached and attached homes in major metropolitan areas in California and Colorado, as well as the eventual entry into other geographic markets. In Southern California, we principally operate in the counties of Los Angeles, Orange, San Diego, Ventura and Riverside-San Bernardino, and in Northern California, we principally operate in the counties of Contra Costa, Santa Clara, San Mateo, Solano, San Joaquin and Alameda. In Colorado, we principally operate in the counties of Douglas, Denver and Jefferson. Because our operations are concentrated in these areas, a prolonged economic downturn in one or more of these areas, particularly within California, could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations, and a disproportionately greater impact on us than other homebuilders with more diversified operations. For the year ended December 31, 2013, we generated a significant amount of our revenues and profits in California. During the downturn from 2008 to 2010, land values, the demand for new homes and home prices declined substantially in California. In addition, the state of California is experiencing severe budget shortfalls and is considering raising taxes and increasing fees to offset the deficit. If these conditions in California persist or worsen, it could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

Because most of our homebuyers finance the purchase of their homes, the terms and availability of mortgage financing can affect the demand for and the ability to complete the purchase of a home, which could materially and adversely affect us.

Our business depends on the ability of our homebuyers to obtain financing for the purchase of their homes. Many of our homebuyers must sell their existing homes in order to buy a home from us. Since 2009, the U.S. residential mortgage market as a whole has experienced significant instability due to, among other things, defaults on subprime and other loans, resulting in the declining market value of such loans. In light of these developments, lenders, investors, regulators and other third parties questioned the adequacy of lending standards and other credit requirements for several loan programs made available to borrowers in recent years. This has led to tightened credit requirements and an increase in indemnity claims for mortgages. Deterioration in credit quality among subprime and other nonconforming loans has caused most lenders to eliminate subprime mortgages and most other loan products that do not conform to Federal National Mortgage Association (“Fannie Mae”), Federal Home Loan Mortgage Corporation (“Freddie Mac”), Federal Housing Administration (the “FHA”) or Veterans Administration (the “VA”) standards. Fewer loan products and tighter loan qualifications, in turn, make it more difficult for a borrower to finance the purchase of a new home or the purchase of an existing home from a potential “move-up” buyer who wishes to purchase one of our homes. In general, these developments have delayed any general improvement in the housing market. If our potential homebuyers or the buyers of our homebuyers’ existing homes cannot obtain suitable financing, our business, prospects, liquidity, financial condition and results of operations could be materially and adversely affected.

Interest rate increases or changes in federal lending programs or other regulations could lower demand for our homes, which could materially and adversely affect us.

Substantially all purchasers of our homes finance their acquisitions with mortgage financing. Rising interest rates, decreased availability of mortgage financing or of certain mortgage programs, higher down payment requirements or increased monthly mortgage costs may lead to reduced demand for our homes and mortgage loans. Increased interest rates can also hinder our ability to realize our backlog because our home purchase contracts provide customers with a financing contingency. Financing contingencies allow customers to cancel their home purchase contracts in the event that they cannot arrange for adequate financing. As a result, rising interest rates can decrease our home sales and mortgage originations. Any of these factors could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

In addition, as a result of the turbulence in the credit markets and mortgage finance industry, the federal government has taken on a significant role in supporting mortgage lending through its conservatorship of Fannie Mae and Freddie Mac, both of which purchase home mortgages and mortgage-backed securities originated by mortgage lenders, and its insurance of mortgages originated by lenders through the FHA and the VA. The availability and affordability of mortgage loans, including consumer interest rates for such loans, could be adversely affected by a curtailment or cessation of the federal government's mortgage-related programs or policies. The FHA may continue to impose stricter loan qualification standards, raise minimum down payment requirements, impose higher mortgage insurance premiums and other costs, and/or limit the number of mortgages it insures. Due to growing federal budget deficits, the U.S. Treasury may not be able to continue supporting the mortgage-related activities of Fannie Mae, Freddie Mac, the FHA and the VA at present levels, or it may revise significantly the federal government's participation in and support of the residential mortgage market. Because the availability of Fannie Mae, Freddie Mac, FHA- and VA-backed mortgage financing is an important factor in marketing and selling many of our homes, any limitations, restrictions or changes in the availability of such government-backed financing could reduce our home sales, which could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

Furthermore, in July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act was signed into law. This legislation provides for a number of new requirements relating to residential mortgages and mortgage lending practices, many of which are to be developed further by implementing rules. These include, among others, minimum standards for mortgages and lender practices in making mortgages, limitations on certain fees and incentive arrangements, retention of credit risk and remedies for borrowers in foreclosure proceedings. The effect of such provisions on lending institutions will depend on the rules that are ultimately enacted. However, these requirements, as and when implemented, are expected to reduce the availability of loans to borrowers and/or increase the costs to borrowers to obtain such loans. Any such reduction could result in a decline of our home sales, which could materially and adversely affect us.

Any limitation on, or reduction or elimination of, tax benefits associated with owning a home would have an adverse effect upon the demand for our home products, which could be material to our business.

Changes in federal income tax laws may affect demand for new homes. Current tax laws generally permit significant expenses associated with owning a home, primarily mortgage interest expense and real estate taxes, to be deducted for the purpose of calculating an individual's federal, and in many cases, state, taxable income. Various proposals have been publicly discussed to limit mortgage interest deductions and to limit the exclusion of gain from the sale of a principal residence. If such proposals were enacted without offsetting provisions, the after-tax cost of owning a new home would increase for many of our potential customers. Enactment of any such proposal may have an adverse effect on the homebuilding industry in general, as the loss or reduction of homeowner tax deductions could decrease the demand for new homes.

Difficulty in obtaining sufficient capital could result in an inability to acquire land for our developments or increased costs and delays in the completion of development projects.

The homebuilding industry is capital-intensive and requires significant up-front expenditures to acquire land parcels and begin development. If internally generated funds are not sufficient, we may seek additional capital in the form of equity or debt financing from a variety of potential sources, including additional bank financings and/or securities offerings. The availability of borrowed funds, especially for land acquisition and construction financing, may be greatly reduced nationally, and the lending community may require increased amounts of equity to be invested in a project by borrowers in connection with both new loans and the extension of existing loans. The credit and capital markets have recently experienced significant volatility. If we are required to seek additional financing to fund our operations, continued volatility in these markets may restrict our flexibility to access such financing. If we are not successful in obtaining sufficient capital to fund our planned capital and other expenditures, we may be unable to acquire land for our housing developments and/or to develop the housing. Additionally, if we cannot obtain additional financing to fund the purchase of land under our option contracts or purchase contracts, we may incur contractual penalties and fees. Any difficulty in obtaining sufficient capital for planned development expenditures could also cause project delays and any such delay could result in cost increases. Any one or more of the foregoing events could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

We face potentially substantial risk with respect to our land and lot inventory.

We intend to acquire land parcels for replacement and expansion of land inventory within our current and any new markets. The risks inherent in purchasing and developing land parcels increase as consumer demand for housing decreases. As a result, we may buy and develop land parcels on which homes cannot be profitably built and sold. The market value of land parcels, building lots and housing inventories can fluctuate significantly as a result of changing market conditions, and the measures we employ to manage inventory risk may not be adequate to insulate our operations from a severe drop in inventory values. When market conditions are such that land values are not appreciating, previously entered into option agreements may become less desirable, at which time we may elect to forego deposits and pre-acquisition costs and terminate the agreements. In addition, inventory carrying costs can be significant and can result in losses in a poorly performing project or market. In the event of significant changes in economic or market conditions, we may have to sell homes at significantly lower margins or at a loss, if we are able to sell them at all.

Adverse weather, wildfires and geological conditions may increase costs, cause project delays and reduce consumer demand for housing, all of which could materially and adversely affect us.

As a homebuilder, we are subject to numerous risks, many of which are beyond our management's control, such as droughts, floods, wildfires, landslides, soil subsidence, earthquakes and other weather-related and geologic events which could damage projects, cause delays in completion of projects, or reduce consumer demand for housing, and shortages in labor or raw materials, which could delay project completion and cause increases in the prices for labor or raw materials, thereby affecting our sales and profitability. Areas in California have historically experienced significant earthquake activity and seasonal wildfires. Areas in Colorado have also been subjected to seasonal wildfires and soil subsidence. In addition to directly damaging our projects, earthquakes, wildfires, floods or other geologic events could damage roads and highways providing access to our projects, thereby adversely affecting our ability to market homes in those areas and possibly increasing the costs of completion.

Certain of the areas in which we operate, particularly in California, have experienced drought conditions from time to time. The Governor of California recently proclaimed a Drought State of Emergency warning that drought conditions may place drinking water supplies at risk in many California communities; negatively impact the state's economy and environment; and increase greatly the risk of wildfires across the state. These conditions may cause us to incur additional costs and we may not be able to complete construction on a timely basis if they were to continue for an extended period of time.

There are some risks of loss for which we may be unable to purchase insurance coverage. For example, losses associated with landslides, earthquakes and other geologic events may not be insurable and other losses, such as those arising from terrorism, may not be economically insurable. A sizeable uninsured loss could materially and adversely affect our business, prospects, liquidity, financial condition and results of operations.

Our business and results of operations are dependent on the availability and skill of subcontractors.

Substantially all of our construction work is done by third-party subcontractors with us acting as the general contractor. Accordingly, the timing and quality of our construction depend on the availability and skill of our subcontractors. While we anticipate being able to obtain sufficient materials and reliable subcontractors during times of material shortages and believe that our relationships with subcontractors are good, we do not have long-term contractual commitments with any subcontractors, and there can be no assurance that skilled subcontractors will continue to be available at reasonable rates and in the areas in which we conduct our operations. Certain of the subcontractors engaged by us are represented by labor unions or are subject to collective bargaining arrangements. A strike or other work stoppage involving any of our subcontractors could also make it difficult for us to retain subcontractors for our construction work. In addition, union activity could result in higher costs to retain our subcontractors. The inability to contract with skilled subcontractors at reasonable costs on a timely basis could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

In addition, despite our quality control efforts, we may discover that our subcontractors were engaging in improper construction practices or installing defective materials in our homes. When we discover these issues, we, generally through our subcontractors, repair the homes in accordance with our new home warranty and as required by law. We reserve up to 1.0% of the sales price of each home we sell to provide the customer service to our homebuyers. These reserves are established based on market practices, our historical experiences, and our judgment of the qualitative risks associated with the types of homes built. However, the cost of satisfying our warranty and other legal obligations in these instances may be significantly higher than our warranty reserves, and we may be unable to recover the cost of repair from such subcontractors. Regardless of the steps we take, we can in some instances be subject to fines or other penalties, and our reputation may be injured.

Labor and raw material shortages and price fluctuations could delay or increase the cost of home construction, which could materially and adversely affect us.

The residential construction industry experiences serious labor and raw material shortages from time to time, including shortages in qualified tradespeople, and supplies of insulation, drywall, cement, steel and lumber. These labor and raw material shortages can be more severe during periods of strong demand for housing or during periods where the regions in which we operate experience natural disasters that have a significant impact on existing residential and commercial structures. The cost of labor and raw materials may also be adversely affected during periods of shortage or high inflation. During the recent economic downturn, a large number of qualified tradespeople went out of business or otherwise exited the market. A reduction in available tradespeople will likely exacerbate labor shortages when demand for new housing increases. Shortages and price increases could cause delays in and increase our costs of home construction, which in turn could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

Utility shortages or price increases could have an adverse impact on operations.

Certain of the areas in which we operate, particularly in California, have experienced power shortages, including mandatory periods without electrical power, as well as significant increases in utility costs. We may incur additional costs and may not be able to complete construction on a timely basis if such power shortages and utility rate increases continue. In addition, power shortages and rate increases may adversely affect the local economies in which we operate, which may reduce demand for housing in our markets. Our operations may be adversely impacted if further rate increases and/or power shortages occur.

New and existing laws and regulations or other governmental actions may increase our expenses, limit the number of homes that we can build or delay completion of our projects.

We are subject to numerous local, state, federal and other statutes, ordinances, rules and regulations concerning zoning, development, building design, construction and similar matters which impose restrictive zoning and density requirements, the result of which is to limit the number of homes that can be built within the boundaries of a particular area. Projects that are not entitled may be subjected to periodic delays, changes in use, less intensive development or elimination of development in certain specific areas due to government regulations. We may also be subject to periodic delays or may be precluded entirely from developing in certain communities due to building moratoriums or “slow-growth” or “no-growth” initiatives that could be implemented in the future. Local governments also have broad discretion regarding the imposition of development fees and exactions for projects in their jurisdiction. Projects for which we have received land use and development entitlements or approvals may still require a variety of other governmental approvals and permits during the development process and can also be impacted adversely by unforeseen health, safety and welfare issues, which can further delay these projects or prevent their development. As a result, home sales could decline and costs increase, which could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

We may be unable to obtain suitable bonding for the development of our housing projects.

We are often required to provide bonds to governmental authorities and others to ensure the completion of our projects. As a result of market conditions, surety providers have been reluctant to issue new bonds and some providers are requesting credit enhancements (such as cash deposits or letters of credit) in order to maintain existing bonds or to issue new bonds. If we are unable to obtain required bonds in the future for our projects, or if we are required to provide credit enhancements with respect to our current or future bonds, our business, prospects, liquidity, financial condition and results of operations could be materially and adversely affected.

We are subject to environmental laws and regulations, which may increase our costs, limit the areas in which we can build homes and delay completion of our projects.

We are subject to a variety of local, state, federal and other statutes, ordinances, rules and regulations concerning the environment. The particular environmental laws which apply to any given homebuilding site vary according to multiple factors, including the site’s location, its environmental conditions and the present and former uses of the site, as well as adjoining properties. Environmental laws and conditions may result in delays, may cause us to incur substantial compliance and other costs, and can prohibit or severely restrict homebuilding activity in environmentally sensitive regions or areas. In addition, in those cases where an endangered or threatened species is involved, environmental rules and regulations can result in the restriction or elimination of development in identified environmentally sensitive areas. From time to time, the United States Environmental Protection Agency and similar federal or state agencies review homebuilders’ compliance with environmental laws and may levy fines and penalties for failure to strictly comply with applicable environmental laws or impose additional requirements for future compliance as a result of past failures. Any such actions taken with respect to us may increase our costs. Further, we expect that increasingly stringent requirements will be imposed on homebuilders in the future. Environmental regulations can also have an adverse impact on the availability and price of certain raw materials such as lumber. California is especially susceptible to restrictive government regulations and environmental laws.

Under various environmental laws, current or former owners of real estate, as well as certain other categories of parties, may be required to investigate and clean up hazardous or toxic substances or petroleum product releases, and may be held liable to a governmental entity or to third parties for related damages, including for bodily injury, and for investigation and clean-up costs incurred by such parties in connection with the contamination. A mitigation system may be installed during the construction of a home if a cleanup does not remove all contaminants of concern or to address a naturally occurring condition such as methane. Some buyers may not want to purchase a home with a mitigation system.

We may not be able to compete effectively against competitors in the homebuilding industry.

Competition in the homebuilding industry is intense, and there are relatively low barriers to entry into our business. Homebuilders compete for, among other things, home buying customers, desirable land parcels, financing, raw materials and skilled labor. Increased competition could hurt our business, as it could prevent us from acquiring attractive land parcels on which to build homes or make such acquisitions more expensive, hinder our market share expansion, and lead to pricing pressures on our homes that may adversely impact our margins and revenues. If we are unable to successfully compete, our business, prospects, liquidity, financial condition and results of operations could be materially and adversely affected. Our competitors may independently develop land and construct housing units that are superior or substantially similar to our products. Furthermore, a number of our primary competitors are significantly larger, have a longer operating history and may have greater resources or lower cost of capital than ours; accordingly, they may be able to compete more effectively in one or more of the markets in which we operate. Many of these competitors also have longstanding relationships with subcontractors and suppliers in the markets in which we operate. We also compete for sales with individual resales of existing homes and with available rental housing.

Increases in our cancellation rate could have a negative impact on our home sales revenue and homebuilding margins.

The cancellation rate of buyers for our owned projects who contracted to buy a home but did not close escrow (as a percentage of overall orders) was approximately 10% and 16% during the years ended December 31, 2013 and 2012, respectively. Home order cancellations negatively impact the number of closed homes, net new home orders, home sales revenue and results of operations, as well as the number of homes in backlog. Home order cancellations can result from a number of factors, including declines or slow appreciation in the market value of homes, increases in the supply of homes available to be purchased, increased competition, higher mortgage interest rates, homebuyers' inability to sell their existing homes, homebuyers' inability to obtain suitable financing, including providing sufficient down payments, and adverse changes in economic conditions. Upon a home order cancellation, the homebuyer's escrow deposit is returned to the homebuyer (other than with respect to certain design-related deposits, which we retain). An increase in the level of our home order cancellations could have a negative impact on our business, prospects, liquidity, financial condition and results of operations.

We are subject to product liability and warranty claims arising in the ordinary course of business.

As a homebuilder, we are subject to construction defect, product liability and home warranty claims, including moisture intrusion and related claims, arising in the ordinary course of business. While we maintain general liability insurance and generally seek to require our subcontractors and design professionals to indemnify us for some portion of the liabilities arising from their work, there can be no assurance that these insurance rights and indemnities will be collectable or adequate to cover any or all construction defect and warranty claims for which we may be liable. For example, contractual indemnities can be difficult to enforce, we are often responsible for applicable self-insured retentions (particularly in markets where we include our subcontractors on our general liability insurance and our ability to seek indemnity for insured claims is significantly limited), certain claims may not be covered by insurance or may exceed applicable coverage limits, and one or more of our insurance carriers could become insolvent. Additionally, in the event we determine to obtain product liability insurance, the coverage offered by and availability of such insurance for construction defects is limited and costly. There can be no assurance that coverage will not be further restricted, become more costly or even be available. Furthermore, any product liability or warranty claims made against us, whether or not they are viable, may lead to negative publicity, which could impact our reputation and our home sales.

In addition, we conduct the substantial portion of our business in California, one of the most highly regulated and litigious jurisdictions in the United States, which imposes a ten year, strict liability tail on many construction liability claims. As a result, our potential losses and expenses due to litigation, new laws and regulations may be greater than those of our competitors who have smaller California operations.

Our operating performance is subject to risks associated with the real estate industry.

Real estate investments are subject to various risks and fluctuations and cycles in value and demand, many of which are beyond our control. Certain events may decrease cash available for operations, as well as the value of our real estate assets. These events include, but are not limited to:

- adverse changes in international, national or local economic and demographic conditions;
- adverse changes in financial conditions of buyers and sellers of properties, particularly residential homes and land suitable for development of residential homes;
- competition from other real estate investors with significant capital, including other real estate operating companies and developers and institutional investment funds;
- reductions in the level of demand for and increases in the supply of land suitable for development;
- fluctuations in interest rates, which could adversely affect our ability, or the ability of homebuyers, to obtain financing on favorable terms or at all;
- unanticipated increases in expenses, including, without limitation, insurance costs, development costs, real estate assessments and other taxes and costs of compliance with laws, regulations and governmental policies; and
- changes in enforcement of laws, regulations and governmental policies, including, without limitation, health, safety, environmental, zoning and tax laws, governmental fiscal policies and the Americans with Disabilities Act of 1990.

In addition, periods of economic slowdown or recession, rising interest rates or declining demand for real estate, or the public perception that any of these events may occur, could result in a general decline in the purchase of homes or an increased incidence of home order cancellations. If we cannot successfully implement our business strategy, our business, prospects, liquidity, financial condition and results of operations will be adversely affected.

Because real estate investments are relatively illiquid, our ability to promptly sell one or more properties for reasonable prices in response to changing economic, financial and investment conditions may be limited and we may be forced to hold non-income producing properties for extended periods of time.

Real estate investments are relatively difficult to sell quickly. As a result, our ability to promptly sell one or more properties in response to changing economic, financial and investment conditions is limited and we may be forced to hold non-income producing assets for an extended period of time. We cannot predict whether we will be able to sell any property for the price or on the terms that we set or whether any price or other terms offered by a prospective purchaser would be acceptable to us. We also cannot predict the length of time needed to find a willing purchaser and to close the sale of a property.

Fluctuations in real estate values may require us to write-down the book value of our real estate assets.

The homebuilding industry is subject to significant variability and fluctuations in real estate values. As a result, we may be required to write-down the book value of our real estate assets in accordance with U.S. generally accepted accounting principles (“GAAP”), and some of those write-downs could be material. Any material write-downs of assets could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

Inflation could adversely affect our business and financial results.

Inflation could adversely affect us by increasing the costs of land, raw materials and labor needed to operate our business. If the market continues to have an oversupply of homes relative to demand, we may be unable to offset any such increases in costs with corresponding higher sales prices for our homes. Inflation may also

accompany higher interest rates, which could adversely impact potential customers' ability to obtain financing on favorable terms, thereby further decreasing demand. If we are unable to raise the prices of our homes to offset the increasing costs of our operations, our margins could decrease. Furthermore, if we need to lower the price of our homes to meet demand, the value of our land inventory may decrease. Inflation may also raise our costs of capital and decrease our purchasing power, making it more difficult to maintain sufficient funds to operate our business.

Acts of war or terrorism may seriously harm our business.

Acts of war, any outbreak or escalation of hostilities between the United States and any foreign power or acts of terrorism may cause disruption to the U.S. economy, or the local economies of the markets in which we operate, cause shortages of building materials, increase costs associated with obtaining building materials, result in building code changes that could increase costs of construction, affect job growth and consumer confidence, or cause economic changes that we cannot anticipate, all of which could reduce demand for our homes and adversely impact our business, prospects, liquidity, financial condition and results of operations.

Risks Related to Conflicts of Interest

The Starwood Fund holds a significant equity interest in our company and its interests may not be aligned with yours.

The Starwood Fund owns 11,985,905 shares of our common stock, which represents 37.9% of our common stock as of February 21, 2014. The Starwood Fund is managed by an affiliate of Starwood Capital Group. The Starwood Fund has the right to designate two members of our board for as long as the Starwood Fund owns 25% or more of our outstanding common stock (excluding shares of common stock that are subject to issuance upon the exercise or exchange of rights of conversion or any options, warrants or other rights to acquire shares) and one member for as long as it owns at least 10%. Messrs. Bauer, Mitchell and Grubbs have agreed to vote all shares of our common stock that they own in favor of the Starwood Fund nominees in any election of directors for as long as the Starwood Fund owns at least 10%. Following consummation of the WRECO Transactions, the Starwood Fund will have the right to designate one member of our board of directors for so long as the Starwood Fund owns at least 5% of our outstanding common stock. The Starwood Fund's interests may not be fully aligned with yours and this could lead to a strategy that is not in your best interests. In addition, the Starwood Fund's significant ownership in us and resulting ability to significantly influence us may discourage someone from making a significant equity investment in us, or could discourage transactions involving a change in control, including transactions in which you as a holder of shares of our common stock might otherwise receive a premium for your shares over the then-current market price.

Moreover, if the Starwood Fund's beneficial ownership of our common stock were to exceed 50%, we may elect to be treated as a "controlled company" for purposes of the New York Stock Exchange, which would allow us to opt out of certain corporate governance requirements, including requirements that a majority of the board of directors consist of independent directors and that the compensation committee and nominating committee be composed entirely of independent directors. We do not currently qualify to rely on the controlled company exemptions; however, to the extent we may qualify in the future, we may choose to take advantage of these exemptions.

As a result of Starwood Capital Group's relationship with our company, conflicts of interest may arise with respect to any transactions involving or with Starwood Capital Group or its affiliates.

Barry Sternlicht, the chairman of our board, is the Chairman and Chief Executive Officer of Starwood Capital Group. As a result of our relationship with Starwood Capital Group, there may be transactions between us and Starwood Capital Group that could present an actual or perceived conflict of interest. These conflicts of interest may lead Mr. Sternlicht to recuse himself from actions of our board of directors with respect to any transactions involving or with Starwood Capital Group or its affiliates, or with Starwood Property Trust, Inc., a

New York Stock Exchange-listed public mortgage REIT managed by an affiliate of Starwood Capital Group. In addition, Mr. Sternlicht will devote only a portion of his business time to his duties with our board of directors, and he will devote the majority of his time to his duties with Starwood Capital Group and other commitments. Following consummation of the WRECO Transactions, Mr. Sternlicht is expected to continue as chairman of our board of directors and Mr. Chris Graham, a Senior Managing Director at Starwood Capital Group, is expected to be appointed a director.

We may in the future acquire land from affiliates of Starwood Capital Group. Any such acquisitions will be separately considered for approval by our independent directors.

We have no contractual right to access the personnel, relationships or the investing and operational expertise of Starwood Capital Group, which may be withheld from us at any time, and we are likely to lose such access if and when the Starwood Fund ceases to hold a material investment in our company. Starwood Capital Group may pursue competing transactions.

We believe that our relationship with Starwood Capital Group provides us with a competitive advantage by providing us with access to the personnel, relationships and the investing and operational expertise of Starwood Capital Group. However, we have not entered into, nor do we anticipate entering into, any exclusivity agreements with Starwood Capital Group, and we have no contractual right to access Starwood Capital Group's personnel, relationships or expertise. Starwood Capital Group may cease to provide us with access to its personnel, relationships and expertise at any time, or from time to time, and we are likely to lose such access if and when the Starwood Fund ceases to hold a material investment in our company. Our inability to access Starwood Capital Group's personnel, relationships or expertise as we currently expect, or the loss of such access in the future, could materially and adversely affect our business, prospects, liquidity, financial condition and results of operations. For example, we believe that our relationship with Starwood Capital Group provides us with access to a greater number of acquisition opportunities than our competitors, and if we do not have access to those opportunities as we currently expect, our ability to grow could be significantly limited, and the number of homes that we build and sell could be materially lower than what we currently anticipate.

In addition, Starwood Capital Group is under no obligation to engage in any transactions with us, to present any acquisition opportunities to us or to assist us in any way in acquiring land parcels. As a result, Starwood Capital Group may pursue transactions that are competitive with our business, including engaging in acquisitions and/or sales of land and other residential properties for its own benefit, or for the benefit of entities that its affiliates manage, with third parties. In addition, Starwood Capital Group may sell land suitable for residential buildout in our current or target markets to our competitors. Any of the foregoing activities by Starwood Capital Group could materially and adversely affect our business, prospects, liquidity, financial condition and results of operations.

Although we do not pay any fees to Starwood Capital Group or its affiliates, we have reimbursed Starwood Capital Group for certain due diligence expenses, and for the out-of-pocket travel and lodging expenses of representatives of the Starwood Fund for their attendance at board and other meetings and in connection with site visits or other business of our company. We reimbursed Starwood Capital Group \$0, \$4,166 and \$79,464 during the years ended December 31, 2013, 2012 and 2011, respectively.

The employment agreements of our executive officers were not negotiated on an arm's length basis and we may choose not to enforce, or to enforce less vigorously, our rights under these agreements because of our desire to maintain our ongoing relationship with them.

We have entered into amended and restated employment agreements with Douglas Bauer, our Chief Executive Officer, Thomas Mitchell, our President and Chief Operating Officer, and Michael Grubbs, our Chief Financial Officer, pursuant to which they will devote their full business time and attention to our affairs. See Part III, Item 11 "Executive Compensation" of this annual report on Form 10-K. These employment agreements were not negotiated on an arm's-length basis. We may choose not to enforce, or to enforce less vigorously, our rights under these agreements because of our desire to maintain our ongoing relationship with these executives.

Risks Related to Our Indebtedness

We expect to use leverage in executing our business strategy, which may adversely affect the return on our assets.

We expect to employ prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. As of December 31, 2013, we had approximately \$270.6 million of aggregate loan commitments, of which \$138.1 million was outstanding. Our board of directors will consider a number of factors when evaluating our level of indebtedness and when making decisions regarding the incurrence of new indebtedness, including the purchase price of assets to be acquired with debt financing, the estimated market value of our assets and the ability of particular assets, and our company as a whole, to generate cash flow to cover the expected debt service. As a means of sustaining our long-term financial health and limiting our exposure to unforeseen dislocations in the debt and financing markets, we currently expect to remain conservatively capitalized. However, our charter does not contain a limitation on the amount of debt we may incur and our board of directors may change our target debt levels at any time without the approval of our stockholders.

Incurring substantial debt could subject us to many risks that, if realized, would adversely affect us, including the risk that:

- our cash flow from operations may be insufficient to make required payments of principal of and interest on the debt which is likely to result in acceleration of such debt;
- our debt may increase our vulnerability to adverse economic and industry conditions with no assurance that investment yields will increase with higher financing cost;
- we may be required to dedicate a portion of our cash flow from operations to payments on our debt, thereby reducing funds available for operations and capital expenditures, future investment opportunities or other purposes; and
- the terms of any refinancing may not be as favorable as the terms of the debt being refinanced.

If we do not have sufficient funds to repay our debt at maturity, it may be necessary to refinance the debt through additional debt or additional equity financings. If, at the time of any refinancing, prevailing interest rates or other factors result in higher interest rates on refinancings, increases in interest expense could adversely affect our cash flows and results of operations. If we are unable to refinance our debt on acceptable terms, we may be forced to dispose of our assets on disadvantageous terms, potentially resulting in losses. To the extent we cannot meet any future debt service obligations, we will risk losing some or all of our assets that may be pledged to secure our obligations to foreclosure. Unsecured debt agreements may contain specific cross-default provisions with respect to specified other indebtedness, giving the unsecured lenders the right to declare a default if we are in default under other loans in some circumstances. Defaults under our debt agreements could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

Access to financing sources may not be available on favorable terms, or at all, especially in light of current market conditions, which could adversely affect our ability to maximize our returns.

We expect to employ prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. As of December 31, 2013, we had approximately \$270.6 million of aggregate loan commitments, of which \$138.1 million was outstanding. Our access to additional third-party sources of financing will depend, in part, on:

- general market conditions;
- the market's perception of our growth potential;
- with respect to acquisition and/or development financing, the market's perception of the value of the land parcels to be acquired and/or developed;
- our current debt levels;

- our current and expected future earnings;
- our cash flow; and
- the market price per share of our common stock.

Recently, domestic financial markets have experienced unusual volatility, uncertainty and a tightening of liquidity in both the investment grade debt and equity capital markets. Credit spreads for major sources of capital widened significantly during the U.S. credit crisis as investors demanded a higher risk premium. Given the current volatility and weakness in the capital and credit markets, potential lenders may be unwilling or unable to provide us with financing that is attractive to us or may charge us prohibitively high fees in order to obtain financing. Consequently, there is greater uncertainty regarding our ability to access the credit market in order to attract financing on reasonable terms. Investment returns on our assets and our ability to make acquisitions could be adversely affected by our inability to secure additional financing on reasonable terms, if at all.

Depending on market conditions at the relevant time, we may have to rely more heavily on additional equity financings or on less efficient forms of debt financing that require a larger portion of our cash flow from operations, thereby reducing funds available for our operations, future business opportunities and other purposes. We may not have access to such equity or debt capital on favorable terms at the desired times, or at all.

Our current financing arrangements contain, and our future financing arrangements likely will contain, restrictive covenants relating to our operations.

Our current financing arrangements contain, and the financing arrangements we enter into in the future likely will contain, covenants (financial and otherwise) affecting our ability to incur additional debt, make certain investments, reduce liquidity below certain levels, make distributions to our stockholders and otherwise affect our operating policies. If we fail to meet or satisfy any of these covenants in our debt agreements, we would be in default under these agreements, which could result in a cross-default under other debt agreements, and our lenders could elect to declare outstanding amounts due and payable, terminate their commitments, require the posting of additional collateral and enforce their respective interests against existing collateral. A default also could limit significantly our financing alternatives, which could cause us to curtail our investment activities and/or dispose of assets when we otherwise would not choose to do so. If we default on several of our debt agreements or any single significant debt agreement, it could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

Secured indebtedness exposes us to the possibility of foreclosure on our ownership interests in our land parcels.

Incurring mortgage and other secured indebtedness increases our risk of loss of our ownership interests in our land parcels or other assets because defaults thereunder, and the inability to refinance such indebtedness, may result in foreclosure action initiated by lenders.

Interest expense on debt we incur may limit our cash available to fund our growth strategies.

As of December 31, 2013, we had approximately \$270.6 million of aggregate loan commitments, of which \$138.1 million was outstanding. As part of our financing strategy, we may incur a significant amount of additional debt. Our current debt has, and any additional debt we subsequently incur may have, a floating rate of interest. Higher interest rates could increase debt service requirements on our current floating rate debt and on any floating rate debt we subsequently incur, and could reduce funds available for operations, future business opportunities or other purposes. If we need to repay existing debt during periods of rising interest rates, we could be required to refinance our then-existing debt on unfavorable terms or liquidate one or more of our assets to repay such debt at times which may not permit realization of the maximum return on such assets and could result in a loss. The occurrence of either such event or both could materially and adversely affect our cash flows and results of operations.

Failure to hedge effectively against interest rate changes may adversely affect us.

We may obtain in the future one or more forms of interest rate protection—in the form of swap agreements, interest rate cap contracts or similar agreements—to hedge against the possible negative effects of interest rate fluctuations. However, we cannot assure you that any hedging will adequately relieve the adverse effects of interest rate increases or that counterparties under these agreements will honor their obligations thereunder. In addition, we may be subject to risks of default by hedging counterparties. Adverse economic conditions could also cause the terms on which we borrow to be unfavorable. We could be required to liquidate one or more of our assets at times which may not permit us to receive an attractive return on our assets in order to meet our debt service obligations.

Risks Related to Our Organization and Structure

We have a limited operating history and we may not be able to successfully operate our business.

Our company was founded in April 2009 and initially focused primarily on fee building projects in Southern California, in which we built, marketed and sold homes for independent third-party property owners, typically markets under the TRI Pointe Homes brand name. Commencing with the investment in us by the Starwood Fund in September 2010, our business was converted into a Delaware limited liability company, TRI Pointe Homes, LLC, and evolved into primarily building, marketing and selling homes for our own account. On January 30, 2013, TRI Pointe Homes, LLC was converted from a Delaware limited liability company into a Delaware corporation and renamed TRI Pointe Homes, Inc. Given our limited operating history, you have little historical information upon which to evaluate our prospects, including our ability to acquire desirable land parcels, develop such land and market our homes. In addition, we cannot assure you that our past experience will be sufficient to enable us to operate our business successfully or implement our operating policies and business strategies as described in this annual report on Form 10-K. Furthermore, we may not be able to generate sufficient operating cash flows to pay our operating expenses or service our indebtedness. You should not rely upon the past performance of our management team, as past performance may not be indicative of our future results.

We depend on key personnel.

Our success depends to a significant degree upon the contributions of certain key personnel including, but not limited to, Douglas Bauer, our Chief Executive Officer, Thomas Mitchell, our President and Chief Operating Officer, and Michael Grubbs, our Chief Financial Officer, each of whom would be difficult to replace. Although we have entered into amended and restated employment agreements with Messrs. Bauer, Mitchell and Grubbs, there is no guarantee that these executives will remain employed with us and we have not adopted a succession plan. If any of our key personnel were to cease employment with us, our operating results could suffer. Our ability to retain our key personnel or to attract suitable replacements should any members of our management team leave is dependent on the competitive nature of the employment market. The loss of services from key personnel or a limitation in their availability could materially and adversely impact our business, prospects, liquidity, financial condition and results of operations. Further, such a loss could be negatively perceived in the capital markets.

Termination of the employment agreements with the members of our management team could be costly and prevent a change in control of our company.

Our amended and restated employment agreements with Douglas Bauer, our Chief Executive Officer, Thomas Mitchell, our President and Chief Operating Officer, and Michael Grubbs, our Chief Financial Officer, each provide that if their employment with us terminates under certain circumstances, we may be required to pay them significant amounts of severance compensation, thereby making it costly to terminate their employment. Furthermore, these provisions could delay or prevent a transaction or a change in control of our company that might involve a premium paid for shares of our common stock or otherwise be in the best interests of our stockholders, which could adversely affect the market price of our common stock.

Certain anti-takeover defenses and applicable law may limit the ability of a third-party to acquire control of us.

Our charter and bylaws and Delaware law contain provisions that may delay or prevent a transaction or a change in control of our company that might involve a premium paid for shares of our common stock or otherwise be in the best interests of our stockholders, which could adversely affect the market price of our common stock. Certain of these provisions are described below.

Selected provisions of our charter and bylaws.

Our charter and/or bylaws contain anti-takeover provisions that:

- authorize our board of directors, without further action by the stockholders, to issue up to 50,000,000 shares of preferred stock in one or more series, and with respect to each series, to fix the number of shares constituting that series and establish the rights and other terms of that series;
- require that actions to be taken by our stockholders may be taken only at an annual or special meeting of our stockholders and not by written consent;
- specify that special meetings of our stockholders can be called only by our board of directors, the chairman of our board of directors or our chief executive officer;
- establish advance notice procedures for stockholders to submit nominations of candidates for election to our board of directors and other proposals to be brought before a stockholders meeting;
- provide that our bylaws may be amended by our board of directors without stockholder approval;
- allow our directors to establish the size of our board of directors by action of our board, subject to a minimum of three members;
- provide that vacancies on our board of directors or newly created directorships resulting from an increase in the number of our directors may be filled only by a majority of directors then in office, even though less than a quorum;
- do not give the holders of our common stock cumulative voting rights with respect to the election of directors; and
- prohibit us from engaging in certain business combinations with any “interested stockholder” unless specified conditions are satisfied as described below under “—Selected provisions of Delaware law.”

Selected provisions of Delaware law. We have opted out of Section 203 of the Delaware General Corporation Law (the “DGCL”), which regulates corporate takeovers. However, our charter contains provisions that are similar to Section 203 of the DGCL. Specifically, our charter provides that we may not engage in certain “business combinations” with any “interested stockholder” for a three-year period following the time that the person became an interested stockholder, unless:

- prior to the time that person became an interested stockholder, our board of directors approved either the business combination or the transaction which resulted in the person becoming an interested stockholder;
- upon consummation of the transaction which resulted in the person becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, excluding certain shares; or
- at or subsequent to the time the person became an interested stockholder, the business combination is approved by our board of directors and by the affirmative vote of at least 66⅔% of the outstanding voting stock which is not owned by the interested stockholder.

Generally, a business combination includes a merger, consolidation, asset or stock sale or other transaction resulting in a financial benefit to the interested stockholder. Subject to certain exceptions, an interested stockholder is a person who, together with that person’s affiliates and associates, owns, or within the previous

three years owned, 15% or more of our voting stock. However, in the case of our company, the Starwood Fund and any of its affiliates and subsidiaries and any of their permitted transferees receiving 15% or more of our voting stock will not be deemed to be interested stockholders regardless of the percentage of our voting stock owned by them. This provision could prohibit or delay mergers or other takeover or change in control attempts with respect to us and, accordingly, may discourage attempts to acquire us.

We may change our operational policies, investment guidelines and our business and growth strategies without stockholder consent, which may subject us to different and more significant risks in the future.

Our board of directors will determine our operational policies, investment guidelines and our business and growth strategies. Our board of directors may make changes to, or approve transactions that deviate from, those policies, guidelines and strategies without a vote of, or notice to, our stockholders. This could result in us conducting operational matters, making investments or pursuing different business or growth strategies than those contemplated in this annual report on Form 10-K. Under any of these circumstances, we may expose ourselves to different and more significant risks in the future, which could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

If we fail to implement and maintain an effective system of internal controls, we may not be able to accurately determine our financial results or prevent fraud. As a result, our stockholders could lose confidence in our financial results, which could materially and adversely affect us.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. We may in the future discover areas of our internal controls that need improvement. We cannot be certain that we will be successful in implementing or maintaining adequate internal control over our financial reporting and financial processes. Furthermore, as we grow our business, our internal controls will become more complex, and we will require significantly more resources to ensure our internal controls remain effective. Additionally, the existence of any material weakness or significant deficiency would require management to devote significant time and incur significant expense to remediate any such material weaknesses or significant deficiencies and management may not be able to remediate any such material weaknesses or significant deficiencies in a timely manner. The existence of any material weakness in our internal control over financial reporting could also result in errors in our financial statements that could require us to restate our financial statements, cause us to fail to meet our reporting obligations and cause stockholders to lose confidence in our reported financial information, all of which could materially and adversely affect us.

We are an “emerging growth company” and, as a result of the reduced disclosure and governance requirements applicable to emerging growth companies, our common stock may be less attractive to investors.

We are an “emerging growth company,” as defined in the JOBS Act, and we are eligible to take advantage of certain exemptions from various reporting requirements applicable to other public companies but not to emerging growth companies, including, but not limited to, an exemption from the auditor attestation requirement of Section 404 of the Sarbanes-Oxley Act, reduced disclosure about executive compensation arrangements pursuant to the rules applicable to smaller reporting companies and no requirement to seek non-binding advisory votes on executive compensation or golden parachute arrangements. We have elected to adopt these reduced disclosure requirements. We could be an emerging growth company until the last day of the fiscal year following the fifth anniversary of the completion of our initial public offering, although a variety of circumstances could cause us to lose that status earlier. We cannot predict if investors will find our common stock less attractive as a result of our taking advantage of these exemptions. If some investors find our common stock less attractive as a result of our choices, there may be a less active trading market for our common stock and our stock price may be more volatile.

In addition, Section 107 of the JOBS Act provides that an “emerging growth company” can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised financial accounting standards. An emerging growth company can therefore delay the adoption of certain

accounting standards until those standards would otherwise apply to private companies. However, we have determined to opt out of such extended transition period and, as a result, we will comply with new or revised financial accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies. Section 107 of the JOBS Act provides that our decision to opt out of the extended transition period for complying with new or revised financial accounting standards is irrevocable.

The consummation of the WRECO Transactions is expected to cause us to lose our status as an emerging growth company in 2014. Accordingly, we will become subject to additional disclosure, reporting and other obligations, which could place significant demands on our management, administrative, operational and accounting resources and cause us to incur significant expenses. If our independent auditor is unable to provide an unqualified attestation report on internal control over financial reporting, investors could lose confidence in the reliability of our financial statements and our stock price may be adversely affected.

Changes in accounting rules, assumptions and/or judgments could materially and adversely affect us.

Accounting rules and interpretations for certain aspects of our operations are highly complex and involve significant assumptions and judgment. These complexities could lead to a delay in the preparation and dissemination of our financial statements. Furthermore, changes in accounting rules and interpretations or in our accounting assumptions and/or judgments, such as asset impairments, could significantly impact our financial statements. In some cases, we could be required to apply a new or revised standard retroactively, resulting in restating prior period financial statements. Any of these circumstances could have a material adverse effect on our business, prospects, liquidity, financial condition and results of operations.

Any joint venture investments that we make could be adversely affected by our lack of sole decision making authority, our reliance on co-venturers' financial condition and disputes between us and our co-venturers.

We may co-invest in the future with third parties through partnerships, joint ventures or other entities, acquiring non-controlling interests in or sharing responsibility for managing the affairs of a land acquisition and/or a development. In this event, we would not be in a position to exercise sole decision-making authority regarding the acquisition and/or development, and our investment may be illiquid due to our lack of control. Investments in partnerships, joint ventures, or other entities may, under certain circumstances, involve risks not present were a third-party not involved, including the possibility that partners or co-venturers might become bankrupt, fail to fund their share of required capital contributions, make poor business decisions or block or delay necessary decisions. Partners or co-venturers may have economic or other business interests or goals which are inconsistent with our business interests or goals, and may be in a position to take actions contrary to our policies or objectives. Such investments may also have the potential risk of impasses on decisions, such as a sale, because neither we nor the partner or co-venturer would have full control over the partnership or joint venture. Disputes between us and partners or co-venturers may result in litigation or arbitration that would increase our expenses and prevent our officers and/or directors from focusing their time and effort on our business. In addition, we may in certain circumstances be liable for the actions of our third-party partners or co-venturers.

We may become subject to litigation, which could materially and adversely affect us.

In the future we may become subject to litigation, including claims relating to our operations, security offerings and otherwise in the ordinary course of business. Some of these claims may result in significant defense costs and potentially significant judgments against us, some of which are not, or cannot be, insured against. We generally intend to vigorously defend ourselves. However, we cannot be certain of the ultimate outcomes of any claims that may arise in the future. Resolution of these types of matters against us may result in our having to pay significant fines, judgments, or settlements, which, if uninsured, or if the fines, judgments and settlements exceed insured levels, could adversely impact our earnings and cash flows, thereby materially and adversely affecting us. Certain litigation or the resolution of certain litigation may affect the availability or cost of some of our insurance coverage, which could materially and adversely impact us, expose us to increased risks that would be uninsured, and materially and adversely impact our ability to attract directors and officers.

An information systems interruption or breach in security could adversely affect us.

We rely on fully integrated accounting, financial and operational management information systems to conduct our operations. Any disruption in these systems could adversely affect our ability to conduct our business. Furthermore, any security breach of information systems or data could result in a violation of applicable privacy and other laws, significant legal and financial exposure, damage to our reputation, and a loss of confidence in our security measures, which could harm our business.

Failure by our directors, executives or employees to comply with applicable codes of conduct could materially and adversely affect us and the market price of our stock.

We have adopted a Code of Business Conduct and Ethics and a Code of Ethics for senior executives and financial officers. Our adoption of these codes and other standards of conduct is not a representation or warranty that all persons subject to those codes or standards are or will be in complete compliance. The failure of a director, executive or employee to comply with applicable codes or standards of conduct may result in termination of the relationship and/or adverse publicity, either of which could materially and adversely affect us and the market price of our stock.

Risks Related to Ownership of Our Common Stock

A trading market for our common stock may not be sustained and our common stock prices may be volatile and could decline substantially.

Prior to our initial public offering, there was no market for shares of our common stock. Although our common stock is listed on the New York Stock Exchange under the symbol “TPH,” an active trading market for the shares of our common stock may not be sustained. Accordingly, no assurance can be given as to the following:

- the likelihood that an active trading market for shares of our common stock will be sustained;
- the liquidity of any such market;
- the ability of our stockholders to sell their shares of common stock; or
- the price that our stockholders may obtain for their common stock.

If an active market is not maintained, the market price of our common stock may decline. The market price of our common stock may be highly volatile and subject to wide fluctuations. Our financial performance, government regulatory action, tax laws, interest rates and market conditions in general could have a significant impact on the future market price of our common stock.

Some of the factors that could negatively affect or result in fluctuations in the market price of our common stock include:

- actual or anticipated variations in our quarterly operating results;
- changes in market valuations of similar companies;
- adverse market reaction to the level of our indebtedness;
- additions or departures of key personnel;
- actions by stockholders;
- speculation in the press or investment community;
- general market, economic and political conditions, including an economic slowdown or dislocation in the global credit markets;

- our operating performance and the performance of other similar companies;
- changes in accounting principles; and
- passage of legislation or other regulatory developments that adversely affect us or the homebuilding industry.

We do not intend to pay dividends on our common stock for the foreseeable future.

We currently intend to retain our future earnings, if any, to finance the development and expansion of our business and, therefore, do not intend to pay cash dividends on our common stock for the foreseeable future. Any future determination to pay dividends will be at the discretion of our board of directors and will depend on our financial condition, results of operations, capital requirements, restrictions contained in any financing instruments and such other factors as our board of directors deems relevant. Accordingly, you may need to sell your shares of our common stock to realize a return on your investment, and you may not be able to sell your shares at or above the price you paid for them.

Future sales of our common stock or other securities convertible into our common stock could cause the market value of our common stock to decline and could result in dilution of your shares.

Our board of directors is authorized, without your approval, to cause us to issue additional shares of our common stock or to raise capital through the issuance of preferred stock (including equity or debt securities convertible into common stock), options, warrants and other rights, on terms and for consideration as our board of directors in its sole discretion may determine. Sales of substantial amounts of our common stock could cause the market price of our common stock to decrease significantly. We cannot predict the effect, if any, of future sales of our common stock, or the availability of our common stock for future sales, on the value of our common stock. Sales of substantial amounts of our common stock by the Starwood Fund or another large stockholder or otherwise, or the perception that such sales could occur, may adversely affect the market price of our common stock.

As of February 21, 2014, the members of our senior management team collectively beneficially owned 2,242,641 shares of our common stock (excluding grants of restricted stock units and options to purchase shares of our common stock), which represents 7.1% of our common stock outstanding and 1.4% of our common stock outstanding on a pro forma basis after giving effect to the WRECO Transactions. Further, as of February 21, 2014, the Starwood Fund owned 11,985,905 shares of our common stock, which represents 37.9% of our common stock outstanding.

In connection with the WRECO Transactions, 675,876 shares of restricted stock granted to Messrs. Bauer, Mitchell and Grubbs will vest. Messrs. Bauer, Mitchell and Grubbs have entered into a lock-up agreement with the Starwood Fund, pursuant to which Messrs. Bauer, Mitchell and Grubbs have agreed not to sell these shares without the Starwood Fund's prior written consent until the Starwood Fund owns less than 4.875% of our common stock outstanding.

Pursuant to his employment agreement, each member of our management team has agreed that, for a period of 36 months following the completion of our initial public offering, during any calendar quarter, he will not sell shares of our common stock in an amount exceeding the greater of (1) 10% of the shares of our common stock owned by him on the date of the completion of the offering and (2) the percentage of shares of our common stock that has been sold or otherwise disposed of by the Starwood Fund during such calendar quarter. Any sales of shares of our common stock made pursuant to the foregoing will be subject to the restrictions imposed by the lock-up agreements referenced above and by applicable law.

We have entered into a registration rights agreement with the Starwood Fund, the members of our senior management team and a third-party investor (each, a "Holder"), with respect to the shares of our common stock that they received as part of our formation transactions. We refer to these shares collectively as the "registrable

shares.” Pursuant to the registration rights agreement, we have granted the Holders and their direct and indirect transferees shelf registration rights requiring us to file a shelf registration statement and to maintain the effectiveness of such registration statement so as to allow sales thereunder from time to time, demand registration rights to have the registrable shares registered for resale, and, in certain circumstances, the right to “piggy-back” the registrable shares in registration statements we might file in connection with any future public offering.

We have filed a registration statement on Form S-8 to register the total number of shares of our common stock that may be issued under our 2013 Long-Term Incentive Plan, including the restricted stock units to be granted to the members of our management team, other officers and employees and our board of directors, as well as the options to purchase shares of our common stock to be granted to the members of our management team, in each case upon the completion of our initial public offering pursuant to our 2013 Long-Term Incentive Plan.

Future offerings of debt securities, which would rank senior to our common stock upon our bankruptcy or liquidation, and future offerings of equity securities that may be senior to our common stock for the purposes of dividend and liquidating distributions, may adversely affect the market price of our common stock.

In the future, we may attempt to increase our capital resources by making offerings of debt securities or additional offerings of equity securities. Upon bankruptcy or liquidation, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will receive a distribution of our available assets prior to the holders of our common stock. Additional equity offerings may dilute the holdings of our existing stockholders or reduce the market price of our common stock, or both. Our preferred stock, if issued, could have a preference on liquidating distributions or a preference on dividend payments or both that could limit our ability to make a dividend distribution to the holders of our common stock. Our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control. As a result, we cannot predict or estimate the amount, timing or nature of our future offerings, and purchasers of our common stock bear the risk of our future offerings reducing the market price of our common stock and diluting their ownership interest in our company.

Non-U.S. holders may be subject to United States federal income tax on gain realized on the sale or disposition of shares of our common stock.

We believe we are and will remain a “United States real property holding corporation” for United States federal income tax purposes. As a result, a non-U.S. holder generally will be subject to United States federal income tax on any gain realized on a sale or disposition of shares of our common stock, and a purchaser of the stock generally will be required to withhold and remit to the Internal Revenue Service (the “IRS”) 10% of the purchase price, unless our common stock is regularly traded on an established securities market (such as the New York Stock Exchange) and such non-U.S. holder did not actually or constructively hold more than 5% of our common stock at any time during the shorter of (a) the five-year period preceding the date of the sale or disposition and (b) the non-U.S. holder’s holding period in such stock. A non-U.S. holder also will be required to file a United States federal income tax return for any taxable year in which it realizes a gain from the disposition of our common stock that is subject to United States federal income tax.

No assurance can be given that our common stock will remain regularly traded in the future. Non-U.S. holders should consult their tax advisors concerning the consequences of disposing of shares of our common stock.

Item 1B. Unresolved Staff Comments

Not Applicable.

Item 2. Properties

We lease our corporate headquarters located in Irvine, California. The lease on this facility consists of approximately 17,000 square feet and expires in October 2016. During the year ended December 31, 2013, we signed a letter of intent to lease an additional 20,000 square feet at our corporate headquarters. We expect to occupy the additional 20,000 square feet during the third quarter of 2014 and the additional lease will expire in 2020. In addition, we lease divisional offices in Northern California and Colorado. The lease on the facility in Northern California consists of approximately 6,200 square feet and expires in September 2017. The lease on the facility in Colorado consists of approximately 5,000 square feet and expires in June 2018.

Item 3. Legal Proceedings

None.

Item 4. Mine Safety Disclosures

Not applicable.

Executive officers of the Registrant

Our executive officers' ages, positions and brief accounts of their business experience as of February 21, 2014, are as follows:

<u>Name</u>	<u>Age</u>	<u>Position with the Company</u>
Douglas F. Bauer	52	Chief Executive Officer and Director
Thomas J. Mitchell	53	President and Chief Operating Officer
Michael D. Grubbs	55	Chief Financial Officer and Treasurer
Jeffrey D. Frankel	39	Senior Vice President and Division President-Northern California
Matthew P. Osborn	43	Senior Vice President and Division President-Colorado

Douglas F. Bauer has served as Chief Executive Officer since forming our company in April 2009. Prior to that Mr. Bauer served in various roles, including most recently President and Chief Operating Office, for William Lyon Homes. Mr. Bauer also serves on our Board of Directors.

Thomas J. Mitchell has served as our Chief Operating Officer and Secretary since forming our company in April 2009. Prior to that Mr. Mitchell served in various roles, including most recently Executive Vice President, for William Lyon Homes.

Michael D. Grubbs has served as our Chief Financial Officer and Treasurer since forming our company in April 2009. Prior to that Mr. Grubbs served in various roles, including most recently Senior Vice President and Chief Financial Officer, for William Lyon Homes.

Jeffrey D. Frankel has served as our Senior Vice President and Division President-Northern California since January 30, 2013. Mr. Frankel joined our company in November 2010 to form the Northern California Division. Prior to that Mr. Frankel worked in various capacities for William Lyon Homes, Bank of America and Comerica Bank.

Matthew P. Osborn has served as our Senior Vice President and Division President-Colorado since January 30, 2013. Mr. Osborn joined our company in August 2012 to lead the startup of the Colorado Division. Prior to that Mr. Osborn was the President and Chief Operating Officer of Village Homes, a Colorado community builder, since its inception in January 2010.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

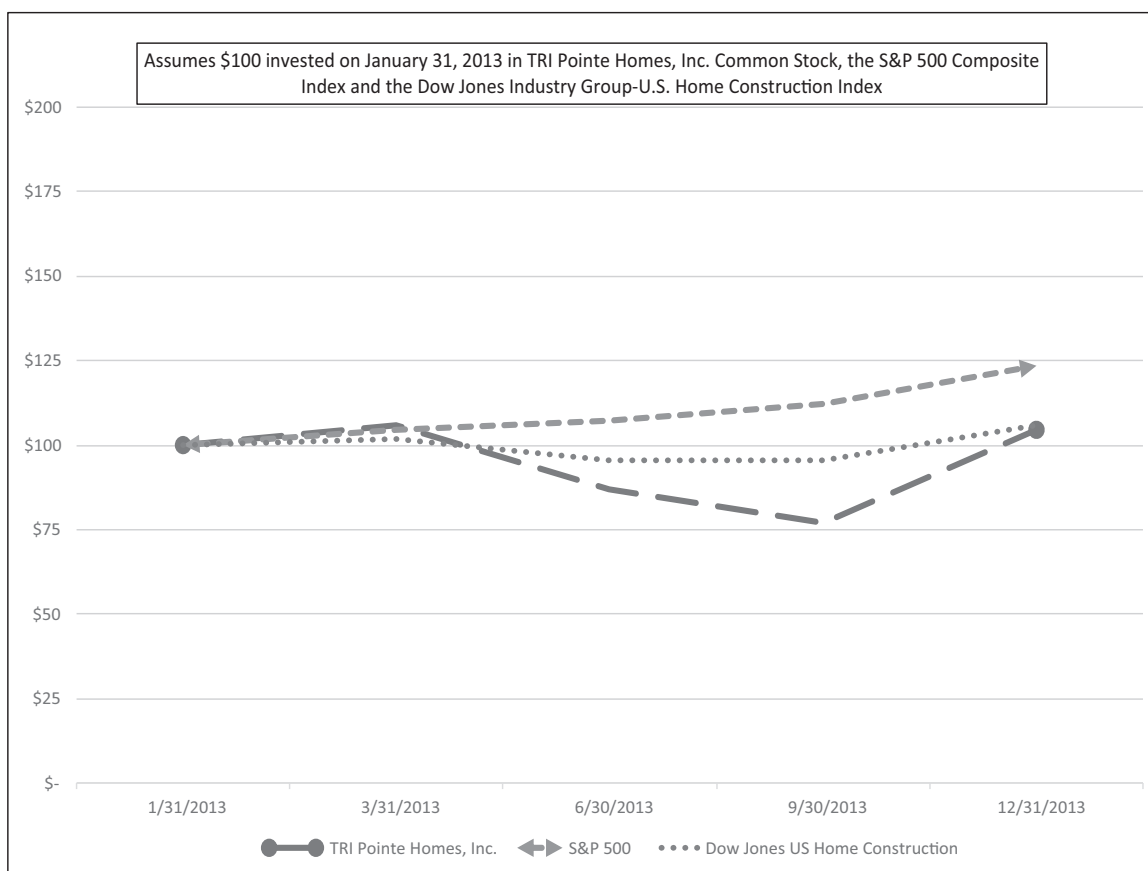

Our common stock is listed on the New York Stock Exchange ("NYSE") under the ticker symbol "TPH" and began trading on January 31, 2013. The following table sets forth the high and low intra-day sales prices per share of our common stock for the periods indicated, as reported by the NYSE.

<u>Quarter Ended</u>	<u>2013</u>	
	<u>High</u>	<u>Low</u>
March 31	\$21.25	\$17.50
June 30	\$21.18	\$14.24
September 30	\$14.30	\$13.95
December 31	\$20.29	\$13.43

The following performance graph shows a comparison of the cumulative total returns to stockholders of the Company, as compared with the Standard & Poor's 500 Composite Stock Index and the Dow Jones Industry Group-U.S. Home Construction Index.

The performance graph and related information shall not be deemed to be "soliciting material" or to be "filed" with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any filing under the Securities Act of 1933 or Securities Exchange Act of 1934, each as amended, except to the extent that we specifically incorporate it by reference.

**Comparison of the Cumulative Total Stockholders' Return
Among TRI Pointe Homes, Inc., The Standard & Poor's 500 Composite Stock Index and
the Dow Jones Industry Group-U.S. Home Construction Index**

The above graph is based upon common stock and index prices calculated as of the end of the year. The Company's common stock closing price on December 31, 2013 was \$19.93 per share. The stock price performance of the Company's common stock depicted in the graph above represents past performance only and is not necessarily indicative of future performance.

As of February 21, 2014, we had 11 holders of record of our common stock. Pursuant to the Transaction Agreement, we have agreed to not pay any dividends in respect of our shares of capital stock without the prior consent of Weyerhaeuser until after the consummation of the Merger. We currently intend to retain our future earnings, if any, to finance the development and expansion of our business and, therefore, do not intend to pay cash dividends on our common stock for the foreseeable future. Any future determination to pay dividends will be at the discretion of our board of directors and will depend on our financial condition, results of operations, capital requirements, restrictions contained in any financing instruments and such other factors as our board of

directors deems relevant. Accordingly, you may need to sell your shares of our common stock to realize a return on your investment, and you may not be able to sell your shares at or above the price you paid for them. See Part I, Item 1A, “Risk Factors—Risks Related to Ownership of Our Common Stock—we do not intend to pay dividends on our common stock for the foreseeable future” of this annual report on Form 10-K.

Item 6. Selected Financial Data

The following sets forth our selected financial and operating data on a historical basis. You should read the following summary of selected financial data in conjunction with our consolidated financial statements and the related notes and with “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” which are included elsewhere in this annual report on Form 10-K.

Our historical consolidated balance sheet information as of December 31, 2013, 2012 and 2011 and September 23, 2010, and consolidated statements of operations information for the years ended December 31, 2013, 2012 and 2011, the period from September 24, 2010 (inception date of TRI Pointe Homes, LLC) through December 31, 2010 and the period from January 1, 2010 through September 23, 2010 (our predecessor) have been derived from the historical consolidated financial statements audited by Ernst & Young LLP, independent registered public accounting firm. From April 2009 to September 23, 2010, our principals were engaged primarily in the business of constructing homes for independent third-party property owners through a number of different entities.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following in conjunction with the sections of this annual report on Form 10-K entitled "Risk Factors," "Cautionary Note Concerning Forward-Looking Statements," "Selected Financial Data" and "Business" and our historical financial statements and related notes thereto included elsewhere in this annual report on Form 10-K. This discussion contains forward-looking statements reflecting current expectations that involve risks and uncertainties. Actual results and the timing of events may differ materially from those contained in these forward-looking statements due to a number of factors, including those discussed in the section entitled "Risk Factors" and elsewhere in this annual report on Form 10-K. Our future results of operations, financial condition and cash flow will be significantly affected by the consummation of the WRECO Transactions, which is expected to occur near the beginning of the third fiscal quarter of 2014. For additional information regarding the WRECO Transactions, you are encouraged to read the information included in the Registration Statement, including "Management's Discussion and Analysis of Financial Condition and Results of Operations for WRECO," as well as the sections of this annual report on Form 10-K entitled "Cautionary Note Concerning Forward-Looking Statements," "Business – WRECO Transactions," and "Risk Factors."

Consolidated Financial Data (in thousands):

	Year Ended December 31,		
	2013	2012	2011

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

Net New Home Orders and Backlog (dollars in thousands)

	Year Ended December 31,		Increase (Decrease)	
	2013	2012	Amount	%
Net new home orders	477	204	273	134%
Cancellation rate	10%	16%	(6)%	(38)%
Average selling communities	7.4	5.4	2.0	37%
Selling communities at end of period	10	7	3	43%
Backlog (dollar value)	\$111,566	\$33,287	\$78,279	235%
Backlog (units)	149	68	81	119%
Average sales price of backlog	\$ 749	\$ 490	\$ 259	53%

Net new home orders for the year ended December 31, 2013 increased 134% to 477, compared to 204 during the prior year. Our overall “absorption rate” (the rate at which home orders are contracted, net of cancellations) for the year ended December 31, 2013 was 64.5 per average selling community (5.37 monthly), compared to 37.8 per average selling community (3.15 monthly) during the prior year. Our cancellation rate of buyers for our owned projects who contracted to buy a home but did not close escrow (as a percentage of overall orders) was approximately 10% for the year ended December 31, 2013 as compared to 16% during the prior year. We experienced substantial order growth primarily due to an increase in our average selling community count and an increase in our absorption rate. Our average number of selling communities increased by 2.0 communities from 5.4 for the year ended December 31, 2012 to 7.4 for the year ended December 31, 2013. The increase in net new home orders positively impacted our number of homes in backlog, which is discussed below. We expect that our net new home orders and backlog increases will have a positive impact on revenues and cash flow in future periods.

Backlog reflects the number of homes, net of actual cancellations experienced during the period, for which we have entered into a sales contract with a customer but for which we have not yet delivered the home. Homes in backlog are generally closed within three to nine months, although we may experience cancellations of sales contracts prior to closing. The increase in backlog units of 81 homes was driven by the 134% increase in net new home orders during the year ended December 31, 2013 as compared to the previous year. The dollar value of backlog increased \$78.3 million, or 235%, as of December 31, 2013 from \$33.3 million as of December 31, 2012. This increase reflects an increase in the number of homes in backlog of 81, or 119%, to 149 homes as of December 31, 2013 from 68 homes as of December 31, 2012 and an increase in the average sales price of homes in backlog of \$259,000, or 53 %, to \$749,000 as of December 31, 2013 compared to \$490,000 as of December 31, 2012. The increase in average sales price of homes in backlog was the result of increased pricing power and a change in product mix to more move-up product at our new communities compared to the prior year. The increase in the dollar amount of backlog of homes sold but not closed as described above generally results in an increase in operating revenues in subsequent periods.

New Homes Delivered and Home Sales (dollars in thousands)

	Year Ended December 31,		Increase (Decrease)	
	2013	2012	Amount	%
New homes delivered	396	144	252	175%
Home sales	\$247,091	\$77,477	\$169,614	219%
Average sales price of homes delivered	\$ 624	\$ 538	\$ 86	16%

New home deliveries increased 252, or 175%, to 396 during the year ended December 31, 2013 from 144 during the prior year. The increase in new home deliveries was primarily attributable to the increase in net new home orders and units in backlog due to the increase in the average number of selling communities. Home sales revenue increased \$169.6 million, or 219%, to \$247.1 million for the year ended December 31, 2013 from \$77.5 million for the prior year. The increase was primarily attributable to: (i) an increase in revenue of \$135.5 million due to a 175% increase in homes closed to 396 for the year ended December 31, 2013 from 144 for the prior year, and (ii) an increase in revenues of \$34.1 million related to an increase in average sales price of \$86,000 per unit to \$624,000 for the year ended December 31, 2013 from \$538,000 for the prior year. The increase in the average sales price of homes delivered was attributable to increased pricing power and a change in product mix to more move-up product at our new communities for the year ended December 31, 2013.

Homebuilding (dollars in thousands)

	Year Ended December 31,			
	2013	%	2012	%
Home sales	\$247,091	100.0%	\$77,477	100.0%
Cost of home sales	193,092	78.1%	63,688	82.2%
Homebuilding gross margin	53,999	21.9%	13,789	17.8%
Add: interest in cost of home sales	2,158	0.8%	872	1.1%
Adjusted homebuilding gross margin ⁽¹⁾	\$ 56,157	22.7%	\$14,661	18.9%
Homebuilding gross margin percentage	21.9%		17.8%	
Adjusted homebuilding gross margin percentage ⁽¹⁾	22.7%		18.9%	

(1) Non-GAAP financial measure (as discussed below).

Homebuilding gross margin represents home sales revenue less cost of home sales. Cost of home sales increased \$129.4 million, or 203%, to \$193.1 million for the year ended December 31, 2013 from \$63.7 million for the prior year. The increase was primarily due to a 175% increase in the number of homes delivered and the product mix of homes delivered from new communities in 2013. Our homebuilding gross margin percentage increased to 21.9% for the year ended December 31, 2013 as compared to 17.8% for the prior year, primarily due to price increases and the product mix of homes delivered from new communities in 2013.

Excluding interest in cost of home sales, adjusted homebuilding gross margin percentage was 22.7% for the year ended December 31, 2013, compared to 18.9% for the prior year. Adjusted homebuilding gross margin is a non-GAAP financial measure. We believe this information is meaningful as it isolates the impact that leverage has on homebuilding gross margin and permits investors to make better comparisons with our competitors, who adjust gross margins in a similar fashion. See the table above reconciling this non-GAAP financial measure to homebuilding gross margin, the nearest GAAP equivalent.

Fee Building (dollars in thousands)

	Year Ended December 31,			
	2013	%	2012	%
Fee building home sales	\$10,864	100.0%	\$1,073	100.0%
Fee building cost of home sales	9,782	90.0%	924	86.1%
Fee building gross margin	1,082	10.0%	149	13.9%

In 2013, we completed one fee building project located in Carpinteria, California, whereby all homes were completed and delivered to the third-party property owner. In addition, we earned management fees for another project in Moorpark, California. Fee building revenue, which was all recorded in Southern California, increased \$9.8 million, or 912%, to \$10.9 million for the year ended December 31, 2013 from \$1.1 million for the prior year. Fee building cost increased \$8.9 million, or 959%, to \$9.8 million for the year ended December 31, 2013 from \$924,000 for the prior year. Fee building revenue and cost increased primarily due to the two new fee building projects mentioned above. Fee building gross margin represents the net fee income earned related to our fee building projects. As of December 31, 2013 we have completed all construction activity related to these fee building projects and do not expect material fee building activity in the future.

Selling, General and Administrative Expense (dollars in thousands)

	Year Ended December 31,		As a Percentage of Home Sales Revenue	
	2013	2012	2013	2012
Sales and marketing	\$ 8,486	\$ 4,636	3.4%	6.0%
General and administrative ("G&A")	17,057	6,772	6.9%	8.7%
Total sales and marketing and G&A	<u>\$25,543</u>	<u>\$11,408</u>	<u>10.3%</u>	<u>14.7%</u>

Sales and marketing expense increased \$3.9 million, or 83%, to \$8.5 million for the year ended December 31, 2013 from \$4.6 million for the prior year. The increase in sales and marketing expense was primarily attributable to over a 100% increase in the number of net new homes ordered and homes delivered and a 37% increase in the average number of selling communities during the year ended December 31, 2013 compared to the prior year. Sales and marketing expense was 3.4% and 6.0% of home sales revenue for the years ended December 31, 2013 and 2012, respectively.

General and administrative expenses increased \$10.3 million, or 152%, to \$17.1 million for the year ended December 31, 2013 from \$6.8 million for the prior year. The increase was primarily attributed to (i) an increase of \$5.5 million in our compensation-related expenses resulting largely from an 106% increase in our office headcount to 74 employees as of December 31, 2013 compared to 36 as of December 31, 2012, (ii) an increase of \$1.9 million in stock-based compensation primarily due to option and restricted share unit awards granted in 2013, (iii) an increase of \$1.6 million in legal, accounting and other professional fees to support our growth as a new public company in 2013 and (iv) an increase of \$1.3 million in insurance, rent, office, business taxes and other related costs to support our growth during 2013. Our general and administrative expense as a percentage of home sales revenue was 6.9% and 8.7% for the year ended December 31, 2013 and 2012, respectively.

Total sales and marketing and G&A expenses ("SG&A") increased \$14.1 million, or 124%, to \$25.5 million for the year ended December 31, 2013 from \$11.4 million in the prior year. We recognized significant operational efficiencies in 2013 represented by our SG&A expense, which improved to 10.3% of home sales revenue for the year ended December 31, 2013 as compared to 14.7% in 2012.

Transaction Expense

As a result of the WRECO Transactions, the Company has incurred due diligence and other related transaction expenses during the year of \$4.1 million. During 2014 we expect to incur additional expense related to the WRECO Transactions.

Other Income (Expense), Net

Other income (expense), net, increased to \$302,000 of other income for the year ended December 31, 2013 compared to (\$24,000) of expense for the prior year period. The change was primarily due to increased interest and dividend income as result of higher cash and cash equivalents balances during the year due to the net cash proceeds received from our IPO in January 2013.

Other Items

Interest, which was incurred principally to finance land acquisitions, land development and home construction, totaled \$3.1 million and \$2.1 million for the year ended December 31, 2013 and 2012, respectively, all of which was capitalized to real estate inventory. The increase in interest incurred during the year ended December 31, 2013 as compared to the prior year was primarily attributable to our increase in outstanding debt, which was the result of the increase in the number of active projects and the growth in our real estate inventory.

Income Tax

For the year ended December 31, 2013, we have recorded a tax provision of \$10.4 million based on an effective tax rate of 40%. The Company reorganized from a Delaware limited liability company into a Delaware corporation during the first quarter of 2013, therefore there was no tax provision recorded for the year ended December 31, 2012.

Net Income

As a result of the foregoing factors, net income for the year ended December 31, 2013 was \$15.4 million compared to net income for the year ended December 31, 2012 of \$2.5 million.

Lots Owned and Controlled

The table below summarizes our lots owned and controlled as of the dates presented:

	December 31,		Increase (Decrease)	
	2013	2012	Amount	%
Lots Owned				
Southern California	1,072	520	552	106%
Northern California	947	198	749	378%
Colorado	263	57	206	361%
Total	2,282	775	1,507	194%
Lots Controlled⁽¹⁾				
Southern California	674	257	417	162%
Northern California	192	322	(130)	(40)%
Colorado	318	196	122	62%
Total	1,184	775	409	53%
Total Lots Owned and Controlled⁽¹⁾	3,466	1,550	1,916	124%

- (1) As of December 31, 2013, lots controlled includes lots that are under land option contracts or purchase contracts. As of December 31, 2012, lots controlled included lots that were under a land option contract, purchase contract or a non-binding letter of intent.

Year Ended December 31, 2012 Compared to Year Ended December 31, 2011

Net New Home Orders and Backlog (dollars in thousands)

	Year Ended December 31,		Increase (Decrease)	
	2012	2011	Amount	%
Net new home orders	204	42	162	386%
Cancellation rate	16%	13%	3%	23%
Average selling communities	5.4	2.0	3.4	170%
Selling communities at end of period	7	3	4	133%
Backlog (dollar value)	\$33,287	\$3,364	\$29,923	890%
Backlog (units)	68	8	60	750%
Average sales price of backlog	\$ 490	\$ 421	\$ 69	16%

Net new home orders for the year ended December 31, 2012 increased 386% to 204, compared to 42 during the prior year. Our overall “absorption rate” (the rate at which home orders are contracted, net of cancellations) for the year ended December 31, 2012 was 37.8 per average selling community (3.15 monthly), compared to 21.0 per average selling community (1.75 monthly) during the prior year. Our monthly absorption rates increased despite an increase in our cancellation rate. Our cancellation rate of buyers for our owned projects who contracted to buy a home but did not close escrow (as a percentage of overall orders) was approximately 16% for the year ended December 31, 2012 as compared to 13% during the prior year. We experienced substantial order growth primarily due to an increase in our average selling community count. Our average number of selling communities increased by 3.4 communities to 5.4 for the year ended December 31, 2012 from 2.0 for the year ended December 31, 2011. The increase was due to our opening seven new selling communities for the year ended December 31, 2012, offset by final net new home orders at two selling communities. The increase in net new home orders positively impacted our number of homes in backlog, which is discussed below. We expect that our net new home orders and backlog increases will have a positive impact on revenues and cash flow in future periods.

Backlog reflects the number of homes, net of actual cancellations experienced during the period, for which we have entered into a sales contract with a customer but for which we have not yet delivered the home. Homes in backlog are generally closed within three to six months, although we may experience cancellations of sales contracts prior to closing. The increase in backlog units of 60 homes was driven by the 386% increase in net new home orders during the year ended December 31, 2012 as compared to the previous year. The dollar value of backlog increased \$29.9 million, or 890%, as of December 31, 2012 from \$3.4 million as of December 31, 2011. The increase in dollar amount of backlog reflects an increase in the number of homes in backlog of 60, or 750%, to 68 homes as of December 31, 2012 from 8 homes as of December 31, 2011 and an increase in the average sales price of homes in backlog. We experienced an increase in the average sales price of homes in backlog of \$69,000, or 16 %, to \$490,000 as of December 31, 2012 compared to \$421,000 as of December 31, 2011 due to the introduction of new product at seven new communities with a shift to larger square footage homes with corresponding higher average sales prices in the 2012 period, including one move-up product. The increase in the dollar amount of backlog of homes sold but not closed as described above generally results in an increase in operating revenues in subsequent periods.

New Homes Delivered and Home Sales (dollars in thousands)

	Year Ended December 31,		Increase (Decrease)	
	2012	2011	Amount	%
New homes delivered	144	36	108	300%
Home sales	\$77,477	\$13,525	\$63,952	473%
Average sales price of homes delivered	\$ 538	\$ 376	\$ 162	43%

New home deliveries increased 108, or 300%, to 144 during the year ended December 31, 2012 from 36 during the prior year. The increase in new home deliveries was primarily attributable to the increase in net new home orders and units in backlog due to the increase in the average number of selling communities.

Home sales revenue increased \$64.0 million, or 473%, to \$77.5 million for the year ended December 31, 2012 from \$13.5 million for the prior year. The increase was primarily attributable to: (1) an increase in revenue of \$40.6 million due to a 300% increase in homes closed to 144 for the year ended December 31, 2012 from 36 for the prior year, and (2) an increase in revenues of \$23.4 million related to an increase in average sales price of \$162,000 per unit to \$538,000 for the year ended December 31, 2012 from \$376,000 for the prior year. The increase in the average sales price of homes delivered was attributable to a change in product mix from the deliveries at five new communities for the year ended December 31, 2012.

Homebuilding (dollars in thousands)

	Year Ended December 31,			
	2012	%	2011	%
Home sales	\$77,477	100.0%	\$13,525	100.0%
Cost of home sales	63,688	82.2%	12,075	89.3%
Homebuilding gross margin	13,789	17.8%	1,450	10.7%
Add: interest in cost of home sales	872	1.1%	269	2.0%
Adjusted homebuilding gross margin ⁽¹⁾	\$14,661	18.9%	\$ 1,719	12.7%
Homebuilding gross margin percentage	17.8%		10.7%	
Adjusted homebuilding gross margin percentage ⁽¹⁾	18.9%		12.7%	

(1) Non-GAAP financial measure (as discussed below).

Homebuilding gross margin represents home sales revenue less cost of home sales. Cost of home sales increased \$51.6 million, or 427%, to \$63.7 million for the year ended December 31, 2012 from \$12.1 million for the prior year. The increase was primarily due to a 300% increase in the number of homes delivered and the product mix of homes delivered from new communities in 2012. Our homebuilding gross margin percentage increased to 17.8% for the year ended December 31, 2012 as compared to 10.7% for the prior year, primarily due to the delivery unit mix from new projects, which achieve higher gross margins, along with additional cost savings on existing projects.

Excluding interest in cost of home sales, adjusted homebuilding gross margin percentage was 18.9% for the year ended December 31, 2012, compared to 12.7% for the prior year. Adjusted homebuilding gross margin is a non-GAAP financial measure. We believe this information is meaningful as it isolates the impact that leverage has on homebuilding gross margin and permits investors to make better comparisons with our competitors, who adjust gross margins in a similar fashion. See the table above reconciling this non-GAAP financial measure to homebuilding gross margin, the nearest GAAP equivalent.

Fee Building (dollars in thousands)

	Year Ended December 31,			
	2012	%	2011	%
Fee building home sales	\$1,073	100.0%	\$5,804	100.0%
Fee building cost of home sales	924	86.1%	5,654	97.4%
Fee building gross margin	149	13.9%	150	2.6%

As of December 31, 2012, we had entered into two construction management agreements to build 83 homes in Moorpark, California and 73 homes in Carpinteria, California. In addition, we completed one fee building project in Irvine, California, whereby all homes were completed and delivered to the third-party property owner, leaving three active model homes remaining unsold and scheduled to be delivered in 2013. Fee building revenue, which was all recorded in Southern California, decreased \$4.7 million, or 82%, to \$1.1 million for the year ended December 31, 2012 from \$5.8 million for the prior year. Fee building cost decreased \$4.7 million, or 84%, to \$924,000 for the year ended December 31, 2012 from \$5.7 million for the prior year. Fee building revenue and cost decreased primarily due to the close out of two of the three fee building projects in 2011, leaving only one remaining fee building project for the year ended December 31, 2012, which completed construction activity in early 2012. The two new fee building projects mentioned above, one of which began in September 2012, began generating fee building revenue and cost in October 2012. Fee building gross margin represents the net fee income earned related to our fee building projects.

Selling, General and Administrative Expense (dollars in thousands)

	Year Ended December 31,		As a Percentage of Home Sales Revenue	
	2012	2011	2012	2011
Sales and marketing	\$ 4,636	\$1,553	6.0%	11.5%
General and administrative (“G&A”)	6,772	\$4,620	8.7%	34.2%
Total sales and marketing and G&A	<u>\$11,408</u>	<u>\$6,173</u>	<u>14.7%</u>	<u>45.7%</u>

Sales and marketing expense increased \$3.1 million, or 199%, to \$4.6 million for the year ended December 31, 2012 from \$1.5 million for the prior year. The increase in sales and marketing expense was primarily attributable to a 157% increase in the average number of selling communities and a 300% increase in the number of homes delivered for the year ended December 31, 2012 compared to the prior year. Sales and marketing expense was 6.0% and 11.5% of home sales revenue for the years ended December 31, 2012 and 2011, respectively.

General and administrative expenses increased \$2.2 million, or 47%, to \$6.8 million for the year ended December 31, 2012 from \$4.6 million for the prior year. The increase was primarily attributed to (i) an increase of \$1.7 million in our compensation-related expenses resulting largely from a 38% increase in our office headcount to 36 employees as of December 31, 2012 compared to 26 as of December 31, 2011, (ii) an increase of \$225,000 in office rent and office related expenses due to our growth, and our resulting move to our Northern California office in August 2011 and our larger Southern California office in November 2011, and (iii) moderate increases in outside professional services, depreciation, travel and other miscellaneous expenses related to increased operations from our growth in 2012. Our general and administrative expense as a percentage of home sales revenue was 8.7% and 34.2% for the year ended December 31, 2012 and 2011, respectively.

Total sales and marketing and G&A expenses (“SG&A”) increased \$5.2 million, or 85%, to \$11.4 million for the year ended December 31, 2012 from \$6.2 million in the prior year. Total SG&A expense was 14.7% and 45.7% of home sales revenue for the years ended December 31, 2012 and 2011, respectively. We expect that our SG&A expense as a percentage of home sales revenue will continue to decrease as our increase in new home deliveries from growth in our community count generate increased home sales revenue.

Other Income (Expense), Net

Other income (expense), net, remained relatively consistent at (\$24,000) of other expense for the year ended December 31, 2012 compared to other expense of (\$20,000) for the prior year.

Other Items

Interest, which was incurred principally to finance land acquisitions, land development and home construction, totaled \$2.1 million and \$171,000 for the year ended December 31, 2012 and 2011, respectively, all of which was capitalized to real estate inventory. The increase in interest incurred during the year ended December 31, 2012 as compared to the prior year was primarily attributable to our increase in outstanding debt, which was the result of the increase in the number of active projects and the growth in our real estate inventory.

Net Income (Loss)

As a result of the foregoing factors, net income for the year ended December 31, 2012 was \$2.5 million compared to net loss for the year ended December 31, 2011 of \$(4.6) million.

Lots Owned and Controlled

The table below summarizes our lots owned and controlled as of the dates presented:

	December 31,		Increase (Decrease)	
	2012	2011	Amount	%
Lots Owned				
Southern California	520	301	219	73%
Northern California	198	107	91	85%
Colorado	57	—	57	N/A
Total	775	408	367	90%
Lots Controlled⁽¹⁾				
Southern California	257	326	(69)	(21)%
Northern California	322	59	263	446%
Colorado	196	—	196	N/A
Total	775	385	390	101%
Total Lots Owned and Controlled⁽¹⁾	<u>1,550</u>	<u>793</u>	<u>757</u>	<u>95%</u>

(1) Includes lots that were under a land option contract, purchase contract or a non-binding letter of intent.

Liquidity and Capital Resources

Overview

Our principal uses of capital for the year ended December 31, 2013 were operating expenses, land purchases, land development, home construction and the payment of routine liabilities. We used funds generated by our IPO, operations and available borrowings to meet our short-term working capital requirements. We remain focused on generating positive margins in our homebuilding operations and acquiring desirable land positions in order to maintain a strong balance sheet and keep us poised for growth. As of December 31, 2013, we had \$35.3 million in cash and cash equivalents, a \$15.5 million increase from December 31, 2012, primarily as a result of the proceeds from our IPO that was completed in the first quarter of 2013.

Cash flows for each of our communities depend on their stage in the development cycle, and can differ substantially from reported earnings. Early stages of development or expansion require significant cash outlays for land acquisitions, entitlements and other approvals, and construction of model homes, roads, utilities, general landscaping and other amenities. Because these costs are a component of our inventory and not recognized in our statement of operations until a home closes, we incur significant cash outlays prior to our recognition of earnings. In the later stages of community development, cash inflows may significantly exceed earnings reported for financial statement purposes, as the cash outflow associated with home and land construction was previously incurred. From a liquidity standpoint, we are currently actively acquiring and developing lots in our markets to maintain and grow our lot supply and active selling communities that are strategically located in “core markets,” which are in major job centers or on transportation corridors to those job centers. As demand for new homes improves and we continue to expand our business, we expect that cash outlays for land purchases and land development to grow our lot inventory will exceed our cash generated by operations. The opportunity to purchase substantially finished lots in desired locations is becoming increasingly more limited and competitive. As a result, we are spending more dollars on land development, as we are purchasing more undeveloped land and partially finished lots than in recent years.

We intend to employ both debt and equity as part of our ongoing financing strategy, coupled with redeployment of cash flows from continuing operations, to provide us with the financial flexibility to access capital on the best terms available. In that regard, we expect to employ prudent levels of leverage to finance the

acquisition and development of our lots and construction of our homes. As of December 31, 2013, we had approximately \$270.6 million of aggregate loan commitments, of which \$138.1 million was outstanding. At that date, our aggregate loan commitments consisted of \$205 million of secured revolving credit facilities, which provide financing for several real estate projects, project-specific revolving loans and several other loan agreements related to the acquisition and development of lots and the construction of model homes and homes for sale. Our board of directors will consider a number of factors when evaluating our level of indebtedness and when making decisions regarding the incurrence of new indebtedness, including the purchase price of assets to be acquired with debt financing, the estimated market value of our assets and the ability of particular assets, and our company as a whole, to generate cash flow to cover the expected debt service. As a means of sustaining our long-term financial health and limiting our exposure to unforeseen dislocations in the debt and financing markets, we currently expect to remain conservatively capitalized. However, our charter does not contain a limitation on the amount of debt we may incur and our board of directors may change our target debt levels at any time without the approval of our stockholders.

On November 3, 2013, WRECO and certain financial institutions executed a commitment letter pursuant to which the financial institutions have agreed to provide debt financing to WRECO in an aggregate principal amount of \$800 million on the terms and conditions set forth therein. WRECO will use the proceeds of the debt financing to pay approximately \$739 million in cash to Weyerhaeuser NR Company, the current direct parent of WRECO and a wholly owned subsidiary of Weyerhaeuser, which cash will be retained after consummation of the merger by Weyerhaeuser and its subsidiaries (other than WRECO and its subsidiaries). The amount of the cash payment is subject to adjustment based on the terms set forth in the Transaction Agreement. For additional information regarding this debt financing, please see the section of the Registration Statement entitled “Debt Financing.”

Secured Revolving Credit Facilities

As of December 31, 2013, we were party to a secured revolving credit facility which has a maximum loan commitment of \$30 million, an initial maturity date of April 19, 2014 and a final maturity date of April 19, 2015. We may borrow under the secured revolving credit facility in the ordinary course of business to fund our operations, including our land development and homebuilding activities. Interest on the secured revolving credit facility is paid monthly at a rate based on LIBOR or prime rate pricing, subject to a minimum interest rate floor. As of December 31, 2013, the outstanding balance was \$9.2 million with an interest rate of 3.75% per annum, and \$20.2 million of availability under the secured revolving credit facility after considering the borrowing base provisions and outstanding letters of credit.

In July, 2013, we entered into an additional secured, three-year revolving credit facility with the potential for a one-year extension of the term of the loan, subject to specified conditions and payment of an extension fee. The facility provides for a maximum loan commitment of \$125 million. On December 26, 2013, we entered into a modification agreement to increase the commitment amount under our secured, three-year revolving credit facility from \$125 million to \$175 million, subject to specified conditions and the payment of a loan fee. Borrowings under the facility are secured by a first priority lien on borrowing base properties and will be subject to, among other things, a borrowing base formula. Subject to the satisfaction of the conditions to advances set forth in the facility, we may borrow solely for the payment or reimbursement of costs or return of capital related to: (a) land acquisition, development and construction of single-family residential lots and homes on and with respect to borrowing base properties (as defined in the facility), or (b) paying off any existing financing secured by the initial borrowing base properties. The interest rate on borrowings will be at a rate based on applicable LIBOR plus a margin, ranging from 250 to 370 basis points depending on our leverage ratio. As of December 31, 2013, the outstanding balance was \$81.5 million with an interest rate of 2.92% per annum, and \$42.2 million of availability under the secured revolving credit facility after considering the borrowing base provisions and outstanding letters of credit.

Secured Acquisition and Development Loans and Construction Loans

As of December 31, 2013, we were party to several secured acquisition and development loan agreements to purchase and develop land parcels. In addition, we were party to several secured construction loan agreements for the construction of our model and production homes. As of December 31, 2013, the total aggregate commitment of our acquisition and development loans and our construction loans was \$65.6 million, of which \$47.4 million was outstanding. The acquisition and development loans will be repaid as lots are released from the loans based upon a specific release price, as defined in each respective loan agreement. Our construction loans will be repaid with proceeds from home sales based upon a specific release price, as defined in each respective loan agreement. These loans range in maturity between March 2014 and January 2016, including the six month extensions which are at our election (subject to certain conditions) and bear interest at a rate based on applicable LIBOR or Prime Rate pricing options plus an applicable margin. As of December 31, 2013, the weighted average interest rate was 3.5% per annum.

Covenant Compliance

Under our secured revolving credit facilities, our acquisition and development loans and our construction loans, we are required to comply with certain financial covenants, including but not limited to those set forth in the table below:

Financial Covenants	Actual at December 31, 2013	Covenant Requirement at December 31, 2013
	(dollars in thousands)	
Liquidity ⁽¹⁾ (Greater of \$10.0 million or 10% of total liabilities)	\$ 97,704	\$ 18,373
Tangible Net Worth (Not less than \$200.0 million plus 50% of annual net income and 50% of the net proceeds from equity offerings after December 31, 2012)	\$322,306	\$207,687
Maximum Total Liabilities to Tangible Net Worth Ratio (Not in excess of 1.5:1.0)	0.57	<1.5
Maximum Fixed Charge Coverage Ratio (Equal to or greater than 1.6:1.0)	10.19	≥ 1.6
Maximum Land Assets to Tangible Net Worth Ratio (Not in excess of 1.5:1.0)	1.01	<1.5

⁽¹⁾ Liquidity is defined as cash on hand plus availability under our secured revolving credit facilities.

As of December 31, 2013 and 2012, we were in compliance with all of these financial covenants.

We believe that our leverage ratios provide useful information to the users of our financial statements regarding our financial position and cash and debt management. The ratio of debt-to-capital and the ratio of net debt-to-capital are calculated as follows (dollars in thousands):

		December 31,	
		2013	2012
Debt		\$138,112	\$ 57,368
Equity		322,306	149,153
Total capital		<u>460,418</u>	<u>206,521</u>
Ratio of debt-to-capital ⁽¹⁾		<u>30.0%</u>	<u>27.8%</u>
Debt		\$138,112	\$ 57,368
Less: cash and cash equivalents		(35,261)	(19,824)
Net debt		102,851	37,544
Equity		322,306	149,153
Total capital		<u>\$425,157</u>	<u>\$186,697</u>
Ratio of net debt-to-capital ⁽²⁾		<u>24.2%</u>	<u>20.1%</u>

- (1) The ratio of debt-to-capital is computed as the quotient obtained by dividing debt by the sum of total debt plus equity.
- (2) The ratio of net debt-to-capital is computed as the quotient obtained by dividing net debt (which is debt less cash and cash equivalents) by the sum of net debt plus equity. The most directly comparable GAAP financial measure is the ratio of debt-to-capital. We believe the ratio of net debt-to-capital is a relevant financial measure for investors to understand the leverage employed in our operations and as an indicator of our ability to obtain financing. See the table above reconciling this non-GAAP financial measure to the ratio of debt-to-capital.

Cash Flows—Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

For the year ended December 31, 2013 as compared to the year ended December 31, 2012, the comparison of cash flows is as follows:

- Net cash used in operating activities increased to \$220.2 million in 2013 from a use of \$104.2 million in 2012. The change was a result of (i) an increase in real estate inventories of \$261.6 million in 2013 compared to an increase of \$112.1 million in 2012, primarily driven by the increase in land, land development and homes under construction due to the growth in our community count, offset by (ii) an increase in accrued liabilities of \$19.0 million in 2013 compared to \$875,000 in 2012 due to the overall increase in business and the timing of payments and (iii) a 175% increase in home closings in 2013 as compared to 2012 resulting in an increase in net income of \$15.4 million in 2013 compared to net income of \$2.5 million in 2012.
- Net cash used in investing activities was \$506,000 in 2013 as compared to \$288,000 in 2012. The change was a result of additional fixed assets purchased in 2013.
- Net cash provided by financing activities increased to \$236.2 million 2013 from \$114.2 million in 2012. The change was primarily a result of (i) an increase in the net proceeds from the issuance of common stock of \$155.4 million as a result of the completion of the Company's IPO in January 2013 compared to \$66.0 million in 2012 related to a capital contribution from a member, offset by (ii) a financial advisory fee payment of \$2.3 million and (iii) an increase in net borrowings on notes payable of \$80.7 million in 2013 as compared to an increase of \$50.4 million in 2012 to fund our growth.

As of December 31, 2013, our cash balance was \$35.3 million.

Cash Flows—Year Ended December 31, 2012 Compared to Year Ended December 31, 2011

For the year ended December 31, 2012 as compared to the year ended December 31, 2011, the comparison of cash flows is as follows:

- Net cash used in operating activities increased to \$104.2 million in 2012 from a use of \$66.4 million in 2011. The change was primarily a result of (i) an increase in real estate inventories of \$112.1 million in 2012 compared to an increase of \$67.9 million in 2011, primarily driven by the increase in land, land development and homes under construction, offset by (ii) the increase in home closings in 2012 as compared to 2011 and net income of \$2.5 million in 2012 compared to a net loss of \$4.6 million in 2011.
- Net cash used in investing activities was \$288,000 in 2012 as compared to \$308,000 in 2011. The change was a result of less fixed assets purchased in 2012.
- Net cash provided by financing activities increased to \$114.2 million in 2012 from \$65.2 million in 2011. The change was primarily a result of (i) an increase in net borrowings on notes payable of \$50.5 million in 2012 as compared to an increase \$3.4 million in 2011 and (ii) an increase in capital contributions from members of \$66.0 million offset by a financial advisory fee payment of \$2.3 million in 2012 compared to \$64.0 million in capital contributions offset by a financial advisory fee payment of \$2.2 million in 2011.

As of December 31, 2012, our cash balance was \$19.8 million.

Off-Balance Sheet Arrangements and Contractual Obligations

In the ordinary course of business, we enter into land option contracts in order to procure lots for the construction of our homes. We are subject to customary obligations associated with entering into contracts for the purchase of land and improved lots. These purchase contracts typically require a cash deposit and the purchase of properties under these contracts is generally contingent upon satisfaction of certain requirements by the sellers, including obtaining applicable property and development entitlements. We also utilize option contracts with land sellers as a method of acquiring land in staged takedowns, to help us manage the financial and market risk associated with land holdings, and to reduce the use of funds from our corporate financing sources. Option contracts generally require a non-refundable deposit for the right to acquire lots over a specified period of time at pre-determined prices. We generally have the right at our discretion to terminate our obligations under both purchase contracts and option contracts by forfeiting our cash deposit with no further financial responsibility to the land seller. As of December 31, 2013, we had \$19.7 million of non-refundable cash deposits pertaining to land option contracts and purchase contracts for 1,184 lots with an aggregate remaining purchase price of approximately \$262.1 million (net of deposits).

Our utilization of land option contracts is dependent on, among other things, the availability of land sellers willing to enter into option takedown arrangements, the availability of capital to financial intermediaries to finance the development of optioned lots, general housing market conditions, and local market dynamics. Options may be more difficult to procure from land sellers in strong housing markets and are more prevalent in certain geographic regions.

As of December 31, 2013, we had \$62.4 million of availability under our secured revolving credit facilities after considering the borrowing base provisions and outstanding letters of credit. As of December 31, 2013, we also were party to several secured acquisition and development loan agreements to purchase and develop land parcels. In addition, we were party to several secured construction loan agreements for the construction of our model and production homes. As of December 31, 2013, the total aggregate commitments of our acquisition and development loans and our construction loans were \$65.6 million, of which \$47.4 million was outstanding. We expect that the loan agreements generally will be satisfied in the ordinary course of business and in accordance with applicable contractual terms.

Contractual Obligations Table

The following table summarizes our future estimated cash payments under existing contractual obligations as of December 31, 2013, including estimated cash payments due by period. Our purchase obligations primarily represent commitments for land purchases under land purchase and land option contracts with non-refundable deposits and commitments for subcontractor labor and material to be utilized in the normal course of business.

Contractual Obligations	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	4-5 Years	After 5 Years
	(dollars in thousands)				
Long-term debt principal payments ⁽¹⁾	\$138,112	\$138,112	\$ —	\$ —	\$ —
Long-term debt interest payments	4,122	4,122	—	—	—
Operating leases ⁽²⁾	7,050	905	2,732	2,002	1,411
Purchase obligations ⁽³⁾	332,756	233,155	95,844	3,757	—
Total liabilities measured at fair value	<u>\$482,040</u>	<u>\$376,294</u>	<u>\$98,576</u>	<u>\$5,759</u>	<u>\$1,411</u>

- (1) Long-term debt represents our secured revolving credit facilities and an acquisition and development loans. Contractual maturities of the debt are in the 1-3 Years category; however, the assets securing the loans are expected to be sold in less than a year and consequently repayment will be required at that time. For a more detailed description of our long-term debt, please see Note 4 of the notes to our consolidated financial statements included elsewhere in this annual report on Form 10-K.
- (2) For a more detailed description of our operating leases, please see Note 6 of the notes to our consolidated financial statements included elsewhere in this annual report on Form 10-K.
- (3) Includes \$262.1 million (net of deposits) of the remaining purchase price for all land options contracts and purchase contracts and \$70.7 million of subcontractor labor and material commitments as of December 31, 2013. For a more detailed description of our land purchase and option contracts, please see the discussion set forth above in the section entitled “—Off-Balance Sheet Arrangements and Contractual Obligations.”

Inflation

Our homebuilding and fee building segments can be adversely impacted by inflation, primarily from higher land, financing, labor, material and construction costs. In addition, inflation can lead to higher mortgage rates, which can significantly affect the affordability of mortgage financing to homebuyers. While we attempt to pass on cost increases to customers through increased prices, when weak housing market conditions exist, we are often unable to offset cost increases with higher selling prices.

Seasonality

Historically, the homebuilding industry experiences seasonal fluctuations in quarterly operating results and capital requirements. We typically experience the highest new home order activity in spring and summer, although this activity is also highly dependent on the number of active selling communities, timing of new community openings and other market factors. Since it typically takes four to six months to construct a new home, we deliver more homes in the second half of the year as spring and summer home orders convert to home deliveries. Because of this seasonality, home starts, construction costs and related cash outflows have historically been highest in the second and third quarters, and the majority of cash receipts from home deliveries occur during the second half of the year. We expect this seasonal pattern to continue over the long-term, although it may be affected by volatility in the homebuilding industry.

Critical Accounting Policies

Our financial statements have been prepared in accordance with GAAP. The preparation of these financial statements requires our management to make estimates and judgments that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of costs and expenses during the

reporting period. On an ongoing basis, our management evaluates its estimates and judgments, including those which impact our most critical accounting policies. Our management bases its estimates and judgments on historical experience and on various other factors that we believe to be reasonable under the circumstances. Actual results may differ from our estimates under different assumptions or conditions. Our management believes that the following accounting policies are among the most important to the portrayal of our financial condition and results of operations and require among the most difficult, subjective or complex judgments:

Implications of Being an Emerging Growth Company

We are an “emerging growth company,” as defined in the JOBS Act, and we are eligible to take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not “emerging growth companies.” These provisions include:

- an exemption from the auditor attestation requirement of Section 404 of the Sarbanes-Oxley Act in the assessment of the emerging growth company’s internal control over financial reporting;
- an exemption from the adoption of new or revised financial accounting standards until they would apply to private companies; and
- an exemption from compliance with any new requirements adopted by the Public Company Accounting Oversight Board requiring mandatory audit firm rotation or a supplement to the auditor’s report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer.

We have determined to opt out of the exemption from compliance with new or revised financial accounting standards. As a result, we will comply with new or revised financial accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies. Our decision to opt out of this exemption is irrevocable.

We will remain an “emerging growth company” until the earlier of (1) the last day of the fiscal year (a) following the fifth anniversary of the completion of our initial public offering, (b) in which we have total annual gross revenue of at least \$1.0 billion or (c) in which we are deemed to be a large accelerated filer, which means the market value of our common stock that is held by non-affiliates exceeds \$700 million as of the prior June 30th, and (2) the date on which we have issued more than \$1.0 billion in non-convertible debt during the prior three-year period.

The consummation of the WRECO Transactions is expected to cause us to lose our status as an emerging growth company in 2014. Accordingly, we will become subject to additional disclosure, reporting and other obligations, which could place significant demands on our management, administrative, operational and accounting resources and cause us to incur significant expenses. If our independent auditor is unable to provide an unqualified attestation report on internal control over financial reporting, investors could lose confidence in the reliability of our financial statements and our stock price may be adversely affected.

Real Estate Inventories and Cost of Sales

Real estate inventories consist of land, land under development, homes under construction, completed homes and model homes and are stated at cost, net of impairment losses. We capitalize direct carrying costs, including interest, property taxes and related development costs to inventories. Field construction supervision and related direct overhead are also included in the capitalized cost of inventories. Direct construction costs are specifically identified and allocated to homes while other common costs, such as land, land improvements and carrying costs, are allocated to homes within a community based upon their anticipated relative sales or fair value. In accordance with ASC Topic 835, *Interest* (“ASC 835”), homebuilding interest capitalized as a cost of inventories owned is included in costs of sales as related units or lots are sold. To the extent our debt exceeds our qualified assets as defined in ASC 835, we expense a portion of the interest incurred by us. Qualified assets

represent projects that are actively under development. Homebuilding cost of sales is recognized at the same time revenue is recognized and is recorded based upon total estimated costs to be allocated to each home within a community. Any changes to the estimated costs are allocated to the remaining undelivered lots and homes within their respective community. The estimation and allocation of these costs requires a substantial degree of judgment by management.

The estimation process involved in determining relative sales or fair values is inherently uncertain because it involves estimating future sales values of homes before delivery. Additionally, in determining the allocation of costs to a particular land parcel or individual home, we rely on project budgets that are based on a variety of assumptions, including assumptions about construction schedules and future costs to be incurred. It is common that actual results differ from budgeted amounts for various reasons, including construction delays, increases in costs that have not been committed or unforeseen issues encountered during construction that fall outside the scope of existing contracts, or costs that come in less than originally anticipated. While the actual results for a particular construction project are accurately reported over time, a variance between the budget and actual costs could result in the understatement or overstatement of costs and have a related impact on gross margins between reporting periods. To reduce the potential for such variances, we have procedures that have been applied on a consistent basis, including assessing and revising project budgets on a periodic basis, obtaining commitments from subcontractors and vendors for future costs to be incurred and utilizing the most recent information available to estimate costs.

If there are indications of impairment, we perform a detailed budget and cash flow review of our real estate assets to determine whether the estimated remaining undiscounted future cash flows of the community are more or less than the asset's carrying value. If the undiscounted cash flows are more than the asset's carrying value, no impairment adjustment is required. However, if the undiscounted cash flows are less than the asset's carrying value, the asset is deemed impaired and is written down to fair value. These impairment evaluations require us to make estimates and assumptions regarding future conditions, including timing and amounts of development costs and sales prices of real estate assets, to determine if expected future undiscounted cash flows will be sufficient to recover the asset's carrying value.

When estimating undiscounted cash flows of a community, we make various assumptions, including: (i) expected sales prices and sales incentives to be offered, including the number of homes available, pricing and incentives being offered by us or other builders in other communities, and future sales price adjustments based on market and economic trends; (ii) expected sales pace and cancellation rates based on local housing market conditions, competition and historical trends; (iii) costs expended to date and expected to be incurred including, but not limited to, land and land development costs, home construction costs, interest costs, indirect construction and overhead costs, and selling and marketing costs; (iv) alternative product offerings that may be offered that could have an impact on sales pace, sales price and/or building costs; and (v) alternative uses for the property.

Many assumptions are interdependent and a change in one may require a corresponding change to other assumptions. For example, increasing or decreasing sales absorption rates has a direct impact on the estimated per unit sales price of a home, the level of time sensitive costs (such as indirect construction, overhead and carrying costs), and selling and marketing costs (such as model maintenance costs and advertising costs). Depending on the underlying objective of the community, assumptions could have a significant impact on the projected cash flow analysis. For example, if our objective is to preserve operating margins, our cash flow analysis will be different than if the objective is to increase sales. These objectives may vary significantly from community to community and over time. If assets are considered impaired, impairment is determined by the amount the asset's carrying value exceeds its fair value. Fair value is determined based on estimated future cash flows discounted for inherent risks associated with real estate assets. These discounted cash flows are impacted by expected risk based on estimated land development, construction and delivery timelines; market risk of price erosion; uncertainty of development or construction cost increases; and other risks specific to the asset or market conditions where the asset is located when assessment is made. These factors are specific to each community and may vary among communities. We perform a quarterly review for indicators of impairment. We did not note any indicators of impairment for any projects, and no impairment adjustments relating to real estate inventories were recorded, for the years ended December 31, 2013, 2012 and 2011.

Revenue Recognition

Home Sales and Profit Recognition. In accordance with ASC 360, *Property, Plant, and Equipment*, revenues from home sales and other real estate sales are recorded and a profit is recognized when the respective units are closed. Home sales and other real estate sales are closed when all conditions of escrow are met, including delivery of the home or other real estate asset, title passage, appropriate consideration is received and collection of associated receivables, if any, is reasonably assured. Sales incentives are a reduction of revenues when the respective unit is closed. When it is determined that the earnings process is not complete, the sale and the related profit are deferred for recognition in future periods. The profit we record is based on the calculation of cost of sales, which is dependent on our allocation of costs, as described in more detail above in the section entitled “—Real Estate Inventories and Cost of Sales.”

Fee Building. We enter into construction management agreements to provide fee building services whereby we will build, market and sell homes on behalf of independent third-party property owners. The independent third-party property owner funds all project costs incurred by us to build and sell the homes. We primarily enter into cost plus fee contracts where we charge independent third-party property owners for all direct and indirect costs plus a negotiated management fee. For these types of contracts, we recognize revenue based on the actual total costs we have expended and the applicable management fee. The management fee is typically a fixed fee based on a percentage of the cost or home sales revenue of the project depending on the terms of the agreement with the independent third-party property owner. In accordance with ASC 605, *Revenue Recognition*, revenues from construction management services are recognized over a cost-to-cost approach in applying the percentage-of-completion method. Under this approach, revenue is earned in proportion to total costs incurred, divided by total costs expected to be incurred. The total estimated cost plus the management fee represents the total contract value. We recognize revenue based on the actual labor and other direct costs incurred, plus the portion of the management fee we have earned to date. In the course of providing our services, we routinely subcontract for services and incur other direct costs on behalf of our clients. These costs are passed through to clients and, in accordance with industry practice and GAAP, are included in our revenue and cost of revenue. Under certain agreements, we are eligible to receive additional incentive compensation, as certain financial thresholds defined in the agreement are achieved. We recognize revenue for any incentive compensation when such financial thresholds are probable of being met and such compensation is deemed to be collectible, generally at the date the amount is communicated to us by the independent third-party property owner.

We also enter into fee building contracts where we do not bear risks for any services outside of our own. For these types of contracts, we recognize revenue as services are performed. We do not recognize any revenue or costs related to subcontractors' cost since we do not bear any risk related to them.

Due to uncertainties inherent in the estimation process, it is possible that actual completion costs may vary from estimates.

Warranty Reserves

In the normal course of business, we incur warranty-related costs associated with homes that have been delivered to homebuyers. Estimated future direct warranty costs are accrued and charged to cost of sales in the period when the related homebuilding revenues are recognized while indirect warranty overhead salaries and related costs are charged to cost of sales in the period incurred. Amounts are accrued based upon our historical rates. We also consider historical experience of our peers due to our limited history related to home sales. We assess the adequacy of our warranty accrual on a quarterly basis and adjust the amounts as appropriate for current quantitative and qualitative factors. Factors that affect the warranty accruals include the number of homes delivered, historical and anticipated rates of warranty claims and cost per claim. Although we consider the warranty accruals reflected in our consolidated balance sheet to be adequate, actual future costs could differ significantly from our currently estimated amounts. Our warranty accrual is included in accrued liabilities in the accompanying consolidated balance sheets.

Stock-Based Compensation

We account for share-based awards in accordance with ASC 718, *Compensation-Stock Compensation* (“ASC 718”). ASC 718 requires that the cost resulting from all share-based payment transactions be recognized in the financial statements. ASC 718 requires all entities to apply a fair-value-based measurement method in accounting for share-based payment transactions with employees.

Income Taxes

We account for income taxes in accordance with ASC Topic 740, *Income Taxes*. Deferred tax assets and liabilities are recorded based on future tax consequences of both temporary differences between the amounts reported for financial reporting purposes and the amounts deductible for income tax purposes, and are measured using enacted tax rates expected to apply in the years in which the temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period when the changes are enacted.

Each quarter we assess our deferred tax asset to determine whether all or any portion of the asset is more likely than not unrealizable under ASC 740. We are required to establish a valuation allowance for any portion of the asset we conclude is more likely than not to be unrealizable. Our assessment considers, among other things, the nature, frequency and severity of our current and cumulative losses, forecasts of our future taxable income, the duration of statutory carryforward periods and tax planning alternatives. Due to uncertainties inherent in the estimation process, it is possible that actual results may vary from estimates.

The Company classifies any interest and penalties related to income taxes assessed by jurisdiction as part of income tax expense. The Company has concluded that there were no significant uncertain tax positions requiring recognition in its financial statements, nor has the Company been assessed interest or penalties by any major tax jurisdictions related to 2013 or prior years.

Related Party Transactions

In March 2011 and December 2012, TRI Pointe (through its predecessor in interest, TPH LLC) acquired 62 lots and 25 lots, respectively, in the Rosedale master planned community located in Azusa, California, for a purchase price of approximately \$6.5 million and \$3.5 million (plus a potential profit participation should a specific net margin be exceeded), respectively, from an entity in which an affiliate of the Starwood Capital Group owns a minority interest.

In December 2012, TRI Pointe (through its predecessor in interest, TPH LLC) acquired 57 lots out of a total commitment of 149 lots located in Castle Rock, Colorado, for a purchase price of approximately \$3.2 million from an entity managed by an affiliate of the Starwood Capital Group. TRI Pointe has the right to acquire the remaining 92 entitled lots for a purchase price of approximately \$5.4 million.

In March 2013, TRI Pointe acquired an additional 66 lots in the Rosedale master planned community located in Azusa, California, for a purchase price of approximately \$15.7 million (plus a potential profit participation should a specific net margin be exceeded) from an entity in which an affiliate of the Starwood Capital Group owns a minority interest. This acquisition was approved by TRI Pointe independent directors.

In September 2013, TRI Pointe acquired 87 lots located in the master planned community of Sycamore Creek in Riverside, CA, for a purchase price of approximately \$11.8 million, and 49 lots located in the community of Topazridge, also located in Riverside, CA, for a purchase price of approximately \$6 million. These lots were purchased from entities managed by an affiliate of the Starwood Capital Group. This acquisition was approved by TRI Pointe independent directors.

In December 2013, TRI Pointe acquired 67 lots located in Castle Rock, Colorado, for a purchase price of approximately \$3.8 million from an entity managed by an affiliate of the Starwood Capital Group. This acquisition was approved by TRI Pointe independent directors.

The Starwood Capital Group (through its affiliate the Starwood Fund) owns 11,985,905 shares of our common stock, which represents 37.9% of our common stock as of February 21, 2014. Additionally, Barry Sternlicht, the Chairman and Chief Executive Officer of Starwood Capital Group, is also chairman of our board.

Recently Issued Accounting Standards

On February 5, 2013, the FASB issued Accounting Standards Update 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income* (“ASU 2013-02”), which adds additional disclosure requirements for items reclassified out of accumulated other comprehensive income (loss). We adopted ASU 2013-02 during the year ended December 31, 2013.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks related to fluctuations in interest rates on our outstanding variable rate debt. We did not utilize swaps, forward or option contracts on interest rates or commodities, or other types of derivative financial instruments as of or during the year ended December 31, 2013. We have not entered into and currently do not hold derivatives for trading or speculative purposes. Many of the statements contained in this section are forward looking and should be read in conjunction with our disclosures under the heading “Cautionary Note Concerning Forward-Looking Statements.”

The table below details the principal amount and the average interest rates for the outstanding debt for each category based upon the expected maturity or disposition dates. The fair value of our variable rate debt, which consists of our secured revolving credit facilities and our acquisition and development loans, is based on quoted market prices for the same or similar instruments as of December 31, 2013.

	Expected Maturity Date				Estimated Fair Value
	December 31,		Thereafter	Total	
	2014	2015-2018			
	(dollars in thousands)				
Liabilities:					
Variable rate debt ⁽¹⁾	\$138,112	\$—	\$—	\$138,112	\$138,112
Weighted average interest rate	3.2%	0.0%	0.0%	3.2%	3.2%

- ⁽¹⁾ Contractual maturities of the variable rate debt are in 2014 and 2016; however, the assets securing the loans are expected to be sold in less than a year and consequently repayment will be required at that time. For a more detailed description of our long-term debt, please see Note 4 of the notes to our consolidated financial statements included elsewhere in this annual report on Form 10-K.

Based on the current interest rate management policies we have in place with respect to our outstanding debt, we do not believe that the future market rate risks related to the above securities will have a material adverse impact on our financial position, results of operations or liquidity. For a more detailed description of our long-term debt, please see Note 4 of the notes to our consolidated financial statements included elsewhere in this annual report on Form 10-K.

Item 8. Financial Statements and Supplementary Data

The information required by this item appears beginning on page 65.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

We have established and maintain disclosure controls and procedures that are designed to ensure that material information relating to the Company and its subsidiaries required to be disclosed by us in the reports that are filed under the Securities Exchange Act of 1934, as amended (“Exchange Act”) is recorded, processed, summarized and reported in the time periods specified in the SEC’s rules and forms, and that this information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only a reasonable assurance of achieving the desired control objectives, and management was necessarily required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as of December 31, 2013. Based on this evaluation, the chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures were effective as of December 31, 2013.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) and 15d-15(f). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the criteria in Internal Control – Integrate Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in Internal Control – Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2013.

This annual report on Form 10-K does not include an attestation report of the Company's registered public accounting firm on the effectiveness of our internal control over financial reporting as of December 31, 2013 due to an exemption offered to us as an emerging growth company under the JOBS act.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required in response to this item is incorporated by reference from the information contained in our 2014 Proxy Statement under the captions “Board of Directors,” “Management,” “Section 16(A) Beneficial Ownership Reporting Compliance,” and “Corporate Governance.”

Item 11. Executive Compensation

The information required in response to this item is incorporated by reference to our 2014 Proxy Statement under the captions “Executive Compensation,” and “Corporate Governance – Compensation Committee Interlocks and Insider Participation.”

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholders

The information required in response to this item is incorporated by reference to our 2014 Proxy Statement under the captions “Ownership of TRI Pointe Common Stock” and “Equity Compensation Plan Information.”

Item 13. Certain Relationships and Related Party Transactions, and Director Independence

The information required in response to this item is incorporated by reference to our 2014 Proxy Statement under the caption “Certain Relationships and Related Party Transactions.”

Item 14. Principal Accountant Fees and Services

The information required in response to this item is incorporated by reference to our 2014 Proxy Statement under the caption “Audit Committee Matters.”

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed as part of this annual report on Form 10-K:

(1) Financial Statements:

Report of Independent Registered Public Accounting Firm	66
Consolidated Balance Sheets as of December 31, 2013 and 2012	67
Consolidated Statements of Operations for each of the three years in the period ended December 31, 2013	68
Consolidated Statements of Equity for each of the three years in the period ended December 31, 2013	69
Consolidated Statements of Cash Flows for each of the three years in the period ended December 31, 2013	70
Notes to Consolidated Financial Statements	71

(2) Financial Statement Schedules

All other schedules have been omitted since the required information is presented in the financial statements and the related notes or is not applicable.

(3) Exhibits

The exhibits filed or furnished as part of this annual report on Form 10-K are listed in the Index to Exhibits immediately preceding those exhibits, which Index is incorporated in this Item by reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
TRI Pointe Homes, Inc.

We have audited the accompanying consolidated balance sheets of TRI Pointe Homes, Inc. as of December 31, 2013 and 2012, and the related consolidated statements of operations, equity, and cash flows for each of the three years in the period ended December 31, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of TRI Pointe Homes, Inc. at December 31, 2013 and 2012, and the consolidated results of its operations and cash flows for each of the three years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

TRI POINTE HOMES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Summary of Significant Accounting Policies

Organization

TRI Pointe Homes, Inc. is engaged in the design, construction and sale of innovative single-family homes in major metropolitan areas located throughout California and Colorado. We generate a significant amount of our revenues and profits in California.

Initial Public Offering

In January 2013, the Company completed its initial public offering (“IPO”) in which it issued and sold 10 million shares of common stock at the public offering price of \$17.00 per share. The Company received proceeds of approximately \$155.4 million, net of the underwriting discount and estimated offering expenses. In preparation of the IPO, the Company reorganized from a Delaware limited liability company into a Delaware corporation and was renamed TRI Pointe Homes, Inc. Upon the close of the IPO and as of December 31, 2013, the Company had 31,597,907 common shares outstanding.

WRECO Transactions

On November 4, 2013, the Company announced that its board of directors approved a Transaction Agreement with Weyerhaeuser Company, a Washington corporation (“Weyerhaeuser”), pursuant to which Weyerhaeuser Real Estate Company, a Washington corporation and an indirect wholly owned subsidiary of Weyerhaeuser (“WRECO”), will combine with Topaz Acquisition, Inc., a Washington corporation and a wholly owned subsidiary of TRI Pointe (“Merger Sub”) in a transaction valued at approximately \$2.7 billion as of that date. Pursuant to the Transaction Agreement, Weyerhaeuser will distribute all the shares of common stock of WRECO (the “WRECO Common Shares”) to its shareholders (i) on a pro rata basis, (ii) in an exchange offer, or (iii) in a combination thereof (the “Distribution”). Weyerhaeuser will determine which approach it will take to consummate the Distribution prior to closing the transaction and no decision has been made at this time. Immediately following the Distribution, Merger Sub will merge with and into WRECO (the “Merger”), with WRECO surviving the Merger and becoming a wholly owned subsidiary of the Company. We expect to issue 129,700,000 shares of our common stock in the Merger, excluding shares to be issued for equity awards held by WRECO employees that are being assumed by us. As a result of the WRECO Transactions, the Company has incurred due diligence and other related transaction expenses during the year of \$4.1 million.

In order to complete the Merger and the related transactions, (i) WRECO will incur new indebtedness of approximately \$800 million or more in the form of (a) debt securities, (b) senior unsecured bridge loans, or (c) a combination thereof; (ii) WRECO will make a cash payment of approximately \$739 million, subject to adjustment, to Weyerhaeuser NR Company, the current direct parent of WRECO and a subsidiary of Weyerhaeuser, which cash will be retained by Weyerhaeuser and its subsidiaries (other than WRECO and its subsidiaries); and (iii) Weyerhaeuser will cause certain assets relating to Weyerhaeuser’s real estate business to be transferred to, and certain liabilities relating to Weyerhaeuser’s real estate business to be assumed by, WRECO and its subsidiaries and cause certain assets of WRECO that will be excluded from the transaction to be transferred to, and certain liabilities that will be excluded from the transaction to be assumed by, Weyerhaeuser and its subsidiaries (other than WRECO and its subsidiaries).

Basis of Presentation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany accounts have been eliminated upon consolidation. Certain prior period amounts have been reclassified to conform to current period presentation. Subsequent events have been evaluated through the date the financial statements were issued.

The accompanying financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) as contained within the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”).

Unless the context otherwise requires, the terms “we”, “us”, “our” and “the Company” refer to TRI Pointe Homes, Inc. (and its consolidated subsidiaries).

Use of Estimates

The preparation of the Company’s consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of commitments and contingencies. Accordingly, actual results could differ materially from these estimates.

Cash and Cash Equivalents and Concentration of Credit Risk

We define cash and cash equivalents as cash on hand, demand deposits with financial institutions, and short term liquid investments with an initial maturity date of less than three months. The Company’s cash balances exceed federally insurable limits. The Company monitors the cash balances in its operating accounts and adjusts the cash balances as appropriate; however, these cash balances could be impacted if the underlying financial institutions fail or are subject to other adverse conditions in the financial markets. To date, the Company has experienced no loss or lack of access to cash in its operating accounts.

Real Estate Inventories and Cost of Sales

We capitalize pre-acquisition, land, development and other allocated costs, including interest, during development and home construction. Applicable costs incurred after development or construction is substantially complete are charged to selling, general and administrative, and other expenses as appropriate. Pre-acquisition costs, including non-refundable land deposits, are expensed to other income (expense) when we determine continuation of the respective project is not probable. In accordance with ASC Topic 835, *Interest* (“ASC 835”), homebuilding interest capitalized as a cost of inventories owned is included in costs of sales as related units or lots are sold. To the extent our debt exceeds our qualified assets as defined in ASC 835, we expense a portion of the interest incurred by us. Qualified assets represent projects that are actively under development. For the years ended December 31, 2013, 2012, and 2011, we did not expense any interest costs as the qualified assets were in excess of debt.

Land, development and other common costs are typically allocated to inventory using a methodology that approximates the relative-sales-value method. Home construction costs per production phase are recorded using the specific identification method. Cost of sales for homes closed includes the allocation of construction costs of each home and all applicable land acquisition, land development and related common costs (both incurred and estimated to be incurred) based upon the relative-sales-value of the home within each community. Changes to estimated total development costs subsequent to initial home closings in a community are generally allocated on a relative-sales-value method to remaining homes in the community. Inventory is stated at cost, unless the carrying amount is determined not to be recoverable, in which case inventory is written down to fair value. We review our real estate assets at each community for indicators of impairment. Real estate assets include projects actively selling and projects under development or held for future development. Indicators of impairment include, but are not limited to, significant decreases in local housing market values and selling prices of comparable homes, significant decreases in gross margins and sales absorption rates, costs in excess of budget, and actual or projected cash flow losses.

If there are indications of impairment, we perform a detailed budget and cash flow review of our real estate assets to determine whether the estimated remaining undiscounted future cash flows of the community are more or less than the asset’s carrying value. If the undiscounted cash flows are more than the asset’s carrying value, no

impairment adjustment is required. However, if the undiscounted cash flows are less than the asset's carrying value, the asset is deemed impaired and is written down to fair value. These impairment evaluations require us to make estimates and assumptions regarding future conditions, including timing and amounts of development costs and sales prices of real estate assets, to determine if expected future undiscounted cash flows will be sufficient to recover the asset's carrying value.

When estimating undiscounted cash flows of a community, we make various assumptions, including: (i) expected sales prices and sales incentives to be offered, including the number of homes available, pricing and incentives being offered by us or other builders in other communities, and future sales price adjustments based on market and economic trends; (ii) expected sales pace and cancellation rates based on local housing market conditions, competition and historical trends; (iii) costs expended to date and expected to be incurred including, but not limited to, land and land development costs, home construction costs, interest costs, indirect construction and overhead costs, and selling and marketing costs; (iv) alternative product offerings that may be offered that could have an impact on sales pace, sales price and/or building costs; and (v) alternative uses for the property.

Many assumptions are interdependent and a change in one may require a corresponding change to other assumptions. For example, increasing or decreasing sales absorption rates has a direct impact on the estimated per unit sales price of a home, the level of time sensitive costs (such as indirect construction, overhead and carrying costs), and selling and marketing costs (such as model maintenance costs and advertising costs). Depending on the underlying objective of the community, assumptions could have a significant impact on the projected cash flow analysis. For example, if our objective is to preserve operating margins, our cash flow analysis will be different than if the objective is to increase sales. These objectives may vary significantly from community to community and over time. If assets are considered impaired, impairment is determined by the amount the asset's carrying value exceeds its fair value. Fair value is determined based on estimated future cash flows discounted for inherent risks associated with real estate assets. These discounted cash flows are impacted by expected risk based on estimated land development, construction and delivery timelines; market risk of price erosion; uncertainty of development or construction cost increases; and other risks specific to the asset or market conditions where the asset is located when assessment is made. These factors are specific to each community and may vary among communities. For the years ended December 31, 2013, 2012 and 2011, no impairment adjustments relating to real estate inventories were recorded.

Revenue Recognition

Home Sales and Profit Recognition

In accordance with Accounting Standards Codification ("ASC") 360, *Property, Plant, and Equipment*, revenues from home sales and other real estate sales are recorded and a profit is recognized when the respective units are closed. Home sales and other real estate sales are closed when all conditions of escrow are met, including delivery of the home or other real estate asset, title passage, appropriate consideration is received and collection of associated receivables, if any, is reasonably assured. Sales incentives are a reduction of revenues when the respective unit is closed. When it is determined that the earnings process is not complete, the sale and the related profit are deferred for recognition in future periods. The profit we record is based on the calculation of cost of sales, which is dependent on our allocation of costs, as described in more detail above in the section entitled "—Real Estate Inventories and Cost of Sales."

Fee Building

The Company enters into construction management agreements to provide fee building services whereby it will build, market and sell homes on behalf of independent third-party property owners. The independent third-party property owner funds all project costs incurred by the Company to build and sell the homes. The Company primarily enters into cost plus fee contracts where it charges independent third-party property owners for all direct and indirect costs plus a negotiated management fee. For these types of contracts, the Company recognizes revenue based on the actual total costs it has expended and the applicable management fee. The management fee is typically a fixed fee based on a percentage of the cost or home sales revenue of the project depending on the

terms of the agreement with the independent third-party property owner. In accordance with ASC 605, *Revenue Recognition*, revenues from construction management services are recognized over a cost-to-cost approach in applying the percentage-of-completion method. Under this approach, revenue is earned in proportion to total costs incurred, divided by total costs expected to be incurred. The total estimated cost plus the management fee represents the total contract value. The Company recognizes revenue based on the actual labor and other direct costs incurred, plus the portion of the management fee it has earned to date. In the course of providing its services, the Company routinely subcontracts for services and incurs other direct costs on behalf of its clients. These costs are passed through to clients and, in accordance with industry practice and GAAP, are included in the Company's revenue and cost of revenue. Under certain agreements, the Company is eligible to receive additional incentive compensation, as certain financial thresholds defined in the agreement are achieved. The Company recognizes revenue for any incentive compensation when such financial thresholds are probable of being met and such compensation is deemed to be collectible, generally at the date the amount is communicated to us by the independent third-party property owner.

The Company also enters into fee building contracts where it does not bear risks for any services outside of its own. For these types of contracts, the Company recognizes revenue as services are performed. The Company does not recognize any revenue or costs related to subcontractors' cost since it does not bear any risk related to them.

Warranty Reserves

Estimated future direct warranty costs are accrued and charged to cost of sales in the period when the related homebuilding revenues are recognized. Amounts accrued are based upon historical experience rates. We also consider historical experience of our peers due to our limited history related to home sales. Indirect warranty overhead salaries and related costs are charged to the reserve in the period incurred. We assess the adequacy of our warranty accrual on a quarterly basis and adjust the amounts recorded if necessary. Our warranty accrual is included in accrued liabilities in the accompanying consolidated balance sheets.

Variable Interest Entities

The Company accounts for variable interest entities in accordance with ASC 810, *Consolidation* ("ASC 810"). Under ASC 810, a variable interest entity ("VIE") is created when: (a) the equity investment at risk in the entity is not sufficient to permit the entity to finance its activities without additional subordinated financial support provided by other parties, including the equity holders; (b) the entity's equity holders as a group either (i) lack the direct or indirect ability to make decisions about the entity, or (ii) are not obligated to absorb expected losses of the entity or (iii) do not have the right to receive expected residual returns of the entity; or (c) the entity's equity holders have voting rights that are not proportionate to their economic interests, and the activities of the entity involve or are conducted on behalf of the equity holder with disproportionately few voting rights. If an entity is deemed to be a VIE pursuant to ASC 810, the enterprise that has both (i) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and (ii) the obligation to absorb the expected losses of the entity or right to receive benefits from the entity that could be potentially significant to the VIE is considered the primary beneficiary and must consolidate the VIE. In accordance with ASC 810, we perform ongoing reassessments of whether an enterprise is the primary beneficiary of a VIE. As of December 31, 2013, 2012 and 2011, the Company did not have any investment that was deemed to be a VIE.

Under ASC 810, a non-refundable deposit paid to an entity is deemed to be a variable interest that will absorb some or all of the entity's expected losses if they occur. Our land purchase and lot option deposits generally represent our maximum exposure to the land seller if we elect not to purchase the optioned property. In some instances, we may also expend funds for due diligence, development and construction activities with respect to optioned land prior to takedown. Such costs are classified as inventories owned, which we would have to write off should we not exercise the option. Therefore, whenever we enter into a land option or purchase contract with an entity and make a non-refundable deposit, a VIE may have been created. As of December 31,

2013, 2012 and 2011, the Company was not required to consolidate any VIEs nor did the Company write off any costs that had been capitalized under lot option contracts. In accordance with ASC 810, we perform ongoing reassessments of whether we are the primary beneficiary of a VIE.

Stock-Based Compensation

We account for share-based awards in accordance with ASC 718, *Compensation-Stock Compensation* (“ASC 718”). ASC 718 requires that the cost resulting from all share-based payment transactions be recognized in the financial statements. ASC 718 requires all entities to apply a fair-value-based measurement method in accounting for share-based payment transactions with employees.

Sales and Marketing Expense

Sales and marketing costs incurred to sell real estate projects are capitalized if they are reasonably expected to be recovered from the sale of the project or from incidental operations and are incurred for tangible assets that are used directly through the selling period to aid in the sale of the project or services that have been performed to obtain regulatory approval of sales. All other selling expenses and other marketing costs are expensed in the period incurred.

Income Taxes

Income taxes are accounted for in accordance with ASC 740, *Income Taxes* (“ASC 740”). The provision for, or benefit from, income taxes is calculated using the asset and liability method, under which deferred tax assets and liabilities are recorded based on the difference between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. Deferred tax assets are evaluated on a quarterly basis to determine if adjustments to the valuation allowance are required. In accordance with ASC 740, we assess whether a valuation allowance should be established based on the consideration of all available evidence using a “more likely than not” standard with respect to whether deferred tax assets will be realized. The ultimate realization of deferred tax assets depends primarily on the generation of future taxable income during the periods in which the differences become deductible. The value of our deferred tax assets will depend on applicable income tax rates. Judgment is required in determining the future tax consequences of events that have been recognized in our consolidated financial statements and/or tax returns. Differences between anticipated and actual outcomes of these future tax consequences could have a material impact on our consolidated financial statements.

Recently Issued Accounting Standards

On February 5, 2013, the FASB issued Accounting Standards Update 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income* (“ASU 2013-02”), which adds additional disclosure requirements for items reclassified out of accumulated other comprehensive income (loss). We adopted ASU 2013-02 during the year ended December 31, 2013.

2. Real Estate Inventories

Real estate inventories consisted of the following (in thousands):

	December 31,	
	2013	2012
Inventories owned:		
Deposits and pre-acquisition costs	\$ 19,714	\$ 12,285
Land held and land under development	326,209	129,621
Homes completed or under construction	92,901	40,955
Model homes	16,818	11,222
	<u>\$455,642</u>	<u>\$194,083</u>

Model homes, homes completed, and homes under construction include all costs associated with home construction, including land, development, indirects, permits, and vertical construction. Land under development includes costs incurred during site development such as land, development, indirects, and permits. Land is classified as held for future development if no significant development has occurred.

Interest Capitalization

Interest is capitalized on inventory during development and other qualifying activities. Interest capitalized as cost of inventory is included in cost of sales as related units are closed. For each of the three years ended December 31, 2013, interest incurred, capitalized, and expensed were as follows (in thousands):

	Year Ended December 31,		
	2013	2012	2011
Interest incurred	\$ 3,058	\$ 2,077	\$ 171
Interest capitalized	(3,058)	(2,077)	(171)
Interest expensed	\$ —	\$ —	\$ —
Capitalized interest in beginning inventory	\$ 1,364	\$ 159	\$ 257
Interest capitalized as a cost of inventory	3,058	2,077	171
Interest previously capitalized as a cost of inventory, included in cost of sales	(2,158)	(872)	(269)
Capitalized interest in ending inventory	\$ 2,264	\$ 1,364	\$ 159

3. Accrued Liabilities

Accrued liabilities consisted of the following (in thousands):

	December 31,	
	2013	2012
Accrued expenses	\$ 7,605	\$ 457
Accrued income tax payable	7,764	—
Accrued payroll liabilities	3,513	1,122
Warranty reserves (Note 6)	3,338	1,593
	<u>\$22,220</u>	<u>\$3,172</u>

4. Notes Payable

Notes payable consisted of the following (in thousands):

	December 31,	
	2013	2012
Revolving credit facilities	\$ 90,689	\$ 6,855
Acquisition and development loans	31,591	37,996
Construction loans	15,832	12,517
	<u>\$138,112</u>	<u>\$57,368</u>

The Company has a secured revolving credit facility which has a maximum loan commitment of \$30 million, an initial maturity date of April 19, 2014 and a final maturity date of April 19, 2015. The Company may borrow under the facility in the ordinary course of business to fund its operations, including its land development and homebuilding activities. The amount the Company may borrow is subject to applicable borrowing base provisions and concentration limitations, which may also limit the amount available or

outstanding under the facility. The facility is secured by deeds of trust on the real property and improvements thereon, and borrowings are repaid with the net sales proceeds from the sales of homes, subject to a minimum release price. Interest rates charged under the facility include applicable LIBOR and prime rate pricing options, subject to a minimum interest rate floor. As of December 31, 2013, the outstanding balance was \$9.1 million with an interest rate of 3.75% per annum, and \$20.2 million of availability under the facility after considering the borrowing base provisions and outstanding letters of credit.

In July 2013, the Company entered into an additional secured, three-year revolving credit facility with the potential for a one-year extension of the term of the loan, subject to specified conditions and payment of an extension fee. The facility provides for a maximum loan commitment of \$125 million. On December 26, 2013, we entered into a modification agreement to increase the commitment amount under our secured, three-year revolving credit facility from \$125 million to \$175 million, subject to specified conditions and the payment of a loan fee. Borrowings under the facility are secured by a first priority lien on borrowing base properties and will be subject to, among other things, a borrowing base formula. Subject to the satisfaction of the conditions to advances set forth in the facility, the Company may borrow solely for the payment or reimbursement of costs or return of capital related to: (a) land acquisition, development and construction of single-family residential lots and homes on and with respect to borrowing base properties (as defined in the facility), or (b) paying off any existing financing secured by the initial borrowing base properties. The interest rate on borrowings will be at a rate based on applicable LIBOR plus a margin, ranging from 250 to 370 basis points depending on our leverage ratio. As of December 31, 2013, the outstanding balance was \$81.5 million with an interest rate of 2.92% per annum, and \$42.2 million of availability under the facility after considering the borrowing base provisions and outstanding letters of credit.

The Company enters into secured acquisition and development loan agreements to purchase and develop land parcels. In addition, the Company enters into secured construction loan agreements for the construction of its model and production homes. The acquisition and development loans will be repaid as lots are released from the loans based upon a specific release price, as defined in each respective loan agreement. The construction loans will be repaid with proceeds from home closings based upon a specific release price, as defined in each respective loan agreement.

As of December 31, 2013, the Company had \$43.2 million of aggregate acquisition and development loan commitments and \$22.4 million of aggregate construction loan commitments, of which \$31.6 million and \$15.8 million was outstanding, respectively. The loans have maturity dates ranging from March 2014 and January 2016, including the six month extensions which are at our election (subject to certain conditions) and bear interest at a rate based on applicable LIBOR or Prime Rate pricing options plus an applicable margin, with certain loans containing a minimum interest rate floor of 4.0%. As of December 31, 2013, the weighted average interest rate was 3.5% per annum.

As of December 31, 2012, the Company's secured revolving credit facility with a maximum loan commitment of \$30.0 million, of which \$6.9 million was outstanding, had \$21.4 million of availability and an interest rate of 5.5% per annum. In addition, the Company had \$68.1 million of aggregate acquisition and development loan commitments and \$25.4 million of aggregate construction loan commitments, of which \$38.0 million and \$12.5 million were outstanding, respectively. The loans had maturity dates ranging from August 2013 to February 2015, including the six month extensions which are at our election (subject to certain conditions) and bear interest at a rate based on applicable LIBOR or Prime Rate pricing options, with interest rate floors ranging from 4.0% to 6.0%. As of December 31, 2012, the weighted average interest rate was 5.2% per annum.

During the years ended December 31, 2013 and 2012, the Company incurred interest of \$3.1 million and \$2.1 million, respectively, related to its notes payable. Included in interest incurred was amortization of deferred financing costs of \$99,000 and \$0 for the years ended December 31, 2013 and 2012, respectfully. Accrued

interest payable at December 31, 2013 and 2012 amounted to \$347,000 and \$273,000, respectfully. All interest incurred during the years ended December 31, 2013 and 2012 was capitalized to real estate inventories.

Under the revolving credit facilities and construction notes payable, the Company is required to comply with certain financial covenants, including but not limited to (i) a minimum tangible net worth; (ii) a maximum total liabilities to tangible net worth ratio; (iii) a minimum liquidity amount; (iv) maximum fixed charge coverage ratio; and (v) maximum land assets to tangible net worth ratio. The Company was in compliance with all financial covenants as of December 31, 2013 and 2012.

5. Fair Value Disclosures

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value as the price that would be received for selling an asset or paid to transfer a liability in an orderly transaction between market participants at measurement date and requires assets and liabilities carried at fair value to be classified and disclosed in the following three categories:

- Level 1—Quoted prices for identical instruments in active markets
- Level 2—Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are inactive; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets at measurement date
- Level 3—Valuations derived from techniques where one or more significant inputs or significant value drivers are unobservable in active markets at measurement date

Nonfinancial assets and liabilities include items such as inventory and long lived assets that are measured at fair value when acquired and resulting from impairment, if deemed necessary. During the years ended December 31, 2013 and 2012, the Company did not record any fair value adjustments to those financial and nonfinancial assets and liabilities measured at fair value on a nonrecurring basis.

Financial instrument as of December 31, 2013 were comprised of secured revolving credit facilities, which provide financing for several real estate projects; secured acquisition and development loan agreements to purchase and develop land parcels, and; secured construction loan agreements for the construction of our model and production homes

At December 31, 2013 and 2012, as required by ASC 820, *Financial Instruments*, the following presents net book values and estimated fair values of notes payable (in thousands):

	Hierarchy	December 31, 2013		December 31, 2012	
		Cost	Fair Value	Cost	Fair Value
Notes payable					
Revolving credit facilities	Level 3	\$ 90,689	\$ 90,689	\$ 6,855	\$ 6,855
Acquisition and development loans	Level 3	31,591	31,591	37,996	37,996
Construction loans	Level 3	15,832	15,832	12,517	12,517
Total notes payable		<u>\$138,112</u>	<u>\$138,112</u>	<u>\$57,368</u>	<u>\$57,368</u>

Estimated fair values of the outstanding revolving credit facilities, acquisition and development loans, and construction loans at December 31, 2013 and 2012 were based on cash flow models discounted at market interest rates that considered underlying risks of the debt. Due to the short term nature of the revolving credit facilities, acquisition and development loans and construction loans, book value approximated fair value at December 31, 2013 and 2012.

6. Commitments and Contingencies

Legal Matters

Lawsuits, claims and proceedings have been or may be instituted or asserted against us in the normal course of business, including actions brought on behalf of various classes of claimants. We are also subject to local, state and federal laws and regulations related to land development activities, house construction standards, sales practices, employment practices and environmental protection. As a result, we are subject to periodic examinations or inquiry by agencies administering these laws and regulations.

We record a reserve for potential legal claims and regulatory matters when they are probable of occurring and a potential loss is reasonably estimable. We accrue for these matters based on facts and circumstances specific to each matter and revise these estimates when necessary.

In view of the inherent difficulty of predicting outcomes of legal claims and related contingencies, we generally cannot predict their ultimate resolution, related timing or eventual loss. If our evaluations indicate loss contingencies that could be material are not probable, but are reasonably possible, we will disclose their nature with an estimate of possible range of losses or a statement that such loss is not reasonably estimable. At December 31, 2013 and 2012, the Company did not have any accruals for asserted or unasserted matters.

Warranty

The Company currently provides a limited one year warranty covering workmanship and materials. In addition, our limited warranty (generally ranging from a minimum of two years up to the period covered by the applicable statute of repose) covers certain defined construction defects. The limited warranty covering construction defects is transferable to subsequent buyers not under direct contract with us and requires that homebuyers agree to the definitions and procedures set forth in the warranty, including the submission of unresolved construction-related disputes to binding arbitration. We reserve up to 1.0% of the sales price of each home we sell to provide the customer service to our homebuyers. We believe that our reserves are adequate to cover the ultimate resolution of our potential liabilities associated with known and anticipated warranty and construction defect related claims and litigation.

We subcontract our homebuilding work to subcontractors who generally provide us with an indemnity and a certificate of insurance prior to receiving payments for their work and, therefore, claims relating to workmanship and materials are generally the primary responsibility of our subcontractors.

There can be no assurance, however, that the terms and limitations of the limited warranty will be effective against claims made by homebuyers, that we will be able to renew our insurance coverage or renew it at reasonable rates, that we will not be liable for damages, the cost of repairs, and/or the expense of litigation surrounding possible construction defects, soil subsidence or building related claims or that claims will not arise out of uninsurable events or circumstances not covered by insurance and not subject to effective indemnification agreements with our subcontractors.

Estimated future direct warranty costs are accrued and charged to cost of sales in the period when the related homebuilding revenues are recognized. Amounts accrued are based upon historical experience rates. We also consider historical experience of our peers due to our limited history related to home sales. Indirect warranty overhead salaries and related costs are charged to the reserve in the period incurred. We assess the adequacy of our warranty accrual on a quarterly basis and adjust the amounts recorded if necessary.

Warranty reserves consisted of the following (in thousands):

	Year Ended December 31,		
	2013	2012	2011
Warranty reserves, beginning of period	\$ 1,593	\$ 985	\$ 731
Warranty reserves accrued	2,898	854	470
Warranty expenditures	(1,153)	(246)	(216)
Warranty reserves, end of period	<u>\$ 3,338</u>	<u>\$1,593</u>	<u>\$ 985</u>

Performance Bonds

We obtain surety bonds in the normal course of business to ensure completion of certain infrastructure improvements of our projects. As of December 31, 2013 and 2012, the Company had outstanding surety bonds totaling \$41.4 million and \$11.9 million, respectively. The beneficiaries of the bonds are various municipalities. In the unlikely event that any such surety bond issued by a third party is called because the required improvements are not completed, the Company could be obligated to reimburse the issuer of the bond.

Leases

We lease certain property and equipment under non-cancelable operating leases. Office leases are for terms up to six years and generally provide renewal options for terms up to an additional five years. In most cases, we expect that, in the normal course of business, leases that expire will be renewed or replaced by other leases. Equipment leases are typically for terms of three to four years.

We lease our corporate headquarters located in Irvine, California. The lease on this facility consists of approximately 17,000 square feet and expires in October 2016. During the year we signed a letter of intent to lease an additional 20,000 square feet at our corporate headquarters. We expect to occupy the additional 20,000 square feet during the third quarter of 2014 and the additional lease will expire in 2020. In addition, we lease divisional offices in Northern California and Colorado. The lease on the facility in Northern California consists of approximately 6,200 square feet and expires in September 2017. The lease on the facility in Colorado consists of approximately 5,000 square feet and expires in June 2018. As of December 31, 2013, future minimum lease payments under non-cancelable operating lease agreements are as follows (in thousands):

2014	\$ 905
2015	1,346
2016	1,386
2017	1,081
2018	921
Thereafter	<u>1,411</u>
	<u>\$7,050</u>

For the years ended December 31, 2013, 2012 and 2011, rental expense was \$531,000, \$373,000 and \$167,000, respectively.

Purchase Obligations

In the ordinary course of business, we enter into land option contracts in order to procure lots for the construction of our homes. We are subject to customary obligations associated with entering into contracts for the purchase of land and improved lots. These purchase contracts typically require a cash deposit and the purchase of properties under these contracts is generally contingent upon satisfaction of certain requirements by the sellers, including obtaining applicable property and development entitlements. We also utilize option contracts with land sellers as a method of acquiring land in staged takedowns, to help us manage the financial

and market risk associated with land holdings, and to reduce the use of funds from our corporate financing sources. Option contracts generally require a non-refundable deposit for the right to acquire lots over a specified period of time at pre-determined prices. We generally have the right at our discretion to terminate our obligations under both purchase contracts and option contracts by forfeiting our cash deposit with no further financial responsibility to the land seller. As of December 31, 2013, we had \$19.7 million of non-refundable cash deposits pertaining to land option contracts and purchase contracts for 1,184 lots with an aggregate remaining purchase price of approximately \$262.1 million (net of deposits).

Our utilization of land option contracts is dependent on, among other things, the availability of land sellers willing to enter into option takedown arrangements, the availability of capital to financial intermediaries to finance the development of optioned lots, general housing market conditions, and local market dynamics. Options may be more difficult to procure from land sellers in strong housing markets and are more prevalent in certain geographic regions.

7. Stock-Based Compensation

The Company's stock compensation plan, the 2013 Long-Term Incentive Plan ("2013 Incentive Plan"), was adopted by our board of directors in January 2013. The 2013 Incentive Plan provides for the grant of equity-based awards, including options to purchase shares of common stock, stock appreciation rights, common stock, restricted stock, restricted stock units and performance awards. The 2013 Incentive Plan will automatically expire on the tenth anniversary of its effective date. Our board of directors may terminate or amend the 2013 Incentive Plan at any time, subject to any requirement of stockholder approval required by applicable law, rule or regulation.

The number of shares of our common stock that may be issued under the 2013 Incentive Plan is 2,527,833 shares. To the extent that shares of our common stock subject to an outstanding option, stock appreciation right, stock award or performance award granted under the 2013 Incentive Plan or any predecessor plan are not issued or delivered by reason of the expiration, termination, cancellation or forfeiture of such award or the settlement of such award in cash, then such shares of our common stock generally shall again be available under our the 2013 Incentive Plan. As of December 31, 2013 there were 2,096,416 shares available for future grant in the 2013 Incentive Plan.

The Company has issued stock option awards and restricted stock unit awards against the 2013 Incentive Plan. The exercise price of our stock-based awards may not be less than the market value of our common stock on the date of grant. The fair value for stock options is established at the date of grant using the Black-Scholes model for time based vesting awards. Our stock option awards typically vest over a one to three year period and expire ten years from the date of grant. Our restricted stock awards are valued based on the closing price of our common stock on the date of grant and typically vest over a one to three year period.

The following table presents compensation expense recognized related to all stock-based awards (in thousands):

	Year Ended December 31,		
	2013	2012	2011
Total stock-based compensation	<u>\$2,371</u>	<u>\$466</u>	<u>\$466</u>

As of December 31, 2013, total compensation cost related to all non-vested awards not yet recognized was \$4.3 million and the weighted average term over which the expense was expected to be recognized was 1.7 years.

Summary of Stock Option Activity

The following table presents a summary of stock option awards relating to our 2013 Incentive Plan for the year ended December 31, 2013 (dollars in thousands, except per share amounts):

	2013		
	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
Options outstanding at beginning of year	—	\$ —	—
Granted	285,900	17.04	9.1
Exercised	—	—	—
Forfeited	—	—	—
Options outstanding at end of year	<u>285,900</u>	<u>\$17.04</u>	<u>9.1</u>
			<u>\$827</u>

As of December 31, 2013, there were no stock options vested or exercisable. As of December 31, 2013, 285,900 stock options were expected to vest in the future with a weighted average exercise price of \$17.04 and a weighted average remaining contractual life of 9.1 years. There were no stock option grants in 2012 or 2011.

The fair value for stock option awards granted during the year was established at the date of grant using an option based mode. The fair value of the stock option awards was determined using the following assumptions:

	2013
Dividend yield	0.00%
Expected volatility	44.00%
Risk-free interest rate	1.89%
Expected life	5.00

Summary of Restricted Stock Unit Activity

The following table presents a summary of restricted stock units (“RSUs”) relating to our 2013 Incentive Plan for the year ended December 31, 2013 (dollars in thousands, except per share amounts):

	2013	
	Restricted Share Units	Weighted Average Grant Date Fair Value
RSUs outstanding at beginning of year	—	\$ —
Granted	150,667	17.70
Vested	—	—
Forfeited	(5,150)	18.30
RSUs outstanding at end of year	<u>145,517</u>	<u>\$17.68</u>
		<u>\$2,900</u>

The fair value of restricted stock awards is measured as of the closing price on the date of grant and is expensed on a straight-line basis over the vesting period of the award. There were no restricted stock awards grants in 2012 or 2011.

Summary of Equity Based Incentive Units

On September 24, 2010, the Company granted equity based incentive units to management. In connection with our initial public offering in January 2013, the incentive units converted into shares of common stock. The recipients of the equity based incentive units have all the rights of a stockholder, including the rights to vote those shares and receive any dividends or distributions made with respect to those shares and any shares or other property received in respect of those shares; provided, however, any non-cash dividend or distribution with respect to the common stock shall be subject to the same vesting provisions as the incentive units. The vesting terms of the equity based incentive units are as follows: (1) 18.75% of such units vested, subject to limitation in (3) below on the date following the first-year anniversary of the date of such officer's employment; (2) 56.25% of such units vest, subject to limitation in (3) below in equal quarterly installments between the first and fourth-year anniversary of the date of such officer's employment; (3) 25% of the awards granted in (1) and (2) will vest upon a liquidity event as defined; and (4) 25% of such units will be converted into a number of shares of restricted stock prior to a liquidity event, as defined. The grant-date fair value of the equity based incentive units granted during the period ended December 31, 2010 was \$3.3 million. The Company did not grant any equity based incentive units during the year ended December 31, 2013, 2012 and 2011. No equity based incentive units were forfeited during the years ended December 31, 2013, 2012 and 2011.

8. Segment Information

The Company's operations are organized into two reportable segments: homebuilding and fee building (construction services). In accordance with ASC 280, *Segment Reporting*, in determining the most appropriate reportable segments, we considered similar economic and other characteristics, including product types, average selling prices, gross profits, production processes, suppliers, subcontractors, regulatory environments, land acquisition results, and underlying demand and supply.

The reportable segments follow the same accounting policies as our consolidated financial statements described in Note 1. Operational results of each reportable segment are not necessarily indicative of the results that would have been achieved had the reportable segment been an independent, stand-alone entity during the periods presented. Financial information relating to reportable segments was as follows (in thousands):

		Year Ended December 31,		
		2013	2012	2011
Revenues				
	Homebuilding	\$247,091	\$77,477	\$13,525
	Fee building	10,864	1,073	5,804
		<u>\$257,955</u>	<u>\$78,550</u>	<u>\$19,329</u>
Gross profit				
	Homebuilding	\$ 53,999	\$13,789	\$ 1,450
	Fee building	1,082	149	150
		<u>\$ 55,081</u>	<u>\$13,938</u>	<u>\$ 1,600</u>
		December 31,		
		2013	2012	
Assets				
	Homebuilding	\$505,174	\$216,667	
	Fee building	861	849	
		<u>\$506,035</u>	<u>\$217,516</u>	

9. Earnings (Loss) Per Share

Basic and diluted earnings (loss) per share for the three years ended December 31, 2013 give effect to the conversion of the Company's members' equity into common stock on January 30, 2013 as though the conversion had occurred as of the beginning of the reporting period or the original date of issuance, if later. The number of shares converted was based on the actual initial public offering price of \$17.00 per share.

The following table sets forth the components used in the computation of basic and diluted earnings (loss) per share (dollars in thousands, except share and per share amounts):

	Year Ended December 31,		
	2013	2012	2011
Numerator:			
Net income (loss)	\$ 15,374	\$ 2,506	\$ (4,593)
Denominator:			
Basic weighted-average shares outstanding	30,775,989	21,597,907	12,681,352
Effect of dilutive shares:			
Unvested restricted stock units ⁽¹⁾	21,613	—	—
Diluted weighted-average shares outstanding	30,797,602	21,597,907	12,681,352
Basic earnings (loss) per share	\$ 0.50	\$ 0.12	\$ (0.36)
Diluted earnings (loss) per share ⁽¹⁾	\$ 0.50	\$ 0.12	\$ (0.36)

- (1) For the year ended December 31, 2013, no stock options were included in the diluted earnings per share calculation as the effect of their inclusion would be antidilutive. There were no outstanding options or non-vested shares in 2012 or 2011.

10. Income Taxes

As discussed in Note 1, in prior years and for the first 30 calendar days of 2013, the Company was a Delaware limited liability company which was treated as partnership for income tax purposes and was subject to certain minimal taxes and fees; however, income taxes on taxable income or losses realized by the Company were the obligation of the members.

The (provision) benefit for income taxes includes the following (in thousands):

	Year Ended December 31, 2013
Current (provision) benefit for income taxes:	
Federal	\$(11,967)
State	(3,023)
Total	(14,990)
Deferred (provision) benefit for income taxes:	
Federal	3,840
State	771
Total	4,611
Provision for income taxes	\$(10,379)

The effective tax rate differs from the federal statutory rate of 35% due to the following items (in thousands):

	Year Ended December 31, 2013
Income before income taxes	<u>\$ 25,753</u>
Provision for income taxes at federal statutory rate	\$ (9,014)
(Increases) decreases in tax resulting from:	
State income taxes, net of federal benefit	(1,464)
Permanent differences	(552)
Deferred tax assets upon conversion to a corporation	590
Other	<u>61</u>
Provision for income taxes	<u>\$(10,379)</u>
Effective tax rate	<u>(40)%</u>

The Company accounts for income taxes in accordance with ASC 740, *Income Taxes* (“ASC 740”), which requires an asset and liability approach for measuring deferred taxes based on temporary differences between the financial statements and tax bases of assets and liabilities existing at each balance sheet date using enacted tax rates for the years in which taxes are expected to be paid or recovered. The components of our deferred income tax asset are as follows (in thousands):

	December 31, 2013
State tax	\$1,058
Warranty reserves	1,360
Transaction expenses	1,466
Share based compensation	571
Other	<u>156</u>
Total deferred tax asset	<u>\$4,611</u>

Each quarter we assess our deferred tax asset to determine whether all or any portion of the asset is more likely than not unrealizable under ASC 740. We are required to establish a valuation allowance for any portion of the asset we conclude is more likely than not to be unrealizable. Our assessment considers, among other things, the nature, frequency and severity of our current and cumulative losses, forecasts of our future taxable income, the duration of statutory carryforward periods and tax planning alternatives.

As of December 31, 2013, we had \$4.6 million in deferred tax assets with no valuation allowance. The Company will continue to evaluate both positive and negative evidence in determining the need for a valuation allowance against its deferred tax assets. Changes in positive and negative evidence, including differences between the Company’s future operating results and the estimates utilized in the determination of the valuation allowance, could result in changes in the Company’s estimate of the valuation allowance against its deferred tax assets. The accounting for deferred taxes is based upon estimates of future results. Differences between the anticipated and actual outcomes of these future results could have a material impact on the Company’s consolidated results of operations or financial position. Also, changes in existing federal and state tax laws and tax rates could affect future tax results and the valuation allowance against the Company’s deferred tax assets.

The Company classifies any interest and penalties related to income taxes assessed by jurisdiction as part of income tax expense. The Company has concluded that there were no significant uncertain tax positions requiring recognition in its financial statements, nor has the Company been assessed interest or penalties by any major tax

jurisdictions related to the first 30 calendar days of 2013 or prior years. As of December 31, 2013, the earliest tax year still subject to examination by the Internal Revenue Service is 2010. The earliest year still subject to examination by a significant state or local taxing jurisdiction is 2010.

11. Related Party Transactions

In March 2011 and December 2012, TRI Pointe (through its predecessor in interest, TPH LLC) acquired 62 lots and 25 lots, respectively, in the Rosedale master planned community located in Azusa, California, for a purchase price of approximately \$6.5 million and \$3.5 million (plus a potential profit participation should a specific net margin be exceeded), respectively, from an entity in which an affiliate of the Starwood Capital Group owns a minority interest.

In December 2012, TRI Pointe (through its predecessor in interest, TPH LLC) acquired 57 lots out of a total commitment of 149 lots located in Castle Rock, Colorado, for a purchase price of approximately \$3.2 million from an entity managed by an affiliate of the Starwood Capital Group. TRI Pointe has the right to acquire the remaining 92 entitled lots for a purchase price of approximately \$5.4 million.

In March 2013, TRI Pointe acquired an additional 66 lots in the Rosedale master planned community located in Azusa, California, for a purchase price of approximately \$15.7 million (plus a potential profit participation should a specific net margin be exceeded) from an entity in which an affiliate of the Starwood Capital Group owns a minority interest. This acquisition was approved by TRI Pointe independent directors.

In September 2013, TRI Pointe acquired 87 lots located in the master planned community of Sycamore Creek in Riverside, CA, for a purchase price of approximately \$11.8 million, and 49 lots located in the community of Topazridge, also located in Riverside, CA, for a purchase price of approximately \$6 million. These lots were purchased from entities managed by an affiliate of the Starwood Capital Group. This acquisition was approved by TRI Pointe independent directors.

In December 2013, TRI Pointe acquired 67 lots located in Castle Rock, Colorado, for a purchase price of approximately \$3.8 million from an entity managed by an affiliate of the Starwood Capital Group. This acquisition was approved by TRI Pointe independent directors.

The Starwood Capital Group (through its affiliate the Starwood Fund) owns 11,985,905 shares of our common stock, which represents 37.9% of our common stock as of February 21, 2014. Additionally, Barry Sternlicht, the Chairman and Chief Executive Officer of Starwood Capital Group, is also chairman of our board.

12. Results of Quarterly Operations (Unaudited)

The following table presents our unaudited quarterly financial data. In our opinion, this information has been prepared on a basis consistent with that of our audited consolidated financial statements and all necessary material adjustments, consisting of normal recurring accruals and adjustments, have been included to present fairly the unaudited quarterly financial data. Our quarterly results of operations for these periods are not necessarily indicative of future results of operations (in thousands, except per share amounts):

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>
2013				
Total revenues	\$ 27,888	\$ 51,087	\$ 58,539	\$120,441
Cost of homes sales and fee building	(23,074)	(41,713)	(45,340)	(92,747)
Gross margin	<u>\$ 4,814</u>	<u>\$ 9,374</u>	<u>\$ 13,199</u>	<u>\$ 27,694</u>
Net income	\$ 270	\$ 2,075	\$ 4,686	\$ 8,343
Basic earnings per share (1)	\$ 0.01	\$ 0.07	\$ 0.15	\$ 0.26
Diluted earnings per share (1)	\$ 0.01	\$ 0.07	\$ 0.15	\$ 0.26

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>
2012				
Total revenues	\$ 4,653	\$ 7,808	\$ 10,060	\$ 56,029
Cost of homes sales and fee building	(4,137)	(6,853)	(8,879)	(44,743)
Gross margin	<u>\$ 516</u>	<u>\$ 955</u>	<u>\$ 1,181</u>	<u>\$ 11,286</u>
Net income (loss)	\$ (1,143)	\$ (1,317)	\$ (1,480)	\$ 6,446
Basic earnings per share (1)	\$ (0.09)	\$ (0.09)	\$ (0.10)	\$ 0.30
Diluted earnings per share (1)	\$ (0.09)	\$ (0.09)	\$ (0.10)	\$ 0.30

- (1) Some amounts do not add to our full year results presented on our consolidated statement of operations due to rounding differences in quarterly and annual weighted average share calculations.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
